# Technology Service Change Requests September 20, 2017

**Technology Service Change Requests**  
September 4, 2017

The support staff in the offices of Academic Technology Services, the Faculty Center for Ignatian Pedagogy, and the Office for Online Learning request your review, approval, and support for three separate technology changes we believe will provide Loyola students, faculty, and staff a better experience while making for more efficient use of Loyola's technology, teaching, and learning support resources. We request:

- Increase the Sakai retention practice from 18 months to 2 years for Sakai course and project site data
- Elimination of the Kaltura system as a video repository service (replace with Panopto)
- Elimination of Adobe Connect as an online classroom and webinar service (replace with Zoom)

Empowering these three changes over the current academic year will save the University approximately \$3,000 in software maintenance annually beginning in FY19 (see table below), better streamline support services, and provide for an overall better experience with technology in the teaching and learning environment. Furthermore, making these changes over the current academic year will make for a more seamless transition for those students, faculty, and staff who currently use the technologies we are requesting for removal.

Academic Technologies	FY18 Operating	FY18 Capital	New FY18 Capital	FY19 Operating	Notes
Kaltura System	\$ 55,000	\$ -	\$ -	\$ -	Eliminate in FY19
Adobe Connect System	\$ 28,000	\$ -	\$ -	\$ -	Eliminate in FY19
Panopto System	\$ 88,000	\$ -	\$ -	\$ 88,000	Retain in FY19
Zoom System	\$ 50,000	\$ -	\$ -	\$ 50,000	Retain in FY19
Sakai System	\$ 108,000	\$ -	\$ -	\$ 108,000	Retain in FY19
Eliminate Kaltura Content to Panopto	\$ 3,000	\$ -	\$ -	\$ -	One Time Expense for Transition
Quintara Online Survey Software Platform	\$ -	\$ 44,500	\$ 0	\$ 44,500	Eliminate of Kaltura and Adobe Connect to Replace FY18 Capital Request (\$82.5K)
ITS System to Replace Quiltboard Functions	\$ -	\$ 38,000	\$ 0	\$ 38,000	2% Savings in Operating Operating Expenses While Adding New Technologies and Withdrawing \$82.5K from FY18 Capital Request
<b>Totals</b>	<b>\$ 334,000</b>	<b>\$ 82,500</b>	<b>\$ 0</b>	<b>\$ 328,500</b>	

We've provided three separate documents for each of these requests. The documents provide more data, background, and detail around the requests. In short we ask you to:

- Support the move to a 2-year retention practice for Sakai course and project sites. The Sakai database continues to grow and much of the data is no longer used. Instituting a 2-year retention practice will make for a more predictable service for faculty and students, providing an efficient and better performing Sakai environment, and help the University avoid additional Sakai storage costs beginning as early as June 2018.
- Support the elimination of Kaltura as an internal video repository and distribution service at Loyola. Kaltura has become a redundant service, is not well-supported by the vendor, and is used by only 7% of the Loyola community who produce videos. Removal of Kaltura will save the University \$55,000 in annual maintenance fees.
- Support the elimination of Adobe Connect as a webinar and online classroom service. While providing a much needed service for webinars and online classrooms over the last seven years, Adobe Connect has been challenging to use for Loyola's faculty, students, and staff. The Zoom video-conferencing technology has emerged as an easy to use, reliable, and viable webinar and online classroom technology. Transitioning from Adobe Connect to Zoom over the next year will save the University over \$28,000 in annual software maintenance, eliminate some services and storage in LUC's data center, and make for better support of online classrooms using Zoom. Most notably, 24-hour support is provided for the Zoom service, which is something that has been requested by the LUC's professional schools over the last few years.

Kristen Dalton, Sarah Kantner, Nick Liberatore, Bruce Montes, Tim Walker (Academic Technology Services)  
Terry Moy, Carol Schedenhelm (Faculty Center for Ignatian Pedagogy)  
Sarah Dyson (Office for Online Learning)

## Management System (Sakai) and Retention Practices

**Foundations**  
Learning management system is in need of review and cleanup. The Office of Online Learning and Academic Technology is to carry out a two-year data retention policy in the Sakai system.

**High Longlight**, a technology service provider to host and support all of Loyola's Sakai sites, is entering its second 3-year agreement. In July of 2016, Loyola entered its second 3-year agreement with High Longlight. Loyola has four terabytes (TB) of data storage to host all content. High Longlight backs up the content daily and retains the backup for 30 days. The backup process is to recover from system level failure. The current strategy ensures that no data greater than 24 hours of a corrupted individual course site. There are three course sites per year and cost Loyola \$200 to \$300 per occurrence.

Five and project sites comprising 3.1 terabytes of storage, 78% of all staff use Sakai and the database is growing by 10,000 sites and its current growth rate. Loyola will exceed the 4-terabyte threshold in 2018. Loyola can purchase additional storage at a rate of \$1.00 per GB per month.

Added. Project sites are deleted by Sakai administrators upon an Blackboard to Sakai in 2013 courses less than 18 months old. Deleted by faculty. It has been the strategy to manage an actual deletion process has not been strictly enforced over the years and 5% are project sites. Course sites are 61 megabytes (MB) on sites in size. There are over 5,000 instructors referenced in the database have one course site associated with their ID. 40% of the 5,000 to 24 course sites, and 14% of the instructors have over 25 sites.

