TEACHER PREPARATION PROGRAMS
SCHOOL OF EDUCATION
Loyola University Chicago

Program Director:

Ann Marie Ryan, PhD
aryan3@luc.edu
312/915-6232

Faculty Coordinator of
School and Community Partnerships,
Teaching and Reform:
Vesna Cejovic, Ed.D.
mailto:cejovi@luc.edu
312/915-7402

The office of Student Academic Services assists undergraduate and graduate students in teacher preparation by providing the following services:

- Academic Advising
- Program Information
- Teacher Licensure Endorsement
- Add/Drops
- Graduation

Dr. Janet Pierce-Ritter,
Associate Dean for Student Academic Services
WTC: Room 1126- jpierce@luc.edu

Robbie Jones
Academic Advisor for Student Academic Services
WTC: Room 1157- rjones7@luc.edu

Updated – March 2013
School of Education Mission

The School of Education at Loyola University Chicago, a Jesuit and Catholic urban university, supports the Jesuit ideal of knowledge in the service of humanity. We endeavor to advance professional education in the service of social justice, engaged with Chicago, the nation, and the world. To achieve this vision, the School of Education participates in the discovery, development, demonstration, and dissemination of professional knowledge and practice within a context of ethics, service to others, and social justice. We fulfill this mission by preparing professionals to serve as teachers, administrators, psychologists, and researchers; by conducting research on issues of professional practice and social justice; and by partnering with schools and community agencies to enhance life-long learning in the Chicago area.
Who are we as a School of Education?

Collectively we are students, faculty, and staff. Our lives are diverse and complex, but we share our Loyola experience together. This is a special time and place for each of us to participate in the community that is Loyola’s School of Education. Our Loyola community focuses its energies on building teachers and other professionals who will go on to build socially just careers. Many of the more advanced students and the faculty are engaged in the generation of theory to better understand the role of education in a just society.

Our students are both participants in our Loyola community and products of that community. We believe that students choose to join because of the values that distinguish us from other universities’ programs. Our value base arises from Jesuit heritage. The first characteristic of Jesuit teaching is the sense of being "persons for others," a profound caring for every person and compassion that guides one’s acts. We seek to prepare students whose careers will be guided by such caring, who have reflected on their actions with being “persons for others” in mind, and who consider what is just as they make life choices. The expression of caring for others cannot be only for our friends and families, but must truly be for all of humankind and most especially for those who are poor or suffering. A valuing of human diversity and a profound respect for the beliefs of others underlie a life lived for others.

We believe a fundamental element of being just includes bringing not just competence, but excellence, to one’s work. In order to care for others and to live for others, one must continuously strive to be as good at one’s work as one can possibly be. Thus, we expect our students to aim for excellence and for lifelong intellectual growth. Students should expect excellence in the instruction they receive in our community and should model excellence in the teaching or treatment of the persons they serve. The just society we strive to achieve offers each child and their family the finest possible teaching or service.
These complimentary ideas link to form the School of Education’s conceptual framework:

**Professionalism in Service of Social Justice.** This framework, in turn, links each of the programs of the School of Education together in fundamental ways. However varied these programs may be, the conceptual framework holds all of them together and moves them forward with a shared purpose. Students in any of our School of Education programs should experience that shared purpose in four particular dimensions:

- **Service:** Our programs emphasize service to others. We expect students to reflect on this notion throughout their academic careers. It is not enough to assume that teaching or counseling is a service to others. Indeed, if poorly done or done with the wrong motivations, neither may be a service to others at all. A commitment to service implies a lifetime commitment of reflection on each possible decision: how does my action serve others?

- **Skills:** Professionalism implies pride in the quality of one’s work. Professionalism implies practice in the use of relevant skills to the point of obtaining a level of expertise. Professionalism implies having varied skills and being able to choose what skills to use based on students’ or clients’ needs. In that sense, a professional can never have “enough” skills and strives to be a lifelong learner. It is clear that the skills of any profession must include competence with rapidly changing technologies as well as the competencies of the profession.

- **Knowledge:** Just as professionals must have skills, they must also have knowledge. They must be able to benefit from all of the research and practice that has gone before them and use that knowledge to make reasoned decisions about their actions. One’s depth of knowledge must far exceed the minimum for competent functioning. For example, a teacher must know his or her subjects in such great depth as to be able to answer a range of student questions. A counselor must know which treatment approaches are likely to be successful for clients with diverse needs. Scholars and researchers must use their expertise in the service of others.

- **Ethics:** No amount of knowledge or skills alone can make one into a professional who is a “person for others.” Both knowledge and skill must be tempered with a capacity to make reasoned decisions about what is just. Development of a professional ethical sense is essential to Loyola’s learning community. We expect all members of our community to be lifelong learners about the complex issues of what is right.

---

*Make service your first priority, not success, and success will follow.*

*Only those who have the patience to do simple things perfectly ever acquire the skill to do difficult things easily. Author Unknown*

*Those that know, do. Those that understand, teach. Aristotle*

*The probability that we may fail in the struggle ought not to deter us from the support of a cause we believe to be just. Abraham*

*The probability that we may fail in the struggle ought not to deter us from the support of a cause we believe to be just. Abraham*
Here are some articles and books you may wish to read to gain a better understanding of Loyola's conceptual framework:

PURPOSE OF PRACTICUM

Practicum is the culminating experience of the Loyola University education program. The capstone of the pre-service teacher’s preparation is guided practice in the actual activity of teaching. Practicum gives the teacher the opportunity to join the worlds of theory and practice and to develop an individual teaching style. Those engaged in practicum are closely monitored by a cooperating teacher at the school site and supervised by a university supervisor. College of Education faculty also monitor the student’s progress as they implement the Impact on Student Learning project.

