

CHEM 106: Basic Inorganic Chemistry
Spring 2013
Loyola University Chicago

Instructor:

Patrick L.
Daubenmire, Ph. D.

Laboratory Assistants:

Mary van Opstal Kyle Webster

Office: FH 415/416

FH 416

FH 106/410

Phone (office): 773.508.8248

Phone (mobile): 630.336.4180

Email: pdauben@luc.edu

mtwist@luc.edu

kwebster3@luc.edu

Office hours: Tu 2:30-3:30 pm
F 1:00-2:00 pm, & by
appointment

Th 11-12 pm, &
by appointment

W 9:00-10:00 a.m. &
by appointment

**Class Meeting
Times:**

Lecture
TuTh 1:00-2:15 pm
Cuneo 210

Lab Sections
W 11:30-2:15 pm &
W 2:45-5:30 pm
Flanner 305

Discussion
F 2:45-4:45 pm
Cuneo 210

Course Description

This course is a lecture, discussion and laboratory course for chemistry majors and is a continuation of CHEM 105. Specific areas addressed are: properties of solutions, kinetics, equilibrium, chemical thermodynamics, and electrochemistry. Historical and current developments in chemistry as well as real-world problems that chemists address will be incorporated into the course. The laboratory involves the techniques and procedures of inorganic synthesis and analysis.

The emphasis of this course is on understanding and prediction rather than memorization. This means that students must foster their problem solving skills, ability to make claims based on evidence, and effective communication of laboratory endeavors. It is not enough to know *what* happens in chemistry, the student must also be able to explain *why* it happens.

Course Prerequisites

Successful completion (C- or better) in CHEM 105 and MATH 118 or higher.

Required Resources

- (1) Brown, T. L., et. al (2012). *Chemistry: The Central Science, 12th ed (with MasteringChemistry)*. Pearson Prentice Hall. ISBN 978-0-321-74105-9.
- (2) Moog, R.S. & Farrell, J.J. (2008). *Chemistry: A Guided Inquiry, 4th ed.* John Wiley & Sons, Inc. ISBN 978-0-470-12926-5
- (3) In-house laboratory manual (purchase from Dr. D.)
- (4) *Blackboard Connection*, blackboard.luc.edu

Connection to the “Hungers” of Loyola University’s Transformative Education

This course seeks to assist each student in fostering hungers associated with the University’s model of transformative education¹. The study of introductory chemistry can assist in development of the specific hungers below:

- *A Hunger for Integrated Knowledge* – by building an understanding of a variety of chemical concepts and applying them to problems in many contexts.
- *A Hunger for a Moral Compass* – by examining the variables, benefits, and detriments that exist at the interface of applied science, technology, environment, and society.
- *A Hunger for a Global Paradigm* – by examining the variables, benefits, and detriments that exist at the interface of applied science, technology, environment, and society.

Instructional Format – Process Oriented Guided Inquiry Learning (POGIL)

This course will not follow a traditional lecture format for delivery of course content and skill development. Instead this course will capitalize on students’ current prevailing ideas and thoughts about sets of data or presented models. Then, through guided questions about the presented information, students, in small groups, discuss ideas and come to consensus about answers to questions. Ideas are further developed in questions that force application of the agreed upon concepts. The instructor is the guide on this journey, pointing out areas that are particularly relevant or that may need attention. This format is designed based on the idea that learning cannot be directly transmitted from one person to another. Knowledge must be built by the learner which results from interpretation and reflection on experiences in particular contexts, such as the chemistry classroom, and when working with others.

¹<http://www.luc.edu/transformatived/>

The roles you may have throughout the semester when working in groups include:

- ❖ *Manager*: The student in this role ensures that the group is functioning efficiently and progressing within the time frame set by the instructor. This student is not a supervisor, but a full participant. Additionally, this student monitors the participation of all group members to make sure all ideas have been heard.
- ❖ *Recorder*: The student in this role transcribes the agreed upon responses of the group to questions and problems. The recorder is not solely responsible for doing the work, but is responsible for accurately recording the results of the group's work. There will be times during the semester when the group's answer(s) to certain questions will be collected. The recorder submits these responses.
- ❖ *Technician*: The student in this role primarily handles calculations and the management of equipment for the group. If special operating instructions are needed for an instrument during an activity, the technician is the point person for these applications and will be trained as necessary.
- ❖ *Presenter*: The student in this role represents the group during all class discussions or during inter-group interactions. Similarly to the recorder, the presenter's responses should accurately reflect the results of the work of the group.