Sakai has not been used in the past year. Forty percent (40%) of sites are inactive (98% of Sakai sites have not been used in over thirty-nine (39%) of the storage hasn't been accessed in over two years been accessed in over three years. On average, Sakai sites are not very. Many faculty who regularly use Sakai may have three or four sites which accounts for a measurable storage build-up. Expanding which builds over the years.

September 1, 2017

## The Kaltura System (Loyola Media) Repository and Distribution Services

**Foundations**  
Video services at Loyola are currently provided by both the Panopto system and the Kaltura system. The functionality of these systems has decreased, and eliminating one of these redundant services will allow the University to save money and support its video and audio files. Support personnel in Academic Technology Services, the Faculty Center for Ignatian Pedagogy, and the Office for Online Learning request your review, approval, and support for the elimination of Kaltura as a video repository service at Loyola. The storage, delivery, and management of Loyola's video content is currently provided by the Kaltura system. The storage, delivery, and management of Loyola's video content is currently provided by the Kaltura system. The storage, delivery, and management of Loyola's video content is currently provided by the Kaltura system.

Internal distribution solution since 2014. It would require faculty to have video created already in the repository accounting for 3.4TB of data stored in the repository.

September 1, 2017

# Proposed...

- **Changes**

1. Enforce a Two-Year Retention Practice for Sakai Course and Project Site Data (*was 18-months*)
2. Eliminate Kaltura System as a Video Repository Service (*use Panopto as a Replacement*)
3. Eliminate Adobe Connect as an Online Classroom and Webinar Service (*use Zoom as a Replacement*)

- **Timing**

- Complete Changes Over the Course of the Current Academic Year:
  1. Allow Faculty to Plan for Transition
  2. Lessen the Impact on LUC Community
  3. Align to Budget Cycles

September 2017

# Proposed...

- **Financial Impact**

1. Save 2% in Ongoing Annual Maintenance
2. Fund New Technology Requests While Reducing FY'18 Capital Request by \$82.5K
3. Avoid Additional \$3K in FY'18 Storage Expenses

Academic Technologies	FY '18 Operating	FY'18 Capital	New FY'18 Capital	FY'19 Operating	Notes
Kaltura System	\$ 55,000	\$ -	\$ -	\$ -	Eliminate in FY'19
Adobe Connect System	\$ 28,000	\$ -	\$ -	\$ -	Eliminate in FY'19
Panopto System	\$ 88,000	\$ -	\$ -	\$ 88,000	Retain in FY'19
Zoom System	\$ 50,000	\$ -	\$ -	\$ 50,000	Retain in FY'19
Sakai System	\$ 108,000	\$ -	\$ -	\$ 108,000	Retain in FY'19
Move Kaltura Content to Panopto	\$ 5,000	\$ -	\$ -	\$ -	One-Time Expense for Transition
Qualtrics: Online Survey Software Platform	\$ -	\$ 44,500	\$ 0.00	\$ 44,500	<i>Earmark Savings from Elimination of Kaltura and Adobe Connect to Replace FY'18 Capital Requests (\$82.5K)</i>
IVR System to Replace Switchboard Functions	\$ -	\$ 38,000	\$ 0.00	\$ 38,000	
<b>Totals</b>	<b>\$ 334,000</b>	<b>\$ 82,500</b>	<b>\$ 0.00</b>	<b>\$ 328,500</b>	2% Savings in Ongoing Operating Expenses While Adding New Technologies and Withdrawing \$82.5K from FY'18 Capital Request

September 2017

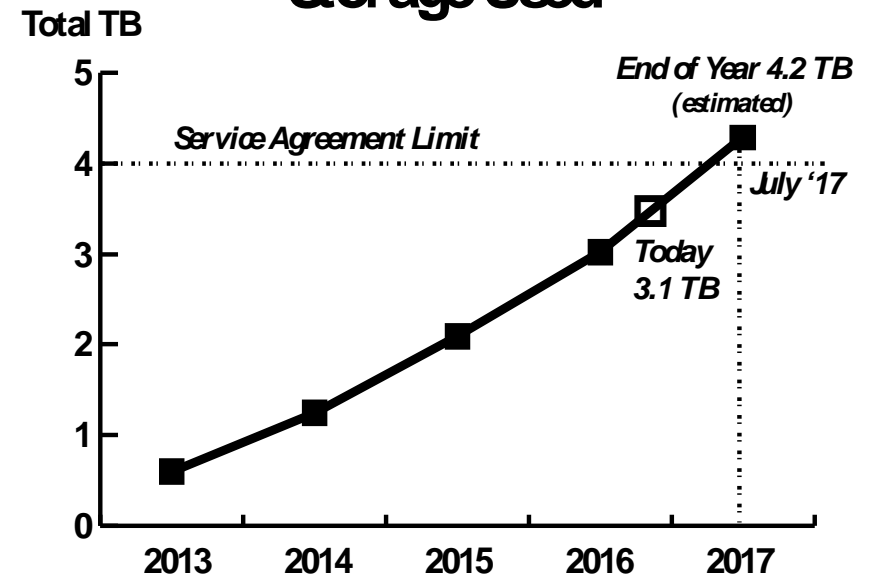

# Employ a Two-Year Retention Practice for Sakai Course and Project Site Data

- Clean-up Unused Data
- Provide Better Defined and Efficient Services in the Learning Management System (LMS)
- Avoid \$3,000 in Additional Annual Expenses in Storage Costs in 2018  
*(current Sakai Maintenance is \$108K annually)*

