

THE LOYOLA EXPERIENCE

ORIENTATION

ARE HERE

Prior to orientation, students were sent email from the Help Desk Manager directing them to the Technology Roadmap site: <http://luc.edu/technologyroadmap/newstudents/>

Students were sent sequential email instructing them to through the stages of the roadmap documentation to prepare and practice for orientation.

ARE HERE

The Technology Presentation for Parents/Guests will take you through a 5000' view of what the Roadmap and the Technology session does with the student.

[STAGE 1](#)[STAGE 2](#)[STAGE 3](#)[STAGE 4](#)[SUPPLEMENTAL](#)

New Students

Let's Get Going!

Before you arrive at Orientation, you'll have 4 stages to complete on the Technology Roadmap. There are short videos or PDFs to review that will guide you through the numbered stages.

UNIVERSAL ID

- Your Loyola Universal ID (UVID) is unique to you.
- Your UVID and password provide you single source sign-on to university applications, access to university computers and resources.
- Secure your account with a strong password.
- For recommendations on password security, visit the security office guidelines.

LOCUS

- Where you register for classes.
- Work with your financial aid.
- Pay your bill and more...
- You can sign in with your universal ID and password at locus.luc.edu 24 hours a day, 7 days a week.

E-MAIL

- All official University communication will be sent to your Loyola (Exchange) e-mail address.
- Access your e-mail account via the web or contact the Help Desk and we'll guide you through the steps to add it to your mobile device.

ITS HELP DESK

- The ITS Help Desk provides the Loyola Community with a single point of contact for support.
- Contact the Help Desk for password assistance, help with Loyola apps and connecting your personal technology devices onto the Loyola network.

NEW STUDENTS

STAGE 1

- CHANGE YOUR PASSWORD
- LOG IN TO LOCUS
- LOCUS STUDENT CENTER OVERVIEW
- CHECK YOUR E-MAIL
- ITS HELP DESK

STAGE 2

STAGE 3

STAGE 4

SUPPLEMENTAL

Stage 1

Preparing to Depart

Before you can hit the road to college success with technology, you need to log in. This series of videos will tell you how to change your password, Log into LOCUS, get your official Loyola email, and find out how the ITS (Information Technology Services) Help Desk can assist you with all of this.

Loyola Alert

ARE HERE

Sakai: Sakai is Loyola's online course management system.

A collaborative platform for Loyola faculty, staff, and students to interact and support teaching and learning activities

Sakai offers tools for university courses, research projects, organizations, and groups

Instructors at Loyola use Sakai as an extension of their classes

Class syllabi, handouts, assignments, notes, online quizzes or tests, and grade book

Interact through class discussions, wiki posts, and more

The screenshot shows the Sakai LMS interface for Loyola University Chicago. The top navigation bar includes 'My Workspace', 'Sakai Training', 'Liz 101 001 W12', 'PROJ_ITS_ITRS', and 'More Sites'. A left-hand menu lists various tools like Home, Announcements, Site Info, Tests & Quizzes, Messages, Syllabus, Resources, Assignments, Gradebook, Wiki, Roster, Blogs, Email, Forums, i>clicker, Podcasts, Polls, Schedule, Drop Box, Chat Room, and Lessons. The main content area displays 'Liz 101 001 W12: Sakai' with an 'Options' button and a 'Welcome to Sakai 101!' message. A large image of a Loyola University building is also visible.

→ **Full mobile versions of Outlook, Word, Excel, PowerPoint, and OneNote**

→ **Download them to as many as five PCs or Macs, five tablets, and five phones.**

→ **Real-time co-authoring and collaboration with Office Online.**

ARE HERE

Information Technology Services

ARE HERE

Information Technology Services will serve as a partner and leader for technology needs and initiatives to enhance learning, teaching, research, and operations for Loyola University Chicago, higher education, and technology communities.