Academic Honesty

Academic honesty is an expression of interpersonal justice, responsibility and care, applicable to Loyola University faculty, students, and staff, which demands that the pursuit of knowledge in the university community be carried out with sincerity and integrity. The School of Education's Policy on Academic Integrity can be found at: http://www.luc.edu/education/academics_policies_integrity.shtml. For additional academic policies and procedures refer to: http://www.luc.edu/education/academics_policies_main.shtml

Accessibility

Students who have disabilities which they believe entitle them to accommodations under the Americans with Disabilities Act should register with the Services for Students with Disabilities (SSWD) office. To request accommodations, students must schedule an appointment with an SSWD coordinator. Students should contact SSWD at least four weeks before their first semester or term at Loyola. Returning students should schedule an appointment within the first two weeks of the semester or term. The University policy on accommodations and participation in courses is available at: <http://www.luc.edu/sswd/>

Harassment (Bias Reporting)

It is unacceptable and a violation of university policy to harass, discriminate against or abuse any person because of his or her race, color, national origin, gender, sexual orientation, disability, religion, age or any other characteristic protected by applicable law. Such behavior threatens to destroy the environment of tolerance and mutual respect that must prevail for this university to fulfill its educational and health care mission. For this reason, every incident of harassment, discrimination or abuse undermines the aspirations and attacks the ideals of our community. The university qualifies these incidents as incidents of bias.

In order to uphold our mission of being Chicago's Jesuit Catholic University-- a diverse community seeking God in all things and working to expand knowledge in the service of humanity through learning, justice and faith, any incident(s) of bias must be reported and appropriately addressed. Therefore, the Bias Response (BR) Team was created to assist members of the Loyola University Chicago community in bringing incidents of bias to the attention of the university. If you believe you are subject to such bias, you should notify the Bias Response Team at this link: <http://webapps.luc.edu/biasreporting/>

Safety

Students must adhere to proper safety protocols and practices when conducting classroom activities and laboratory investigations. A separate agreement describing these practices must be signed before a student may participate in coursework.

Course Evaluation

Grades will be assigned in the course according to the following sources:

Table 1. Grade Criteria

Criteria	Maximum Percent Value
<i>CHEM 106 – Lecture, Lab, Discussion (4.0 credits)</i>	
participation, group responses, and reports	5 %
online quizzes & homework sets	10 %
laboratory preparation & weekly SWH reports	10 %
tests	20 %
laboratory problem reports	30 %
final exam	25 %

Participation, group responses and reports will be an important part of the class. This work will be a combination of individual and group work. Students must be present during class sessions in order to receive credit for these assignments. The two lowest scores on these assignments will be dropped from your course evaluation.

Online quizzes will be administered via *MasteringChemistry* at the end of nearly each week during the discussion time, specifically from 2:45-3:15 pm on Fridays. Content from the previous sessions (whole class and small group) will be the source of material on each quiz. The two lowest quiz scores will be dropped from your course evaluation.

Online Homework Sets will be assigned weekly. Submitted responses must be the result of your individual effort and synthesis and are due before 12 noon on the following Monday. The two lowest homework sets scores will be dropped from your course evaluation.

Laboratory Preparation & Weekly Science Writing Heuristic (SWH) Reports will be a regular part of weekly laboratory work. Pre-laboratory assignments are to be completed prior to each laboratory session, and the written weekly lab report is due by the following Discussion session on Friday. The two lowest scores in this category will be dropped from your grade evaluation.

Written Reports to Laboratory Problems will be assigned at five different points in the semester. These problems will require students to use skills and ideas developed in prior laboratory activities in order to formulate an acceptable solution and full written report to communicate results effectively.

Tests will be administered at two different points during the course. Each will primarily reflect the content and concepts developed during prior class sessions.

The *Final Exam* will be designed to assess students comprehensive knowledge of concepts developed during the work of the semester.

Practices for Success

Supporting claims with evidence, making applications, solving and analyzing problems, and using chemical principles to explain phenomena are critical skills in the field of chemistry. The development of these skills is not without some frustration, but it carries the reward of deepening one's ability to think critically and solve problems in any field. To do this, one may have to assess, evaluate, and possibly revise approaches to learning. The use of targeted, guiding questions, regularly scheduled work, and strategic study plans can greatly assist the learning of learning chemistry. With such a focus, hopefully any frustration will quickly turn to appreciation and fascination for the relevance and connectedness of chemistry in your life and the world around you. Solving and analyzing problems is the most important feature of this work. If, at any time, you need assistance framing such plans for your work in chemistry, please do not hesitate to ask the instructor.

Norms of Course Proceedings

The classroom is to be a safe place to question and explore ideas. Student and teacher voices are important to this work. Collegial disagreement can be a healthy part of this process, but must always include respect for all members of the class.

Course activities will be designed to help students reach the goal of learning chemistry content and developing thinking skills. This will more often be driven by the use of data and reasoning to discover concepts and solutions rather than the identification and exchange of chemical facts and algorithms.