## Allocation of Storage

## Storage Used

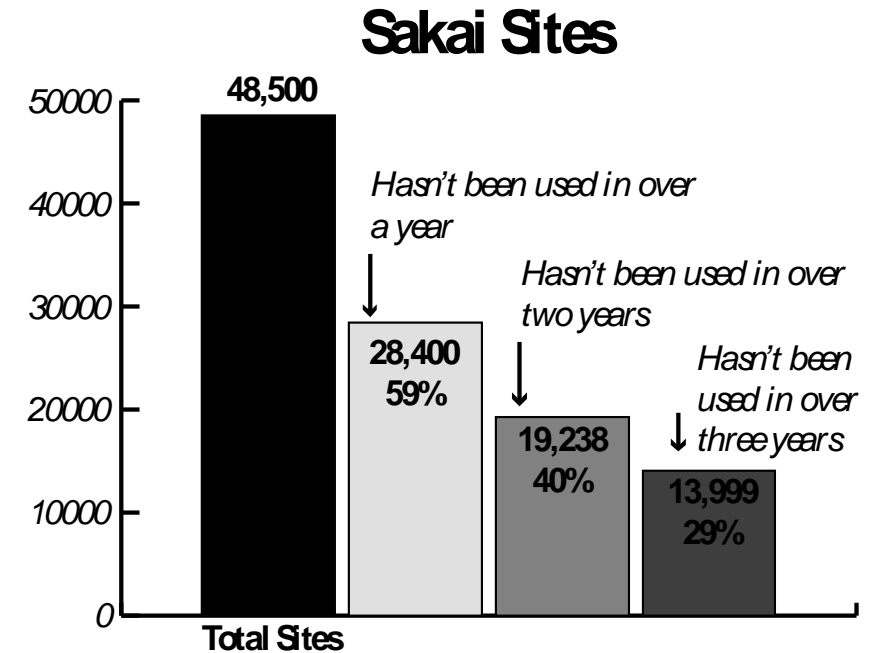

September 2017

# Employ a Two-Year Retention Practice for Sakai Course and Project Site Data

- 40% of Sites Have Not Been Used in Over Two Years
- Growing by 1-TB Per Year – Avoid Additional Expenses
- Provide Faculty Nine Month Notice
  - Identify Semester Break as “Clean-Up” Month as an Opportunity to Market, Advertise, and Plan for Change
  - Encourage Content Review, Clean-up, and Assistance
- Better Align Student Data With ID\Email Policies

September 2017

# Eliminate Kaltura System as a Video Repository Service

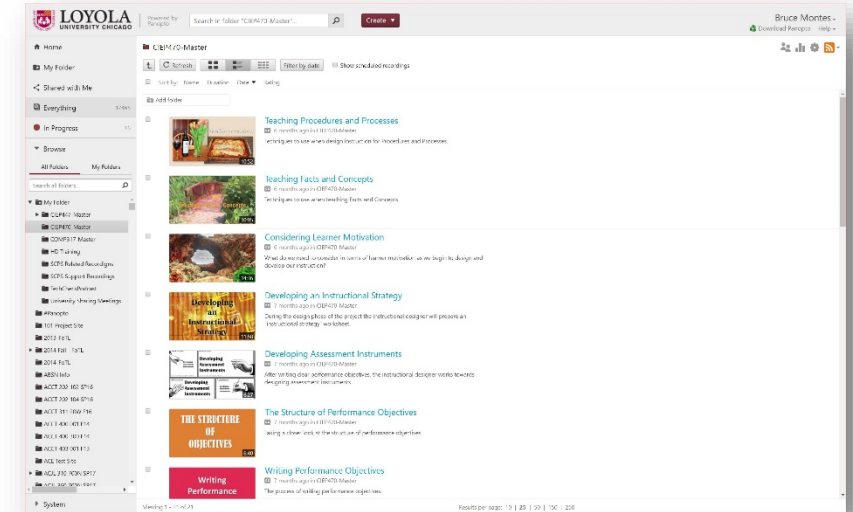

- Remove a Redundant Service
- Panopto Can Now Meet and Exceed Current Services (*current Panopto Maintenance is \$88K annually*)
- Cease Business With a Non-Value Add Business Partner
- “Right Fit” Video Services at Loyola
- Save \$55,000 in Annual Maintenance Expenses

