Introduction to Non-Fictional Prose

In this course, we will study nonfiction prose from a range of times and places. To focus our studies, we will investigate how a wide variety of authors have used writing to express, explore, and create a sense of self. When sharing their lives with an audience of readers, how do these authors navigate the territory between the private and public spheres, between internal experience and external reality, between self and environment? To answer this question, we will read a variety of nonfiction forms including diaries, essays, autobiographies, and graphic memoirs. Throughout the course, we will discuss issues of literary meaning, form and value.

Outcomes: Upon completion of this course, students will have demonstrated inquiry and pursue self-directed learning, mastered key literary terms, read for comprehension, read for analysis, and argued for literary components.

Foundation Studio: Two Dimensional Design
This course explores the fundamental organizational systems of intentional visual expression through purposeful making of, and critical response to, traditional design concepts. The elements of art and the principles of design will be experienced through a range of media both tactile and digital, with emphasis on spatial perception, color theory, and visual communication.

Students will recognize and experience the core concepts and practices of visual communication through hands-on exercises and projects addressing observation and perception, composition, transformation and manipulation of the picture plane, sequence and narrative, and the physical and communicative properties of pigment and color. Students will further engage these concepts through critical examination of images, texts, and objects representing a wide array of contemporary and historical visual culture. IAI Code: ART 907

Environmental Processes, Challenges, and Methods

This course examines scientific issues underlying a series of significant threats to the planet. These include the loss of biodiversity, ensuring access to a stable supply of food and water for all of the Earth's inhabitants, climate change, and the demands for energy and other resources. Students will also investigate possible responses to these planetary threats.

Outcomes: Students will understand the nature of contemporary environmental challenges, both as scientific and social problems.

The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions:

- Who is the entrepreneur? that is, what activities or characteristics make one an entrepreneur?
- Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?
- How ought we to evaluate the entrepreneur morally—and does the answer depend upon who we understand the entrepreneur to be?

## Culture, Identity and Performance

This course examines the beliefs, values, sub-cultural traditions and performance of identity(ies) typically associated with persons of African heritage in various areas and contexts across the African world. Each of these elements of Black/Africana culture will be viewed through the lenses of social science, literature and other articulations and postulations which attempt to name and characterize these populations, historically and contemporarily in print and electronic media, filmic and popular cultural discourses. This interdisciplinary approach will engage early black film, ethnography, slave narratives, performance and performance theory as tools to unpack multiple contested ideas, beliefs and ideologies concerning the nature of black self-identity and expression.

Course ID:013464  06-JUN-2018  
Social Movements, Culture, and Activism  
This class examines social movements and activism from an ethnographic perspective. Case studies will examine movements across the globe. Topics to analyze include: what socio-cultural contexts shape, and are shaped by, social movements? How do social movements organize themselves, and what meanings or belief systems do they appeal to?  
Learning outcomes include: familiarizing students with the ethnographic analysis of social movements; analyzing the socio-cultural effects of global commodity flows, secularization, environmental pollution, corporate power, migration and other political issues; examining how people resist, reproduce and alter relations of power; and introducing students to the broader field of political anthropology.  
Components: Lecture(In person)  
Req. Designation: Internship

ANTH 309(3) Course ID:001123 06-JUN-2018

Urban Anthropology
Prerequisite: ANTH 100 or ANTH 102.

This course is focused on defining characteristics of city life across a variety of societies. It particularly considers urban complexity in the context of the globalization of cities.

Outcome: Students will gain a cross-cultural and global outlook on the defining features of urbanism.
Components: Lecture
Attributes: Urban Studies
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

ANTH 310(3) Course ID:001124 06-JUN-2018

Social Anthropology
Prerequisite: ANTH 100 or 102.

Theoretical frameworks and methods used in the scientific study of culture, society, and personality.

Outcome: Students will be able to demonstrate a knowledge of various anthropological approaches to understanding social structure, social organization, and social institutions; major societal types; and selected classic problems in social anthropology.
Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Service Learning

Room Requirements: General Classroom(1)

ANTH 313(3) Course ID:001127 06-JUN-2018

Interpretive Anthropology
Prerequisite: ANTH 100 or ANTH 102.

This course highlights the recent turn away from natural science models for ethnography. It stresses the relevance of literary studies to the writing and reading of ethnographic texts.

Outcome: Students will understand that "objectivism" in ethnography is an out-of-date theory of knowledge. Raised awareness of the interpretive dimensions of ethnographic writing is the course goal.
Components: Lecture

ANTH 314(3)  Course ID:001128  06-JUN-2018
Applied Anthropology
Prerequisite: ANTH 304 or Instructor approval

This course offers a hands-on introduction to the application of anthropological principles and methods to non-academic, "real world" problems. Course sessions will be dedicated to situating applied anthropology within the broader discipline, learning methods, and practicing applied cultural techniques. Students will also develop and carry out an applied cultural anthropology project.

Outcomes: Students will: situate applied anthropology in the broader discipline; practice a variety of applied methodological techniques; work with a community partner to design a project; prepare a comprehensive and clearly written report.

Components: Field Studies(In person)
Attributes: Engaged Learning
Requirement Group: Prerequisite: ANTH 304 or Instructor's Permission
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

ANTH 315(3)  Course ID:001129  06-JUN-2018
Identities: Race, Ethnicity, and Nationalism
Prerequisites: ANTH 100 or ANTH 102.

Drawing on case studies, this course examines anthropological understandings of "race," ethnicity, and nationalism.

Outcome: Students will emerge able to understand historical anthropological theories concerning group identities (tribes, race, ethnic groups); the symbolic construction of group identities; the political dimensions of collective identities; dynamics between religion and ethnicity; and the role of colonialism & the state in shaping ethnic relations.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102

Room Requirements: General Classroom(1)

ANTH 316(3)  Course ID:001130  06-JUN-2018
Anthropology of Religion & Ritual
Prerequisites: ANTH 100 or ANTH 102.

The course considers religion as a form and part of culture. The innovative as well as conservative features of religion in culture change are addressed. Religion's role as both a belief-system and ritual practice are underscored.

Outcome: Students will develop the capacity to view religion in a broad perspective and to understand it as a significant factor of belief and practice in cultural systems.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

ANTH 317(3)  Course ID:001131  06-JUN-2018  Instructor Consent Required
Ethnographic Methods
This course is designed to offer an introduction to qualitative methods in anthropology. Students will learn methodologies such as participant observation, interviewing, and document analysis, and we will also address ethical issues in field research. Students will design and carry out an ethnographic research project.

Outcomes: Students will: demonstrate in-depth knowledge of qualitative research techniques; critically discuss ethical implications of ethnographic research; undertake original ethnographic fieldwork; prepare a comprehensive, theoretically informed, and clearly written report based on original ethnographic data.

Instructor permission required.

Human Evolution
Prerequisite: ANTH 101 or ANTH 103.

This course provides a detailed assessment of the fossil record pertinent to the emergence and evolution of humans up through the origin of modern people. The interpretation of this record within the context of important biological principles is emphasized, as is the methodology of doing historical science with paleontological data.

Outcome: Students will develop an understanding of the course of human biological history from the perspective of the pertinent fossils record as well as a mastery of the biological principles and scientific methodology that apply to assessing that history.

Dental Anthropology

This course will examine teeth, and is divided into two sections. Section one will provide a foundation to dental studies within an anthropological and biomedical context through the study of dental anatomy, morphology, and variation. Section two will examine the genetic and biological underpinnings of dental development and eruption.

Prerequisites: ANTH 101 or BIOL 101

Outcomes:
- Gaining factual knowledge (terminology, classifications, methods, trends); learning to apply course material (to improve thinking, problem solving, and decisions); developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course.

ICE AGE AMERICA
This course surveys archaeological and paleoenvironmental evidence from the Late Pleistocene in North and South America with emphasis on the initial processes of human colonization/adaptation to the New World.
Outcomes: Students will demonstrate an understanding of the current debates and methods of critical assessment in evidence from environmental changes; megafaunal extinctions; and human biological, archaeological, and linguistic data.
Components: Lecture (In person)
Req. Designation: Undergraduate Research and Writing Intensive

Rise & Fall of Civilizations
Prerequisite: ANTH 101 or ANTH 104.
This course examines the socio-cultural process that produced complex societies in the past, particularly the contrasting trajectories of Old World and New World civilizations. Emphasis is on the material manifestations of status differences, power relations, and ideological control.
Outcome: Students will appreciate the complicated dynamics that underwrite increasing socio-cultural differentiation and will understand the archaeological methods used to chart that differentiation through time.
Components: Lecture
Requirement Group: Prerequisite: ANTH 101 or ANTH 104
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom (1)

ANTHROPOLOGY OF MUSEUMS
This course explores the museum as a dynamic site of cultural production and consumption, and an important sphere for anthropological study. It examines the historical and contemporary relationships between museums, anthropology, and material culture, with particular attention to the broader socio-cultural context of collecting from and representing cultures.
Prerequisites: ANTH 100 or ANTH 102
Outcomes: Students will gain knowledge of museums as sites of anthropological study and practice, with specific attention to an understanding of the formation and use of anthropological collections, and cultural representations. Students will visit, discuss, and critique exhibitions in Chicago-based museums.
Components: Lecture (In person)
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Undergraduate Research and Writing Intensive

| ANTH 347(3) | 010449    | 06-JUN-2018 | |
| Shipwreck Archaeology | |
| Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. |
| Outcome: Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum. |

### Introduction to Martial Arts

**Course ID:** 010798  
**Date:** 06-JUN-2018

This course introduces the student to Chinese Wushu. Two forms of Wushu will be selected for in depth study each semester. Students will explore the origins of the sports studied and their importance to Chinese culture and philosophy while learning the specific physical techniques.

**Outcome:** Students will improve their balance, flexibility and coordination while learning the basic moves of two forms of Wushu. They will develop a reference for appreciating the place of Wushu in Chinese culture and create a foundation for further Wushu training.

### The Crafts of China

**Course ID:** 010773  
**Date:** 06-JUN-2018

This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.

**Outcome:** Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture.

| ASIA 168(3) | 010333   | 06-JUN-2018 | Sacred Texts of China  
Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods.  
Outcomes: Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically. |
| ASIA 169(3) | 010359   | 06-JUN-2018 | Taoism  
Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life.  
Outcomes: Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs, practices, and institutions in varied contexts and historical periods. |
| ASIA 191(3) | 010355   | 06-JUN-2018 | Traditional Chinese Philosophy  
Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged. |
| ASIA 192(3) | 010353   | 06-JUN-2018 | Chinese Ethics and Asian Values  
This course offers an overview of the spirit of Chinese ethics, covering sacred and secular as well as intellectual and practical elements. |
| ASIA 193(3) | 010356   | 06-JUN-2018 | Contemporary Chinese Philosophy  
Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation. |
| ASIA 252(3) | 010794   | 06-JUN-2018 | Peoples of China  
This class introduces China’s cultural diversity and unity as a whole. It provides a general overview of cultural mappings in China, and a detailed study of significant ethnic minorities.  
Outcome: Students will gain the ability to perceive cultural phenomena in a comparative framework and understand cultural differences more deeply. |
Political and Social Movements in China
This course examines historical and contemporary movements pursuing political, economic and social reforms in China. It studies both state-sponsored and voluntary movements.

Outcome: Students will gain a deeper understanding of China's ongoing transformation, and will learn how to develop their own scholarly analysis of such social change.

Components: Lecture
Course Equivalents: SOCL 263
Requirement Group: Restricted to Beijing Students
Req. Designation: Fieldwork

Development and Social Change in Modern China
This course examines change and development in modern China from the late Qing period to the present, focusing on the movement from a planned economy to a market-based economy.

