

FYRE General FAQs

1. If I change majors, can I remain in FYRE?

You may remain in FYRE if your new major is in a STEM field. You may also remain in FYRE if you've changed to Undecided.

2. How does UNIV 102 assignment and research placement work?

Based on your top three research preferences, we will assign each FYRE student to a UNIV 102 section and corresponding research placement. We will do our best to place student according to their listed preferences and major.

3. Who can I contact if I have questions?

Contact FYRE program support at fyre@luc.edu.

4. Can I take a class or have another job during the three weeks of research?

No. Our expectation is that your primary commitment will be to the FYRE research. In the past, FYRE students have not been successful trying to balance research with a job or a class (even online) because of the heavy research schedule. In extreme cases, we have made exceptions to this restriction. However, unless the FYRE Program Director gives you an exemption, you may not make any other academic or work commitments during the three weeks of your research.

5. What should I do if I feel that I need to take a summer class to stay on sequence for my major, minor, or pre-health requirements?

Schedule an appointment with your advisor to discuss your academic plan.

6. What should I do if I have scheduling issues or class conflicts?

Email your academic advisor and Cc fyre@luc.edu on the email with any questions pertaining to scheduling classes, changing majors, etc.