The Information Commons is the HUB for our services:

- **Digital Media Services**
- **Advisor assistance**
- **ResNet**

Similar services exist at the Water Tower Campus on the 6th floor of the Corboy Law Center

Digital Media Services

- ➔ Professional staff and students dedicated to help you take your next project from theory to final product.
- ➔ DMS provides access to:
 - Computer Labs & Workstations
 - Printing (B&W, Color and Posters)
 - Laptop Checkout Program
 - Equipment Loan Program
 - Training Courses and Workshops
 - 1:1 Assistance on Projects

➔ [Visit DMS online](#)

ARE HERE

- Digital Media Services (DMS) features professional staff members and trained students whom are dedicated to promoting faculty, staff and student success inside and outside the classroom. In addition to one-on-one support and short course training, DMS provides users with access to equipment, applications and lab workstations for the development of coursework, projects and presentations.
- Our Digital Media Advisors are poised to provide one-on-one support during your time in the labs. You can learn the basics of any equipment we have in our equipment loan program and use any of the software we have on our lab computers. Our professional staff can help you gain insight on your multimedia project planning and execution.
- Our Advisors are available for drop-in one-on-one support. We are eager to help you learn, and are excited when you walk away with new tools in your technology arsenal. If you would like more in-depth consultation, please see an Advisor to schedule an appointment, if necessary. In scheduled consultations with our professional staff members, you can get advice, receive instruction, and solidify ideas into a game plan.
- We will provide regular information sessions, online training, presentations and hands-on workshops based on the wide array of software and equipment available for loan. Visit the [Short Courses](#) section for details on upcoming workshops and events. If the software and equipment is available in our labs, we want you to be able to use it!

Digital Media Services

→ Checkout multi-media equipment from our Equipment Loan Program – free of charge:

<http://www.luc.edu/digitalmedia/elp.shtml>

– iPads, Camcorders, Digital Cameras, Laptops, Hard Drives, Projectors, etc.

→ Develop your next project with a Digital Media Advisor

→ Access high-end software and workstations

→ Publish weekly podcasts: Create video, graphics and animation to make your PowerPoint presentation come to life

Laptop Checkout

With you where you want to work
Need a computer while in a Group Study Room or just wish you had a better view? Take a laptop with you where you study in the Information Commons or Cudahy Library.

Laptops are available to students to check out, free of charge.

Both Windows and Mac laptops are available

ARE HERE

The Equipment Loan Program (ELP) was launched on January 14, 2008, along with the start of the first Digital Media Lab (DML) in the Richard J. Klarchek Information Commons (IC).

The DML is a space that was created to place digital media in the hands of students by reducing the financial barriers associated with accessing technology. With the opening of each of our two Digital Media Labs, both locations have become a sandbox for testing and exploration - encouraging faculty, staff and student early adopters to discover new technologies, develop new resources and ideas and find new ways to innovate in the classroom.

On-Line reservation system for equipment:

<https://myits.luc.edu/dmlequipment/day.php?day=13&month=07&year=2012&area=1045&room=1212>

ARE HERE

→ ResNet is a free “Best Effort” service available for students to provide support with their personal technology devices.

- Virus / Spyware Removal
- Windows / MAC / Linux
- **Wireless device configuration**
- Mobile Device
- Gaming Console Registration
- Loyola NetReg
- And more.....

ARE HERE

At Loyola our student technology support group is modeled after the international organization of the same name, ResNet. Loyola is a member of the ResNet organization and our management team is actively involved in the organization and have presented at multiple symposiums regarding various student support concerns at Loyola.

While ResNet is a Best-effort technology resource..... provided by students for students, we are a terrific technical support shop committed to helping students solve their technology challenges.

ResNet service and support includes, but is not limited to, the following:

- Internet Connectivity*
- Microsoft Windows Maintenance*
- Mac Support*
- Linux Support*
- Virus and Malware Removal*
- Wireless Device Configurations*
- System File Recovery*
- Purchase Recommendations*
- Auxiliary Device Support Printers Gaming Systems Routers DVRs Smart Phones*