Outcome: Students will gain knowledge of China's economic development path, and will apply gender and/or class-based analysis to patterns of social change.

Components: Lecture
Requirement Group: Restricted to Beijing Students
Req. Designation: Fieldwork

Environment of China
This course provides a systematic introduction to major environmental issues in the context of recent social and economic development in China

Modern Chinese Fiction
This course introduces selected fictional works by some of the most insightful writers of modern China. The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture.

Outcome: Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course.

Components: Lecture
Course Equivalents: LITR 292
Requirement Group: Restricted to Beijing Students
Req. Designation: Fieldwork

Discovering China Through Film
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.

Outcome: All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology.

Components: Lecture

### BIOL 202 (3)
**Course ID:** 013229  **Date:** 06-JUN-2018
**Introduction to Neuroscience**
Prerequisites: PSYC 101 or BIOL 101; Biology Majors: BIOL 102 & 112.

This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), physiology, neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas; laying a foundation for advanced coursework in neuroscience. BIOL 202 is cross-listed with PSYC 202.

Outcomes: Knowledge of the organization of the nervous system, cellular events that underlie emotions, learning, and behavior, and awareness of classical and modern methods for advancing the field.

| Components: | Lecture (In person) |
| Attributes: | Neuroscience |
| Requirement Group: | Prerequisites: PSYC 101 or BIOL 101; For Biology Majors: BIOL 102 & 112. |
| Req. Designation: | Fieldwork |

### BIOL 205 (4)
**Course ID:** 001295  **Date:** 06-JUN-2018
**Plant Biology Lect/Lab**
Prerequisites: BIOL 102, 112.

Lecture and laboratory. Survey of the principles of botany including development and reproduction, structure, phylogeny and metabolism.

Outcome: Students will understand the basic morphology of plants; utilize morphology in the identification of local plants; understand the anatomy of plants; understand the relationship between anatomy and basic physiology; recognize that differences in physiological function allow different plants to be found in specific environments; appreciate the diversity of organisms called "plants."

| Components: | Laboratory, Lecture |
| Requirement Group: | Pre-requisite: BIOL 102 and 112. |
| Req. Designation: | Fieldwork |
| Room Requirements: | General Classroom(1) |

### BIOL 210 (2)
**Course ID:** 009680  **Date:** 06-JUN-2018
**Laboratory Techniques**
Lab sessions designed to prove a firm foundation in basic techniques and procedures, use of equipment and apparatus; keeping a lab notebook and in data collection and treatment.

Outcome: Students will acquire basic skills needed to work in a research laboratory.

| Components: | Laboratory (In person) |
| Requirement Group: | Pre-requisite: BIOL 102 and 112. |
| Req. Designation: | Fieldwork |
| Room Requirements: | Lab - Biology(1) |

### BIOL 215 (3)
**Course ID:** 009806  **Date:** 06-JUN-2018
**Ornithology**
An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.

Outcome: Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area.

| Components: | Lecture (In person) |
| Requirement Group: | Pre-requisites: BIOL 102 and 112. |
| Req. Designation: | Fieldwork |
| Room Requirements: | Lab - Biology(1) |
### BIOL 242(4) Course ID:010724 06-JUN-2018
**Human Structure and Function I**
Prerequisite: BIOL 102, 112; CHEM 102, 112 or 106.

Lecture, laboratory, and demonstrations. Organization of the human body from the cellular to the organismal level. Anatomy of body systems and their physiology related to 1) support and movement (integumentary, skeletal and muscular systems) and integration and control (nervous and endocrine systems). Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111,112 and CHEM 101, 102, 111, 112.

Outcomes: Students will be able to demonstrate knowledge of human anatomy at the microscopic and gross levels. They will be able to correlate structure and function and will have a firm understanding of the organizing principle of human physiology, homeostasis and explain the role of the nervous and endocrine systems.

**Components:**
- Laboratory (In person), Lecture

**Requirement Group:** Prerequisite: BIOL 102, 112; CHEM 102, 112 or CHEM 106.

**Req. Designation:** Fieldwork

**Room Requirements:**

### BIOL 243(4) Course ID:010725 06-JUN-2018
**Human Structure and Function II**
Pre-requisite: BIOL 242.

Lecture, laboratory and demonstrations. A continuation of BIOL 242. Anatomy of body systems and their physiology related to 1) regulation and maintenance (cardiovascular, lymphatic respiratory, digestive and urinary systems) and reproduction and development (male and female reproductive systems.) Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111,112, BIOL 242 and CHEM 101, 102, 111, 112.

Outcomes: Students will be able to demonstrate a comprehensive integrated knowledge and understanding of human anatomy and physiology at all levels.

**Components:**
- Laboratory (In person), Lecture (In person)

**Requirement Group:** Pre-requisite: BIOL 242.

**Req. Designation:** Fieldwork

**Room Requirements:**
- Lab - Biology(1), Electronic Classroom(1)

---

### BIOL 251(3) Course ID:001307 06-JUN-2018
**Cell Biology**
Prerequisites: BIOL 102, 112 and CHEM 102 or 106.

This course covers basic molecular and cellular studies of living organisms, emphasizing the relationships between subcellular structures and biochemical and physiological functions of cells.

Outcome: Students will become familiar with a wide range of cell biological principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern cell biology research.

**Components:**
- Discussion (In person), Lecture

**Requirement Group:** Pre-requisites: BIOL 102, 112; CHEM 102 or 106.

**Req. Designation:** Fieldwork

**Room Requirements:**
- Electronic Classroom(1), Auditorium(1)

---

### BIOL 252(1) Course ID:001308 06-JUN-2018
**Cell Biology Laboratory**
Prerequisite or corequisite: BIOL 251.

Laboratory experiences designed to explore relationships between structure and function of subcellular components.

Outcome: Working knowledge of a variety of techniques utilized in the cell biology laboratory.

**Components:**
- Laboratory

**Requirement Group:** Pre-requisite or Co-requisite: BIOL 251.

**Req. Designation:** Fieldwork

**Room Requirements:**

Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Restricted to Biology and Environmental Science/Studies students.

Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels.

Outcome: Students will understand the fundamental principles governing the interactions of organisms and their environment at the population, community, and ecosystem levels.

Components: Discussion(In person), Lecture(In person)
Attributes: Environmental Studies
Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106.
Req. Designation: Fieldwork

BIOL 280(3)  Course ID:001311  06-JUN-2018

Evolution of Human Disease
Prerequisites: BIOL 102.

Introduces students to the complex interaction between human hosts and pathogens. Begins with an introduction to immunology and discussion and analysis of particular paradigms that strive to model host/pathogen interaction. Using the paradigms, paleopathological and paleodemographic information, students explore the patterns of human diseases throughout prehistory and history. Addresses the role of human biology, human culture, and changing environments.

Components: Lecture
Course Equivalents: ANTH 280
Attributes: Bioethics
Requirement Group: Prerequisite: Biology 102
Req. Designation: Fieldwork
Room Requirements: General Classroom(1)

Genetics
Pre-requisites: BIOL 102, 112; CHEM 102 or 106.
Pre-requisites For Bioinformatics majors ONLY: BIOL 101; CHEM 102 or 106.

This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population and evolutionary genetics.

Outcome: Students will develop knowledge and awareness of the genetic bases of modern biology. They will understand Mendelian principles of inheritance, chromosome and DNA structure and replication, gene expression, molecular biology, genetic bases of development and other biological processes, and quantitative, population and evolutionary genetics.

Components: Discussion(In person), Lecture
Attributes: Bioinformatics, Forensic Science
Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Pre-requisites For Bioinformatics majors ONLY: BIOL 101

**Genetics Laboratory**
Prerequisite or corequisite: BIOL 282.

Experiments and demonstrations to illustrate chromosomal structures and transmission, molecular biology, gene linkage, gene frequencies and variation.

Outcome: Students will develop technical skills and ability to interpret data from a variety of types of genetics experiments.

**Components:** Laboratory

**Attributes:** Bioinformatics, Forensic Science

**Requirement Group:** Pre-requisite or Co-requisite: Biology 282.

**Req. Designation:** Fieldwork

BIOL 296(1)  
Course ID: 011190  
06-JUN-2018

**Introduction to Research**

Prerequisites: BIOL 102, 112; Permission of the instructor; Biology Core highly recommended.

Students will begin reading the literature in the field of their mentor, conduct experiments designed by the mentor, and give a presentation on their work or studies, in preparation for upper level undergraduate research.

Learning Outcome: Students will develop critical reading skills and become familiar with basic lab techniques in the area of their mentor.

**Components:** Lecture(Directed Research)

**Attributes:** Engaged Learning

**Requirement Group:** Pre-requisite: BIOL 102 and 112.

**Req. Designation:** Undergraduate Research

06-JUN-2018

**General Microbiology Lec/Lab**

Prerequisites: BIOL 251 and 282

Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.

Outcome: Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes.

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

BIOL 303(1)  
Course ID: 007304  
06-JUN-2018

**Seminar in Neuroscience**

Prerequisites: BIOL 202 or PSYC 202

The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. BIOL 303 is cross-listed with NEUR 300.

Outcome: Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses.

**Components:** Seminar(In person)

**Course Equivalents:** NEUR 300

**Attributes:** Neuroscience

**Requirement Group:** Prerequisite PSYC 202 or BIOL 202

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Neuroscience(1)
**BIOL 304(3)**  
**Intro to Developmental Biology**  
Course ID: 001321  
06-JUN-2018  
Prerequisite: BIOL 251.  

The analysis of developmental processes such as; fertilization, embryonic cleavage, cell determination and cell differentiation in selected species. Emphasis will be on experiments that reveal how these processes are controlled at the molecular and cellular levels.  

Outcome: Students will become familiar with a wide range of developmental biology principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern developmental biology research.  

**Components:**  
Lecture  
**Requirement Group:** Pre-requisite: BIOL 251.  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

**BIOL 313(3)**  
**Lab in Psychobiology**  
Course ID: 001326  
06-JUN-2018  
Prerequisites: (BIOL/STAT 335 or PSYC 304) and (PSYC/Biol 202, PSYC/Biol 240, or PSYC 382/Biol 284); or for PSYC-BS and Cognitive/Behavioral Neuroscience majors, PSYC 306 and (PSYC/Biol 202, PSYC/Biol 240, or PSYC 382/Biol 284) Grades of C- or above are required in all prerequisites.  

A 'hands on' experience with the instrumentation, measurement techniques and experimental designs used in electrophysiological studies of nervous system function. BIOL 313 is cross-listed with PSYC 311.  

**Components:** Laboratory  
**Course Equivalents:** PSYC 311  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisites: (BIOL/STAT 335 or PSYC 304) and (PSYC/Biol 202, PSYC/Biol 240, or PSYC 382/Biol 284); Grades of C- or above are required in all prerequisites.

**BIOL 315(4)**  
**Introductory Immunology Lec/Lab**  
Course ID: 001328  
06-JUN-2018  
Prerequisites: BIOL 251, 282  

The study of the nature and molecular basis of immune responses. History and vocabulary of immunology; experiments involving immune recognition and destruction; theories regarding self-tolerance and immunological diseases.  

Outcome: Students will learn the morphology and histology of the cells involved in an immune response, as well as how the cells develop and the molecular mechanisms used to recognize and eliminate non-self material. The students will become familiar with the evasion strategies of pathogens and the consequences associated with either hyper or hypo-responsiveness.  

**Components:** Laboratory, Lecture  
**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

**BIOL 316(4)**  
**Limnology Lec/Lab**  
Course ID: 001330  
06-JUN-2018  
Prerequisites: BIOL 265 and CHEM 102 or 106.  

An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats.  

