Loyola University Chicago and the Stritch School of Medicine (SSOM) are pleased to provide a program which allows Loyola’s undergraduate students to be considered for early admission to SSOM. This program is designed to assist students throughout stages of premedical planning by helping to define and broaden their academic interests. Additionally, through a variety of educational opportunities, students will explore and learn more about the medical profession.

Eligibility
Students are required to:

- Be enrolled full time at Loyola University Chicago
- Complete all science courses at Loyola University Chicago
- Have earned a total of 60 credits over the past four consecutive semesters at Loyola (i.e., end of spring term of second year)
- Post a minimum Science Grade Point Average (SGPA) of 3.5 and an overall cumulative Grade Point Average (GPA) above 3.5 with no grade lower than C on the academic record. (Note that a minimum SGPA of 3.7 and minimum cumulative GPA of 3.7 must be earned at graduation; see Acceptance section in this document for more details.)
- It is strongly preferred that applicants present an academic record which is clear of any "irregularities" (i.e., incomplete courses, withdrawals, repeated course work)
- Complete the year-long sequence of both General and Organic Chemistry by the end of the academic year in which the EAP application is submitted*
  - General Chemistry with lab**
    CHEM 101/111 or 105\(^t\) and CHEM 102/112 or 106\(^t\)
  - Organic Chemistry with lab
    CHEM 223/225 or 221\(^t\) and CHEM 224/226 or 222\(^t\)
- Complete the year-long sequence of either Biology or Physics by the end of the academic year in which the EAP application is submitted
  - General Biology with lab**
    BIOL 101/111 and BIOL 102/112
  - General Physics with lab***
    PHYS 111/111L or 125/125\(^L\) and PHYS 112/112L or 126/126\(^L\)

*Two Completion Options for the General and Organic Chemistry Sequence:

Option 1 – Complete the year-long sequence of both General and Organic Chemistry by the end of spring term 2017
Option 2 – Complete the year-long sequence of both General and Organic Chemistry by the end of summer term 2017 and complete the year-long sequences of both Biology and Physics by the end of spring term 2017.
**students earning advanced placement (AP) credit in General Biology must complete both of the following at Loyola: Cell Biology (BIOL 251) and Genetics (BIOL 282). Students earning advanced placement (AP) credit in General Chemistry must complete Organic Chemistry at Loyola (CHEM 223/225 & 224/226 or CHEM 221 and 222).**

***students earning advanced placement (AP) credit in physics are strongly encouraged to audit the physics lecture prior to taking the MCAT and must complete both physics lab courses.***

- Complete a course in math at or above the level of Precalculus (MATH 118)
- Be in good standing at the university as evidenced by academic and interpersonal conduct and activities
- Submit a completed application via the Pre-Health application database and letters of evaluation as designated by electronic request in the Letters of Recommendation section of the application.

**Admissions Interviews**
Following review of all EAP applications, candidates deemed acceptable for further consideration will be invited to interview first with a LSC EAP Interview Committee and, if deemed acceptable for further consideration after this initial interview, candidates will then be invited to interview with members of the Committee on Admissions at the Stritch School of Medicine. During interviews, candidates will be encouraged to reveal many of their personal qualities such as empathy, integrity, self-confidence and resourcefulness, just to mention a few. Applicants also will have the opportunity to demonstrate their suitability for pursuing a career in medicine by addressing questions related (but not limited) to:

- Motivation for medicine
- Breadth of educational interests and accomplishments
- Extracurricular activities and evidence of service to others
- Self-awareness and insight into issues facing physicians today

**Acceptance**
After all EAP interviews have been completed, up to ten candidates will be guaranteed acceptance into the designated Entering Class at the Stritch School of Medicine. This acceptance is, of course, contingent upon maintaining the same high standards evidenced in the candidate's initial EAP application as well as:

- Completion of all SSOM prerequisites for admission, including award of the Baccalaureate Degree prior to matriculation at Stritch
- Participation in required programs and activities sponsored by SSOM and the Pre-Health Professions Advising office
- Continued endorsement by the Director of the Pre-Health Professions Program and approval of all course schedules by a Pre-Health Advisor (prior to registration deadlines)
- Submission of an application to the American Medical College Application Service (AMCAS) no later than July 1 of the year prior to matriculation at Stritch
- Post a minimum Science Grade Point Average (SGPA) of 3.7 and an overall cumulative Grade Point Average (GPA) above 3.7, with no grade lower than C on the academic record at the end of spring 2019
- Applicants must take MCAT 2015, and earn a minimum 509 composite score. If the total score is less than 509, but the confidence band includes 509 within its range, the applicant meets the
requirement. For example, a reported composite score of 508 with confidence band 507-511 meets the requirement. For the 2019 EAP cycle there is no minimum section requirement for MCAT 2015 scores.

- The MCAT must be taken no later than September of the year prior to matriculation at SSOM
- Adequate preparation for the MCAT2015 will require additional coursework than the previous MCAT. Please see the Example Course Sequences for the MCAT2015 on the Pre-Health website for additional information: http://www.luc.edu/prehealth/healthprofessions/mddo/mcat/

Applications are only submitted on the Pre-Health application database accessible from the Pre-Health Professions Program Office website (http://www.luc.edu/prehealth/). Announcements opening the application submission process are sent over the Pre-Health email List-Serve, posted on the Pre-Health Professions website and through other resources in March. Completed applications must be submitted by the stated deadline via the Pre-Health application database. Once your application and letters are submitted it will be reviewed by the LSC EAP Selection Committee; selected students will be forwarded for consideration by the SSOM EAP Committee on Admissions. Please realize that requests for interviews can be generated only by the Committees.

Accepted EAP candidates will be required to acknowledge their intent to matriculate at Stritch in writing within two weeks of the acceptance, thereby constituting an agreement with the Stritch School of Medicine that they will not pursue admission to any other medical school(s).

Note: This information reflects information pertinent only to the Stritch School of Medicine Entering Class of 2019. The Early Assurance Program will be reviewed annually to determine any necessary or desirable changes regarding EAP requirements and/or standards for admission to the Stritch School of Medicine.
