

Inclusion By Design: Survey Your Syllabus and Course Design

Online [Article](#)

Ed Brantmeier, James Madison University, brantmej@jmu.edu

Andreas Broscheid, James Madison University, broschax@jmu.edu

Carl S. Moore, University of the District of Columbia, carlsmoore.phd@gmail.com

This survey tool was designed for you to examine a particular syllabus and course design to get a broader perspective on inclusion in your actual teaching practices. We have organized this worksheet in three sections: 1. The context and design of your course. 2. The “text” of your syllabus and course design. 3. And the subtext of your syllabus.

1. Inclusion and Course Context

Examine situational factors by writing short answers to these questions.

A. People: Who will most likely be in your class (Consider student characteristics such as race and ethnicity, gender, class, ability, religion, language, geographic region, sexual orientation, ability/disability, first generation college, other invisible status, etc.)

B. Content: What different perspectives and viewpoints are included in the course content?

C. Relevance: What ways are there to connect the course topic and content to your students and the real world?

D. Pedagogy: What are the pedagogical choices available to you in your discipline and how diverse are they? (Examples: lecture, team-based learning, problem-based learning, socratic method, simulations, role-play, debate, service learning)

E. Values: What values do you intend to instill in this course? (Examples: Inquiry, community, discipline, deliberation, critical thinking, value of difference)

F. Climate: How will differences of positionality/opinion/thinking be handled in the classroom? How can you create safe spaces for both visible and invisible minority students?

2. Inclusion and “Text”: Syllabus and Course Design

In this section, you will summarize your thoughts quantitatively, using the five-point scales provided. In addition, you may want to write short explanatory notes for each question that provide examples and/or describe why you selected a particular score.

To create a summary score for how inclusive your syllabus and course design are, add the quantitative responses to all questions that you find relevant for your course, then divide the resulting number by the number of questions multiplied by five. A result close to ‘0’ means your course lacks inclusion; a result close to ‘1’ means your course is highly inclusive.

Frame and Tone of the syllabus

A. Tone: What is the balance between inviting, friendly, and supportive sections and rules of prohibitions in your syllabus? Is the syllabus written in an inviting, friendly, and supportive tone, or is it mainly a list of rules and regulations?

Rules and Regulations

Inviting

B. Perspectives: Does the syllabus on the whole communicate openness to multiple perspectives and experiences, or is it mainly focused on one perspective?

One Perspective

Multiple Perspectives

C. Student appeal: Does the course description/introduction appeal to a variety of students and perspectives or does it mainly target one type of student?

One Type of Student

Variety of Students

D. Accessible syllabus: How accessible is your syllabus as a document? (You may want check [JMU's ODS page](#) or the [Universal Design Validator at the Equity and Excellence in the Higher Education website](#) to answer this question.)

Low Level of Accessibility

High Level of Accessibility

Learning Objectives

A. Clarity: Are the learning goals and objectives clearly stated or mainly implied?

Mainly Implied

Clearly Stated

B. Student interests: To what extent do the objectives appeal to a range or variety of student interests? Do the objectives appeal to and reflect the interests and learning needs of different types/groups of students? (Consider student differences related to socio-demographic factors, first generation status, ability, sexual orientation, etc.)

Appeal to One Type of Student

Appeal to a Range of Students

C. Learning domains: To what extent do the learning objectives appeal to the head, heart, and hand? In other words, do they cover cognitive, affective, and physco-motor domains?

Objectives Belong to One Domain

Objectives Cover Various Domains

D. Levels: To what extent do the cognitive learning objectives appeal to different levels/ types of thinking? (Summary, evaluation, application, analysis, synthesis, etc.)

One Level

Multiple Levels

E. Diversity: To what extent do some of the learning objectives aim at diversity or inclusion-related knowledge, skills, or attitudes?

No Diversity-Related Objectives

All Objectives Relate to Diversity

Assessment

A. Variety: To what extent does the course employ a variety of assignments? Do the students have a variety of ways to show what they know? Or does the course rely on only few types of assignment?

One Type of Assignment

Several Types of Assignment

B. Formative assessment: Is there a variety of formative assessments (assignments) that provide students with immediate feedback and opportunities to improve?

No Formative Assessment

Many Formative Assessments

C. Alignment: To what extent do the assessments measure student knowledge and skills that are taught in the class and correspond to learning objectives, or do they measure extraneous knowledge and skills?

Assessments Test Extraneous Knowledge/Skills

Assessments Align with Objectives and Teaching

D. Fixed and flexible options: Is divergent, creative thinking rewarded or do assessments require students to conform to one common norm?

**Assessments Establish
One Norm**

**Assessments Reward
Creativity**

Teaching and Learning Activities

A. Culturally responsive teaching: To what extent do teaching activities meet the needs of diverse learners, diverse ways of processing information, diverse performance styles? (Examples: Experiential learning, collaborative group work, individual activities, peer teaching/editing/sharing, one on one instructor time.)

**Teaching Requires
One Type of Learning**

**Teaching Supports
Diverse Types of Learning**

B. Flexibility/adaptation: How much flexibility is there in the course design to modify and adjust to meet the learning opportunities that arise in the moment in the classroom?

No Flexibility

**High Level of
Flexibility**

C. Alignment: Are the teaching and learning activities aligned with the objectives? Or are they disconnected?

**Activities do not align
with objectives**

**Activities align with
objectives**

D. Interaction patterns: Do learning activities promote inclusive interactive patterns? Do students cooperatively learn together? Or is instructed based on one-directional information provision by the instructor?

**Teaching as information
provision**

**Learning through
inclusive interaction**

E. Shared teaching: Do students have shared responsibility in their (and their fellow students') learning? For example, do students lead discussion groups, reteach concepts, or otherwise contribute to the teaching?

Instructor alone is responsible for teaching

Students share responsibility for learning

F. Engagement: To what extent do you encourage students to interact with you and with each other?

I don't encourage interaction

Encourage interaction in a variety of ways

Content

A. Perspectives: To what extent do the course materials, such as readings, provide a full spectrum of perspectives on topics?

The material presents one perspective

The material presents a wide variety of perspectives

B. Voice: To what extent does the course material represent a variety of voices?

The material presents one voice

The material presents a wide variety of voices

C. Pace: To what extent does the pace of the course content allow for multiple processing speeds?

Content requires common pace

Content permits for multiple speeds

D. Course materials: To what extent does the format of the course material respond to a broad range of learning preferences (reading written text, visual and audio media preferences, etc.)?

One format

Multiple formats

E. Accessibility: To what extent is the course material accessible to all students including those with disabilities? (For example, do visual media have subtitles, can online readings be recognized by screen readers, etc.)

The material is not accessible

All course materials are accessible

3. Inclusion and Subtext

In this section, write short responses to explore the implicit assumptions, rules, and requirements of your course.

Hidden Curriculum

A. Implicit rules: What formal and informal rules, assumptions, values are important for the course but not stated in the syllabus?

B. Implicit messages: What unwritten messages does the syllabus convey about the course content, and learning? Is there a “hidden curriculum” embedded in the syllabus?

C. Hidden biases: In which ways does the “hidden curriculum” potentially discriminate against some students? (For example, do you use only one type of assessment to determine grades, and does this disadvantage some of the students in ways unrelated to their learning?)

D. Teaching philosophy: What is your teaching philosophy (student-centered learning, teacher-centered information dissemination, cooperative learning, etc.) and how does the syllabus communicate it to students? Do you clearly communicate your teaching philosophy to avoid biases?