## Locations of LUC Video Recordings

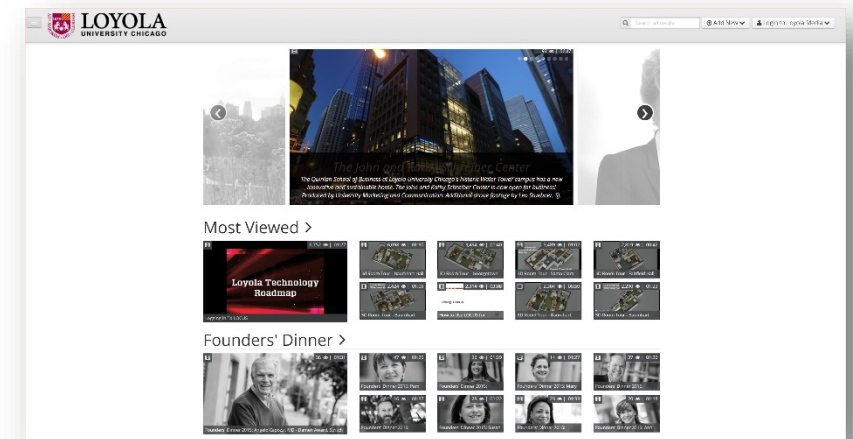

# Eliminate Kaltura System as a Video Repository Service

- 13 Individuals Account for Over 70% All Entries in Kaltura
- Modern Languages Accounts for 34% of the Items in Kaltura (audio files)
- Panopto is More broadly Used and Adopted and Can Fully Support Kaltura Functions
- With Transition
  1. Content Remains Same – Moves to Panopto and Links Updated
  2. For a one-time Fee (\$5K) Panopto Will Migrate Content for LUC

Panopto  
Kaltura

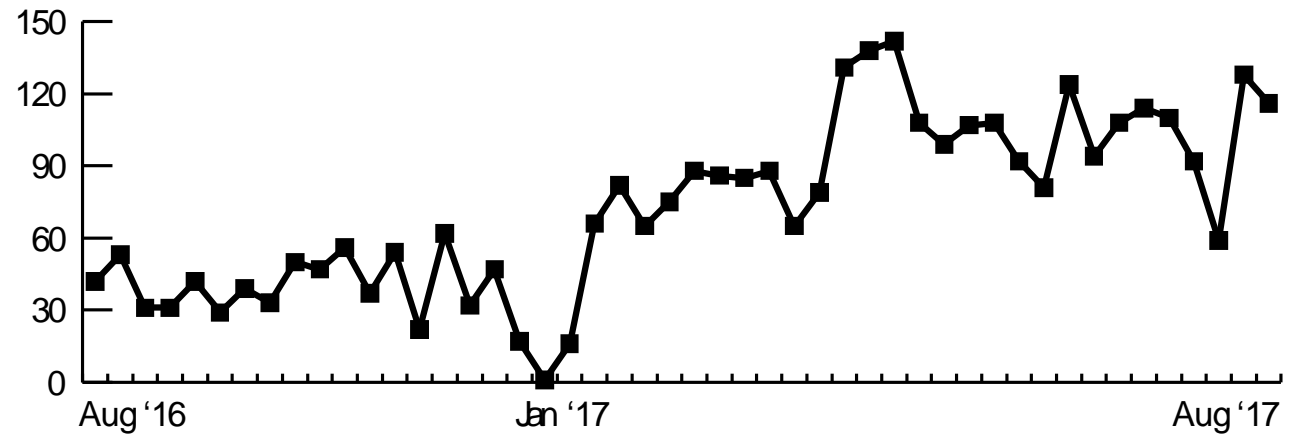

September 2017

# Eliminate Adobe Connect as an Online Classroom and Webinar Service

- Consolidate Video Conferencing, Webinar, and Online Classroom Technologies to “Best Fit”
- Replace With Existing Zoom Service
- Make for a Better Online Experience for Loyola’s Students, Faculty, and Staff
- Save \$28,000 in Annual Maintenance Expenses

Zoom Meetings Each Week

Zoom Meeting Minutes Each Week

# Eliminate Adobe Connect as an Online Classroom and Webinar Service

- Professional Schools (Law, QSOB, SCPS, Nursing) Account for 43% of Adobe Connect Use
- Targeted Campaign With These Schools to Help With Transition (*Use Zoom in Spring*)
- Faculty Have Expressed Continued Frustration With Adobe Connect
- Limited Licensing

*“Switching to Zoom for my summer online course was such a great decision due to the increased functionality for student-to-student interaction in Zoom, I will never go back to Adobe Connect for synchronous sessions.”* -

Patrick Daubenmire, Associate Professor, Chemistry Undergraduate Program Director

Top Departments with Recordings in Adobe Connect	Hours	Days	Percent
School of Business	4,098	171	38%
Computer Science	2,978	124	28%
Faculty Center for Ignation Pedagogy	1,909	80	18%
School of Continuing and Professional Studies	773	32	7%
Chemistry	527	22	5%
Bioethics	524	22	5%
<b>Totals for Top Six Departments With Recordings</b>	<b>10,810</b>	<b>450</b>	<b>92%</b>
<b>Total Recordings in Adobe Connect Database</b>	<b>11,748</b>		

## Zoom...

- Is Easier to Use
- Is Better Performing
- Offers 24-Hour End User Support
- Can Support Adobe Connect Functionality

September 2017

# Proposed Schedule...

October  
'17 –  
Dec '17

- Work with Committees
- Work with Individuals
- “Sakai Clean-Up” Month Dec

January-  
May '18

- Delete Content
- Migrate Content
- Transition Remaining Individuals to New Systems
- “Shift to Zoom” Semester

