When to Study Abroad

Students majoring in **Biochemistry need to do careful planning** when deciding when to study abroad. It is vital that students meet with an advisor in the Biochemistry department to map out their courses. Overall, most ideal time for Biochemistry students to study abroad is during the sophomore year due to junior and senior year biochemistry courses which must be taken in sequence. However, with careful planning, biochemistry students may participate in any semester study abroad program and take their Tier II Core courses while abroad. Summer and J-term programs are very popular with all science students and are an easy way to complete core courses, gain internship or research experience, or study a language.

### Potential Program for Biochemistry majors:

- **Global Centers**
  - John Felice Rome Center
  - The Vietnam Center

- **Global Exchange**
  - Melbourne, Australia (Deakin University)

- **Global Providers**
  - **Jesuit Providers**
    - Madrid, Spain (SLU Madrid)

- **API**
  - Brisbane/Gold Coast, Australia
  - Melbourne, Australia
  - Sydney, Australia
  - San Joaquín de Flores, Coast Rica
  - San José, Costa Rica
  - London, England
  - Leeds, England
  - Cork, Ireland
  - Dublin, Ireland
  - Limerick, Ireland
  - Querétaro, Mexico

- **SIT**
  - Switzerland

- **USAC**
  - Gold Coast, Australia
  - Brighton, England
  - Bristol, England
  - London, England
  - Reading, England
  - Accra, Ghana
  - Cork, Ireland
  - Seoul, Korea
  - Auckland/Palmerston, New Zealand
  - North/Wellington, New Zealand
  - St. Andrews, Scotland

- **IES**
  - Cape Town, South Africa
  - London, England
  - Santiago, Chile
  - Netherlands, Amsterdam

- Dunedin, New Zealand
- Cádiz, Spain (recommended for advanced Spanish speakers)