Knowing that open and clear communication is imperative to the practicum student’s success, Loyola University has developed a Practicum Triad Model. The practicum student, university supervisor and cooperating teacher are the integral members of this triad. The university supervisor and cooperating teacher, collectively, bring to the practicum student years of experience. Using this experience, these two triad members have a professional responsibility to aid in developing the professional identity of the practicum student. This is only possible through continual formal and informal dialogue, both written and verbal, by all members of the triad. The practicum student has a responsibility to listen carefully to the feedback given and to be reflective about their own practice with the goal of improved instruction and professional development.
OBJECTIVES OF THE PRACTICUM

Special Education

The Loyola University program is designed to help practicum students perform in a competent and professional manner and to demonstrate specific knowledge, skills, and dispositions. The practicum student in special education will:

- Derive a philosophy of education appropriate for learning in a democratic society;
- Create a classroom environment conducive to learning;
- By applying the principles of Universal Design for Learning (CAST), adjust the teaching-learning process to the students’ needs, abilities and backgrounds;
- Plan lessons with measurable objectives (ISBE, CEC) and accompanying procedures for meeting the needs of large groups, small groups and individuals;
- Demonstrate the ability to interpret test results presented at the time students are identified as qualifying for services under IDEA;
- Develop IEP goals/benchmarks in response to formal test results;
- Monitor students’ progress related to IEP goals;
- Demonstrate the ability to accommodate the general education curriculum to the needs of students with learning differences;
- Demonstrate a thorough command of the subject matters taught in classrooms;
- If working in an inclusive setting, demonstrate the ability to co-teach with general educators;
- Use both informal and formal evaluation techniques- including curriculum based measures- to measure pupil growth in relationship to stated objectives;
- Using informal and formal data, do frequent progress monitoring to determine if learning goals/objectives or teaching methods need to be altered;
- Identify potential behavioral or social issues that need to be addressed, collect data related to these issues, and develop a plan to intervene;
- Identify and teach social skills to whole class or individual students;
- Establish effective relationships with pupils, staff (including paraprofessionals), parents, and citizens of the community;
- Enable and empower students to believe in their ability to learn and to meet personal goals;
- Contribute to school-wide PBIS and RTI goals/strategies;
- Contribute to the IEP process, including attending IEP and parent meetings;
• Identify strengths and weaknesses in facilitating the teaching-learning process;

• Perform all duties required of professional teachers in the school district of placement.

• Advocate for students and families and strive to insure that the federal law related to the service of students with learning differences be properly implemented.
RESPONSIBILITIES OF THE UNIVERSITY SUPERVISOR

To the Practicum student:

- Become acquainted with the practicum student s/he is supervising.
- Observe and visit the practicum student a minimum of five times. The first visit is introductory in nature. The remaining four visits involve observation of a planned lesson/providing feedback and suggestions for improvement to the practicum student.
- Supervise the practicum student for at least one entire instructional lesson per formal observation – date and time to be prearranged with the practicum student.
- Provide the practicum student with concrete pedagogical recommendations through post-observation conferences and written evaluations for each observation.
- Formatively evaluate the practicum student.
- If necessary, provide a remediation plan and feedback on the student’s progress as they implement the plan.
- Summatively evaluate the practicum student through a mid-term evaluation and a final evaluation.
- Determine a final grade for practicum after factoring in feedback from the cooperating teacher.
- Conduct seminars that will reflect on students’ experiences in the practicum placement, help to broaden students’ knowledge base, and enhance their growth as future teachers by placing an emphasis on the conceptual framework “Professionalism in Service of Social Justice.”

To the Cooperating Teacher:

- During the initial visit to the school, inform the cooperating teacher about the University requirements for the practicum experience, provide relevant paperwork, and contact information.
- Communicate frequently with the cooperating teacher to support and enhance the experience of the practicum student.
- Collaborate to develop a remediation plan if the student is experiencing difficulty.
- Collaborate with the cooperating teacher to formatively and summatively evaluate the practicum student using a mid-term and final evaluation.

To the Practicum Program:

- Meet the principal and the cooperating teacher in order to become knowledgeable about the school program prior to the first practicum student observation.
- Maintain practicum records and transmit them and the final grade to the Coordinator of Clinical Services.
- Immediately communicate with the Coordinator of Clinical Services any complications or problems involving a practicum student.
- Electronically submit final grades for the practicum using the LOCUS management system.
- Electronically submit to live text the results of the final practicum evaluation.
• Communicate regularly with the Coordinator of Clinical Services and assist in the evaluation and revision of the practicum program.

RESPONSIBILITIES OF THE COOPERATING TEACHER

To the Practicum student:

• Give the practicum student an opportunity to become familiar with the classroom, the facilities, the staff, and the policies of the school which includes but is not limited to:

  Tour of building, introduction to principal, parking procedures, meal options, library resources, print resources, technology resources, instructional materials availability, parent handbook, handbook of district-wide policies, student tardy and attendance policy, school grading procedures, and school calendar

• Model and provide a number of strategies for effective instruction and classroom management

• Provide for the smooth transition of the practicum student to full-time teaching later in the practicum experience by encouraging the student to engage in:

  One-to-one tutoring, small group instruction, short classroom discussions, team teaching with the cooperating teacher, supervising the work of pupils during independent study time, assisting in the organization and preparation of instructional materials, developing bulletin boards and instructional displays, making use of technology, correcting and grading student work, recording grades, becoming involved in administrative tasks, and interacting with other faculty members, support staff, and the families of their students.

• Observe the practicum student frequently, arranging to see all subjects/periods for which the practicum student is responsible, offering both verbal and written feedback after each observation

• Encourage the practicum student to try their own ideas – not to be a “carbon copy” of the cooperating teacher

• Communicate daily with the practicum student, providing feedback on lesson plans, teaching, and classroom management

• Schedule weekly, more formal, conferences with the Practicum student, assuring on-going communication regarding the student’s strengths and weaknesses

• Enhance the developing professionalism of the practicum student by including them in non-teaching functions such as staffings, parent conferences, in-service activities, etc.

• Schedule feedback conferences as soon as possible after an observation is completed. The conference should include the free flow of ideas and foster an objective analysis of the development and improvement of the Practicum competencies

• Complete two formal evaluations, one at mid-term and the other at the conclusion of the practicum. Provide the results to the university supervisor, attempt to reach a consensus regarding the feedback that will be presented to the practicum student, and help to present the feedback to the practicum student
To the University Supervisors:

- Communicate frequently with the university supervisor to support and evaluate the practicum student’s performance
- Immediately communicate any concerns or problems about the practicum student to the university supervisor
RESPONSIBILITIES OF THE PRACTICUM STUDENT

Pre-requisites:

- **Criminal Background Check for Certification** Loyola University Chicago (LUC) requires that prior to their initial field or practicum/internship experience in the schools, all candidates for Illinois certification submit to a state criminal background fingerprint check by the Illinois State Police. This is consistent with the state law that requires Illinois school districts to conduct criminal background investigations of applicants for certified and non-certified positions. Recently the Chicago Public Schools began requiring the federal/FBI criminal background check in addition to the state check. A candidate whose background check results in a status of "no record" may be placed in the schools. Loyola University Chicago will not accept criminal background check reports from sources other than Arts Investigation.

- **Current TB test** Students must obtain a TB test that is current enough that it does not expire during the term of the practicum placement. TB tests are valid for one year.

- **Additional paperwork** Districts and individual school periodically revise their requirements for paperwork required of practicum students. It is the responsibility of the individual practicum student to confirm with their placement school or district all required paperwork.