Outcome: Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions. Students will learn to evaluate the trophic status and health of a lake by the end of the course.  

**Components:** Laboratory, Lecture  
**Requirement Group:** Pre-requisite: BIOL 265 and CHEM 102 or 106.  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)
### BIOL 317(3) Course ID:013298 06-JUN-2018
#### Models of Human Disease
This course explores approaches used to study human diseases from in vitro to in vivo levels and examines their strengths and weaknesses. Discussions will cover historical experiments and cutting-edge research to learn about the techniques used to generate data and how to interpret the results.

Outcomes: Students will gain knowledge about human diseases and techniques used to model aspects of those diseases in the laboratory.

#### Evolution
Prerequisite: BIOL 282; BIOL 265 recommended

This course focuses on analysis of processes and patterns of evolution. Topics include population genetic principles, fossil patterns and geologic ages, phylogenetic analysis of relationships of species, experimental approaches to evolutionary questions, and evolutionary perspectives on human biology and relationships.

Outcome: Students will develop knowledge and awareness of evolutionary processes and patterns, the evidence for them, and how evolutionary hypotheses are tested experimentally. They will develop an appreciation of the primary literature through reading and discussing research articles.

### BIOL 320(3) Course ID:001335 06-JUN-2018
#### Animal Behavior
Prerequisites: ANTH 101 or 103; or BIOL 102 & 112.

This course examines the biological basis of animal behavior including function and evolution of behavior patterns. Mechanisms and the adaptive significance of behaviors are examined and analyzed. BIOL 320 is cross-listed with ANTH 320.

Outcome: Students will have an understanding of both proximate and ultimate causes of a broad array of behaviors in animals and their implications for the life histories of those animals.

**BIOL 327(4) Wetland Ecology**
- **Prerequisite:** BIOL 265
- **Outcome:** Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants.

**BIOL 328(3) Conservation Biology**
- **Prerequisite:** BIOL 265
- **Outcome:** Students will be able to describe conservation strategies being used by institutions around the world and understand the ecological theory that supports those strategies.

**BIOL 329(3) Winter Ecology**
- **Prerequisites:** BIOL 265 or permission of instructor
- **Outcomes:** Students will gain understanding of habitats and organisms present during winter in temperate ecosystems and gain experience with field techniques employed when studying these ecosystems.

**BIOL 337(3) Quantitative Methods in Bioinformatics**
- **Course Equivalents:** STAT 337
- **Attributes:** Bioinformatics

**BIOL 341(4) HistologyLec/Lab**
- **Prerequisite:** BIOL 251, 282.
- **Outcome:** The major learning objectives for this course are (1) to become familiar with the gross and microscopic anatomy of cells, tissues and organs and (2) to understand how these anatomical features correlate with specific physiological functions.
## BIOL 342(4)  Human Anatomy
- **Course ID:** 001346
- **Offered:** 06-JUN-2018

**Prerequisites:** BIOL 242, 243, 251, 282; CHEM 222 or 224.

A mixed lecture and laboratory course providing an in-depth look at the human body at the level of gross anatomy.

**Outcome:** Students will acquire an advanced understanding of the structure and relationships of major organ systems in the human body.

**Components:** Laboratory (In person), Lecture (In person)

**Attributes:** Forensic Science

**Requirement Group:** Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224.

**Room Requirements:** Lab - Biology(1)

---

## BIOL 346(3)  Biology of Women
- **Course ID:** 009821
- **Offered:** 06-JUN-2018

This course focuses on the anatomy and physiology of women at different and critical times in their life span. This course also addresses social issues that effect women at different points in their life. Topics include the evolution of sex, gender differentiation, and reproduction.

**Outcome:** Students will learn about the biology of the female system, and how it changes with age. Students will also learn through discussions and guest lectures the interplay between society, medicine and gender.

**Components:** Lecture (In person)

**Course Equivalents:** WOST 346, ANTH 346

**Attributes:** Women & Gender Studies

**Requirement Group:** Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224.

**Room Requirements:** Electronic Classroom(1)

---

## BIOL 350(4)  Vertebrate Physiology Lec/Lab
- **Course ID:** 001348
- **Offered:** 06-JUN-2018

**Prerequisites:** BIOL 242, 243, 251, BIOL 282, and CHEM 222 or 224.

Lecture and laboratory. Animal function and structure; emphasis on organ physiology. Feeding, digestion, water relations, respiration, hormone systems, receptor and effector mechanisms, central nervous coordination, regulation of homeostasis, dynamics of the circulatory system and the physiology of bone and musculature.

**Outcome:** Students will demonstrate detailed understanding of how organ function is regulated at cellular and systems level.

**Components:** Laboratory, Lecture

**Requirement Group:** Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224.

**Room Requirements:** General Classroom(1)

---

## BIOL 351(3)  Sleep/Circadian Rhythms
- **Course ID:** 013221
- **Offered:** 06-JUN-2018

We will cover circadian rhythms one very prominent circadian-regulated behavior: sleep. We will investigate these topics at several different levels, spanning from cellular and molecular mechanisms to systems and behavioral approaches, and finally will look at pathologies of these systems that lead to human disorders.

**Prerequisites:** BIOL 251, BIOL 282, PSYC/BIOL 202 (Introduction to Neuroscience, formerly Brain and Behavior)

**Outcomes:** Students will become familiar with a variety of model systems used to study circadian rhythms, and learn how to critically read primary literature and lead discussions of this reading.

**Components:** Lecture (In person)

**Attributes:** Neuroscience

**Requirement Group:** Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior)

**Room Requirements:** Electronic Classroom(1)

## BIOL 352(3)  Mammalian Endocrinology
- **Course ID:** 001350
- **Offered:** 06-JUN-2018

**Prerequisite:** BIOL 242 and BIOL 243.

Survey of hormones that regulate metabolism, salt and water balance, calcium and phosphorus metabolism, and reproduction; special emphasis on hormonal transduction signals and integration of endocrine systems.

**Outcome:** Students will develop detailed understanding of how numerous aspects of metabolism are controlled at cellular and systems levels by hormone action.

**Components:** Lecture (In person)

**Requirement Group:** Pre-requisite: BIOL 242 & 243.
**Mammalian Reproduction**

Prerequisite: BIOL 251.

Anatomy and physiology of male and female reproductive systems, fertilization, implantation, pregnancy, and birth; immunological aspects of reproduction.

Outcome: Students will understand structure/function relationships in reproductive biology and how reproductive systems are regulated at cellular levels.

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisite: BIOL 251.

**Room Requirements:** General Classroom(1)

**Parasitology Lec/Lab**

A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.

Outcome: Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation.

**Components:** Laboratory(In person), Lecture

**Requirement Group:** Pre-requisite: BIOL 251.

**Room Requirements:** Electronic Classroom(1), General Classroom(1)

**Neural Disease, Degeneration, and Regeneration**

This course offers an overview of cellular and molecular mechanisms underlying common neurodegenerative disorders. Mechanisms of neuronal cell death and application of stem cells in CNS regeneration will also be covered. Students will learn by reading assigned background materials and research articles, and participating in class discussions. Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior).

Outcomes: Students will understand current advances of genetic, developmental, molecular, and cellular mechanisms underlying the neurodegenerative diseases. Students will also learn how disease mechanisms affect neural function, cognition, and behavior.

**Components:** Lecture(In person)

**Attributes:** Neuroscience

**Requirement Group:** Pre-requisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior).

**Room Requirements:** Electronic Classroom(1)

**Developmental Neurobiology**

Prerequisites: BIOL 251, 282.

This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis.

Outcome: Students will become familiar with principles of neural development and the studies that led to those principles. Students will also learn how to critically read primary research papers and present these papers to the class.

**Components:** Discussion, Lecture

**Attributes:** Neuroscience

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Room Requirements:** General Classroom(1)
### BIOL 360(3)  
**Course ID:** 001357  
**Date:** 06-JUN-2018  
**Department Consent Required**  

**Field Biology**  
Prerequisites: BIOL 265 and permission of chair.  

Ecological study of an area in North America outside Midwest. Includes a field trip to a specific region. Trip is at student expense.  

Outcome: Students will become familiar with an ecosystem outside the Chicago Region; gain a first-hand understanding of the interrelationships of living things and their environment; develop a loving appreciation of wilderness.  

**Components:** Lecture  
**Requirement Group:** Pre-requisite: BIOL 265  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

### BIOL 362(3)  
**Course ID:** 001358  
**Date:** 06-JUN-2018  

**Neurobiology**  
Prerequisite: PSYC/BIOL 202 and BIOL 251  

The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.  

Outcome: Student will gain a sold foundation in nervous system structure and function.  

**Components:** Discussion(In person), Lecture(In person)  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisite: PSYC/BIOL 202 and BIOL 251  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1), Electronic Classroom(1)

### BIOL 363(4)  
**Course ID:** 001360  
**Date:** 06-JUN-2018  

**Entomology Lec/Lab**  
Prerequisite: BIOL 265.  

An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience.  

Outcome: Students will learn to identify major insect groups in the field and in the laboratory. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.  

**Components:** Laboratory, Lecture  
**Requirement Group:** Pre-requisite: BIOL 265  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

### BIOL 366(3)  
**Course ID:** 001364  
**Date:** 01-JAN-2018  

**Cell Physiol & Biochem**  
Prerequisites: BIOL 251 and CHEM 224  

An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information pathways, and evolution. BIOL 366 is cross-listed with CHEM 361.  

Outcome: Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes. Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned.  

**Components:** Discussion, Lecture  
**Course Equivalents:** CHEM 361  
**Attributes:** Forensic Science  
**Requirement Group:** Pre-requisites: BIOL 251 & CHEM 224 or 222. Pre-requisites for Bioinformatics majors: CHEM 224 or 222  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)
**Cell Physiology & Biochemistry Lab**

*Course ID:* 001365  
*6-JUN-2018*

Introduction to modern techniques and instrumentation with an emphasis on cellular metabolism and protein biochemistry including purification and quantitation methods and enzyme kinetics.

**Outcome:** Proficiency in performing a variety of biochemical assays and the ability to write up results as a formal lab report.

**Components:** Laboratory

**Attributes:** Forensic Science

**Requirement Group:** Pre-Co-requisite with BIOL 366 or CHEM 361

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology(1)

**Bioimaging**

*Course ID:* 011440  
*6-JUN-2018*

Prerequisites: BIOL 251 and 282; PHYS 112 or 114; Instructor Permission.

This course focuses on light microscopy but also includes a section on Electron Microscopy. Topics include basic optical theory, history, sample preparation, microscope operation, digital image acquisition and analysis.

**Outcome:** Students will become adept at producing publication quality images using a variety of imaging techniques. Students will also learn how to correctly interpret results and properly present their data.

**Components:** Laboratory(In person), Lecture(In person)

**Requirement Group:** Prerequisite: BIOL 251 and 282; PHYS 112 or 114

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology(1), Lab - Biology(1)

---

**Plant Ecology Lec/Lab**

*Course ID:* 001366  
*6-JUN-2018*

Prerequisite: BIOL 265.

Focuses on plant population dynamics; plant-animal interactions, including herbivory, pollination, dispersal; plant community dynamics, such as the processes of succession; and the effect of global climate on the distribution of major vegetation types. The laboratory is divided between weekend field trips to local forests, prairies and bogs, and laboratory studies.

**Outcome:** Students will achieve familiarity with major vegetation types and especially with local vegetation and natural areas; understand the dynamics of plant communities; understand the nature of research in plant ecology and gain familiarity with the primary literature; understand environmental issues as they relate to...

