RMTD 483
Multivariate Statistics

Instructor: Meng-Jia Wu, Associate Professor
Classroom: Corboy Law Center, Room 201
Class time: Wednesday, 7:00 - 9:30 pm
Office hour: By appointment
Office: Lewis Towers, Room 1040
Email: mwu2@luc.edu

School of Education conceptual framework
Our School’s conceptual framework is “social action through education.” This course contributes to this framework by equipping students with knowledge and experience for conducting valid quantitative research. Through conducting, interpreting, and reporting reliable social science studies, researchers can help further the scholarly understanding of the events and practices that influence the field of education. The ultimate outcome is to ensure that all individuals, no matter their ability, race, religion, socioeconomic status, age or gender benefit from effective social science research.

Course topics & objectives
Major topics introduced in this class are multiple regression (in the matrix format), MANOVA, MANCOVA, repeated MANOVA, discriminant analysis, canonical correlation, and logistic regression. Students are expected to
1. Get familiar with the terms used in multivariate data analysis.
2. Understand the theoretical basis and assumptions for the techniques introduced in this class.
3. Be able to select and apply appropriate procedures to analyze multivariate data.
4. Be able to interpret the outputs from multivariate analysis.
5. Be able to study further in quantitative methods.

Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.

Assignments
Eight assignments make up the points devoted to homework. The assignments are not all equal in length. Students can choose to work individually or with another student in the class to form a two-person group. Each group will turn in one copy of the finished assignment with both students’ names included. A discussion of the assignment is encouraged. However, DO NOT CIRCULATE YOUR WRITTEN HOMEWORK between groups nor among individuals outside of the group through e-mail to avoid plagiarism.

Please note that late work is not acceptable unless prior arrangements have been made with the instructor. Late assignments without prior arrangements will automatically be worth only half of their original point value.

Final exam
The final exam is open book and open note, and you may use a calculator during the exam. SPSS is not required during the exam. More information will be provided.

Presentation
This activity is designed for students to practice searching the literature with specific goals as well as to practice presenting a study with multivariate statistics involved. You will present the paper of your choice as if you were the researcher of the selected paper. A specific guideline is provided at the end of this syllabus. Please note that the presentation is part of the class. You are expected to present and stay for other students’ presentations.

Participation
Class participation includes but is not limited to, attending class on time, actively participating in class activities and discussions, asking and answering questions, listening to and respecting the views, thoughts, and opinions of your classmates. If you must be absent from class because of illness or emergency, notify the instructor as early as possible.

Evaluation
Grades will be based on points accumulated on homework, presentation, and examinations. There will be 100 total possible points, distributed as follows:

| Assignments | 50% | Presentation | 10% | Final exam | 30% | Participation | 10% |

The grade ranges in terms of percentage are:

100.0-90.0 = A  84.9-80.0 = B+  69.9-65.0 = C+  54.9 and below= F
89.9-85.0 = A-  79.9-75.0 = B  64.9-60.0 = C
74.9-70.0 = B-  59.9-55.0= C-
Dispositions
Each course in the School of Education focuses on one or more professional dispositions. Students are offered opportunities to receive feedback on their dispositional growth in the areas of professionalism, Inquiry and/or social justice. The evaluation of SOE student’s disposition will be recorded in LiveText. The expected behaviors for specific dispositions for this class and the evaluation rubrics are listed at the end of this syllabus.
Loyola University Chicago  
School of Education  
Syllabus Addendum

**Smart Evaluation**
Towards the end of the course, students will receive an email from the Office of Institutional Effectiveness reminding them to provide feedback on the course. They will receive consistent reminders throughout the period when the evaluation is open, and the reminders will stop once they have completed the evaluation.

- The evaluation is completely anonymous. When the results are released, instructors and departments will not be able to tell which student provided the individual feedback.
- Because it is anonymous and the results are not released to faculty or departments until after grades have been submitted, the feedback will not impact a student’s grade.

**Dispositions**
All students are assessed on one or more dispositional areas of growth across our programs: **Professionalism, Inquiry, and Social Justice.** The instructor in your course will identify the dispositions assessed in this course and you can find the rubrics related to these dispositions in LiveText. For those students in non-degree programs, the rubric for dispositions may be available through Sakai, TaskStream or another platform. Disposition data is reviewed by program faculty on a regular basis. This allows faculty to work with students to develop throughout their program and address any issues as they arise.

**LiveText**
All students, except those who are non-degree, must have access to LiveText to complete the benchmark assessments aligned to the Conceptual Framework Standards and all other accreditation, school-wide and/or program-wide related assessments. You can access more information on LiveText here: [LiveText](https://www.luc.edu/education/syllabus-addendum/).

**Center for Student Access and Assistance (CSAA)**

Should you encounter an unexpected crisis during the semester (e.g., securing food or housing, addressing mental health concerns, managing a financial crisis, and/or dealing with a family emergency, etc.), I strongly encourage you to contact the Office of the Dean of Students by submitting a CARE Referral for yourself or a peer in need of support: [www.LUC.edu/csaa](http://www.LUC.edu/csaa). If you are uncomfortable doing so on your own, please know that I can submit a referral on your behalf.
This link directs students to statements on essential policies regarding academic honesty, accessibility, ethics line reporting and electronic communication policies and guidelines. We ask that you read each policy carefully.

This link will also bring you to the full text of our conceptual framework that guides the work of the School of Education – **Social Action through Education**.

REQUIREMENTS FOR THE FINAL PRESENTATION

Turn in the study of your choice for presentation by April 8 to get approval
Presentation date: April 22th

This activity is designed for you to practice searching the literature with specific goals (which will be described below) as well as to practice presenting a study using multivariate statistics. You will present a paper of your choice as if you were one of the researchers.

You can pair up with another student in the class and work on this presentation as a group, or you can choose to present individually.

Below are the specific requirements for the final presentation:

Search of the study

1. The study should focus on the topic in your field or relate to the field of your current research interest.

2. The study should adopt at least one of the following analytical methods to answer the major research question(s): MANOVA, MANCOVA, profile analysis, discriminant analysis, and/or canonical correlation.

3. Search on-line databases through our school library website at http://libraries.luc.edu/databases, or search any databases you can access. You can also conduct a manual search and browse through the journals.

4. The study should be no less than 7 pages and no longer than 35 pages. Published papers are preferred.

5. The conceptual framework of the study should make sense and the methodology section of the paper should be clear (so you would have enough information for your presentation). Be sure you have enough statistics in the paper for you to discuss in your presentation.

6. After you select the study, e-mail the downloaded file to the instructor. Once the study is approved for presentation, it will be posted in Sakai for everybody to view. Make sure you select the right study for you (e.g., you are interested in it, and the conceptual framework, method and the statistics make sense to you) to avoid the last minute change.

7. Submit the study of your interest as soon as possible. You do not have to wait until the due date to get the approval.

Presentation requirements
1. You will need to use either Power Point slides or handouts while presenting the study of your choice. If you decide to use handouts, you will need to bring enough copies to the class.

2. Each person/group will have 12 minutes to present the paper, followed by questions from the audience.

   The suggested distribution of the time spent during the presentation:
   - **Conceptual framework & research question:** 4 to 5 minutes
   - **Methodology:** 2 to 3 minutes
   - **Analysis (statistics):** 4 to 5 minutes
   - **Conclusion:** 2 minutes

3. The “conclusion” in the presentation could be the summary made by the original researchers, which can be found in the last section of a study, or it can be from your observation on the things that should be addressed in the study.

**Participation requirement**

Each student is responsible to ask at least one question to the student’s presentation whose First name is next to her/him alphabetically (A to Z).