- **Passed Basic Skills Exam**

- **Passed Content Exam(s): LBS1**

- **Education Curriculum Test K-12, and APT K-12 Test**

- **Completed required coursework /clinical hours**

**Professionalism and Ethics:** Students are expected to maintain a professional attitude in regard to all activities undertaken during the field experience including appropriate dress, speech, and personal habits. Particular care should be taken with the rights of privacy of children and parents. When a student is unsure of the procedure to be followed in a given situation, the student should consult first with the cooperating teacher. If the cooperating teacher is unavailable, the student should consult with appropriate administrative personnel. Except in the case of life-threatening emergency, a student should not contact an outside agency (police, social service, etc) without prior permission from school authorities.

**University Assignments:** Students must complete all assignments on time in order to complete the practicum sequence. Since most assignments require the student’s presence in a classroom, incomplete work is nearly impossible to make up and should be avoided. Additional site requirements may be added at the discretion of the cooperating teacher, i.e., lesson plan books, and when required should be regarded as university assignments.

**University Attendance Policy:** Practicum is a full-time experience. The practicum student is expected to maintain, at a minimum, the working hours specified by the local school district or agency for the cooperating teacher to which he or she has been assigned. This includes following the local school district or agency calendar during the entire assignment.

If due to an illness or emergency situation a practicum student cannot be present, the practicum student must contact the Cooperating teacher, university supervisor, and Coordinator of Clinical Services before the beginning of the school work day, preferably no later than the evening before. If an illness or emergency results in more than a two day absence, the university supervisor, Cooperating teacher, and the Coordinator of Clinical Services determine if additional practicum days are required.

**Practicum Seminars:** Practicum students are required to attend all seminars at Loyola. A student who fails to attend a seminar, whether the absence is excused or unexcused, is responsible for all announcements made and information given. It is not the responsibility of the University supervisor to see that the student who misses seminar is informed about what took place. Failure to attend a
seminar does not excuse a student from any deadlines. Assignment due dates are firm. Practicum students should consult their practicum seminar syllabus to check how many seminars, including group meetings, can be missed before the final grade for practicum is impacted.

**Practicum Placements:** Practicum placements are made by the Coordinator of Clinical Services. Under no circumstance are practicum students to call schools to make their own placements. Once a practicum placement has been confirmed by a school, students may not retract their placement unless they are willing to defer their practicum until the following fall/spring term. All students seeking licensure endorsement teach for the allotted time block, all day, every day. The practicum placement may be discontinued at any time by the School of Education for the following reason(s):

- Irresponsibility and lack of dependability by the practicum student
- Failure to successfully implement reasonable recommendations from the cooperating teacher and university supervisor.
- Emotional instability/physical illness which interferes with planning and teaching duties.
- Criminal behavior.
- Immoral/unethical conduct

The practicum assignment may be changed by the Coordinator of Clinical Services if personality conflicts develop which impede the student’s progress in learning to teach. A student who is removed from practicum may be given another placement in a subsequent semester, if the education faculty feel that s/he will perform her/his duties in a serious and professional manner. A student who is removed from a second placement for ANY reason will not be given another placement by the School of Education.

Grooming and Attire: Practicum students are expected to exercise good judgment in their grooming and personal appearance. They are expected to dress in a professional manner which conforms to the established dress code of the school/district in which they are placed. The cooperating teacher should be consulted during the pre-practicum visit to determine school/district policies regulating dress.

Responsibility for the Classroom: The cooperating teacher is a licensed teacher and has full responsibility for his or her students. The practicum student assumes responsibility for the classroom only under the supervision of the cooperating teacher. **THE PRACTICUM STUDENT IS NOT TO BE UTILIZED AS A SUBSTITUTE TEACHER DURING THE PRACTICUM ASSIGNMENT.** Practicum students in special education are not allowed to physically restrain students.

**SITE SELECTION**

Loyola University provides many excellent and diverse school settings, both public and private where students may student teach. The University enters into an agreement with a school district which is able to provide a quality experience for the student, including a rich multicultural environment. During the pre-practicum interview with University personnel, the practicum student may recommend a placement site. (A student, in general, is not placed in a school in which a relative or close associate is an employee or in a school from which the student has graduated). The degree to which students are able to control the location of practicum may vary as the demand for practicum placements and availability of excellent sites change. For students majoring in special education, the Coordinator of Clinical Services looks for school sites where professionals are working to implement inclusion for the widest number of students possible.
Criteria for Site Selection

- The practicum site meets all time requirements and other standards set by the Illinois State Board of Education and Loyola University for fulfilling the students teaching experience.

- The practicum site recognizes diversity across age, ethnicity, culture, and gender and is committed to providing staff and student development in these areas.

- A master teacher, with an appropriate Illinois teaching license and a minimum of three years teaching experience, is available to provide full-time on-site supervision.

- During the practicum experience, the student is afforded the opportunity to participate in educating disabled and non-disabled students together.

- Provision is made at the site for regularly scheduled meetings with the practicum student, on-site cooperating teacher, university supervisor, and other on-site staff as appropriate.

- The practicum site will provide opportunities for the practicum student, during the course of the semester, to assume the full teaching responsibilities of the cooperating teacher. Depending on the instructional arrangements that exist in the school, this might involve a student majoring in special education who initially shadows and then takes over the duties of a special educator who co-teaches in an inclusive setting or gradually taking over full responsibility for a small group of students in a self-contained setting.

RESPONSIBILITIES OF THE COORDINATOR OF CLINICAL SERVICES

The Coordinator of Clinical Services is responsible for developing and maintaining practicum sites in accordance with the philosophy and policies of the Elementary and Secondary and Special Education Teacher Education Programs. Input from university supervisors is an important source of information regarding potential and current sites. The responsibility for the decision to recommend a practicum student for a particular site rests with the Coordinator of Clinical Services.

The Coordinator of Clinical Services will:

- Schedule the pre-practicum interviews with Teacher Education personnel.

- Conduct an orientation meeting with practicum students during the term preceding the practicum experience.

- Initiate contacts, make placements and enter into agreements with officials in school districts/principals regarding all clinical placements.

- Correspond with practicum students regarding site placement.

- Regularly evaluate sites and provide feedback to the individual education programs so students will be provided experiences that meet the needs of each course.

- Keep students and faculty apprised of regulations regarding clinical experiences and practicum.
• Maintain and monitor a practicum file for each practicum student ensuring the related records are accurately completed and maintained.

• Issue one three-credit tuition waiver per student to the cooperating teacher. The waiver is subject to the conditions specified therein.

• Change or terminate a practicum student placement, for professional reasons, upon collaboration with the district/principal/university supervisor.