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisite: BIOL 265

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology(1), Electronic Classroom(1)

---

**Invertebrate Biology**

*Course ID:* 009922  
*6-JUN-2018*

Broad survey of invertebrates including morphology, physiology, ecology, evolution, and systematics.

**Components:** Lecture(In person)

**Requirement Group:** Pre-requisite: BIOL 265

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

---

**Ichthyology Lec/Lab**

*Course ID:* 001368  
*6-JUN-2018*

Prerequisite: BIOL 265.

Lecture and laboratory and/or field trips. Systematics, phylogeny, anatomy, physiology, behavior, functional morphology and ecology of fishes. Includes field collecting trips in Lake Michigan and local streams and lakes and individual projects/research papers.

**Outcome:** Students will develop a detailed understanding of a range of topics in fish biology, with special emphasis on evolutionary relationships.

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisite: BIOL 265

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology(1)
## BIOL 373(4)
### Laboratory in Neuroscience I
**Prerequisites:** BIOL/PSYC 240 or BIOL 284/PSYC 382 and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. BIOL 373 is cross-listed with NEUR 301 & PSYC 388.

**Outcome:** Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques.

**Components:** Laboratory

**Course Equivalents:** NEUR 301, PSYC 388

**Requirement Group:** Prerequisites: BIOL/PSYC 240 or BIOL 284/PSYC 382 and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Neuroscience(1)

## BIOL 375(4)
### Aquatic Insects Lecture & Laboratory
**Prerequisite:** BIOL 265.

This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.

**Outcome:** Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans.

**Components:** Laboratory(In person), Lecture(In person)

**Requirement Group:** Pre-requisite: BIOL 265

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology(1), Electronic Classroom(1)

## BIOL 376(3)
### Seminar in Molecular/Cellular Neuroscience
**Prerequisites:** BIOL 251, 282 and 362.

Lecture/discussions will focus on issues central to molecular/cellular neuroscience, emphasizing mechanisms of development, maturation, synaptic plasticity, regeneration, hormonal regulation and molecular underpinnings of normal and disease-affected circuitry. Professors will first discuss a range of questions being pursued in their general area of study, then present primary research papers, illustrating analytical skills that students will then employ in their own presentations. Presentations and exams will test students' general understanding of the topics that are covered.

**Components:** Lecture(In person)

**Requirement Group:** Prerequisite: BIOL 251, 282, 362

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

## BIOL 377(3)
### Molecular Pathogenesis
**Instructor Consent Required**

Introduction to the molecular mechanisms of disease pathology and therapeutic and control strategies, using a particular disease as model.

**Outcome:** Students will be able to explain the molecular basis for particular disease symptoms, understand therapeutic strategies, and use experimental results to form conclusions about disease molecular mechanisms.

**Components:** Lecture(In person)

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)
### BIOL 380(3)
#### Genetics and Evolution of Development
This course explores the evolution of the embryo and the patterns of gene regulation and morphogenesis that drive early development. Topics include evolution of nervous system patterning, shared human, mouse, and frog regulatory systems and evolution of human genetic syndromes.

**Outcome:** Students will master the stages and regulation of development in a number of organisms through use of primary literature. Evidence of their mastery will be seen through grant writing exercises, in class presentations and conventional exams.

### BIOL 382(3)
#### Molecular Genetics
Prerequisites: BIOL 251, 282 and CHEM 222 or 224.

This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.

**Outcome:** Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes.

### BIOL 383(3)
#### Population Genetics
Prerequisites: BIOL 282 and MATH 132 or 162. BIOL 235 is recommended.

Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations.

**Outcome:** Students develop knowledge and awareness of population genetic theory and information. They learn how to apply basic tools of population genetic analysis.

#### Prin Electron Microscopy Lec/Lab
Prerequisites: Permission of instructor, BIOL 341 recommended.

This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques.

**Outcome:** Student will become adept with the various techniques needed to produce research quality electron micrographs. Students will also learn how to correctly interpret their results, and properly present their data.

### BIOL 387(3)
#### Genomics
Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce the students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution.

**Outcome:** Students will acquire an in-depth knowledge of the nature of gene and genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge. Students will be able to create meaningful web-based database search strategies and interpret the significance of results.

### BIOL 388(3) Course ID: 001383 06-JUN-2018

#### Bioinformatics

Students will engage in the applications of computer-based tools and database searching to better understand DNA and protein structure, function, and evolution.

**Outcome:** Students will be able to apply their understanding of genetic and evolutionary processes to the appropriate use of computer software and manipulation of large databases to accurately predict structural, informational, functional, and evolutionary characteristics of DNA and protein sequences.

**Components:** Discussion (In person), Lecture (In person)

**Course Equivalents:** COMP 381

**Attributes:** Bioinformatics

**Requirement Group:** Pre-requisite: Biol 282.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom (1), Electronic Classroom (1)

#### Introduction to Pharmacology

Prerequisite: BIOL 243, 251, 282; CHEM 224 or 222.

Principles and mechanisms of drug action. Topics discussed include drug-receptor interaction, pharmacokinetics, drug distribution, metabolism, and neuro-transmission, blood-brain barrier, and toxicology.

**Outcome:** Students will be able to describe the cellular and molecular mechanisms of action for a variety of the most commonly used drugs in current medical use.

**Components:** Lecture

**Requirement Group:** Prerequisite: BIOL 243, 251, 282; CHEM 222 or 224

**Req. Designation:** Undergraduate Research

#### Molecular Biology Laboratory

Prerequisites: BIOL 251, 282, 283 and CHEM 222 or 224

Prerequisites for Bioinformatics Majors: BIOL 282 & 283 and CHEM 222 or CHEM 224

This course is an intensive laboratory course in the basic principles and techniques of molecular biology, including bacterial cloning, polymerase chain reaction, restriction mapping, agarose gel electrophoresis, and DNA sequencing.

**Outcome:** Students will be able to demonstrate basic molecular biology skills including manipulation of bacterial cultures and DNA, plasmid minipreps, gel electrophoresis, cloning, polymerase chain reaction, and other molecular techniques that may be specific to their chosen independent projects.

**Components:** Laboratory (In person)

**Attributes:** Engaged Learning, Bioinformatics, Neuroscience

**Requirement Group:** Prerequisites: BIOL 251, 282, 283 and CHEM 222 or 224. Prerequisites for Bioinformatics Majors: BIOL 282 & 283

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology (1)

### BIOL 391(5) Course ID: 009427 15-JUN-2017

#### Forensic Molecular Biology Lecture and Lab

Prerequisite: BIOL 282, 283 & FRSC-BS Major.

This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.

**Outcome:** Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses, and will be able to isolate and process DNA for STR scoring.

**Components:** Laboratory (In person)

**Course Equivalents:** FRSC 371

**Attributes:** Forensic Science

**Requirement Group:** Pre-requisites: BIOL 282 & BIOL 283. Restricted to Forensic Science Majors.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology (1)

College of Arts and Sciences - Chemistry and Biochemistry - Subject: Chemistry

CHEM 111(1)  
General Chemistry Lab A  
Pre or co-requisite: CHEM 101.

Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.

Outcome: Students will be able to use equipment properly and demonstrate correct laboratory technique.

Components: Laboratory

Attributes: Bioinformatics, Forensic Science

Requirement Group: The pre or co-requisite for CHEM 111 is CHEM 101 and prerequisite: Math Placement Test or Math 117; or Pre-Prof Health Science.

Req. Designation: Internship

Room Requirements: Lab - Chemistry(1)

CHEM 112(1)  
General Chemistry Lab B  
Pre or co-requisite:CHEM 102. Prerequisite:CHEM 111.

The second semester of general chemistry laboratory exposes students to qualitative analysis and continues the process of experimenting and collecting data to test the validity of theories and models presented in lecture.

Outcome: Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements.

Components: Laboratory

Attributes: Bioinformatics, Forensic Science

Requirement Group: Pre or co-requisite:CHEM 102. Prerequisite:CHEM 111.

Req. Designation: Internship

Room Requirements: Lab - Chemistry(1)

CHEM 151(4)  
Elem Physiological Chemistry A  
Prerequisite: high school chemistry or permission of chairperson.

Lecture, quiz and laboratory course primarily for nursing students emphasizing basic chemical properties, electron configuration, states of matter, gas laws, stoichiometry and energetics of reactions, aqueous equilibria, use of radioisotopes in medicine, environmental considerations, and nomenclature and structure in organic chemistry.

Outcome: Students will learn basic chemical principles in these areas.

Components: Discussion, Laboratory, Lecture

Course Equivalents: GNUR 160

Req. Designation: Internship

Room Requirements: General Classroom(1)

CHEM 171(3)  
General Chemistry for Engineering Science Majors  
This course is designed to acquaint students in engineering science with fundamental concepts of chemistry as well as their applications in the field of engineering. Students will survey topics in atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry. A good background in high school chemistry is recommendation.

Pre-requisite MATH 118 or Math Placement Test; Co-requisite CHEM 173; Restricted to Engineering Science Students. A good background in high school chemistry is recommendation.

Outcomes: Students should demonstrate proficient understanding of fundamental concepts and skills of general

### CHEM 300 (1 - 6)
**Course ID:** 001613  
**06-JUN-2018**  
**Instructor Consent Required**  
**Undergraduate Research**

Prerequisites: prior consultation with the instructor and a completed agreement form. Agreement forms for this directed study course are obtained from the department office, and the completed form (signed by the student, instructor, and chairperson) must be deposited in the chemistry office before the student can register for the course.

This course gives undergraduate students an opportunity to participate in research in a selected area.

Outcome: Students will accomplish the research task defined in the contractual arrangement between the student and the instructor.

CHEM 323(3)  
**Medicinal Chemistry**  
Prerequisites: CHEM 222 or 224  
This course examines how medicinal chemists design and synthesize drug candidates to meet FDA requirements of efficacy and safety, and how a testing strategy measures efficacy vs. toxicity comprising the therapeutic index. Topics include drug-receptor/enzyme binding, PK, ADME; patenting of IP, and the ethical aspects of pharmaceuticals.  
Outcomes: Students will be able explain the strategy of drug candidate analog design, synthesis, binding and inhibition constants, drug testing strategies, pharmacokinetics, structure-activity relationships (SAR), and the therapeutic index of drugs.  
Components: Lecture(In person)  
Requirement Group: Prerequisite: CHEM 222 or 224  
Req. Designation: Undergraduate Research  
Room Requirements: Electronic Classroom(1)  

CHEM 340(3)  
**Advanced Inorganic Chemistry**  
Prerequisite: CHEM 302.  
Lecture course covering modern theories of atomic and molecular structure as applied to inorganic chemistry with discussion of acid-base theories, the chemistry, spectra and reaction mechanisms of coordination and organometallic compounds. Symmetry is used to develop molecular orbital diagrams, predict geometry, hybridization schemes and interpret electronic spectra.  
Outcome: Students will learn chemical principles in these areas.  
Components: Discussion(In person), Lecture(In person)  
Req. Designation: Undergraduate Research  
Room Requirements: General Classroom(1), General Classroom(1)  

CHEM 341(1)  
**Advanced Inorganic Laboratory**  
Prerequisite or Co-requisite: CHEM 340.  
A laboratory course illustrating topics and techniques used in modern inorganic chemistry; coordination and organometallic compounds are prepared and characterized by IR, UV-Vis and NMR spectroscopy, and magnetic susceptibility measurements. All experimental work is recorded in a laboratory notebook and includes a formal written report.  
Outcome: Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements.

