Vincent V. Herr, S.J., Papers

Dates: 1905 – 1971 (bulk 1945 – 1968)

Creator: Herr, Vincent V. S.J. (1901 - 1970)

Extent: 14 linear feet

Level of description: Folder

Processor & date: Steven Szegedi, 07 March 2008

Administration Information

Access Conditions: Some records are restricted. Consult repository for information.

Usage (Reproduction) Conditions: Consult repository for information.

Citation: Loyola University Chicago. University Archives. Vincent V. Herr, S.J., Papers, 1905 – 1971. Box #, Folder #.

Provenance: Donated to the University Archives by the Jesuit community, 13 July 1982.

Separations: Approximately 3 linear feet of extraneous and duplicate material were removed and discarded.

Biographical Sketch

Father Vincent Victor Herr, S.J. was born 2 July, 1901 in Metamora, Ohio, and spent his youth in Caraghar, Ohio. He was ordained on 22 June, 1932 at St. Mary's in Kansas, and he took his final vows on 2 February, 1937.

Father Herr earned his A.B. and M.A. degrees from St. Louis University, which he attended from 1923 through 1926, and during the following 12 years he rarely paused in his studies. After teaching biology for three years at Xavier University in Cincinnati, Father Herr spent 2 years each studying theology at St. Louis University and St. Mary's. He continued his education for another year in Cleveland, and studied for one term at University of Michigan before leaving the United States for Europe in 1936. Thereafter he spent one year at the University of Vienna performing graduate work under Karl Buehler, as well as one semester at the University of London. Another year was spent at the University of Bonn in Germany, from 1938 to 1939, where Father Herr studied Experimental Psychology in a program patterned after that of German psychologist Oswald Külpe's *Würzburg School of Psychology*. Father Herr left Germany in 1939 and began his lifelong career at Loyola University.

By this time Father Herr was deeply involved in developing psychological tests that measured visual literacy, cognitive and behavioral aptitude, color preferences as they relate to personality traits, physiological psychology, and associative psychological indices. While interested in the pioneering work of others, Father Herr was dedicated to adapting existing investigative models to more accurately model his own lines of inquiry. One of his earliest projects involved the building of a psychogalvanometer, an electrical device that measured subtle changes in a person's skin resistance in response to various audile and visual stimuli in order to detect states of neuroticism.

Father Herr also developed a fairly long range word association study called the Loyola Language Study (LLS), itself a modified form of the Kent-Rosanoff Association Test. The LLS was conducted in several states simultaneously, primarily Boston, Chicago, Seattle, and San Francisco, and was used to determine psychologically normative behaviors. A fair number of the tests were conducted either in High School or College settings, or in homes for people diagnosed with psychological abnormalities. Along with the LLS, Father Herr also took part in the Minnesota Multiphasic Personality Inventory (MMPI), conducted numerous visual experiments based on Hering's Color Disks, and synthesized research on Mental Hygiene.

Perhaps his largest ongoing study was the National Institute of Mental Health (NIMH) sponsored the Religion and Mental Health Project at Loyola, which sought to describe the psychological state of religious orders, as well as assess seminarians' mental health. Father Herr spent many of his later years with Loyola conducting research for the NIMH study, and all work on the study was completed by 1966.

Father Herr was the author of at least five books and contributed to at least as many more; his books include *General Psychology*, and *Social Psychology: How We Influence Each Other*. He was chairman of Loyola's Psychology Department from 1945 to 1968, and was President of the American Catholic Psychological Association from 1954 to 1955. He was also a member of the Catholic Philosophical Association, the Chicago Society of Catholic Psychologists, and Delta Epsilon Sigma. He counted among his experimental psychologist peers Reverend Hubert Gruender of St Louis, Father Joseph Lindowsky of Prague, Father Alexander Willwoll of Munich and Father Joseph Froebes of Germany.

Father Herr died 29 May 1970 of a coronary ailment while sleeping. He was 68 years old.

Scope and Content

The Vincent V. Herr, S.J. papers consist of 14 linear feet spanning the years 1918-1971, with the bulk dating from 1945-1968, and includes: biographical materials; photographs; book and article manuscripts as well as published materials; correspondence; notes; coursework, syllabi and student work in experimental psychology; diplomas, certificates and plaques; raw data for numerous studies in experimental psychology; a broad diversity of psychological testing materials pioneered by Father Herr or developed by his colleagues.

Series

Series 1: Personal and Biographical Materials, 1905 – 1971, Boxes 1-2

Consists of mementos, photographs, correspondence and academic achievements from Father Herr's early life; also includes Father Herr's vows and materials related to his ordination.