Guidance of students during practicum is the shared responsibility of all participants. The university supervisor interacts in a collaborative manner with the cooperating school administration and faculty.
Evaluation of Practicum

The midterm and final evaluation completed by both the cooperating teacher and university supervisor and on-going formal and informal feedback about the student’s performance provided by the cooperating teacher are a critical component in the evaluation process. The university supervisor meets with the cooperating teacher about their impressions and factors in that data when determining a final grade. If the assessment of the university supervisor and the cooperating teacher differ substantially, a meeting is held to determine what feedback will be presented to the student. Ideally both will meet with the practicum student and present a united front, as well as suggestions for improvement. If a remediation plan is developed, the student is asked to respond to the plan and to sign off on a written copy of the plan. Copies of the interim observation, midterm, and final evaluation instruments are included in this handbook.

Self-evaluation is a critical component of the practicum student’s experience. To identify specific strengths and to set specific goals for improvement in areas of weakness, the practicum student is expected to write weekly reflections and respond to any recommendations made by the university supervisor. When the university supervisor determines the final grade, they look for indications that the practicum student listened to constructive feedback and made an effort to implement changes in their teaching practice or the way that they relate to other professionals.

Keeping a journal or a diary of events and experiences during practicum including specific reactions and reflections is a course requirement. The journal is an ongoing narrative in which entries reflect the practicum student’s:

- Growth in understanding of her/his needs
- Development of strategies to deal with stress and burn out
- Insights regarding how to develop sound relationships with students, family members, cooperating teachers, and building personnel
- Development of teaching skills, including the ability to differentiate instruction
- Increased flexibility in dealing with daily occurrences
- Recognition and use of students’ interests, learning styles
- Awareness of the impact of community, culture and language in a diverse classroom
- Increased commitment to students and to the profession of teaching
List three experiences that you feel good about that occurred this week.
1. 
2. 
3. 

Describe an event this week where you know now, after reflection, that you would make a different decision. What would you do differently?

What did you learn about yourself as a teacher this week?

Although perhaps unaware of their influence, who helped and encouraged you the most this past week? (Your cooperating teacher? University supervisor? A student? A class? A school administrator?) Describe the experience.

Name one new or different opportunity you would like to have next week.
**Special Education Midterm/Final Evaluation**

**Practicum student:** __________________________
**Student ID#**________________________

**Date:**___________________________
**Time/Period:**_____________________________

**Observer/Supervisor:** __________________________
**Grade/Subject:**_______________

**Note to Observer:**
This form is used over the course of a semester to assess and record evidence of the various practices by a practicum student throughout his or her field experience.

Score each individual criterion and provide a culminating score for each Conceptual Framework Practice. Provide specific evidence and information to clarify or explain.

**Rating Scale:** Observer’s professional judgment of the qualities of the instruction:

3 = Target  2 = Acceptable  1 = Unacceptable

---

### A. Coherence

**IPTS 1C, 1H, 1J, 1K, 1L, 2H, 6L, 7A, 7E, 7F**  
**CEC 4, 5, 7**

<table>
<thead>
<tr>
<th>Use sub-categories above/overall rating</th>
<th>3 = Target</th>
<th>2 = Acceptable</th>
<th>1 = Unacceptable</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Plans for lessons include shorter range goals and objectives which are a part of a larger unit and contribute to deepening conceptual understanding, increasing skill, and/or developing independence and these connections are explained to students.</td>
<td>3</td>
<td>2</td>
<td>1</td>
</tr>
</tbody>
</table>
| 2. Directions and explanations are understandable, easy to follow, and promote positive learning results.  
  • Teacher uses flexible means of representation  
  • Provides a physical model or demonstrates without verbalization | 3 | 2 | 1 |
| 3. Transitions from one activity to the next are smooth and provide opportunities for students to understand why the new activity is important and how it relates to previous activities.  
  • Teacher uses direct motivational and instructional interventions, such as pre-correction for expected behaviors  
  • Some students might need additional prompts or opportunities to practice over time before a connection to previous activities would be made | 3 | 2 | 1 |

**Overall Rating of Coherence:**

3 = Lessons purposes and outcomes are clear and lessons are meaningful parts of a larger unit, with coherence and flow. Teacher clarifies these connections to students. Teacher gives clear instructions for students prior to transition and activities. Lessons and sections of lessons are connected by smooth, seamless transitions.

2 = Lessons have appropriate pacing and flow, with some connection to prior or subsequent learning. Instructions and transitions are effective.

1 = Lessons lack coherence and flow, may be fragmented with little or not connection to prior or subsequent learning. Instructions and transitions are rarely effective.
### B. Learner Responsiveness

<table>
<thead>
<tr>
<th>Sub-category</th>
<th>Description</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Teacher actively engages and challenges students by modifying the learning environment</td>
<td>Teacher uses strategies that provide/promote multiple opportunities to respond for all students (including both verbal and non-verbal modes of responding, i.e. student gazes at instructor, turns head to acknowledge stimuli, makes use of a switch to respond to a cue). Teacher uses flexible means of engagement and expression.</td>
<td>3 2 1</td>
</tr>
<tr>
<td>2. Teacher progress monitors all students’ activities and modifies the learning environment to encourage the development, maintenance, and generalization of knowledge and skills.</td>
<td></td>
<td>3 2 1</td>
</tr>
<tr>
<td>3. Teacher has a rapport with students, demonstrates respect for students by fostering environments in which diversity is valued and students demonstrate respect for the teacher and each other (e.g., teaching and acknowledging expected behaviors).</td>
<td></td>
<td>3 2 1</td>
</tr>
<tr>
<td>4. Teacher thoughtfully, systematically, and collaboratively adapts materials, assessment and instructional strategies to individualize instruction</td>
<td></td>
<td>3 2 1</td>
</tr>
</tbody>
</table>

**Overall Rating of Learner Responsiveness:**
3 = Lessons are consistently active, engaging and challenging for students. Teacher encourages students to think critically, while closely progress monitors student learning and behavior, intervening and/or redirecting students when appropriate. Strong rapport is evident between teacher and students, demonstrating mutual respect for each member of the classroom community (e.g., teaches expectations, acknowledges behaviors, and redirects misbehavior appropriately).
2 = Teacher provides students opportunities for engagement and/or challenge. Teacher almost always monitors and appropriately redirects when necessary student learning and behavior. Rapport between teacher and students is evident.
1 = Little evidence of student engagement or challenge. Teacher is perhaps unaware of student learning or behavior and/or does not address issues as necessary. Little rapport is evident.

**Overall Rating of Professionalism:**

3 = Teacher is highly professional in all aspects of teaching: preparation, time management, dress, language, classroom management, and content knowledge. I would be pleased and proud to teach with this student at my school in the future.