CHEM 361(3)  
**Principles of Biochemistry**  
Prerequisites: CHEM 222 or 224 and 226.  
Prerequisites for Bioinformatics majors: Chem 222 or 224.  
This course examines the structural' functional relationships in proteins, nucleic acids, carbohydrates and lipids as well as their metabolic pathways. CHEM 361 is cross-listed with BIOL 366.  
Outcome: Students will be able to demonstrate an understanding of biological molecules and how they are metabolized.

- **Attributes:** Bioinformatics
- **Requirement Group:** Prerequisite: CHEM 361 or 370
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** General Classroom(1)

## CHEM 373(2)
### Biochemistry Laboratory II
- **Prerequisite:** CHEM 371

This laboratory course is designed to simulate a research project in which molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. The course theme involves an investigation on the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form.

- **Requirement Group:** Prerequisite: CHEM 372
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Electronic Classroom(1), Lab - Chemistry(1)

## CHEM 380(1)
### Chemistry Seminar
- **Prerequisite:** CHEM 222 or 224, and 226.

A weekly seminar course with presentations, generally given by outside speakers, covering topics in chemistry usually not encountered in the classroom.

- **Outcome:** Students will demonstrate their understanding by writing a one page summary of each presentation.
- **Components:** Seminar
- **Requirement Group:** Pre-requisites: CHEM 222 or 224 and 226.
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Auditorium(1)

## CHEM 395(0 - 3)
### Special Topics in Chemistry
- **Prerequisite:** Satisfactory progress toward completion of the core chemistry courses, and junior or senior status.

Course content varies from semester to semester and has included advanced topics in analytical, inorganic, organic, physical, and biochemistry.

- **Outcome:** Students will acquire an advanced understanding of a selected topic in chemistry.
- **Components:** Lecture
- **Requirement Group:** Prerequisite: Junior standing or above.
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** General Classroom(1)

## CHEM 395B(3)
### Bioethics Minor Capstone: Chemical Topics
- **Prerequisites:** Two Science courses and two Ethics courses

This course number will only be used when CHEM 395 is tagged with the Bioethics Minor Capstone course.

- **Outcome:** Students will understand the connection between ethical and chemical issues with regard to the special topic in chemistry.
- **Components:** Seminar (In person)
- **Attributes:** Bioethics
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Electronic Classroom(1)
### Special Topics in Biochemistry

### Medicinal Chemistry

- **Course ID:** CHEM 423 (3)
- **Course ID:** 012857
- **Date:** 06-JUN-2018

This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.

**Outcomes:**
1. Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window.
2. Summarize interactions of drugs with receptors, enzymes, or nucleotides.
3. Analyze structure-activity relationships given potency data.

**Components:** Lecture (In person)

**Private Life of Ancient Romans**

This course constitutes an investigation of the lives of individuals amidst the society of ancient Rome (and the Roman Empire), including, among other things, their involvements in religion, politics, education, and their gender-relations.

Outcome: Students should be able to demonstrate knowledge of what it was like to be alive and active in ancient Rome, what important issues and concerns affected the ancient Romans (and subjects of Rome) individually, and how these are to be compared and contrasted with their own life issues and concerns.

**Components:** Lecture  
**Course Equivalents:** ROST 374

COMP 170(3) Course ID:002165 06-JUN-2018

Introduction to Object-Oriented Programming
Prerequisite: MATH118 or Placement or COMP125 or COMP150 or COMP163 or permission. Experience programming in a procedural or object-oriented language recommended. Students in the School of Continuing and Professional Studies may enroll with no further prerequisites

This programming intensive course with its weekly lab component introduces basic concepts of object-oriented programming in a language such as Java.

Outcome: Ability to take a problem, break it into parts, specify algorithms, and express a solution in terms of variables, data types,

Components: Laboratory, Lecture
Attributes: Bioinformatics
Requirement Group: At least C- in MATH 118 or Math Placement or COMP 125 or COMP 150 or COMP 163 or Permission. Students

Req. Designation: Internship
Room Requirements: General Classroom(1)

COMP 180(3) Course ID:013334 06-JUN-2018

Computing and Data Analysis for the Sciences
Scientific computing emphasizes data analysis and visualization in a scientific context - analyzing data quickly for understanding by the individual, sharing automated workflows with collaborators, and preparing results for later publication. This course will emphasize rapid, interactive, and reproducible collaborative analysis of data for scientific contribution.

Students are required to have taken MATH 117: College Algebra as a prerequisite or to have been placed in MATH 118: Precalculus or higher.

At the end of this course, students will be well versed in the use of a specific, interactive environment for data analysis (likely Python, R, or MATLAB as indicated in the course notes) for analyzing data and sharing

Components: Lecture(Blended)
Attributes: Neuroscience
Requirement Group: Prerequisite: MATH 117 (or any higher MATH course such as 118, 131, 132, 161, 162) with grade of at least C-

Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

COMP 250(3) Course ID:009503 06-JUN-2018

Introduction to Scientific and Technical Communication
Prerequisite: A minimum grade of C- in COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215.

This course trains students in writing clear, readable, and well-organized technical communications, including presentations, end-user documentation, internal project documentation, and scientific papers.

Outcome: students will learn to write clear technical documentation.

Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

Req. Designation: Writing Intensive

COMP 251(3) Course ID:002171 06-JUN-2018

Introduction to Database Systems
Prerequisites: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.

Outcomes: Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data.

Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

Introduction to Computer Systems
Prerequisites: COMP 170 or COMP 215
Co-requisites: COMP 163 or MATH 201 or declared Computer Science, Computer Crime & Forensices or Information Technology Minor.

This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.

Outcome: Understanding of system issues that affect the performance, correctness, or utility of user-level programs.

Components: Lecture
Requirement Group: Prerequisites: COMP 170 or COMP 215 Co-requisites: COMP 163 or MATH 201 or declared Computer Science, Computer Crime & Forensices or Information Technology Minor.

Data Structures: Algorithms and Applications
Prerequisites: COMP 170 or COMP 215
Co-requisite: COMP 163 or MATH 201 or declared Computer Science Minor, Computer Crime and Forensics Minor, or Information Technology Minor.

This course introduces key data structures such as lists, sets, and maps, as well as their implementations. Performance and analysis of algorithms are covered along with applications in sorting and searching.

Outcome: Students will learn to design new data structures as well as learn to use existing data structures in applications.

Components: Laboratory, Lecture
Attributes: Bioinformatics
Requirement Group: Prerequisites: COMP 170 or COMP 215 and Co-requisite: COMP 163 or MATH 201

Data Warehousing and Data Mining
(COMP 251 or COMP 271) and (STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

This course covers theory and practice of extremely large information storage (warehousing) and analysis (mining) mechanisms. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.

Outcome: Students will be able to define and critically analyze data warehouse and mining approaches for fields such as security, forensics, privacy, and marketing.

Components: Lecture(In person)
Requirement Group: Prerequisites for COMP 300: ( At least C- in COMP 251 or COMP 271) and (at least C- in STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)
Req. Designation: Writing Intensive
Room Requirements: Lab - Computer(1)

Database Administration
Prerequisites: Comp 251 or Comp 271

Business and scientific institutions increasingly use large commercial data base systems. This course teaches the theory and practice for the definition, security, backup, tuning, and recovery of these systems.

Outcome: Students will be able to use theory and pragmatic approaches to define and implement realistic solutions for large database administration environments.

Components: Lecture(In person)
Requirement Group: Prerequisite: Comp 251 or Comp 271
Req. Designation: Writing Intensive
Room Requirements: Lab - Computer(1)
### COMP 310(3) — Intro to Operating Systems  
**Course ID:** 002204  
**15-JUN-2018**  
**Prerequisite:** COMP 271  

This course introduces principles of operating systems and how they are designed. Various important parts of operating systems such as memory addressing, file structures, processes, and threads are covered.  

**Outcome:** Students will learn the different parts of an operating system at a functional level and how they interact with each other.  

- **Components:** Lecture  
- **Requirement Group:** Prerequisite: COMP 271, at least a C-  
- **Req. Designation:** Writing Intensive  
- **Room Requirements:** General Classroom(1)

### COMP 312(3) — Open Source Software Practicum  
**Course ID:** 010231  
**15-JUN-2018**  
**Prerequisite:** Comp 251 or Comp 271  

This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.  

**Outcome:** Students will learn to implement projects involving Free and Open Source software and learn how to participate in open-source projects effectively.  

- **Components:** Lecture (In person)  
- **Attributes:** Engaged Learning  
- **Requirement Group:** Prerequisite: Comp 251 or Comp 271  
- **Req. Designation:** Undergraduate Research  
- **Room Requirements:** Electronic Classroom(1)

### COMP 313(3) — Intermediate Object-Oriented Development  
**Course ID:** 009966  
**06-JUN-2018**  
**Prerequisite:** COMP 271  

Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects.  

**Outcome:** A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java.  

- **Components:** Lecture (In person)  
- **Requirement Group:** Prerequisite: COMP 271, at least a C-  
- **Req. Designation:** Undergraduate Research  
- **Room Requirements:** Lab - Computer(1)

### COMP 314(1) — Problem Solving Strategies I  
**Course ID:** 010224  
**06-JUN-2018**  
**Co-requisite or Prerequisite:** COMP 271  

This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.  

**Outcome:** Ability to work in small groups, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge.  

- **Components:** Seminar (In person)  
- **Requirement Group:** Co-requisite or prerequisite: Comp 271  
- **Req. Designation:** Undergraduate Research  
- **Room Requirements:** General Classroom(1)

### COMP 315(2) — Problem Solving Strategies II  
**Course ID:** 010232  
**06-JUN-2018**  
**Prerequisite:** Comp 314  

This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.  

**Outcome:** Ability to lead a small group, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge.  

- **Components:** Seminar (In person)
COMP 317(3)  Course ID:009773  06-JUN-2018
Social, Legal, and Ethical Issues in Computing
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcome: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system.
Components: Lecture(In person)
Attributes: Sociolegal Studies
Req. Designation: Undergraduate Research

COMP 320(3)  Course ID:009416  06-JUN-2018
Software Systems Analysis
Pre-requisite: COMP 163 and 170 or Instructor Approval.
Software systems analysis and design document user needs, create system architecture, and guide implementation. This course teaches the Unified Modeling Language (UML), and uses current software tools for analysis and design.
Outcome: Students will be able to use techniques of analysis and design, document results using UML, and understand how to communicate in team-oriented settings.
Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 321(3)  Course ID:002194  15-JUN-2018
Computational Aspects of Modeling and Simulation
This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs.
Prerequisites: STAT 203 or STAT 335
Outcomes: Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable.
Components: Lecture(In person)
Course Equivalents: STAT 321
Requirement Group: Prerequisite: STAT 203 or 335
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 322(3)  Course ID:013169  06-JUN-2018
Software Development for Wireless and Mobile Devices
This course will focus on the unique challenges, methods, tools, and technologies for developing software applications for wireless and mobile devices, smart mobile phones, and the growing world of mobile connected devices.
Prerequisite: Comp 313 Intermediate Object Oriented Development
Outcomes:
1. Understand challenges of software design for resource limited devices.
2. Know the architecture for one or more state-of-the-art mobile operating systems
Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

COMP 323(3)  Course ID:013585  15-JUN-2018
Game Design and Development
This course studies design, development, and publication of games and game-based applications. This includes example games and designers, industry practices, and team-based project development.
Prerequisite: COMP 271
Outcomes: Students will acquire an awareness of different game design and development methods, technologies, and techniques suitable for the development of a variety of game based environments.
Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 271, at least a C-
COMP 324(3)  Course ID:013155  06-JUN-2018
Client-Side Web Development
This course covers the design and implementation of the presentation layer of dynamic web applications. Topics include visual design and usability, multi-channel and multi-modal applications, markup of static and dynamic content, and client-side executable content. HTML/CSS/JavaScript are introduced quickly, followed up with the stack of current JavaScript frameworks and libraries used in practice.