Wireless Device Configuration

- **WHAT IS LOYOLA NETREG?** Every new device connecting to the network via wired or wireless must be registered. Registrations are maintained for 120 days or for 14 days of inactivity, whichever comes first. The following are the five most commonly asked questions regarding Loyola's Netreg. **How does it work?** The Network Access Control (NAC) system provides a small program that is run on your computer. If the program detects that your system is not up to the appropriate standards, you will not be allowed on the network until you fix the identified problems with your system. If your system meets requirements, the program erases itself after it is run.
- **What standards does it look for?** The NAC program checks to make sure that you are running a current operating system, that you have installed important security patches, and that you are not running certain peer-to-peer software programs. If you are using a Windows Operating System, it also checks that you are running anti-virus software with up-to-date anti-virus definitions.
- **What is Network Access Control?** Network Access Control (NAC) is a way to control what devices are allowed on Loyola's network. This ensures that Loyola's network is used to serve the University's instructional, research, health care, administrative and public service missions.
- **Why does it check for peer-to-peer software programs?** Please refer to the [University Information Security Office](http://www.luc.edu/its/itspoliciesguidelines/Policy_p2p.shtml) and their policies on peer-to-peer software. http://www.luc.edu/its/itspoliciesguidelines/Policy_p2p.shtml
- **Are you scanning my machine for personal information about me?** No. We only check to make sure that your machine meets appropriate standards and that it is not running certain peer-to-peer software programs. Some information about your computer (such as the operating system and anti-virus program used) is collected, but no personally identifiable information is collected. The program does not collect any information about your files, software used or Internet browsing habits.

E Textbooks?

Computer Security: Safety Tips

- Never leave your property unattended, even for a matter of seconds. Every computer theft on campus was a result of the computer being left unattended for less than a minute.
- If you need to leave your desk or area, bring your property with you.
- Do not ask anyone other than a person known to you to watch your property. If you do ask someone else to watch your property, move your property so that it is in front of them.
- Record the serial number, make and model, and any other identifying information about your electronic items. Keep this record in a safe place that is not saved on your computer.
- If you see anything suspicious, immediately notify a Library or Information Commons' employee, or contact Campus Safety at 773.508.6039.
- Examples of suspicious behavior include the following: a person wandering around without an apparent reason; a person in the library who appears to be constantly scanning the area; a person who abruptly picks up a laptop from an area and walks away with it.

ARE HERE

E Textbooks

→ E Textbooks: The University uses several e-textbook vendors:

→ <http://content.efollett.com/digital/>

→ Students can order books on-line or purchase in the bookstore. When they purchase e-textbooks in the bookstore, they can pay with Rambler Bucks. When they purchase on-line, Ramble Bucks are not available.

→ When purchasing books you need to consider the following:

1. **Book version: do you want used or new?**
2. **Is it available in e-text format?**
3. **Do you want e-text format (not everyone does)** Do you want to rent or own (either e-text or book version)? Do you want to rent or own (either e-text or book version)?
4. **Do you want to rent or own (either e-text or book version)?**
5. **Compare pricing – it will vary from book to book and format to format**

ARE HERE

DMCA

→ : Digital Millennium Copyright Act

- When you share copyrighted files without the permission of the copyright holder, you are breaking the law. This most commonly occurs when students use peer-to-peer (P2P) software to share music, movies, television shows, and other copyrighted works. P2P software includes programs such as LimeWire, Bit Torrent, Morpheus and others.
- The DMCA provides "safe harbor" for schools if they designate an agent to process copyright infringement complaints, and if they work to promptly remove the infringing material from their network.
- Digital Millennium Copyright Act ("DMCA") criminalizes production and dissemination of products intended to circumvent measures that control access to copyrighted works
- Visit the UIISO (University Information Security Office) for more information: <http://content.efollett.com/digital/> DMCA limits the liability of online service providers, such as Loyola University Chicago, for certain copyright infringement liability if various procedures are followed. This policy is intended to take advantage of the liability protections in the DMCA.
- Loyola University Chicago respects the rights of holders of copyrights, their agents and representatives and will implement appropriate policies and procedures to support these rights without infringing on the legal use, by individuals, of those materials. Legal use can include, but is not limited to, ownership, license or permission, and fair use under the US Copyright Act. Employees and students need to be aware of the rights of copyright owners.
- Persons who are found to intentionally or repeatedly violate the copyright rights of others may be denied access to all University computing and networking facilities and resources. All instances of reported copyright violations will be reported to the appropriate University authority in accordance with the policies for possible additional disciplinary actions

PC vs. Mac

Q: What computer should I get? Mac or PC?