2 = Teacher is professional in most aspects of teaching: preparation, time management, dress, language, classroom management, and content knowledge. There may be one or more of these that are in need of continued attention and/or improvement. If improvements are made, this teacher would make a strong colleague.

1 = Teacher lacks professionalism in two or more of the following areas: preparation, time management, dress, language, classroom management, and content knowledge. I would have to be strongly convinced to choose to work with this teacher in the future.

**Comments:**

OVERALL SCORE _____/21 ON FINAL

*Student must score a minimum of 14 to complete partial fulfillment of practicum requirements.

Plans for Improvement for Midterm Evaluation:

- List specific areas of improvement necessary for successful completion of Practicum, including any areas receiving a score of “1.”
- Be sure to include specific actions the practicum student must take to show this improvement.
- Attach additional documents if necessary.

LESSON PLANS

Lesson Plan Guidelines: Successful teaching depends, in large part, on careful and well organized planning. An effective lesson plan should serve the teacher as a guide for clear direction and focus. Lesson plans can take many forms, but the most useful include specific objectives, sequenced procedures, and the materials that will be needed to accomplish the activities.

Experienced teachers have internalized the elements of effective teaching, and frequently no longer need to use detailed written plans for implementation of effective lessons. Practicum students, however, need the security of stating objectives and sequencing each procedure, often even listing each question to be asked or writing out an elaborate script in order to think through the language, or level of language, to be used when explaining a concept to children. Initially, practicum students should use the plans of their cooperating teachers, adding details needed so that their own implementation will be smooth and effective. When the practicum student begins to develop his/her own plans, there will necessarily be more detail than the plans typically done by an experienced cooperating teacher. When the practicum student develops security in presentation and when the cooperating teacher and the university supervisor indicate that a certain level of readiness has been observed, the practicum student may choose to complete less detailed lesson plans. Two different lesson plan forms are provided in this handbook. The first is the template that is used by most of the general education students at Loyola. The second is a UDL (Universal Design for Learning) template that we recommend for students majoring in special education.

The following suggestions regarding lesson planning should be helpful:

- Before a lesson is taught, written plans should be reviewed with the cooperating teacher and any suggestions for change or improvement should be completed.

- At the end of each day, practicum students should take the time to reflect upon and evaluate performance. It is often useful to make notes on the original plan.

- Seek suggestions and comments from the cooperating teacher and university supervisor.

- Keep all plans organized in a folder or ring binder.

Suggested Procedures in Assuming Lesson plan responsibility: As an assistance to the practicum student, the following procedure is suggested for writing lesson plans:

- During week two and three of the practicum placement, the practicum student plans with the cooperating teacher while gradually assuming 25% of the cooperating teacher’s responsibilities.

- During week 4 and no later than week five, the practicum student begins planning an entire week of lessons on his or her own, consulting with the cooperating teacher prior to the Friday morning deadline. The lessons may relate to a series of classes where the practicum student is co-teaching or for a number of students in a self-contained setting.

- During the remaining weeks of the assignment, the practicum student continues to plan independently and confers with the cooperating teacher regarding the lesson content.
Two formats for lesson planning are provided in this handbook. The first is more generic and is used by general education majors at Loyola. The second is called the UDL template and is required for all special education majors. College of education faculty in special education believe that the use of the UDL template as a planning guide should eventually be used by all educators to insure that there is maximum flexibility built into all plans.
LESSON PLAN FORMAT

Practicum student_______________________ Date_________________________

Lesson Topic__________________________ Grade Level___________________

Estimated Time________________________

• Anticipatory Set/Readiness:

• Objectives: (ISBE, INTASC, LBS1)

• Materials: (Hand-outs, hands-on, tests, etc.)

• Technology Integration:

• Procedures: (List questions/provide a script and use Bloom’s Taxonomy to identify type)
• Closure:

• Evaluation (How well did the lesson go? What are the results of informal or formal testing of objectives? How did I do?):
UDL Lesson Template

**Goal(s):** (What is the overall purpose for the learning and teaching that will happen in this lesson? What are the overarching questions that you want the learner(s) to be able to answer? Essential questions should be big, global in scope, important, challenging, and interesting to the learner)

**Objectives:** (What do you want the learner to know and be able to do? How is the lesson tied to Illinois State Content Standards or Social/Emotional Learner Standards or an individual student’s IEP goals and objectives?)

**Description of Learner(s):**
- **Entry Behaviors** (What skills/concepts have the learner(s) already mastered that are associated with the objectives of the lesson? What pre-assessment did you do in order to determine the answer to the above questions?)

- **Prior Knowledge:** (What does the student(s) know about the content that you plan to teach? What did you do in order to determine the answer to this question?)

- **Education and Ability:** (What are the achievements and general ability levels of your learner(s) that might have an impact on the success of the lesson?)

- **Learning Preferences:** (What are your learners’ learning preferences?)

- **Group Characteristics:** (What are the overall differences or levels of heterogeneity in the group being targeted?)

- **How will you consider the above information as you create the anticipatory set for the lesson? How will you hook the student, pre-teach, assess, create relevance or interest?**

**Learning Environment:**
- **Social/Physical Aspects:** (Describe or list the features of the environment which may affect instruction)
Relevance: (Do the skills/knowledge you will teach have application for learners in others context? Which ones?)

Adaptability and Accessibility: (Given what you know about the learner(s) and the context for instruction, how can you increase accessibility to knowledge/skills? How can you provide flexible means of presentation, flexible means of expression and apprenticeship, flexible means of engagement?)

Materials:

Procedures to Be Followed: (Say very specifically what both you and the student will do. Include an explicit script for what you will say once you have carefully considered the language level and approach you will use. Consider including teacher modeling, guided practice, independent student practice)

Closure: (Wrap everything up. Summarize what was accomplished. Ask students to give feedback about what is still difficult or what they accomplished)
**Assessment:** (Did I meet my initial objectives? Do I need to reteach or change my goals? What will I do to answer these questions?)

**Reflection and Next Steps:** (What did I learn? How did I do? Is there anybody I need to consult or questions I need answered? What is the next step?)
Practicum candidates seeking a teacher licensure endorsement through the School of Education at Loyola University Chicago must complete the Impact on Student Learning Project and the Professional Practice Profile. Completion of these culminating activities demonstrates expertise both in content and pedagogy, as well as reflection on clinical and classroom experiences. The purpose of these products is to demonstrate evidence of professional competence in university, state, and national professional teacher preparation standards.

Members of the Teaching and Learning Faculty will evaluate both products to determine whether a candidate can be approved for licensure. The Impact on Student Learning Project is submitted through LiveText at the same time that the Professional Practice Profile is submitted.

The Impact on Student Learning Project consists of five sections: educational context; unit learning goals, standards, and learning objectives; assessment plan; assessment and analysis of learning outcomes; and reflection on teaching and learning. Each of these is detailed below.

