Add Panopto to a Sakai Site

To access Panopto through Sakai, you must add the tool to your course or project site. To add the Panopto tool to your site please use the directions outlined in Adding, Removing, & Reordering Sakai Tools.

1. Open your Sakai course and select the Panopto tool on the left-hand side of the page.

2. Panopto will open in a new window. If Panopto does not open, you will have to allow Panopto from your pop-up blocker or select click here to launch.

3. When you add the Panopto tool to your site, a folder for that course will be created in Panopto. When you select the Panopto tool from your site you will be brought to the site folder by default.

   **Note:** Do not hide the Panopto tool in your course, because students need to click on the tool in order to authenticate their account.
