Office of Sustainability
Energy Internship

Description
The Office of Sustainability is hiring a team of students to support the Archdiocese of Chicago in reducing their energy use and climate impact through a Community Climate Corps.

Students interested in this opportunity will be working on energy efficiency in buildings owned and operated by the Archdiocese of Chicago (Parishes, Chapels, Mausoleums, Schools and other buildings) through direct energy audits and online work entering utility data into tracking systems like the EPA’s Portfolio Manager.

Students will work in teams and will be expected to visit Archdiocese sites to conduct audits (transportation will be reimbursed) and do tracking work on computers.

Please clearly describe your interest to work and learn more about energy use in buildings as a part of climate action.

To Apply
Complete the IES Common Application, including uploading your resume and transcript.