NOTE: All practicum candidates are required to submit a proposal of their instructional unit to an assigned faculty assessor PRIOR to the implementation of their instructional unit.

Proposal submission: Using the Impact on Student Learning Project Proposal Template, submit information regarding your project to your faculty advisor using your Loyola email account. Your faculty assessor will provide comments in the faculty comments boxes and return the form to you. Once approved, you may move forward with your Impact on Student Learning Project.
Impact on Student Learning Project Options

You are required to teach/implement one of the following: a) whole class instructional (academic/social) unit, b) small group instructional (academic/social) unit, or c) individual academic/behavioral intervention.

The goals and objectives should align with Illinois State Content Standards, Social/Emotional Learning Standards, and/or Individualized Education Program (IEP) Goals. You will also need to create an assessment plan designed to measure student performance before (pre-assessment) and after (post-assessment) your unit/intervention. Additionally, your assessment plan should include formative and/or progress monitoring (e.g., Curriculum-Based Measures, on-going direction observation) assessments. Finally, you need to analyze and reflect on your instructional design, educational context, and degree of learning gains demonstrated by your student(s).

Educational Context

Candidates should clearly and thoroughly describe the contextual factors relevant to instructional/intervention planning. Candidates should demonstrate knowledge of students’ varied approaches to learning, students’ skills and prior learning, and classroom, school and community factors affecting student learning. There should be a logical connection between the relevant factors described and your instructional/intervention planning. Use information summarized in the Classroom, School, and Community Environment section of your Proposal Template, as well as evidence drawn from your pre-assessment to support your decisions.

The suggested page length for this section is 2 pages.

Unit Learning Goals, Standards, and Learning Objectives

Candidates should write clear, developmentally appropriate learning goals aligned with state and/or national standards. Candidates also need to develop clear, developmentally appropriate learning objectives.

Learning goals are statements that give a broad description of what students will learn, and should be aligned with state and/or national standards. Candidates need to clearly identify the standards addressed.
by the unit. It is important that your learning objectives are statements describing the specific performance the learner will be able to do after completion of a unit or part of the unit. See Glossary for examples of learning goals, standards, and learning objectives.

The suggested page length for this section is 1 page.

Assessment Plan

Candidates should align learning objectives directly with their pre- and post-assessments. The plan should describe how assessments are congruent with the levels of learning within the cognitive, affective, or psychomotor domains. In essence, if you write a learning objective using verbs associated with the synthesis level of cognitive processing, the items on your post-assessment should measure that same level of processing. Your pre- and post-assessments should align (i.e., they do not have to be the same). It is important that your assessments generate information suitable for analysis in a pre- vs. post-assessment manner. The assessment plan should also clearly describe how and what types of formative assessments were used during your instructional unit.

The suggested page length for this section is 2 pages.

NOTE: Consider reviewing your proposal template and your faculty assessor’s feedback while completing the first three sections of the Impact on Student Learning Project.

Assessment and Analysis of Learning Outcomes

Candidates can use a variety of methods for analyzing data and reporting outcomes such as, basic statistical techniques (e.g., mean, mode, median) to analyze data, changes in rubric categories from pre- to post-assessment, qualitative description of changes in student performance, or comparing feedback on rough drafts to feedback on final paper.

Regardless of the type of Impact on Student Learning Project you complete, candidates must analyze data on at least two levels. Suggestions for two levels of analysis include: whole group pre- vs. post-assessment results, students with IEPs vs. students without IEPs, students with IEPs by category, students who are male vs. female, students with disciplinary concerns, students who varied on pre-
assessment performance (lowest and highest) vs. performance on post-assessment. Suggestions for individual academic/behavior interventions include: case study analysis comparing baseline to intervention, student level of performance vs. normative/typical comparison peer, descriptive summary of progress monitoring data, or correlation between academic and behavioral performance levels. It is important that your interpretation (i.e., your analysis) of the learning results is meaningful and appropriate.
Candidates should summarize evidence of the impact on student learning in terms of how many students met the learning objectives. Summaries of all analyses must be depicted graphically and should be inserted into the text of this section.

The suggested page length for this section is 3-4 pages.

### Reflection on Teaching and Learning

Based on the evidence of student learning, candidates should identify insights on effective instruction and assessment. Candidates should draw conclusions based on the Assessment and Analysis of Learning Results section, as well as research and theory. In the discussion of student learning and effective instruction, candidates should make logical connections between the learning goals and learning objectives, instruction, and assessment results. Consider including in your reflection reasons for the levels of performance on your post-assessment (e.g., Were there items on which students performed better or worse? Were learning objectives appropriate given students prior knowledge, motivation, learning styles?)

Candidates should reflect on the implications for future teaching, as well as implications for professional development.

The suggested page length for this section is 3-4 pages.

*NOTE: We gratefully acknowledge the following universities for their willingness to share their work with us.*

*Bagwell College of Education, Kennesaw State University, Kennesaw, GA*

*The Teachers College at Emporia State University, Emporia, KS*

*The Education Department at Augustana College, Sioux Falls, SD*
#1 Content Knowledge
The teacher understands the central concepts, methods of inquiry, and structures of the discipline(s) and creates learning experiences that make the content meaningful to all students.

#2 Human Development and Learning
The teacher understands how individuals grow, develop, and learn and provides learning opportunities that support the intellectual, social, and personal development of all students.

#3 Diversity
The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to diverse learners.

#4 Planning for Instruction
The teacher understands instructional planning and designs instruction based upon knowledge of the discipline, students, the community, and curriculum goals.

#5 Learning Environment
The teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

#6 Instructional Delivery
The teacher understands and uses a variety of instructional strategies to encourage students’ development of critical thinking, problem solving, and performance skills.

#7 Communication
The teacher uses knowledge of effective written, verbal, nonverbal, and visual communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.

#8 Assessment
The teacher understands various formal and informal assessment strategies and uses them to support the continuous development of all students.

#9 Collaborative Relationships
The teacher understands the role of the community in education and develops and maintains collaborative relationships with colleagues, parents/guardians, and the community to support student learning and well-being.
#10 Reflection and Professional Growth
The teacher is a reflective practitioner who continually evaluates how choices and actions affect students, parents, and other professionals in the learning community and actively seeks opportunities to grow professionally.

#11 Professional Conduct
The teacher understands education as a profession, maintains standards of professional conduct, and provides leadership to improve student learning and well-being.
Impact on Student Learning Project  
Proposal Template

Practicum Candidates: Please submit the following information regarding your Impact on Student Learning Project to your faculty advisor using your Loyola email account. Your faculty assessor will provide comments in the faculty comments boxes and return the form to you. Once approved, you may move forward with your Impact on Student Learning Project.

