

Welcome to “ITS Technology Tips,” where we bring you some useful information about the technology here at Loyola and effective ways to use the technology. Remember to visit the weekly [Tech Tips Blog](#) for the latest tips and the [Technology Tips Archive](#), to find all Tech Tips in PDF format, categorized for easy access.

Capture Highlights from the Web with Clipmarks

When surfing the Web, it’s all too common for us to find useful bits and pieces of information that we want to save and possibly share. With [Clipmarks](#), you can easily “clip” the key portions of the websites you visit including text, images and even videos. Instead of bookmarking or emailing entire pages, you can clip only the pieces you would like to save, email, or post to your webpage or blog. With a free Clipmarks account, you can save clips to your own searchable library as well as create a ClipCast slideshow consisting of the Web clippings you’d like to compile and share.

Getting Started

First you’ll need to install the Clipmarks browser extension for Firefox or Internet Explorer: <http://clipmarks.com/install/>. Once you follow the installation instructions, the Clipmarks button will show up in your Web browser’s toolbar.

When you click on the Clipmarks button, you will enter “clip mode” and instructions to clip will appear in your toolbar. You can email and print your clips from your toolbar; however you will need to [set up a free Clipmarks account](#) in order to save your clips, publish to a blog or webpage, or create a ClipCast. Check out the Clipmarks [How-to-clip page](#) for further instructions and helpful information.

That’s our technology tip for this week. Please drop us a line at Training@luc.edu to let us know what you think or to send us topic ideas for future technology tips. If you’d like to go back to our archive of technology tips, please visit us on the Web at <http://www.luc.edu/its/techtips.shtml>.
