OVERVIEW
Loyola's Bachelor of Science in Health Systems Management program is a non-clinical major that explores the structure of health systems, the policy environment, and management of health service organizations. The degree builds on Loyola's excellent liberal arts and health systems programs and integrates a variety of core competencies including finance, quality management, information systems, and ethics. Graduates are prepared for entry level positions in the growing field of health care management or entry into graduate and professional programs such as health systems administration, public health, or law.

CURRICULUM
Students must complete 121 credit hours, including the freshman seminar, university Core, Health Systems Management core courses, electives and an internship. The program is designed so that students may minor in areas such as marketing, bioinformatics or other related areas. For a complete list of courses that fulfill the degree requirements, visit LUC.edu/hsm.

CAREER OPPORTUNITIES
Chicagoland provides extensive career and internship opportunities because it is home to four global health care/pharmaceutical companies, five academic medical centers, two of the nation's largest health systems, health care equipment manufacturers, software companies, numerous community-based health care systems, large physician group practices, long-term care facilities, assisted living, and home-care services. Large insurance companies and health care associations, such as the American Medical Association and the American Hospital Association, are also located in Chicago.

RESOURCES
University life offers many opportunities for participation in on campus clubs and organizations that respond to students' areas of interest. The Health Systems Management Student Council provides opportunities for developing and enhancing leadership and team building skills. In addition, eligible students may be inducted into Upsilon Phi Delta, the National Honor Society for Healthcare Administration. Other health care related activities are included in a number of organizations across campus.