### Classroom, School, and Community Environment

#### Classroom

1. What is the grade level you are teaching and how many students are enrolled in the class?

2. How many students in your classroom are in each of the following demographic categories?

   - _____ student(s) with _____ student(s) with _____ student(s) IEPs
   - _____ student(s) with 504 plans
   - _____ student(s) who are ELL
   - _____ student(s) meeting grade level expectations
   - _____ student(s) exceeding grade level expectations
   - _____ student(s) below grade level expectations
   - _____ student(s) who are male
   - _____ student(s) who are female
   - _____ other:

3. Does the classroom environment allow for the following groupings? (check all that apply)
whole class  small groups  individual
peer  heterogeneous grouping
teaching
other:

4. What resources are available for you to use in the classroom environment? (check all that apply)
textbooks  manipulatives  technology
other:

5. What additional support is available to you in the classroom? (check all that apply)
educational assistants  resource teachers
peer tutors  parent volunteers
other:

6. Describe the physical organization of your classroom.

7. Describe the classroom management approach (i.e., philosophy and strategies) used by your cooperating professional?

8. What types of instructional methods are typically used by your cooperating professional?

9. What assessment approach (i.e., philosophy and strategies) is typically used by your cooperating professional?

School
Most of the data requested below can be found on your district website, the Interactive Illinois Report Card website (http://iirc.niu.edu/), or by asking your cooperating professional or building administrator.

1. What percent of students in your school are identified in each of the following demographic categories?
   _____ American Indian or Alaska Native   _____ Asian
   _____ Black or African American       _____ Hispanic or Latino
   _____ Native Hawaiian or Other Pacific _____ White

Islander

2. What percent of students in your school are classified as receiving free/reduced lunch?

3. What are the average attendance rates for each of the following demographic groups?
   _____ students   _____ teachers
   _____ parents at school events (e.g., open house)

4. Describe the schools’ approach to differentiation on a school-wide level.

Community

1. What community resources (outside the school) are available to school personnel and students in your school?
Reflection on Classroom, School, and Community Environment

1. Given the data identified above, how will this inform the planning of your instructional unit?

FACULTY ASSESSOR COMMENTS:

Unit Instructional Planning

In the table below, answer the following questions:

1. What is the goal for the unit?
2. What learning standards (e.g., State (ISBE) and/or National) align with your goal?
3. What are the learning objectives for your goal?
4. For each learning objective, describe how your assessment measures what students have learned.

*NOTE: Please keep the maximum number of learning objectives to three per unit goal. You may have fewer than three learning objectives. You may also consider having a second unit goal, in which case you should use the same table format to summarize your answers relevant to the second goal.*

<table>
<thead>
<tr>
<th>Goal:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Learning Standard(s):</td>
</tr>
</tbody>
</table>
5. Identify the formative assessments that will be used during your unit.

6. How do these formative assessments support your learning objectives for the unit?

7. Provide a unit calendar with the schedule for lessons and assessments.

| Project Clarity and Conventions | Candidate’s project is well-written and of collegiate level. The author's ideas, as written, are clear, compelling, and original. | Candidate’s project is of collegiate level. There is a clear beginning, middle, and end. The essay flows nicely from one idea to the next. | The candidate’s project is below collegiate level. It is unstructured and unclear. |

| Grammar and Spelling | The candidate’s project is free from grammar and spelling errors. | The candidate’s project has a few grammar and spelling errors. | The candidate’s project is riddled with grammar and spelling errors. |

| Overall Assessment | TARGET | ACCEPTABLE | UNACCEPTABLE |

**Decision Rules**

- 16 Target Ratings without an Unacceptable Rating = Target
• 5 or More Unacceptable Ratings = Unacceptable

• All Other Rating Combinations = Acceptable

**Resubmission Guidelines**

• Unacceptable Ratings for any components within the Assessment and Analysis of Learning Results or Reflection on Teaching and Learning warrants resubmission of those components.

• Resubmissions are submitted directly to the faculty assessor, whose discretion it is to determine when performance reaches acceptable.

• Assessment rubric is completed only once. Resubmissions do not get re-assessed in LiveText.

**Comments:**

Based on the content of the candidate’s Impact on Student Learning project, the student ___________________________ (has met / has not met) the requirements set out by the faculty of the Loyola School of Education.

Faculty Member: ___________________________ Date: ______________
Students seeking teacher licensure endorsement through the School of Education at Loyola University Chicago must complete the Professional Practice Profile and the Impact on Student Learning Project. Completion of these culminating activities demonstrates expertise both in content and pedagogy, as well as reflection on clinical and classroom experiences. The purpose of these products is to demonstrate evidence of professional competence in university, state, and national professional teacher preparation standards.

Members of the Teaching and Learning Faculty will evaluate both products to determine whether a candidate can be approved for licensure endorsement. The Profile is submitted through LiveText at the same time that the Impact on Student Learning Project is submitted.

The Professional Practice Profile consists of two components. This includes an essay on the conceptual framework of the School of Education, *Professionalism in Service of Social Justice* and a reflection on collaborative relationships in education. Each of these is detailed below.

### Essay on the Conceptual Framework

Your essay should be a reflective statement on Loyola University Chicago’s School of Education’s conceptual framework: *Professionalism in Service of Social Justice*. The essay should address what it means to be an educator in service of social justice and the critical areas of service, skills, knowledge and ethics.

In this essay, you will need to share anecdotes from your clinical experiences in schools and communities, practicum, and coursework at Loyola that have helped you develop an understanding of the conceptual framework and how it has influenced your beliefs and actions as a teacher.

Your essay needs to address the following questions:
- What does it mean to be an educator in service of social justice?
- Why are the areas of service, skills, knowledge and ethics critical?
to advancing social justice through education?
• What issues of social justice and inequity have been raised by your clinical experiences in schools and communities and your coursework at Loyola?
• What are the implications of the conceptual framework for your work as a teacher in the future?

This essay assesses the following standards from the conceptual framework:

CF 3: Candidates demonstrate an understanding of issues of social justice and inequity.

CF 7: Candidates demonstrate how moral and ethical decisions shape actions directed toward service to others.

Reflection on Collaborative Relationships

Your essay should be a reflective statement that demonstrates your understanding of the role of the community in education and your development of collaborative relationships with colleagues, parents/guardians, and the larger community to support student learning and well-being.