May'18 -  
June '18

- Execute Archive Practices
- Sunset Kaltura
- Sunset Adobe Connect

September 2017

# Academic Technology Service Change Requests

August 2017

# Agenda

---

## Business Intelligence Subcommittee

- S. Malisch

## Change Management for Academic Technologies

- B. Montes

## Student System Upgrade

- K. Smith

## Mobile Device Strategy

- D. Vonder Heide, J. Sibenaller

# Student System Upgrade Project Overview

- Move from Oracle Campus Solutions (CS) 9.0 to Oracle CS 9.2
  - Requisite component upgrades
  - Work began July 2016
  - Target go-live December 2017 (Final Date TBD)
- Phased Approach
  - Technical Changes First
  - Functional Improvements

# Project Objectives

---

- Stay current with Campus Solutions (CS) and People Tools (PT) software versions to receive support from Oracle. (Extended support for CS 9.0 will end December 2019)
- Enables implementation of added functional and technology features.
  - PUM (PeopleSoft Update Manager) New selective adoption of new features vs. applying mandatory, incremental bundles updates.
  - Support for new user interface (i.e. FLUID) Navigation and Pages

# Why Do We Care?

---

- Selective Adoption of New Functionality and Regulatory Changes, Enabling Reduced Maintenance Timeframe
- Enables Up-to-date Self-service Features for Students, Faculty and Staff
  - Mobile Responsive Capability
  - Contemporary Look and Feel
- Retirement of Older Technology (e.g. Crystal Reports)

# Scope

---

- **Phase I (Primarily technical)**
  - Complete Pre-requisite Projects
    - Oracle, Application, Development Tools, Portal
  - Upgrade LOCUS Student Information System
  - Functional Testing
- **Phase II (Begins After Phase I Functional Testing)**
  - Added Flexibility and Adaptable User Interface and Navigation
  - New Business Process for Selective Adoption
  - Review of Current LUC Customizations  
(e.g. LUC Parent Guest to Oracle New Delegated Access)

