Introducing LUclean

An ITS focus on increasing sustainable practices within printing, cleaning, energy, and recycling…

Did you know that our very own ITS Digital Media Services is leading the way in sustainable initiatives? Sustainable printing services are now available at both the Lakeshore and Water Tower Campuses! This includes a transition to soy-based toners and 100% post-consumer recycled paper. Be sure to look for the pilot printers designated by special signs and encourage students, faculty, and colleagues to print to these machines!

Congratulations Illinois!

We are now ranked number 1 in the top 10 LEED Certified States in the Nation! Loyola continues to contribute to the number of LEED certified buildings within Illinois. For more details on LEED certification, visit http://www.usgbc.org/leed.

Looking to recycle bottles, plastics, batteries, or toner cartridges?
Look no further than right here on our floor! Put your old batteries in one of the buckets in GC 260 or right inside GC 201; old printer toner has a box across from the printers in GC 201; and bottles/plastics can go in the labeled recycle bins across from GC 260.
**Thirsty?**

Check out the Institute of Environmental Sustainability's Interactive Feature Map to locate water stations near you!

**Did You Know?**

*Quick Tips to Go Green!*

**Think Green and Give**

Ready to rid your home of gently used clothing, household items, or unopened food and toiletries that you no longer need?

Loyola University recommends several off-campus donation locations depending on the type of materials you are looking to donate.

**Think Green and Give:**

---

**Composting Update**

Compost contributions from each department are weighed every week. As of the 13-14 school year, **ITS has composted 1,126.5 pounds of waste for a total of 1,376 pounds since October 2012!** We are done composting for the Spring, but will be back at it again soon in the Fall. Be sure to join our efforts by using the paper towel bins in the second floor restrooms, and using the white composting buckets for leftover food!
