Research Funding Rises Nearly 50% in a Single Year

Loyola researchers overcame the budgetary cutbacks that are plaguing many funding agencies, securing significantly more research funding last year than the previous year.

For the fiscal year ending June 30, 2008, lakeside campuses' faculty garnered a total of \$6,232,528 in external support for research, a 47% increase over the amount received during FY 2007 (\$4,253,998). Total external funding, encompassing research, training, and infrastructure support, declined from \$17.9M to \$11.6M during the same period, mainly because of fluctuations in amounts received for certain campus construction projects. The number of research awards also increased, from 52 to 56.

Sixty-three percent of external funding comes from federal sources, fifteen per-

cent from state government, and twenty-two percent from non-governmental sponsors (foundations, corporations, associations, and other universities).

Lakeside campuses' faculty are to be warmly congratulated for their continuing success!

Director's Notes: Welcome to the First ORS Newsletter!

Welcome to the inaugural issue of *Research Update*, to be published in the fall and spring semesters and which we hope you will find interesting and enlightening.

Each issue will keep you abreast of current issues and news related to the world of grants and contracts. We'll also publish a listing of recent awards received by faculty on the lakeside campuses.

And this issue will allow me to introduce myself as the new Research Services Director, having taken over from the retiring Donna Estler in May of last year. My basic goal as director is to confirm and strengthen the ORS commitment to assist

faculty and students at the Lake Shore and Water Tower campuses with externally funded research, training, and service projects—running the gamut from finding funding opportunities, helping prepare budgets, coordinating compliance with rules for human subjects and lab animals, submitting proposals, and administering awards. If at any time you have suggestions for how we can do a better job of helping you, please don't hesitate to contact me at 5-2478 or wsellers@luc.edu.

—Bill Sellers

“Two awards at a maximum level of \$30,000 per project will be allocated to research teams”

New Internal Awards Stimulate Student and Faculty Research

Associate Provost for Research Samuel Attoh recently announced two new internal award programs. These are in keeping with his emphasis on using internal grant funds to leverage external funding to the maximum extent.

The first new program is the Research Incentive Award for Graduate Students (RIAGS), under which \$300 will be given to any Loyola graduate student on the lakeside campuses who submits a proposal for external funding to a Federal or private agency, as well as a bonus award of \$1000 for any approved proposal.

The second new program is aimed at stimulating multidisciplinary research and building stronger partnerships with other

organizations and institutions. This year, two awards at a maximum level of \$30,000 per project will be allocated to research teams that are prepared to submit a multidisciplinary proposal to a nationally competitive funding agency. This support is intended to provide a basis for project development and pilot research, ultimately leading to independent funding. The deadline for this year's competition is December 5, 2008.

For additional information on all internal funding programs, please see <http://www.luc.edu/ors/internalfunding.shtml>.

News from Federal Agencies

The National Institutes of Health has issued a notice (NOT-OD-09-002) regarding the Continuing Resolution signed by President Bush at the end of September. As in the past when CRs have been used, NIH will make non-competing research grant awards at a level below that indicated on the most recent Notice of Award (generally up to 90% of the previously committed level).

Notice number NOT-OD-09-003 issued on October 8, 2008, states that “Beginning with original new applications (i.e., never submitted) and competing renewal applications submitted for the January 25, 2009 due dates and beyond, the NIH will accept only a single amend-

ment to the original application. Up until now NIH would let investigators submit two amended applications, called A1 and A2. This most emphatically does *not* mean that PIs should give up if they have submitted an “A1” and been rejected. As the Notice states, “Failure to receive funding after two submissions (i.e., the original and the single amendment) will mean that the applicant should substantially re-design the project rather than simply change the application in response to previous reviews.”

The National Science Foundation has published a new *Proposal & Award Policies & Procedures Guide* (available through the NSF website at www.nsf.gov). One major change is that the limitation on funded compensation to two months of summer salary has been

eliminated. Academic year salary for PIs and other senior project personnel can now be requested, though no more than two months in any one year.

Events and Initiatives at the Centers of Excellence

The Center for Ethics and Social Justice is piloting the innovative new Polis Program in philosophy, theology, and service-learning, a year-long set of team-taught courses. People interested in learning more should go to the Center for Ethics website: <http://www.luc.edu/ethics/>.

The Center for the Human Rights of Children is collaborating with the Gannon Center for the African Women in America Conference, "The Voice of African Children: the Mission of Women." On October 30, they hosted a fundraiser entitled, "Suffer the Children: the Nightmare of Immigration Politics."

The Center for Science and Math Education has worked with the School of Education to launch the new MEd in Science Education, with a specialization in chemistry teaching. They are also hard at work improving science and math education throughout Chicago.

The Center for Urban Environmental Research and Policy will be involved in the upcoming Hunger Week activities, and they recently named a new Sustainability Initiative Director. Dr. Marshall Eames, from the Department of Natural Science, will start his new position in January.

The Center for Urban Research and Learning is excited to announce the launch of their new e-journal, *Gateways: International Journal of Community Research and Engagement*. The journal is co-sponsored by the University of Technology Sydney Shopfront. Please visit <http://www.luc.edu/curl/uts/> for more information.

The Gannon Center for Women and Leadership sponsors many events during the fall quarter, including readings, discussion groups, and film screenings. Check out the full calendar of events at: http://www.luc.edu/gannon/.Fall_20081.shtml.

Loyola Receives Royalties from GlaxoSmithKline

The university recently received a check from GlaxoSmithKline (GSK) for \$689,000, in connection with inventions made more than ten years ago by three Loyola faculty members and a Loyola student.

The main U.S. patent is # 6,066,324 ("Carboxyl terminal of papilloma virus L1 region is not required for formation of virus-like particles"), and there are a number of foreign patent applications pending. The technology is currently licensed to GSK, and they have used it to develop a vaccine against papilloma viruses in humans (HPV). Sales in foreign countries have been very good, which accounts for the large royalty check just received. Sales in the U.S. are expected following FDA approval of the vaccine, which should be finalized next

year. In accordance with university patent policy, 50% of the net royalty income was shared with the inventors, who are no longer at Loyola.

ORS has entered into an agreement with TreMonti, Inc., to provide consultation on whether and how to pursue protection and commercialization of inventions made by faculty on the lakeside campuses. This agreement is similar to one that TreMonti already has with the medical center campus. If you think your research has or could result in a novel process, device, composition of matter, business method, or any kind of patentable "subject matter," please contact the ORS Director who can put you in touch with TreMonti for expert advice.

Human Subjects Research Training

ORS's
Compliance
Manager,
Rebekah Soule,
and the chair of
the Institutional
Review Board,
Toby Dye, offer
periodic training
for faculty and
students who use
human subjects
in their research.
If you would like
them to put on a
workshop for
your department
or team, please
contact Rebekah
at 8-2689 or
rsoule@luc.edu.

New Faculty Orientation

ORS was pleased to hold new faculty orientations on the Lake Shore and Water Tower Campuses on October 30 and 31.

Faculty learned about the entire grants process, all the way from searching for funding opportunities and submitting proposals to closing out awards.

**Check the ORS website soon for the presentation slides!