# Upgrade Project Team

## Project Team Members

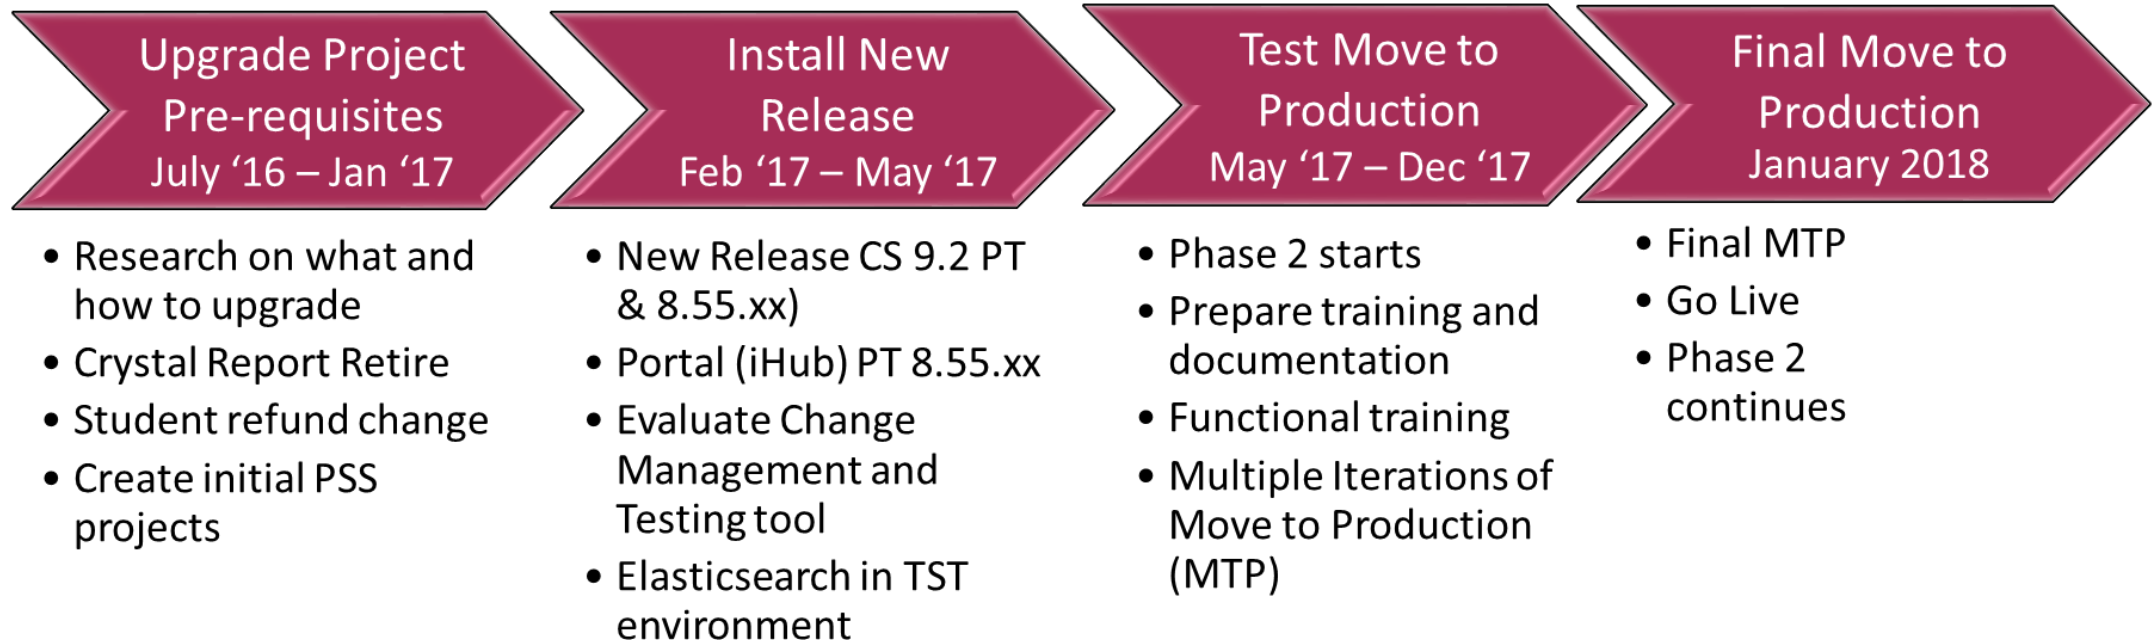

Team / Area	Functional Lead	Technical Lead
Admissions - Undergraduate	Timothy Carroll	Michael Martin
Bursar	Thomas Catania	Dave Kessler, John McGivney
Enrollment Systems Research & Reporting	Tim Heuer, Lisa Gierich	Caroline Mwangi, Ivan Siap
Graduate Enrollment Management	Ronald Martin	Michael Martin
Financial Aid	Tobyn Friar	Caroline Mwangi, Ivan Siap
Registration and Records	Clare Korinek, Diane Hullinger	Xiomara Franco, Mark Reich
Registration and Records – Academic Advisement	Shannon Levi	Xiomara Franco, Greg Biskoski
Registration and Records – Campus Community	Kris Daggett	Dave Kessler, John McGivney
Registration and Records – Class Scheduling	Stacey Lind	Ivan Siap, Xiomara Franco
Registration and Records – Transfer Credit	Thomas Stahnke, Joyce Norwood	Greg Biskoski, Mark Reich
Student Financials	Rebecca Gomez	Dave Kessler, John McGivney
Project Management Team	Dave Kessler, Maria Muñoz, Xiomara Franco	

## Leadership Team Members

Organization	Organizational Member
Executive Sponsor	John Pelissero (Provost), David Prasse (Vice Provost), Jo Beth D'Agostino (Vice Provost)
Chief Information Officer	Susan Malisch (ITS)
Director	Clare Korinek (Registration and Records), Kevin Smith (ITS)
ITS Management	Charlotte Pullen (Database & Middleware), Larry Adams (App Dev)
R&R Management	Diane Hullinger, Kris Daggett

# Project Schedule – Phase 1 (Technical)

---

# Upgrade Phases

---

## Initial Pass – one time process

The initial pass is defined as the process of merging your existing production database with the new release software. In the process you preserve and reapply existing customizations made to delivered objects.

## Test Move(s) to Production – repeated as necessary

The test move(s) to production are defined as the process of merging the data from a new copy of your existing production database with the new initial pass database software which now includes customizations.

## Final Move to Production - one time process

The final move to production includes freezing the production database of any further enhancements. At this time you merge your data from the production database with the software from the latest test move to production.

# Constraints / Risks

- Acclimating Project Schedule Across All Involved Departments
- Concurrent Projects, Maintenance, and Support
- Aggressive Project Schedule
- Transactional Systems (LOCUS and Subsidiary Systems) will be unavailable during the actual cutover (max of 4 days)
- Limited Implementation Windows Due to:
  - Registration
  - Start of School
  - FA Packaging
  - Billing
  - Etc.

# What's Coming?

---

Phase II

Based on review of your Free Application for Federal Student Aid you have been awarded the listed aid. It is intended to help you fill the gap between your ability to pay, your expected family contribution or EFC, and college costs, or the cost of attendance or COA. Additional loan funding may be available, contact the Financial Aid Office for more information. [Show more](#)

# Mobile Device Strategy

## Introduction -

- Fall 2016 - Internal Audit reviewed the design of Loyola's mobile device governance processes across four areas:
  - Policies/People
  - Data
  - Apps/Websites
  - Devices
- Evaluated against maturity model modified for Higher Education
  - Capability Maturity Model Integration (CMMI)

Maturity Level	Maturity Model Criteria
0 - Non-existent	Systems and processes do not exist for the area.
1 - Initial	Basic systems exist that may meet institutional requirements, if defined, but processes for the area are not documented and are often executed in an ad hoc or inconsistent manner.
2 - Repeatable	Systems exist that meet institutional requirements, where defined, and the supporting processes for the area are repeatable, possibly with consistent results. They are executed and managed by appropriate personnel according to their documented plans, where plans exist.
3 - Defined	Systems exist that meet defined institutional requirements to achieve objectives and goals. The supporting processes are executed for all aspects of the area as defined, documented, and communicated.
4 - Managed	Management uses defined metrics to monitor and control the systems and processes in the area. Management can identify ways to adjust and adapt the systems and processes for increased efficiency without measurable losses of quality or deviations from specifications.  <i>[Note: This level is likely the highest maturity an institution will strive for in a given area, and often only when able to cost effectively automate many aspects of the area.]</i>
5 - Optimizing	The systems and processes that enable the area are continually improved upon through both incremental and innovative advancement. The organization adopts leading edge practices.  <i>[Note: This level requires substantial resources (e.g., people, processes, technology) and likely may not be appropriate for most areas based on an institution's own cost benefit analysis.]</i>

