Also, please describe or provide a link to program admissions policies that allow students to enter with credit for prior graduate work, and the expected implications for time to completion. Please indicate NA if not applicable:

Students who have completed previous graduate coursework (e.g., Master's degree) are allowed to apply for the Clinical Psychology PhD program. Credit for previous coursework is awarded on an individual basis after careful review of the student's academic records.

In general, graduate students are expected to complete the Clinical Psychology PhD program in 6 years (5 years of university-based graduate training plus a 1-year clinical internship). In the past, some students who entered the program with a Master's degree have been able to complete the program in 5 years (4 years of university-based graduate training plus a 1-year clinical internship).