Class sessions will begin and end on time. All students should attend class regularly and participate in class discussions. Multiple absences could affect one's ability to learn chemistry during this semester. Anticipated absences should be discussed with the instructor two class days before the absence. Proper documents may be requested to verify the reason for any absence. This is particularly relevant to days missed that include an in-class assessment for which a student is asking for a make-up.

Cell phones and the use of texting devices should be used in appropriate and professional manner. These devices should not distract other participants in the course.

Email messages among students in the course should also be respectful, appropriate, and professional. Response time to email messages is acceptable within 48 hours.

Completed course assignments must be submitted by 5:00 pm on the due date. Late assignments may not be accepted without proper verification of reasons.

Table 3. Proposed Semester Topics & Schedule

Date (Week)	Session	Topics	Resources & Practice	Assignments Due
Week 01: Jan. 14-18	Lecture 1.1	Intermolecular Forces; Orientation to CHEM 106; Pre-course surveys & assessments	Chapter 11 (BLBMW); ChemActivity (CA) 27 (Moog & Farrell); Syllabus	
	Lab 1	<i>Pre-content test, Lab Check-in; Lab Problem #01 – Inkredible</i>	Lab Manual, p. 1-35	Pre-laboratory assignment
	Lecture 1.2	Pre-course surveys & assessments; Properties of Liquids	Various Handouts	
	Discussion	<i>Science Writing Heuristic (SWH) Prologue – A Mystery Event</i> ; Properties of Liquids cont.	Lab Manual, p. 34; Chapter 11 (BLBMW)	
Week 02: Jan. 21-25	Lecture 2.1	Phase Changes & Diagrams	Chapter 11 (BLBMW)	
	Lab 2	<i>SWH #01 – Chemistry in Your Home</i>	Lab Manual, p. 37	Lab Problem #01 Report & Pre-laboratory assignment
	Lecture 2.2	Solids	Chapter 12 (BLBMW); CAs 24 & 25 (Moog & Farrell)	Weekly Lab Report
	Discussion	MC Quiz; Introduction to properties of solutions	Chapter 13 (BLBMW); CA 32 Moog & Farrell)	MC Online Homework Weeks 01 & 02
Week 03: Jan 28- Feb 01	Lecture 3.1	Factors Affecting Solubility, Colligative Properties, Colloids	Chapter 13 (BLBMW)	

Date (Week)	Session	Topics	Resources & Practice	Assignments Due
	Lab 3	<i>Lab Problem #02</i> – The Great White (Chemical) Way	Lab Manual, p. 39	
	Lecture 3.2	The Concept of Equilibrium	Chapter 15 (BLBMW); CA 36 & 37 (Moog & Farrell)	
	Discussion	MC Quiz; The Equilibrium Constant	Chapter 15 (BLBMW); CA 38 (Moog & Farrell)	MC Online Homework Week 03; <i>SWH #02</i> Write-up
Week 04: Feb 04-08	Lecture 4.1	Calculating Equilibrium Constants	Chapter 15 (BLBMW); CA 39 (Moog & Farrell)	
	Lab 4	<i>SWH #02</i> – Freezing Point Matters	Lab Manual, p. 40	Lab Problem #02 Report & Pre-laboratory assignment
	Lecture 4.2	LeChatelier's Principle & the Reaction Quotient	Chapter 15 (BLBMW); CA 40 (Moog & Farrell)	
	Discussion	TEST 01		
Week 05: Feb 11-15	Lecture 5.1	The Solubility Product	Chapter 17.4 (BLBMW); CA 41 (Moog & Farrell)	
	Lab 5	<i>SWH #03</i> – More Reversible and Irreversible Processes	Lab Manual, p. 46	Pre-laboratory assignment

Date (Week)	Session	Topics	Resources & Practice	Assignments Due
	Lecture 5.2	Characteristics and Strengths of Acids and Bases	Chapter 16 (BLBMW); CA 42 & 43 (Moog & Farrell)	
	Discussion	MC Quiz; Weak Acid/Base Dissociation	Chapter 16 (BLBMW); CA 44 (Moog & Farrell)	MC Online Homework Week 05; <i>SWH #02</i> Write-up
Week 06: Feb 18-22	Lecture 6.1	Acids & Bases Equilibrium Constants	Chapter 16 (BLBMW)	
	Lab 6	<i>SWH #04</i> – Chemical Reactions & Identification of a Chemical Compound	Lab Manual, p. 52	Pre-laboratory assignment
	Lecture 6.2	pH and Relative Acid Strength	Chapter 16 (BLBMW); CA 45 & 46 (Moog & Farrell)	
	Discussion	MC Quiz; The Strength of Conjugate Pairs	Chapter 16 (BLBMW); CA 47 (Moog & Farrell)	MC Online Homework Week 06; <i>SWH #03</i> Write-up
Week 07: Feb 25-Mar 01	Lecture 7.1	Additional Aspects of Aqueous Equilibria	Chapter 17 (BLBMW)	
	Lab 7	<i>SWH #05</i> – Interactions of Acids and Bases	Lab Manual, p. 58	
	Lecture 7.2	Additional Aspects of Aqueous Equilibria cont.	Chapter 17 (BLBMW)	
	Discussion	MC Quiz; Redox Reactions & Oxidation Numbers	Chapter 20 (BLBMW); CA 48 & 49 (Moog & Farrell)	MC Online Homework Week 07; <i>SWH #04</i> Write-up

