Mathematics Majors Pathway to Study Abroad

When & Where to Study Abroad

Students studying Mathematics have flexibility when studying abroad after completing the following courses: **MATH 161, MATH 162 and MATH 263** which should be taken at Loyola. Most Math students study abroad their Spring semester Sophomore or Junior year. Students may participate in any semester study abroad program and take their Tier II Core courses while abroad, but also with the option of major courses as well. Summer and short term programs are very popular with students of any major and are an easy way to complete core courses, gain internship or research experience, or study a language. We encourage you to meet with your academic advisor to discuss how study abroad will fit into your academic plan.