Series 2: Professional Writings and Correspondence, 1939 – 1970, Boxes 2-6

Consists of articles, reprints and drafts of Father Herr's numerous published works, as well as materials related to his numerous memberships in and professional activities with learned Catholic and Psychology societies. Also includes materials he

gathered related to his professional studies, such as catalogs, advertisements and operating manuals for technical equipment.

Series 3: Coursework and Student Theses, 1945 – 1969, Boxes 6-8

Consists of material related to his teaching posts, such as course syllabi, bibliographies, articles, correspondence with fellow professors, and communication with his students. Also includes select works by students in experimental psychology, or in continuing the work of Father Herr, as well as proposals for courses and seminars, workshop materials, and details about Loyola's psychology laboratory.

Series 4: The Loyola Language Study (LLS), 1922 – 1966, Boxes 8-13

Consists of a decade-long, multi-state, word association study conducted by Father Herr and numerous colleagues in Boston, Chicago, Seattle, San Francisco and several other locations. Much of the study is concerned with discovering inherent differences in individuals' word associations between "normal" adolescent and adult lay and secular populations vs. "abnormal," primarily closed populations of individuals diagnosed as either schizophrenic or psycho-neurotic. The collection includes articles, correspondence, individuals' responses to the questionnaire, summary reports, raw frequency counts, tabular data, progress reports and summaries.

Series 5: NIMH and the Religion for Mental Health Project, 1953 – 1970, Boxes 13-15

Consists of preliminary proposals and grant requests for the *Religion and Mental Health* study, as well as a decades' worth of article drafts, correspondence, questionnaires, conference materials and data related to the psychological health of seminarians and religious practitioners. Includes a fair amount of documentation and correspondence with *Yeshiva* and Fred Hollander from the mid-60s.

Series 6: Psychogalvanometer, 1948 – 1964, Boxes 15-16

Consists of materials used by Father Herr in constructing a psychogalvanometer (a device which is the immediate predecessor of today's modern lie detectors) and of early studies investigating the use of electric skin resistance tests. Includes the original psychogalvanometer used by Father Herr.

Series 7: Minnesota Multiphasic Personality Inventory, 1958 – 1967, Box 16

Consists of a few brief overviews of the theory and methodology behind the MMPI project, as well as an intact introductory kit.

Series 8: Experimental Psychology Tests and Equipment, 1917 – 1968, Boxes 16-24

Consists of primary experimental psychology testing materials, as developed by Father Herr or by his colleagues and by for-profit societies; includes color preference tests, associative tests, questionnaires, word and sentence fragment tests, puzzles, illusions, and research notes. Includes some examples of Father Herr's personal pitch differential acetate records, though they are in fragile condition.

15	5	Progress reports	1959 – 1966
15	6	“Last minutes NIMH Proj Semin Curriculums”	1960 – 1961
15	7	Scoring key – attitude scale	n.d.
15	8	Project summary	1968
15	9	<i>Innovations in Mental Health Training</i> , booklet and correspondence	1969 - 1970
		<u>Series 6: Psychogalvanometer, 1948-1964</u>	
15	10	“Origin of GSR Research”	1948 – 1953
15	11	Description of the Psychogalvanometer	1957
15	12	GSR Research	ca. 1959
15	13	Instructions and Data Sheet	n.d.
15	14	USAF course 3050 <i>Electronic Fundamentals: Volume 4, Alternating Current Circuit Analysis</i>	1957
16	1	SWMT <i>Block I: Fundamentals of DC Electricity</i> , student textbook	1959

Loyola University Chicago ~ University Archives

16	2	SWMT <i>Block III: Vacuum Tubes</i> , student textbook	1959
16	3	SWMT <i>Block IV: Amplifiers and Oscillators</i> , student textbook	1959
16	4	SWMT <i>Block V: Special Circuits</i> , student textbook	1959
16	5	SWMT <i>Block VI: Kit Construction</i> , student textbook	1959
16	6	Data processing & equipment ads	1964

Series 7: Minnesota Multiphasic Personality Inventory, 1958-1967

16	7	The MMPI notebook: A Guide to the Clinical Use of the Automated MMPI	1966
16	8	“Seminary MMPI and New Questionnaire”	1967
16	9	“Pisani’s Revision of MAS Taylor”	n.d.
16	10	Backer, Anthony J. – data and thesis proposal	ca. 1958

Series 8: Experimental Psychology Tests and Equipment, 1917-1968

Vincent V. Herr’s tests – general materials

16	11	“Herr’s Keys to Various Tests” incl. LLS, MMPI & psychogalvanometer	1954, n.d.
16	12	Assorted personality tests & scoring machine keys	ca. 1953
16	13	Experiment in differential pitch threshold – instructions and data sheet	n.d.
16	14	Memory and association test	n.d.
16	15	Sister M. Rosaire, O.P., TAT card results	ca. 1957
16	16	“Graph – Timekeeper 1000 = cycles per sec.”	n.d.