# Summary Audit Findings

	Areas / Components	Observed Current State	Recommended Goal State
	<b>Area: Policies/People</b>		
✘	1. Mobile device strategy	1 – Initial	3 – Defined
✔	2. Device procurement and disposal	1 – Initial	2 – Repeatable
✔	3. Acceptable use agreement	2 – Repeatable	3 – Defined
✘	4. Training and awareness	1 – Initial	3 – Defined
	<b>Area: Data</b>		
✔	5. Data classification	3 – Defined	3 – Defined
✔	6. Data storage and handling	2 – Repeatable	3 – Defined
✔	7. Authentication and encryption	2 – Repeatable	2 – Repeatable
✔	8. Incident response	3 – Defined	3 – Defined
	<b>Area: Apps/Websites</b>		
✔	9. Mobile apps	2 – Repeatable	2 – Repeatable
✔	10. Web applications	2 – Repeatable	2 – Repeatable
✔	11. Remote access	3 – Defined	3 – Defined
✔	12. Encryption	3 – Defined	3 – Defined
	<b>Area: Devices</b>		
✘	13. Inventory	1 – Initial	2 – Repeatable
✘	14. Security standards	0 – Non-existent	3 – Defined
✘	15. Technical controls	1 – Initial	3 – Defined
✔	16. Support	2 – Repeatable	2 – Repeatable

# Early Effort

---

- Engaged Gartner GTP
- Queried AJCU Schools
- Attended Catalyst Conference
- Began drafting our strategy

# Mobile Device Strategy

---

# Mobile Device Strategy

---

Mobile Device Strategy	Develop plan and execute a University-wide mobile device strategy to improve a shared understanding of mobile governance processes and needs.
Security Standards	Improved protection and reduced risks for mobile devices containing Loyola protected and sensitive data through the adoption of security standards for mobile devices.
Technical Controls	Expansion of technical controls with the assessment of adding a mobile device management system to better coordinate and process the provisioning and de-provisioning of mobile devices.
Inventory Tracking	Expansion of inventory tracking for mobile devices to more efficiently monitor and identify mobile devices and their owners on university networks.
Training and Awareness	Creation of training and awareness materials for mobile device usage.
Analytics and Metrics	Improved analytics and metrics related to mobile devices.
Internal Audit	Internal Audit reassessment

# Mobile Device Strategy

---

## Mobile Device Strategy

- Best practices research and assessment
- Mobile device strategy documented
- Create a milestone based plan for the mobile strategy deliverables
- Mobile device strategy approved by the ITESC
- Communicate mobile device strategy to the University
- Assemble MCOE
- Define “mobile devices” & support requirements
- BYOD policy & process documented & approved
- University-owned procurement process documented & approved
- Service catalogue requirements documented & approved
- Policy updates: Current Acceptable Use, Information Security & Data Classification

## Security Standards

- Mobile device security standards documented & approved
- Define standards for security configurations for UOD & POD
- Determine technology needs for mobile threat protection

# Mobile Device Strategy

---

## Technical Controls

- Define technical changes/parameters
- Determine technology needs for the management of mobile device
- Implement & enforce technical controls

## Inventory Tracking

- Mobile device inventory tracking template documented & approved
- Process for tracking mobile assets to be documented & approved

# Mobile Device Strategy

---

## Training and Awareness

- ITS Security Practices, Procedures & Training documented, approved, & implemented
- Mobile Device User-Training documented, scheduled & implemented
- Processes in place to triage mobile incidents

## Analytics and Metrics

- Mobile device metrics & monitoring process
- Key performance indicators identified & defined