Prerequisite: COMP 271 or Instructor permission

Outcomes: Familiarity with the most common effective tools for creating responsive, dynamic, and interactive web content with client-side tools.

Components: Lecture(Blended)

Requirement Group: Prerequisite: COMP 271, at least a C-

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)

COMP 325(3)  Course ID:013459  15-JUN-2017
Rapid Application Development Methodology
1: This course will teach students how to effect rapid application development using a software framework such as the .NET Framework. Particular emphasis will be placed on enhancing object-oriented programming skills using a language such as C#.NET.
2: Pre-requisite  COMP 271 with a grade of C- or above.
3: Outcomes: Students will gain enhanced skill in object-oriented programming and development of such applications as database applications, web applications, Microsoft .NET services, Silverlight applications, and WCF Services.

Components: Lecture(In person)

Requirement Group: Pre-requisite: COMP 271

Req. Designation: Undergraduate Research

Room Requirements: Lab - Computer(1)

COMP 329(3)  Course ID:013580  15-JUN-2018
Introduction to Natural Language Processing
This course provides an introduction to the field of natural language processing (NLP). NLP is concerned with computational approaches to analyzing, generating, and understanding human language. This course will introduce the students to the problems, methods, and applications of NLP.

Prerequisites - COMP 271 AND (MATH 131 OR MATH 161) AND (COMP 163 OR STAT 103)

Outcomes - Students will become familiar with such areas of natural language processing as information retrieval, sentiment analysis, machine translation, document classification, and question answering.

Components: Lecture(In person)

Requirement Group: At least C- in COMP 271 AND (MATH 131 OR MATH 161) AND (COMP 163 OR STAT 103)

Req. Designation: Undergraduate Research

Room Requirements: Lab - Computer(1)

COMP 330(3)  Course ID:002184  06-JUN-2018
Software Engineering
Prerequisite: COMP 271.

Students learn real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.

Outcome: Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others.

Components: Lecture

Requirement Group: Prerequisite: COMP 271, at least a C-

Req. Designation: Undergraduate Research

Room Requirements: General Classroom(1)

Mathematical Foundations of Cryptography
Prerequisites: Theoretical Foundations: MATH 201 or COMP 363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215.

This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.

Outcome: Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed.

Components: Lecture(In person)
Course Equivalents: MATH 331
Requirement Group: Prerequisite: Theoretical Foundations: MATH201 or COMP363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215.

COMP 333(3) Course ID:013157 15-JUN-2017
Web Services Programming
Web services are building blocks for enterprise applications that use open data exchange standards and transport protocols to exchange data with calling clients. This course studies the architectures, frameworks, and tools required to develop and compose web services and clients, as well as integrate service-oriented systems with legacy systems.

Prerequisite: COMP 313

Outcomes: An understanding of the design space of software architecture. Proficiency in designing, implementing, deploying and composing systems from web services.

Components: Lecture(In person)
Requirement Group: Pre-requisite: COMP 313.
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

COMP 335(3) Course ID:002187 15-JUN-2017
Formal Methods in Software Engineering
Prerequisite: Comp 313

As embedded and networked systems are becoming ever more ubiquitous, we depend increasingly on the correctness of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.

Outcomes: An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as UML and ESC.

Components: Lecture
Requirement Group: Pre-requisite: COMP 313.
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 336(3) Course ID:009582 06-JUN-2018
Markup Languages
Pre-requisite: Comp 271

This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.

Outcome: After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services.

Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 271, at least a C-
Req. Designation: Undergraduate Research
Room Requirements: Lab - Computer(1)
### COMP 339(3)  
**Course ID:** 009583  
**Date:** 06-JUN-2018  
**Title:** Distributed Programming  
**Prerequisite:** COMP 313, COMP 363 or COMP 374  

This course covers topics in modern distributed systems. This course places special emphasis on scalability (performance), reliability/fault tolerance, and security.

**Outcome:** After taking this course, students should understand the essential ingredients of distributed systems and how to build distributed systems that are resilient to transient network failures and other potential anomalies.

**Components:**  
- Lecture (In person)  
- Requirement Group: Prerequisite: COMP 313 or 363 or 374  
- Req. Designation: Undergraduate Research  
- Room Requirements: Lab - Computer(1)

### COMP 340(3)  
**Course ID:** 010307  
**Date:** 06-JUN-2018  
**Title:** Computer Forensics  
**Prerequisite:** (COMP 150 or COMP 170 or COMP/MATH 215) and (COMP 264 or COMP 317 or COMP 343)  

The course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.

**Outcome:** The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols.

**Components:**  
- Lecture (In person)  
- Requirement Group: Prerequisites: (COMP 150 or COMP 170 or COMP/MATH 215) and (COMP 264 or COMP 317 or COMP 343)  
- Req. Designation: Undergraduate Research  
- Room Requirements: Electronic Classroom(1)

### COMP 343(3)  
**Course ID:** 002190  
**Date:** 06-JUN-2018  
**Title:** Intro to Computer Networks  
**Prerequisite:** Comp 264 or Comp 271  

This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. Some Java programming is required.

**Outcome:** Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed.

**Components:**  
- Lecture  
- Requirement Group: Prerequisite: Comp 264 or Comp 271  
- Req. Designation: Undergraduate Research  
- Room Requirements: General Classroom(1)

### COMP 345(3)  
**Course ID:** 013433  
**Date:** 06-JUN-2018  
**Title:** Internet of Things Device and Application Security  
**Prerequisites:** COMP 348 and (COMP 264 or COMP 271)  

It introduces the Internet of Things (IoT) comprising embedded devices and cloud-based resources. The course studies concepts and techniques used in designing and implementing IoT systems providing valuable functionality to consumers and valuable data to organizations. The course discusses methods for addressing related safety, security, reliability, and privacy concerns.

**Outcomes:** Ability to design and implement secure software and establish safety, security, reliability, and privacy goals for embedded and IoT-based systems.  
Ability to visualize and analyze data from an IoT system.

**Components:**  
- Lecture  
- Requirement Group: Prerequisite: Comp 264 or Comp 271  
- Req. Designation: Undergraduate Research  
- Room Requirements: Lab - Computer(1)

### COMP 346(3)  
**Course ID:** 002191  
**Date:** 06-JUN-2018  
**Title:** Intro Telecommunications  
**Prerequisite:** Comp 264 or Comp 271  

This course introduces the fundamental concepts of telecommunication networks, including requirements of voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system.

**Outcome:** Students will understand how modern telephone systems work.

**Components:**  
- Lecture  
- Requirement Group: Prerequisite: Comp 264 or Comp 271  
- Req. Designation: Undergraduate Research  
- Room Requirements: Electronic Classroom(1)
Intrusion Detection and Computer Security
Prerequisite: COMP 150 or COMP 170

This course covers techniques and algorithms for detecting unusual usage patterns that typically signal a break-in, including techniques for detecting evasive or stealthy attacks. Also covered are differences in detecting local versus network intruders. Additional topics: computer viruses, computer security management, computer forensics.

Outcomes: Students will learn to configure ID systems (e.g. SNORT) and analyze their output. They will also understand both network-based and host-based monitoring techniques.

Components:
- Lecture (In person)
- Requirement Group: Prerequisite: COMP 150 or COMP 170
- Req. Designation: Undergraduate Research
- Room Requirements: Electronic Classroom(1)

Network Security
Prerequisite: COMP 264 or COMP 271 or COMP 347

This course continues some of the topics introduced in COMP 347. The course covers methods and tactics to keep network attackers at bay and teaches mechanisms to identify and potentially stop potential intruders. Analyses of specific attack mechanisms may be considered.

Outcomes: An understanding of how to secure networks using encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.

Components:
- Lecture (In person)
- Requirement Group: Prerequisite: COMP 264 or COMP 271 or COMP 347
- Req. Designation: Undergraduate Research
- Room Requirements: Lab - Computer(1)

Wireless Networking and Security
Prerequisite: Comp 264 or Comp 271

This course will explore the wireless standards, authentication issues, and common configuration models for commercial versus institutional installations and analyze the security concerns associated with this ad-hoc method of networking.

Outcome: Students will gain an understanding of wireless networking, protocols, and standards and security issues.

Components:
- Lecture (In person)
- Requirement Group: Prerequisite: Comp 264 or Comp 271
- Req. Designation: Undergraduate Research
- Room Requirements: Electronic Classroom(1)

Network Management
Pre-requisite: Comp 264 or Comp 271

This course introduces the current state of the art in automated management of computer networks, including protocols such as SNMP and its attendant naming conventions, network management systems, and important issues in administrative network configuration.

Outcome: Students will become familiar with the SNMP protocol, with how large-scale Network Management Systems operate and are configured, and with advanced network configuration.

Components:
- Lecture (In person)
- Requirement Group: Prerequisite: Comp 264 or Comp 271
- Req. Designation: Undergraduate Research
- Room Requirements: Lab - Computer(1)

Introduction to Computer Vulnerabilities
Prerequisites: COMP 264 and COMP 347

This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.

Outcomes: Describe some recent computer software vulnerabilities at the machine-code level and how they can be leveraged into an attack.

Run a virus in a virtual-machine sandbox with appropriate monitoring.

Components:
- Lecture (In person)
COMP 353(3)  
Course ID: 002193  
06-JUN-2018  

Database Programming  
Prerequisite: COMP 251 or COMP 271  

This course introduces relational and object databases to support database creation and application development. Use of commercial database products will give a practical orientation.

Outcome: Students will learn SQL, database design and application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation.

Components:  
Lecture (In person)

Room Requirements:  
Lab - Computer(1)

COMP 363(3)

Design and Analysis Computer Algorithms  
Prerequisites: (Comp 163 or Math 201) and Comp 271 and (Math 131 or Math 161)  

Theoretical design and analysis of computer algorithms may be supplemented by small amounts of programming.

Outcome: The ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes.

Components:  
Lecture (In person)

Attributes:

High Performance Computing  
Prerequisite: COMP 313, COMP 363 or COMP 374  

This course covers parallel architectures and parallel models of computation. Algorithms for achieving high performance in various computational contexts are discussed. Models such as shared memory, message passing, and hybrid modes of computing are introduced.

Outcome: Students will learn how to engineer solutions to practical problems in multiprocessor architectures and using large physical memories.

Components:  
Lecture

Requirement Group:  
Prerequisite: COMP 313 or 363 or 374

Room Requirements:

### COMP 367 (3)
**Course ID:** 002200  
**15-JUN-2017**

**Course Title:** Robotics Software Development  
This course is an introduction to robotics and robotic software development using humanoid robots. The course will use modern robot platforms and provide hands on experience with robotic sensor systems, motion and navigation, robot behavior planning and implementation.

**Prerequisites:** COMP 271. COMP 313 recommended.

**Outcomes:** Students will explore the history of robotics, overview the theory of autonomous robotic systems, and develop complete robot projects.

**Components:**  
- **Lecture (In person)**
- **Requirement Group:** Prerequisite: COMP 271, at least a C-
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Electronic Classroom(1)

### COMP 369 (3)
**Course ID:** 013499  
**15-JUN-2017**

**Course Title:** Physical Design and Fabrication  
This course explores the role of products in the economy and how things are made, including: product conceptualization and design, physical design vs. design of things that are not physical, rapid prototyping, 3D printing, 2D conceptualization and sketching, 3D modeling, and design reviews.

**Outcomes:** Students will be able to visualize ideas via sketching basic shapes, create 3D models using 3D modeling software, use a 3D Printer, and give constructive feedback in peer review sessions.