Your essay needs to address the following questions:

• What impact does the school community – students, parents/guardians, teachers, staff, and administrators – have on the educational environment of a school and student learning?
• What impact does the larger community – residents, organizations, institutions and local businesses – have on the educational environment of a school and student learning?
• Describe several significant activities and relationships (positive and/or negative) that you have engaged in during your time in the School of Education. These experiences might include, but are not limited to, service learning projects, after-school tutoring, committee membership, working with parents, extra-curricular duties, etc.
  o How did these experiences influence your understanding of the role of collaborative relationships in education?
  o What are the implications of collaborative relationships with the school community and the larger community for your work as a teacher in the future?

This essay assesses the following standard from the Illinois Professional Teaching Standards:
IPTS 9: The teacher understands the role of the community in education and develops and maintains collaborative relationships with colleagues, parents/guardians, and the community to support student learning and well-being.

Comments:

Based on the content of the candidate's professional profile, I _______________________
(do / do not) recommend the student for licensure endorsement.

Faculty Member: __________________________ Date: __________________________
APPLYING FOR YOUR LICENSURE ENDORSEMENT

The Illinois State Board of Education has moved to a web based system for processing credentials through the “Educator Licensure Information System (ELIS)”, www.isbe.net/elis. In addition to initial licensure, this system will be a way for you to monitor and update your credentials and to use as a means to communicate with district administrators regarding your valid credentials. You can establish your educator’s account at anytime.

The instructions for completing the initial process are explained on the form used for submission (see below). All initial licensure MUST be first processed by the Licensure Officer of Loyola University Chicago. You do not submit any paperwork to the Illinois State Board of Education until you have been processed through Loyola University Chicago. The process will be reviewed during a practicum seminar.

PROFESSIONAL EDUCATION LICENSE (PEL)
INITIAL TEACHER LICENSURE
PROCEDURES FOR RECEIVING YOUR PEL

Step 1: ISBE Educator’s Licensure System (ELIS)
Proceed to the Illinois State Board of Education on-line licensure site to register and obtain your Illinois Education Identification Number (IEIN), which is necessary to complete the “Entitlement Form” and obtain your license (Step 5 below).

1. Go To the ISBE website, http://isbe.net/
2. Select the IWAS tab at the top of the page and follow the instructions to create your own Educator Credentials Account.
3. Your IEIN number will populate once your identification information is entered.
4. Go back to http://isbe.net/ and click on the Educator Credentials tab at the top of the page.
5. You can now use your IWAS login information to access the Educator Credentials portal needed in Step 5.

Step 2: Complete the “Entitlement Form.” M.Ed. candidates, except Reading, MUST also attach official transcripts for any course deficiencies. Return all documents to:
Loyola University Chicago, Licensure Officer
School of Education
820 N. Michigan Avenue
Chicago, IL 60611

Step 3: Verification by the licensure officer of the following:
- Passing scores on the appropriate Illinois exams
- Grades Posted
- Degree Posted (Undergraduate only)
- All program requirements satisfied
- Passing score on the final Portfolio
- **Reading Specialist Only**: an official letter confirming two years of teaching experience

Step 4: After your entitlement is posted by the Licensure Officer of the School of Education, you will receive a notification email from ISBE that will allow you to proceed to Step 5.

Step 5: Proceed to the Illinois State Board of Education website, http://isbe.net/
[Note: You will be able to use Master Card or Visa credit cards to pay your fees.]

1. Click on the Educator Credentials tab at the top of the page.
2. Log into your account using your IWAS information.
3. Click You have been Entitled by your Institution to Apply for your Educator Credential.
4. Launch Wizard and follow it through the application process.
5. When the credit card payment is successfully processed the license is issued.
6. You can print the screen if you wish to have proof of issuance (this has your license number which can be given to prospective employees).
7. You will be required to send official transcripts from all universities attended to ISBE. Transcripts must reflect final grades and posted degree.

Step 6: **License Issuance**
The status of your license, highly qualified status, and professional development are maintained through the Illinois State Board of Education Educator Licensure System (ELIS).

Step 7: **License Registration**
Instructions are also provided on how to register your license online. There is a fee for the service in addition to the registration fee. This keeps the license active. Inactive licenses are subject to new state requirements to reactivate.

Upon completion of both the issuance and registration process, you can direct prospective employers to www.isbe.net/Administrator’s Portal to check on the status of your license.

Entitlement Notification of Completion of ALL Requirements:

Date (submitted to ISBE) ____________________ Initials ____________________

Date (emailed to student) ____________________ Initials ____________________
Qualifying Information Required for Licensure Endorsement

The information below is taken from the Illinois State Board of Education (ISBE) licensure endorsement requirements. We share this information with you to inform you that if you fall into one of the categories below, you may not qualify for licensure endorsement in the state of Illinois.

When applying for your endorsement, if you answer “yes” to questions 1-6 listed below, supporting documentation will be required by ISBE in order to evaluate your eligibility for the endorsement.

1. Are you a U.S. Citizen?
   If not, you must provide proof of legal presence and eligibility for employment. You also must file the form ISBE 73-91 Notice of Intent to Become a U.S. Citizen.

2. Have you ever had a certificate denied, suspended or revoked in Illinois or any other state?

3. Have you ever been convicted of a felony, or any sex, narcotics or drug offense in Illinois or any other state?
   DUI convictions for alcohol do not require a “yes” answer to the above question. Depending on the severity of the felony, sex, narcotic, or drug offense, you may never be able to receive a teaching certificate.

4. Have you failed to file a tax return with the Illinois Department of Revenue, or failed to pay any tax, penalty, or interest owed or any final assessment of same for any tax as required by laws administered by that Department that was not subsequently resolved to the Department’s satisfaction?

5. Have you ever been named by a state agency responsible for child welfare as a perpetrator in an indicated report of child abuse or neglect if such report was not reversed after exhaustion of any appeal?

6. Are you in default of an Illinois student loan for which you have failed to establish a satisfactory repayment plan with the Illinois Student Assistance Commission?

7. Applicants must sign and date the following statement:

   I certify, under penalty of perjury, that I am not more than 30 days delinquent in complying with a child support order. I understand that failure to so certify shall result in disciplinary action and making a false statement may subject me to contempt of court.

   If you are unable to sign this statement, then ISBE will require official documentation (typically provided by the court) regarding the plan for payment of back child support.

Individuals seeking a teaching, school service personnel, or administrative certificate in the state of Illinois are hereby advised that certain convictions may prohibit certification and/or employment in Illinois public schools. It is the responsibility of the candidate to examine school code requirements regarding certification and employment (see School Code: 105 ILCS 5/21-23, 10-21.9 at www.ilga.gov).

Candidates are hereby advised to disclose any prior convictions on the felony questionnaires and the certification application. Failure to do so may result in non-issuance or revocation of a certificate in the state of Illinois. Individuals are advised to seek legal counsel concerning all convictions whereby certification and/or employment may be prohibited in Illinois public schools.
