Computer Science Major Pathway to Study Abroad

When & Where to Study Abroad

Students studying in computer science have more flexibility in when they can study abroad than many other science students. Junior or senior year are often the best time to go abroad, after completing foundational coursework in your major. There are some study abroad programs which offer computer science courses that can be approved to count for 300-level electives. Alternatively, computer science students can reserve their Tier II core courses for their semester abroad and have even more options. We recommend speaking with your academic advisor to determine courses and timing that would be best for you. Additionally, it is also recommended that students peruse the pre-approved course database, which contains study abroad courses deemed correspondent to core, elective, and major requirements.

Programs with course offerings in Computer Science

Global Exchanges
- Melbourne, Australia (Deakin University)

Global Partners
Jesuit Universities
- Cape Town, South Africa (Marquette University)
- Madrid, Spain (SLU)
- Newcastle, England (Loyola Maryland)

USAC
- Cork, Ireland
- Bristol, England
- Stirling, Scotland
- St. Andrews, Scotland
- Seoul, South Korea
- Vaxjo, Sweden
- Melbourne, Australia
- Gold Coast, Australia
- Accra, Ghana
- Alicante, Spain
- Palmerston North, New Zealand
- Auckland, New Zealand
- Wellington, New Zealand

IES Abroad
- Melbourne, Australia
- Sydney, Australia
- Vienna, Austria
- London, England
- Nantes, France
- Berlin, Germany
- Freiburg, Germany
- Dublin, Ireland
- Rabat, Morocco
- Auckland, New Zealand
- Christchurch, New Zealand
- Cape Town, South Africa
- Granada, Spain
- Madrid, Spain
- Salamanca, Spain
- Istanbul, Turkey

IES Abroad
- Melbourne, Australia
- Sydney, Australia
- Wellington, New Zealand
- Barcelona, Spain

CIS (Internships only)
- Melbourne, Australia
- Sydney, Australia
- Wellington, New Zealand
- Barcelona, Spain

API
- Valparaíso, Chile