It depends on several factors. We offer suggestions for particular majors because there are some that favor one over the other. Although Loyola University Chicago does not require students to have a personal computer, it is recommended. Students who do not have a laptop are able to check one out for a small period of time at the Digital Media Lab. Majors such as Communication, Public Relations, Advertisement, Fine Arts, and Journalism tend to be Mac oriented. On the other hand, Business majors and Computer Science majors leans towards the PC. This does not mean that these majors require that you get either a Mac or PC. Classes taught in a lab environment will either be in a MAC or a PAC lab.

You should consider your personal preference. Buy a computer that you are comfortable with and will know how to use.

Whether you purchase a desktop or a laptop, it is important to balance quality and performance with cost. Loyola's ITS staff have system configuration recommendations that you can use when considering your next purchase. Checkout the "[print friendly](#)" configurations for both Windows and Apple Computers.

<http://www.luc.edu/its/resources/technologypurchases/personaltechpurchases/personal-recommendations.shtml>

Refer to the component descriptions below if you're not sure what something means.

<http://www.luc.edu/helpdesk/resources/purchase-faqs.shtml>

After you decide how much you want to spend on your computer, use the configuration recommendations and shop around. Loyola has agreements with Apple, Dell and Lenovo that provide discounts on personal computer purchases. Checkout the [Apple](#) and [Lenovo](#) links for packages and special discounts (on the link above)

Other items you should consider are:

Service Plans

Backup Options

Software Packages

Printers

Information Technology Services has delivered a new solution for students called OnePrint. Print your documents from any laptop or personal workstation, from either your dorm room or wireless connection (such as a classroom or public area) and retrieve your jobs from any of the ITS approved OnePrint stations. Here's how it works:

You choose the "OnePrint" from any application you're working in and provide some quick information on your print job. OnePrint will hold your job for you until you are ready to print it out. Go to any OnePrint authorized station, swipe your Campus Card, choose your job and simply print out your documents.

Here are the steps you need in order to get OnePrint access:

You must download and install the OnePrint installer onto your laptop or PC. Click here and choose your campus and OS <http://www.luc.edu/its/uniprint/oneprint.shtml>

When you are ready to print, you must choose the "OnePrint" option on your Print menu.

From any application, choose File > Print, then click on OnePrint.

A "Print Job Details" dialog box will appear, asking you for information on your job. Fill in the name of the job, your LUC username and a document password for this job. This is how the OnePrint station will recognize you when you come to pick up your printouts.

A pop-up balloon will appear once you have completed all the steps, alerting you to how much the job will cost.

To retrieve your job(s):

Go to any one of the campus's OnePrint stations

Swipe your Campus Card and choose your job. You can sort the list by username, print job name or by time submitted.

Once you choose your job, OnePrint will ask you to type in the password you assigned for the job in order to release. Enter your password and choose print.

Printers

If you chose to bring a printer to school, it will have to be registered on the network.

Please note, there are some security concerns when using wireless printers at Loyola. These devices are primarily designed for home use. There are two main issues with using them on Loyola's network:

- 1) Most wireless printers have no security. They're designed to operate behind a home router, where only people on your network can see it. *(there will be no security to prevent others from sending jobs to your printer, if your address is discovered)*
- 2) If your printer is shut down for an extended length of time, you will lose the ip address and have to re-setup the print queue with the new ip each time.
You could eliminate these concerns using a usb cable directly to your printer.

Discounts & Downloads

The department of ITS provides links to free downloads and discounts:

Through VarsityBuys students, faculty and staff are eligible for discount pricing on Microsoft and other software purchases.

<https://luc.onthehub.com/WebStore/ProductsByMajorVersionList.aspx?vsro=8>

NOTE: students get MS Office 365 Free – no need to purchase

TechConnect <https://myits.luc.edu/techconnect/> This site was created to provide the Loyola Community with a concentrated list of free or discounted software, hardware and other digital media. Choose from the available categories at the top of the page for interesting offers and reviews. This site is updated frequently based on your feedback.

ResNet: <http://www.luc.edu/helpdesk/studentssupport/recommendedsoftware/index.shtml>

The students in ResNet took the guesswork out of determining which free download to use. This links provides recommendation and direct download links for MAC OS X, Windows Machines, as well as LINUX operating systems.