Date (Week)	Session	Topics	Resources & Practice	Assignments Due
Week 08: Mar 04-08	SPRING BREAK – NO CLASS SESSIONS			
Week 09: Mar 11-15	Lecture 9.1	The Electrochemical Cell & Cell Voltage	Chapter 20 (BLBMW); CA 50 & 51 (Moog & Farrell)	
	Lab 9	<i>Lab Problem #03 – pHun is pHinding pK_a</i>	Lab Manual, p. 64	Pre-lab assignment
	Lecture 9.2	Applications of Redox Reactions	Chapter 20 (BLBMW)	
	Discussion	MC Quiz; Introduction to Chemical Thermodynamics & Entropy	Chapter 19 (BLBMW); CA 52 & 53 (Moog & Farrell)	MC Online Homework Week 09; SWH #05 – Write-up
Week 10: Mar 18-22	Lecture 10.1	Entropy Changes in Chemical Reactions; Gibbs Free Energy	Chapter 19 (BLBMW); CA 54 (Moog & Farrell)	MC Online Homework Week 09
	Lab 10	<i>Lab Problem #03 – pHun is pHinding pK_a (cont.)</i>	Lab Manual, p. 64	Pre-lab assignment
	Lecture 10.2	Equilibrium & Thermodynamics	Chapter 16 (BLBMW); CA 55 & 56 (Moog & Farrell)	
	Discussion	TEST 02		
Week 11: Mar 25-29	Lecture 11.1	Rates of Chemical Reactions (II)	Chapter 14 (BLBMW); CA 57 (Moog & Farrell)	

Date (Week)	Session	Topics	Resources & Practice	Assignments Due
	Lab 11	SWH #06 – What Makes a Solution Produce a Solid?	Lab Manual, p. 65	Lab Problem #03 Report & Pre-laboratory assignment
	Lecture 11.2	Integrated Rate Laws; MC Quiz	Chapter 14 (BLBMW); CA 58 (Moog & Farrell)	MC Online Homework Week 11; SWH #06 Write-up
	03/29 - EASTER HOLIDAY – No Class Meeting			
Week 12: Apr 01-05	Lecture 12.1	Reactions Mechanisms	Chapter 14 (BLBMW); CA 59 (Moog & Farrell)	
	Lab 12	SWH #07 – Decomposition: Chemical Breakdown	Lab Manual, p. 69	Pre-laboratory assignment
	Lecture 12.2	Reactions Mechanisms cont.	Chapter 14 (BLBMW); CA 60 & 61 (Moog & Farrell)	
	Discussion	MC Quiz; Activation Energy & Catalysis	Chapter 14 (BLBMW); CA 62 (Moog & Farrell)	MC Online Homework Week 12; SWH #06 Write-up
Week 13: Apr 08-12	Lecture 13.1	Earth's Air & Water	Chapter 18	
	Lab 13	<i>Lab Problem #04 – The Need for Speed</i>	Lab Manual, p. 72	
	Lecture 13.2	Earth's Air & Water	Chapter 18	
	Discussion	MC Quiz; Nuclear Energy & Radiation	Chapter 21	MC Online Homework Week 13

Date (Week)	Session	Topics	Resources & Practice	Assignments Due
Week 14: Apr 15-19	Lecture 14.1	Hydrocarbons	Chapter 24	
	Lab 14	<i>Lab Problem #05 – Drip, Drip, Drip</i>	Lab Manual, p. 73	Lab Problem #04 Report
	Lecture 14.2	Functional Groups & Chirality	Chapter 24	
	Discussion	MC Quiz; Polymers	Chapter 12/24	MC Online Homework Week 14
Week 15: Apr 22-26	Lecture 15.1	Semester Review		
	Lab 15	Final surveys & assessments; clean-up and check-out		Lab Problem #05 Report
	Lecture 15.2	Semester Review		
	Discussion	Semester Review; Post-course surveys & assessments		
Exam Week: Apr 30- May 08	Friday, May 03, 1-3 pm	FINAL EXAM, Cuneo 210
