

# It's Time to Unplug!

## ↓ Pledge to Unplug!

- TV sets, DVD players, cable boxes and other home entertainment peripherals emit up to **1,608 lbs per year of CO<sub>2</sub>** while turned on due to clocks, “standby” mode. Plug them into a power strip & turn off when not in use to save 240 lbs.

- A computer can emit 497 lbs of CO<sub>2</sub> when plugged in; do the same – plug into a power strip, turn off & save 43 lbs per year.