# Mobile Device Strategy

---

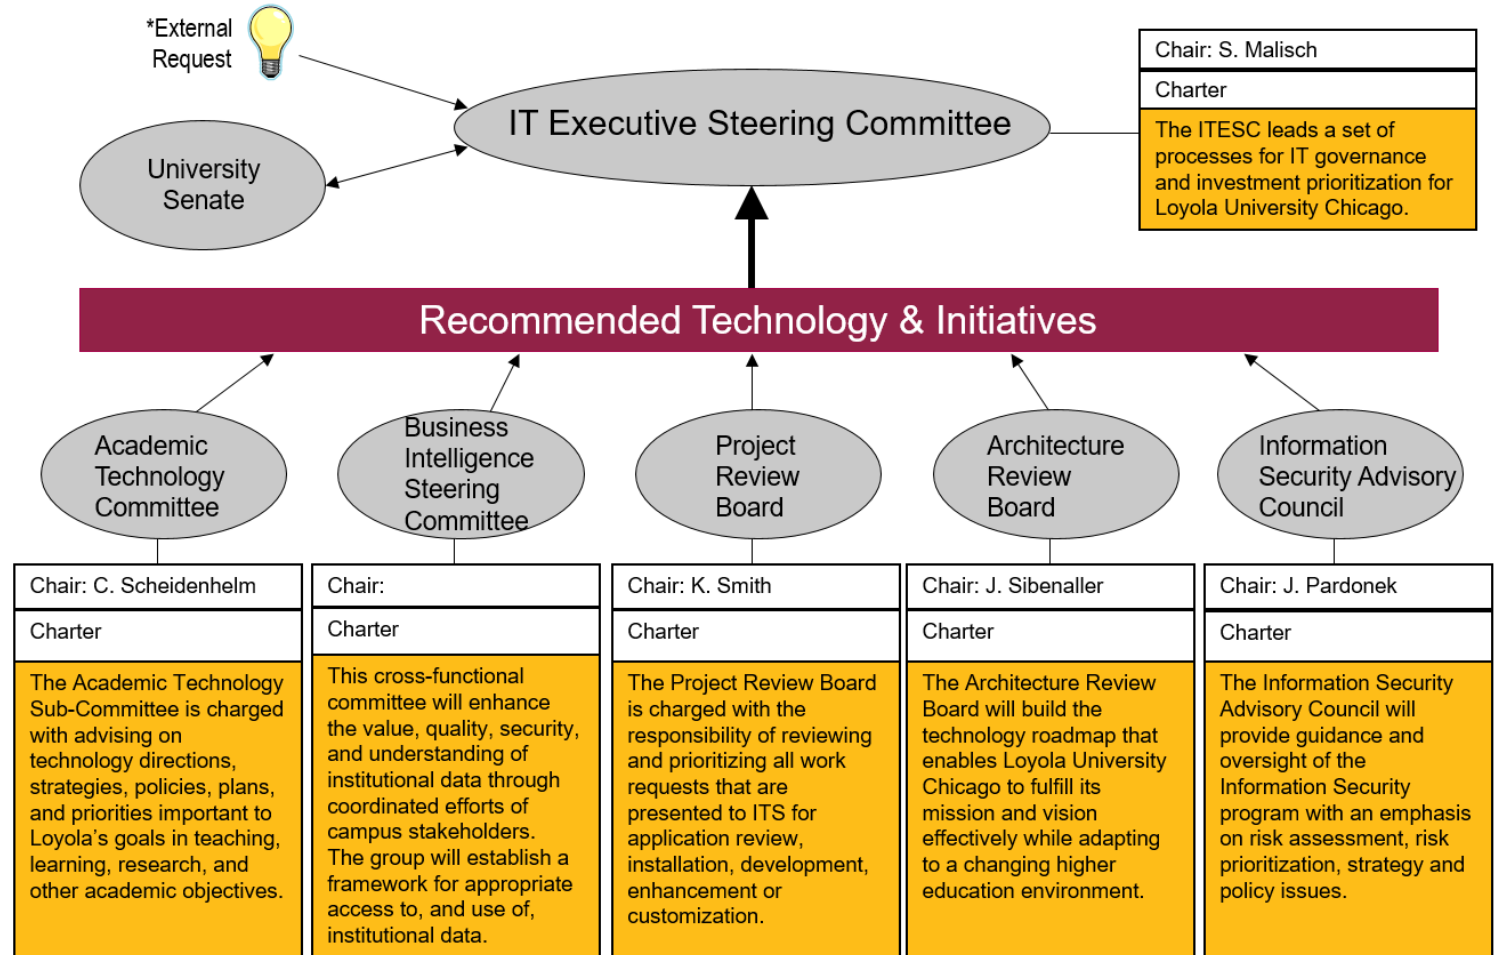

- Baker Tilly reassessment of Loyola's mobile device governance posture

# Governance

- Utilize the existing ITESC & Subcommittee governance processes
- The MCOE will be a working group under the Architecture Review Board
- All recommendations will come to the ITESC for approval

## ITESC Structure & Inputs

# Mobile Device Strategy – Timeline

---

# Next Steps

---

- Consensus on governance
- Approval to proceed with the execution of the strategy
- Suggestions for representation on the Mobile Center of Excellence

# 2017 ITESC Schedule

---

## **January 26, 2017 - Thursday, 1:30-3:30 PM**

- Project Portfolio Prioritization Results
- Status Updates – Major Upgrades
  - Student System, Phone System, Advance, Document Mgmt

## **May 04, 2017 - Thursday, 1:30-3:30 PM**

- Project Portfolio Prioritization
- Summer Project: 10Gb Connectivity/NGFW
- Academic Year 2017-18 Project: Box to OneDrive
- Information Security Training

## **June 15, 2017 - Thursday, 1:30-3:30 PM**

- Event Management Solution
- Project Portfolio Prioritization
- Information Security Training Proposal

## **September 20, 2017 – Wednesday 1:30-3:30 PM**

- Business Intelligence Subcommittee
- Change Management for Academic Technologies
- Student System Upgrade
- Mobile Device Strategy

## **October 26, 2017 - Thursday, 1:30-3:30 PM**

## **December 12, 2017 - Tuesday, 1:30-3:30 PM**

- Project Portfolio Prioritization