**Components:**  
- **Lecture (In person)**
- **Requirement Group:** Prerequisite: COMP 271, at least a C-
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Electronic Classroom(1)

### COMP 370 (3)
**Course ID:** 009418  
**06-JUN-2018**

**Course Title:** Software Quality and Testing  
Prerequisite: Comp 271.

The course teaches software testing and quality control concepts, principles, and techniques including black box and white box testing, coverage testing, test case development, and regression testing.

**Outcomes:** Students will learn how to prevent errors, how to get 'bugs' out of software, and be able to apply this knowledge in other courses and projects.

**Components:**  
- **Lecture (In person)**
- **Requirement Group:** Prerequisite: COMP 271, at least a C-
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Lab - Computer(1)

### COMP 371 (3)
**Course ID:** 002202  
**15-JUN-2018**

**Course Title:** Programming Languages  
Prerequisite: Comp 313.

There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

**Outcomes:** An understanding of key principles and paradigms underlying the design and implementation of commonly used programming languages; exposure to formal mechanisms for describing language syntax and semantics; programming experience in several representative languages.

**Components:**  
- **Lecture**
- **Requirement Group:** Pre-requisite: COMP 313.
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** General Classroom(1)

### COMP 373 (3)
**Course ID:** 002203  
**06-JUN-2018**

**Course Title:** Objects, Frameworks, and Patterns  
Prerequisite: Comp 313.

Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.

**Outcomes:** Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development.

**Components:**  
- **Lecture**
- **Requirement Group:** Pre-requisite: COMP 313.
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** General Classroom(1)
**COMP 377(3)**
**Course ID:** 012849

**IT Project Management**
Prerequisite: COMP 251 or COMP 271

This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure and responsibilities, a written interim report, and a final oral and written report.

Outcomes: Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects.

- **Components:** Lecture (In person)
- **Requirement Group:** Prerequisite: Comp 251 or Comp 271
- **Req. Designation:** Undergraduate Research

**Machine Learning**

Machine learning is the process of making predictions and decisions from data without being explicitly programmed. Topics include a variety of supervised learning methods. Ensemble approaches are used to combine independent models efficiently. Unsupervised and semi-supervised methods demonstrate the power of learning from data without an explicit training goal.

Prerequisite: COMP 271 and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

Outcomes: Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making.

- **Components:** Lecture (Blended)
- **Requirement Group:** C- in COMP 271 and (at least C- in MATH 131 or MATH 161) and (at least C- in STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

**Computational Biology**

Prerequisites: COMP 271 and COMP 381 (Equivalencies: BIOI/BIOL 388)

This course presents an algorithmic focus to problems in computational biology. It is built on earlier courses on algorithms and bioinformatics. Problems and solutions covered in this course include gene hunting, sequence comparison, multiple alignment, gene prediction, trees and sequences, databases, and rapid sequence analysis.

Outcome: Students will learn, in detail, foundational methods and algorithms in bioinformatics.

Client-Side Web Design
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.

Prerequisite: COMP 271

Outcome: Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems.

Components: Lecture (In person)
Requirement Group: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 425(3) Course ID: 013533 15-JUN-2017
Rapid Applications Development
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.

Pre-requisite: COMP 271

Outcomes: Students will create database applications and web applications using server-side technologies.

Components: Lecture (Blended)
Requirement Group: Restricted to graduate students.
Requirement Designation: Undergraduate Research

Distributed Systems
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.

Prerequisites: COMP 313 and COMP 264; COMP 374 recommended

Outcome: Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems.

Components: Lecture (In person)
Requirement Group: Prerequisites: COMP 313 or 413
Requirement Designation: Undergraduate Research
Room Requirements: General Classroom(1)
COMP 441(3) Course ID:009722 06-JUN-2018
Human-Computer Interaction
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.

Prerequisite: COMP 271

Outcome: Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 443(3) Course ID:002225 06-JUN-2018
Computer Networks
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.

Prerequisite COMP 271 or COMP 264

Outcome: Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed.

Components: Lecture
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 446(3) Course ID:009715 06-JUN-2018
Telecommunications
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.

Prerequisite COMP 271 or COMP 264

Outcome: Students will learn how telephone and data networks work. They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 447(3) Course ID:009716 06-JUN-2018
Intrusion Detection and Computer Forensics
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.

Co-requisite or prerequisite COMP 271

Outcome: Students will learn to configure ID systems (eg., snort) and analyze their output. They will also understand both network-based and host-based monitoring techniques.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 448(3) Course ID:009717 06-JUN-2018
Network Security
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.

Prerequisite: COMP 271 or COMP 447

Outcome: Students will gain an understanding of how to secure computers and network environments.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)
### COMP 449 (3)
**Course ID:** 009718  **Date:** 06-JUN-2018

**Title:** Wireless Networking and Security

This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.

**Prerequisite:** COMP 271

**Outcome:** Students will gain an understanding of wireless networking, protocols, and standards and security issues.

### COMP 462 (3)
**Course ID:** 002228  **Date:** 15-JUN-2017

**Title:** Advanced Computer Architecture

This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.

**Outcome:** Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems.

Seminar in Undergraduate Research Methods

This seminar course offers undergraduate students the experiential opportunity to engage in research while building their foundation of research methods. Students may be part of the Loyola Undergraduate Research Opportunities Program (LUROP) through a funded fellowship, or students may be working independently with a faculty mentor (volunteering in a lab, working on a research team). All students must have a research project with a faculty mentor identified prior to enrolling in this course. As an experiential learning course, students will need to be engaging in research with a faculty mentor concurrently to taking this course. Students must work a minimum of 5 - 10 hours each week over the semester on their research projects (10 - 15 hours per week over the summer session). Students will reflect on research experience in the context of understanding research paradigms, application of research methodologies, understanding the implications of ethical research, and preparing to present research professionally. This course will provide students engaged

Criminal Justice in a Global Context

This course introduces students to the study of the causes and control of crime from a global perspective. The course considers: the way crime and criminal justice reflects social, political, and cultural forces; the complex intersection between social inequalities and state responses to crime; and the diffusion of criminal justice reforms based on concepts of equality and

Outcomes: Students will be able to demonstrate an understanding of the structure and challenges of state responses to crime from global, historical, and interdisciplinary perspectives.

Corrections

This course examines the history, functions, and processes of corrections. The primary focus is institutional corrections and its evolution based on philosophies of retribution, deterrence, incapacitation, and rehabilitation. The role and influence of community correctional practices and policy on institutional corrections are also covered.

Outcomes: Students will be able to identify and describe the role of institutional corrections in society and the criminal justice system and articulate the connection between theories regarding criminality and the purposes of incarceration that have historically guided and continue to guide American correctional practice historically and currently.

FRSC 340(3)  Course ID:011822  15-JUN-2018
Introduction to Forensic Science
Prerequisites: CJC 101; Forensic Science Majors Only.

This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.

Outcome: Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice.

Components: Lecture (In person)
Attributes: Forensic Science
Requirement Group: Prerequisite: CJC 101, Forensic Science Majors only
 Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

FRSC 341(3)  Course ID:011824  15-JUN-2018
Forensic Ethics and Professional Practice
Prerequisite: FRSC 340; Forensic Science Majors only

This course develops a basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field and professional practice of forensic science.

Outcome: Students will demonstrate an understanding and application of ethics in the forensic sciences. Students will be able to articulate the role and challenges of ethical issues facing forensic science today, the applicability of ethics in the profession and their individual careers.

Components: Lecture (In person)
Attributes: Forensic Science
Requirement Group: Prerequisite FRSC 340, Forensic Science Majors Only
 Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

FRSC 342(3)  Course ID:013394  06-JUN-2018
Expert Witness Testimony and Court Room Demeanor
The goal for this course is to give you the information necessary to be an effective and ethical witness. This should help throughout your career and help make testimony not so much something to be feared as something which represents the culmination of your work in a case.
Prerequisite: FRSC 341
Forensic Science Majors Only

Outcomes: Students should develop courtroom and expert witness testimony literacy, understanding of the dynamics during court and appreciate the impact to the judicial system.

Components: Lecture (In person)
Attributes: Forensic Science
Requirement Group: Prerequisite: FRSC 341 Forensic Science Majors Only
 Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

FRSC 350(3)  Course ID:011820  15-JUN-2018
Pattern Evidence I
Prerequisites - FRSC 341; Forensic Science Majors only

This course introduces the basic principles and methods of forensic pattern evidence: latent fingerprints, firearms and tool marks, and question documents.

Outcome: Students will demonstrate an understanding of the three (3) forensic pattern evidence areas. Students will develop techniques, work on non-probative cases, and written formal reports of findings.

Components: Lecture (In person)
Attributes: Forensic Science
Requirement Group: Prerequisite: FRSC 341 Forensic Science Majors Only
 Req. Designation: Internship
Room Requirements: Lab - Biology(1)
College of Arts and Sciences - Criminal Justice & Criminology - Subject: Forensic Science

FRSC 350L (1) Course ID: 012382 15-JUN-2018
Pattern Evidence Lab I
This course introduces the basic laboratory methods of forensic pattern evidence: latent prints, firearms and toolmarks, and questioned documents.

Pre-Co-requisites: FRSC 350; Forensic Science Majors only.

Students will demonstrate a basic competency through development of various techniques. Students will work non-probative cases, along with written formal reports of their findings.

Components: Laboratory (In person)
Attributes: Forensic Science
Requirement Group: Prerequisite or Co-requisite: FRSC 350 Forensic Science Majors Only
Req. Designation: Internship
Room Requirements: Lab - Biology (1)

FRSC 360 (3) Course ID: 013395 15-JUN-2018
Forensic Drug Chemistry I
This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed.

Prerequisites: CHEM 212, CHEM 214, CHEM 224, CHEM 226, FRSC 342; Co-requisites: FRSC 360L; Forensic Science Majors only - Chemistry option.

Outcomes: The techniques, skills, advances and limitations of the modern forensic laboratory discussed. The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting.

Components: Lecture (In person)
Attributes: Forensic Science
Requirement Group: Pre-requisites: CHEM 212, CHEM 214, CHEM 224, CHEM 226, FRSC 342; Co-requisite FRSC 360L; Forensic Science Majors - Chemistry option
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom (1)

FRSC 360L (2) Course ID: 013396 15-JUN-2018
Forensic Drug Chemistry Laboratory I
This course provides both basic and advanced foundations to the principles of forensic drug analysis. The use of basic and advanced analytical techniques to gather data, interpret results and form conclusions are developed. Additionally, national forensic laboratory operational standards and requirements are incorporated.

Outcomes: The techniques, skills, advances and limitations of the modern forensic laboratory will be discussed. The students will be able to demonstrate basic/advanced concepts of forensic drug analysis.

Components: Laboratory (In person)
Attributes: Forensic Science
Req. Designation: Writing Intensive
Room Requirements: Lab - Chemistry (1)

FRSC 361 (3) Course ID: 013397 06-JUN-2018
Forensic Toxicology I
This course stresses the practical and theoretical aspects to forensic toxicology, the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.

Prerequisites: FRSC 360/360L; Co-requisite FRSC 361L
Forensic Science Majors Only
Outcomes: Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field of forensic toxicology.

Components: Lecture (In person)
Attributes: Forensic Science
Requirement Group: Prerequisites: FRSC 360/360L; Co-requisite FRSC 361L Forensic Science Majors Only
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom (1)
Forensic Toxicology Laboratory I

This course stresses the practical and theoretical aspects to forensic toxicology, the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.

