

**CHILD CARE ACTIVITIES to Promote Health and Reduce Exposure to Lead**

The following is a room by room list of the potential lead sources shown:

**BATHROOM**

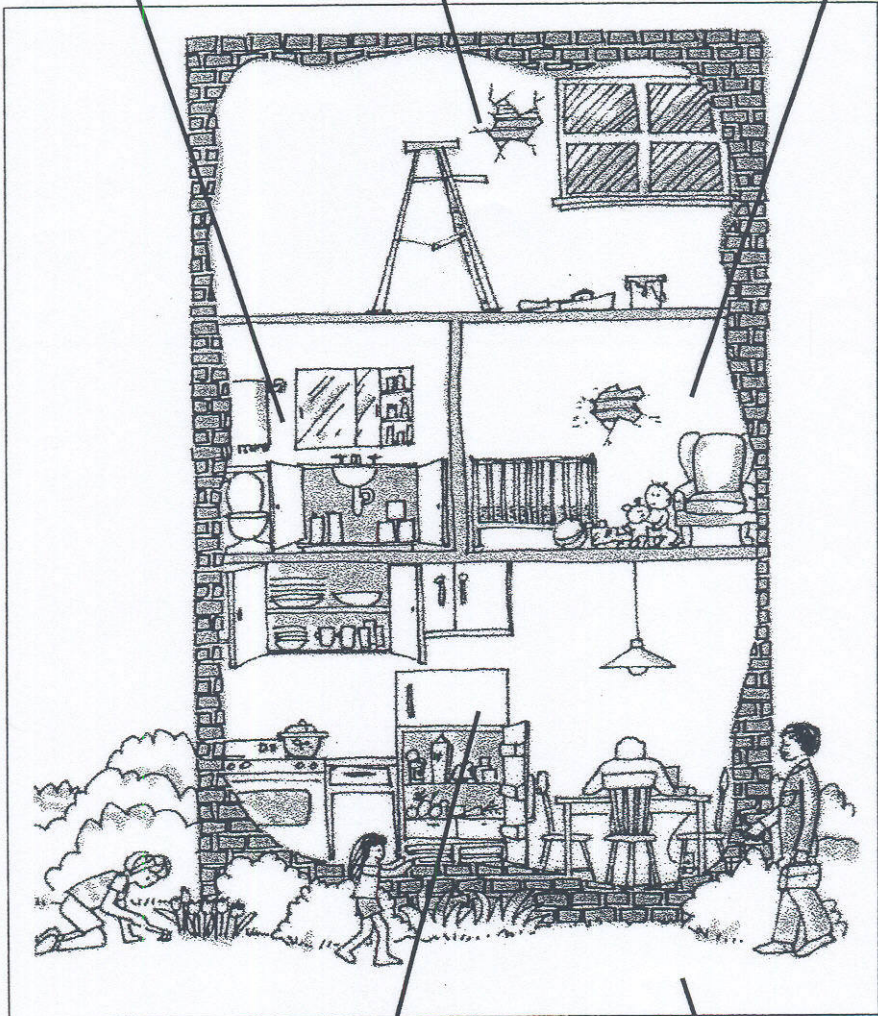

- home remedies in medicine cabinet
- water\*

**ATTIC**

- pre-1978 peeling paint on walls and windows

**CHILD'S ROOM**

- older or imported toys
- peeling pre-1978 paint
- old crib next to an area where there is peeling paint

**KITCHEN/DINING ROOM**

- casuelas and other dishware
- canned foods with lead-soldered seams
- hobbies or cottage industries

**OUTSIDE**

- occupational exposures brought into the home
- soil

\*Water is not usually an important source of lead poisoning in California.
