

# Intro to OpenSciEd: ES and MS

August 13-14, 2026

## NEW TO OPENSCLIED? START HERE!

Join us for this two-day OpenSciEd experience intended for K-8 science teachers, coaches, and administrators who are interested in strengthening NGSS-aligned instruction through high-quality instructional materials (HQIM). Participants will explore how OpenSciEd supports student-centered teaching and learning by engaging students in making sense of and explaining real-world phenomena. Across both days, educators will participate in core OpenSciEd instructional routines and pedagogies, collaborate with peers and instructional coaches, and take a close look at a grade-level-specific OSE unit to begin planning for meaningful classroom implementation.

**Units highlighted:** Launch unit for each participating grade level (indicate on registration)

**Experience lessons from an OpenSciEd unit**

**Learn how you can use OpenSciEd in your classroom**

**Connect with other science educators**

### WHEN?

Thursday, August 13 - Friday, August 14  
9 am - 3 pm

### WHERE?

Loyola University Chicago, Lakeshore Campus

### WHAT?

10 CPDU hours (must attend both days)  
\$250 (discount available for school teams)