Vincent V. Herr’s tests – color preference

17	1	Color preference test: simultaneous contrast frames	n.d.
17	2	Color preference test: materials & simultaneous contrast frames	ca. 1965 – 1968
17	3	Color preference test: materials & simultaneous contrast frames	ca. 1965 – 1968
17	4	Color preference test: color wheels & loose pieces	n.d.
17	5	Color preference test: color wheels	n.d.
17	6	Color preference test: materials & loose pieces (1-16)	n.d.
17	7	Color preference test: model equipment, not uniform	n.d.
18	1	Color preference equipment: blank colored papers	n.d.
18	2	Color preference equipment: grays 1,2,3,4,5	n.d.
18	3	Color preference equipment: grays 6,7,8,9	n.d.
18	4	Color preference equipment: grays 10,11,12	n.d.
18	5	Color preference equipment: grays 13,14,15	n.d.
18	6	Color preference equipment: grays 16,17,18	n.d.
18	7	Color preference equipment: grays 19,20,21	n.d.
18	8	Color preference equipment: grays 22,23,24	n.d.
18	9	Color preference equipment: grays 25,26,27	n.d.

Loyola University Chicago ~ University Archives

Vincent V. Herr's tests – individual experiments

18	10	Experiment V part I, sets 1 + 6	n.d.
18	11	Experiment No.5 part II – simultaneous contrast, sets [1] + 3	n.d.
18	12	Experiment No.6 “Assemble these interlocking pieces...” 3 each A + B	n.d.
18	13	Experiment VI	n.d.
18	14	Experiment VIII	n.d.
18	15	Experiment VIII	n.d.
18	16	Experiment VIII set 2	n.d.
18	17	Experiment XI “Binoc Rivalry”	n.d.
19	1	Experiment XXX “Factual Form” sets 1-3	n.d.
19	2	Experiment 33, loose envelopes	n.d.
19	3	Experiment 33 set 1	n.d.
19	4	Experiment 33 set 2	n.d.
19	5	Experiment 33 set 3	n.d.
20	1	Experiment 33 set 4	n.d.
20	2	Experiment 33 set 8	n.d.
20	3	Experiment 34 “Dots and Rings”	ca. 1949
20	4	Experiment 34 “Dots and Rings,” loose envelopes	ca. 1949
20	5	Experiment XLII set 1 part I, set 2 part II, set 3 parts I + II	n.d.
20	6	Experiment XLII set 2 part I	n.d.
20	7	Experiment 45 “color preference set”	n.d.
21	1	Experiment 75	n.d.
21	2	Experiment #s unknown: assorted tests	n.d.
21	3	Experiment # unknown: crossword puzzles and keys	ca. 1939
21	4	Experiment # unknown: crossword puzzles clipped from newspapers	ca. 1940
21	5	Experiment # unknown: dual color cards	n.d.
21	6	Experiment # unknown: experimental group materials	n.d.
21	7	Experiment # unknown: gray squares	n.d.
22	1	Experiment #s unknown: loose materials	n.d.
22	2	Experiment #s unknown: loose materials	n.d.
22	3	Experiment # unknown: scattered red dots and rings	n.d.
<i>Tests by Vincent V. Herr's colleagues</i>			
22	4	“Aptitude Tests: Old,” primarily Thurstone’s “The Measurement of Social Attitudes” tests	1943 – 1954
22	5	Campbell (Milwaukee): <i>A Seminarian’s Stories</i> , original 10 TAT cards	n.d.
22	6	Campbell (Milwaukee): <i>A Seminarian’s Stories</i> , with personal stories, TAT cards	n.d.
23	1	Freeman’s Stimulus Test No.1	n.d.
23	2	Freeman’s Stimulus Test No.2	n.d.
23	3	Freeman’s Experiment #2 “Figures (Perception) for perceptual learning, catalog #31219 figures”	n.d.
23	4	Hering’s Color Disks	n.d.
23	5	Hering’s Color Disks [1 set]	n.d.

Loyola University Chicago ~ University Archives

23	6	Hering's Color Circle	n.d.
23	7	Heymans-Rice Test	n.d.
23	8	Holmgren Wools: gray components	n.d.
