TIP OF THE WEEK

“"One of the great things about college is that YOU are your top priority, a pretty rare position in which to be. So make sure you work towards being the best “you” you can be! It’s important to find the balance between what you love to do and what is practical to do, both in academic and social life. Study a subject that you’re truly passionate about, then figure out a way to make it marketable post-graduation. Remember, balance is key – in any aspect of your life!"
