

# How can the *Middle Ages*

bring Loyola into the 21<sup>st</sup> century?

Help us create a **medieval garden** as an environmentally responsible “green roof” in Spring 2007

As part of the “greening” of Loyola’s campus, the **Medieval Studies Center** will propose a design for a Medieval knot garden to be installed on the roof of Crown Auditorium Lobby.

Students who wish to participate\* in the project will get 1.5 credit hours (sign up for MSTU 301, Medieval Studies Integrative Seminar: “Material Culture” – M 3:30 – 5:00).

Participants will research medieval garden design as well as current trends in “greening” urban roofs. This will be a very “hands-on” experience!

\*(Optional: MSTU 301 students **may** pursue other projects)
