

WORKING WITH FILES

Welcome to Blackboard, Loyola's online course management system. Instructors at Loyola use Blackboard as an electronic extension of their classes. They may use it to post their syllabi, handouts, assignments, quizzes and tests, and grades on the Web. They might also conduct class discussions or virtual office hours through Blackboard. To access the Blackboard portions of your courses and to download your course materials, login to the Blackboard web site at <http://blackboard.luc.edu>. It is available 24 hours a day from any computer connected to the Internet.

Opening a File

Your instructors post course materials to Blackboard as electronic files. They can post files of almost any type, including files created in Word, WordPerfect, PowerPoint, Excel, or Adobe Acrobat.

1. To open a document, locate the file you wish to open and click on the blue underlined link, which is usually the name of the document.

2. The document should open automatically. If not, you will be prompted to open or save the file. Clicking **Open** allows the document to be viewed directly in your browser.

NOTE: You must have either the program the document was created in (e.g. Microsoft Word) installed on your computer or the compatible viewer to be able to view the document in your browser. If the file is Microsoft Word, Excel, or PowerPoint, and you do not own MS Office, you can download a free viewer that will allow you to open, print, and download documents, but not edit. It is a good idea to install the most recent versions of Flash, Quicktime, Windows Media Player, and Adobe Acrobat Reader to view .pdf and any media files your instructor may have made available. For a full list of important plug-ins, players, and viewers you might want to have installed on your computer, visit: http://www.luc.edu/its/help_blackboard_plug_ins.shtml. The computers in the Loyola computing labs have PowerPoint, Excel, Word, Reader and all the plug-ins already installed.

Open a Document in a New Window

It is often more convenient to have your documents open in a new window. This allows you to more easily close windows and facilitates your navigation in Blackboard.

1. Right click on the link to the document.
2. Select the **Open in New Window** option.
3. The document will then open in a new browser window.

Saving a File

You can save a file your instructor has posted in Blackboard two ways. In a Loyola computing lab, make sure to save your files to a location other than the lab computer's hard drive, e.g., a USB flash drive, because all files will be deleted when you log out.

1. Click the link to the file and choose **Save** or right-click on the file link and click **Save Target As...**

2. When the **Save As** dialog box appears, use the Save in drop down arrow and browse to a place you wish to save the file. For instance, to save the file to the desktop, choose **Desktop**.
3. Click **Save**.

Printing a PowerPoint File

You can print out PowerPoint presentations in a number of layouts; these directions help you print out a layout in notes view.

1. Save the PowerPoint file to the desktop, as described in “Saving a File” above.
2. Open the file from the desktop, as described in “Opening a File” above.
3. Choose **File | Print** from the PowerPoint menu bar.
4. In the **Print** pop-up box, choose **Handouts** under “Print what:”
5. Choose **3** next to “Slides per page:” This layout creates space for notes next to each slide.
6. Click **OK**.

FAQ's:

Why can't I open the linked files?

Remember that you must have the right helper application installed on the computer you are using to access Blackboard (Word, Adobe Reader, PowerPoint) to open and read the files your instructor has posted on Blackboard. If you are certain you have the correct application, make sure your browser is updated. Blackboard works best with Internet Explorer 6, SPI. Visit http://www.luc.edu/its/help_blackboard_plug_ins.shtml for the list of the latest browsers, plugins and viewers you will need to access your documents. If you are using Internet Explorer and are still experiencing trouble, try saving the file to your computer and opening it from your application.

Why does it sometimes take a long time to download files from Blackboard?

There are many factors that affect the time it takes to download files from Blackboard, including varying Internet speeds (home and on campus, dependent on traffic), the health and well-being of the Blackboard server, and the size of the document you are trying to download. A typical Word document is 120KB and takes just a few seconds with a DSL connection. However, a 10 mb audio file would take more than a minute with the same connection. Use this download calculator to estimate how long it should take to download files:

http://www.intel.com/personal/resources/broadband/calculator.htm?iid=ipc+broadband_menu_st

I'm a Mac user. Why can't my instructor and classmates read the files I've uploaded?

The Mac OS does not automatically add extensions to files when they are saved (for example, .doc for Word, .ppt for PowerPoint). If you are uploading documents via assignments or attaching a paper to the discussion board, remember to add the three character file type extension to your Mac file names. This will allow your instructor and classmates to easily read your files.

How do I upload files to Blackboard?

Download the guide “Submitting Assignments” to learn how to submit work via the assignment tool or the digital drop box.

Getting Help

- Contact the Technology Support Center at 4-4444 (on campus) or 773-508-7190 (off campus) from 8:00 am to 5:00 pm, Monday through Friday.
- If you need help using Blackboard features, consult the **Student Manual**. To open the manual, enter any course, click **Tools**, and then click **Student Manual**.
- More Blackboard documentation is available at http://www.luc.edu/its/help_blackboard_doc.shtml
- Send problems, questions, or suggestions to blackboard@luc.edu.