Pre-requisites: FRSC 360/360L; Co-requisite FRSC 361

Forensic Science Majors Only

Outcomes: The techniques, skills, advances and limitations of the modern forensic laboratory discussed. The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting.

Components: Laboratory (In person)

Attributes: Forensic Science

Requirement Group: Pre-requisites: FRSC 360/360L; Co-requisite FRSC 361 Forensic Science Majors Only

Req. Designation: Writing Intensive

Room Requirements: Lab - Chemistry (1)

Forensic Biology

This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.

Prerequisites: FRSC 341, Biology 102 and 112; Co-requisite FRSC 370L

Forensic Science Majors Only

Outcomes: Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field of forensic biology.

Components: Lecture (In person)

Attributes: Forensic Science

Requirement Group: Prerequisite FRSC 341, BIOL 102, BIOL 112 Co-requisite FRSC 370L, Forensic Science Majors Only

Req. Designation: Writing Intensive

Room Requirements: Electronic Classroom (1)

Forensic Molecular Biology Lecture and Laboratory

This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.

Prerequisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, FRSC 370L; Forensic Science Majors only - Biology/DNA Option

Outcomes: Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses, and will be able to isolate and process DNA for STR scoring.

Components: Laboratory (In person), Lecture (In person)

Course Equivalents: BIOL 391

Attributes: Forensic Science

Requirement Group: Pre-requisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, FRSC 370L; Forensic Science Majors only - Biology/DNA Option

Req. Designation: Writing Intensive

Room Requirements: Lab - Biology (1), Lab - Biology (1)
**Forensic Science Internship**

The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.

**FRSC 342 Forensic Science Majors Only**

Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses.

Components: Supervision (In person)

Attributes: Engaged Learning, Forensic Science

Requirement Group: Prerequisite: FRSC 342 Forensic Science Majors Only

Req. Designation: Internship

Room Requirements: Classroom Not Needed (1)

---

**Forensic Science Seminar**

A weekly seminar course with presentations, generally given by outside speakers, covering topics in chemistry usually not encountered in the classroom.

**FRSC 392(1)**

Outcomes: Students will demonstrate their understanding by writing a one page summary of each presentation.

Components: Lecture (In person)

Attributes: Forensic Science

Requirement Group: Restricted to Forensic Science majors.

Req. Designation: Internship

Room Requirements: Electronic Classroom (1)

---

**Forensic Science Research**

This course gives undergraduate students an opportunity to participate in research in a selected area.

**FRSC 394(1 - 4)**

Prerequisites: Prior consultation with the instructor and a completed agreement form. Agreement forms for this directed study course are obtained from the program office, and the completed form (signed by the student, instructor, and program director) must be deposited in the program office before

Outcomes: Students will accomplish the research task defined in the contractual arrangement between the student and the instructor.

Components: Laboratory (In person)

Attributes: Engaged Learning, Forensic Science

Requirement Group: Restricted to Forensic Science majors.

Req. Designation: Undergraduate Research

Room Requirements: Classroom Not Needed (1)

---

**Special Topics in the Forensic Science**

Special topics courses provide students with an opportunity to examine various forensic science topics not normally offered as part of the Program's regular curriculum.

**FRSC 395(3)**

Outcomes: Students will be able to gain an understanding of new issues confronting the forensic sciences, or an advanced understanding of traditional subjects covered in basic courses.

Components: Lecture (In person)

Attributes: Forensic Science

Requirement Group: Prerequisite: FRSC 341 Forensic Science Majors Only

Advanced Bioinformatics

Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.

Prerequisites - BIOL 388 or BIOL 488

Outcomes - Students can describe, design, implement, and evaluate bioinformatics algorithms.

Components: Discussion(In person), Lecture(In person)
Course Equivalents: BIOL 450
Requirement Group: Restricted to graduate students.
Req. Designation: Undergraduate Research
Room Requirements: Seminar(1), Seminar(1)

BIOI 500(1 - 2) Course ID:013476 15-JUN-2018

Bioinformatics Seminar

The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.

Prerequisite: BIOL 388 or BIOL 488

Students can summarize, critique, and present bioinformatics research.

Components: Discussion(In person), Seminar(In person)
Course Equivalents: BIOL 451
Req. Designation: Undergraduate Research

Ballet Dance I: Theory and Technique
Ballet I is designed to introduce the concepts and vocabulary of ballet with a focus on developing student's body awareness and control. Students will learn about the art form of ballet in relationship to theatre, music and other forms of dance.

Outcome: Students will improve their posture, flexibility and coordination. They will develop a reference for enjoying ballet performances and create a foundation for further dance training.

Components: Performance(In person)
Course Equivalents: THTR 111
Attributes: Artistic Knowledge and Experience
Req. Designation: Service Learning / Internship

DANC 121(2)  Course ID:010240  06-JUN-2018
Modern Dance I: Theories and Techniques
Modern Dance I is designed to increase student's body awareness, strength, flexibility and musicality. The course studies the technique and theory of Fall and Recovery developed by Doris Humphrey.

Outcome: Students will develop a basic dance technique and be able to describe and demonstrate the differences between modern dance and ballet. They will understand the history of the development of modern dance as a uniquely American art form.

Components: Performance(In person)
Course Equivalents: THTR 121
Attributes: Artistic Knowledge and Experience

DANC 131(2)  Course ID:010239  06-JUN-2018
Jazz Dance I: Theories and Techniques
Jazz I is designed to increase the student's body awareness, enjoyment of movement and appreciation of Jazz dance in theatrical productions. May be repeated once for credit.

Outcome: Students will improve their strength, coordination, flexibility and correct posture. They will develop basic skills and vocabulary for performing Jazz movements and a framework to view dance in theatrical productions.

Components: Performance(In person)
Course Equivalents: THTR 131
Attributes: Artistic Knowledge and Experience

Ballet Dance II: Theory and Technique
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping.

This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.

Outcome: This class further develops strength, posture, flexibility and coordination. Progressions include

Modern Dance II: Theory and Technique
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping.

This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.

Outcome: Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations.

Jazz Dance II: Theories and Techniques  
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plie. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourree. Dancers need to use correct position and opposition of the arms in combinations.

Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.

Outcome: Students will improve their dance technique, performance skills and appreciation of Chicago's rich Jazz history.

Dance History: Renaissance to Present  
This course is a survey of the history of theatrical dance from the Renaissance through the present. It provides a basic knowledge of the origins of theatrical dance forms, from the development of ballet in the courts of Louis XIV, through Vaudeville and stylistic revolutions of Modern Dance, to contemporary choreographic innovators and performance practices.

Outcome: Students will be able to identify and describe significant events, artists, performance practices, forms, and styles in the history of theatrical dance; to locate these facts in cultural context; to relate the evolution of dance forms to cultural history; and to apply this comprehension to enhanced appreciation and informed critique of contemporary dance.

- **Components:** Lecture (In person)

Dance Composition
Prerequisite: Must be a Dance Major or Dance Minor to enroll. Placement in Level III or higher dance technique courses. Permission of the department required.
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.

Learning Outcomes: Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience.

**Research in Dance**

Faculty serve as mentors for dance students pursuing research opportunities. Platforms cross various domains in cognitive, psychomotor, and artistic development. Students and faculty work together to generate qualitative and quantitative data documented in multiple modalities including: dancemaking, regression analyses, interviews, correlational and case studies. This course satisfies the Engaged Learning-Undergraduate Research requirement.

Must be a declared dance major or minor to enroll.

Outcome: Students will learn discipline-specific language skills, research ethics and methodologies. Students will gain valuable skills disseminating research through performances, scholarly articles,

**Components:**  
Supervision (In person)

**Attributes:**

Classroom Not Needed(1)
### Two-Dimensional Design

**Course:** FNAR 112(3)  
**Course ID:** 003044  
**Run Date:** 06-JUN-2018

An examination of the basic elements and organizational systems of visual expression through the application of design principles and theory.

**Outcomes:** Students will be able to manipulate various forms of media to produce desired spatial effects, and understand how to control by using such design methods as scale, perspective, and composition - the viewer's understanding of and reaction to visual information on a two-dimensional surface.

**Components:** Lecture

**Course Equivalents:** ACFNA 112

**Req. Designation:** Undergraduate Research

**Room Requirements:** Studio - Fine Arts(1)

### Drawing I

**Course:** FNAR 113(3)  
**Course ID:** 003045  
**Run Date:** 06-JUN-2018

An introduction to the basic elements of drawing including: line, value, texture, volume, shape, proportion, perspective and visual composition. A variety of drawing materials will be explored with an emphasis on observation problems designed to build technical, perceptual, and personal expressive interpretation of form through the drawing idiom.

**Outcomes:** Students will be able to demonstrate an understanding of basic drawing principles and vocabulary, through practice and articulation of both formal and artistic ideas.

**Components:** Lecture

**Attributes:** Artistic Knowledge and Experience

**Req. Designation:** Undergraduate Research

**Room Requirements:** Studio - Fine Arts(1)

### Painting I

**Course:** FNAR 114(3)  
**Course ID:** 003046  
**Run Date:** 06-JUN-2018

An introduction to the basic elements of painting including: the application of drawing, design, and color principles. A variety of materials will be explored with an emphasis on oil painting. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.

**Outcomes:** Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas.

**Components:** Lecture

**Attributes:** Artistic Knowledge and Experience

**Req. Designation:** Undergraduate Research

**Room Requirements:** Studio - Fine Arts(1)

### Foundations of Photography

**Course:** FNAR 115(3)  
**Course ID:** 003047  
**Run Date:** 15-JUN-2017

This course introduces photography as a form of visual art. Students learn the technical concepts in order to develop their ability to express ideas through photography. The course also emphasizes strengthening visual literacy through lectures, discussions, and critiques.

**Requirements:** A fully adjustable digital camera (DSLR) and an external hard drive are required.

**Outcomes:** Students will learn how to formulate and communicate ideas through photography. The course focuses on building the student's visual literacy and understanding of photography as a form of visual art.

**Components:** Lecture

**Course Equivalents:** ICVM 115

**Attributes:** Artistic Knowledge and Experience, Film & Digital Media Studies, International Film & Media Studies

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Mac(1)

### Printmaking I

**Course:** FNAR 118(3)  
**Course ID:** 003049  
**Run Date:** 06-JUN-2018

An exploration of the production of fine art multiples as they are created utilizing zinc and copper plates. Techniques of etching and engraving aquatint and color printing as well as innovative processes are taught.

**Outcomes:** Students will demonstrate understanding of the techniques needed to produce images on metal plates and alternative surface; the intrinsic qualities particular to expression in print media, recognize fine prints, specific techniques, and archival quality in historical examples, use intaglio presses as a means of production and form evaluative judgments about printed imagery.

**Components:** Lecture

**Req. Designation:** Undergraduate Research

**Room Requirements:** Studio - Fine Arts(1)
FNAR 120(3)  Course ID: 003051  06-JUN-2018

Ceramics: Handbuilding
An exploration of various handbuilding techniques, surface design techniques, and firing ranges available to the contemporary ceramist. Students are encouraged to pursue individual expression in the context of a broad range of methods and creative concepts.

Outcomes: Students will be able to demonstrate the basics of successful construction and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present.

Components: Lecture
Attributes: Artistic Knowledge and Experience
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

FNAR 121(3)  Course ID: 009844  06-JUN-2018

Ceramics: Wheelthrowing
An introduction to the potter's wheel. Students learn basic throwing skills, explore utilitarian design concepts, and learn to balance spontaneous and practiced approaches to process. Emphasis is on the successful integration of craft and personal expression.

Outcomes: Students will be able to demonstrate basic wheelthrowing and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present.

Components: Lecture
Attributes: Artistic Knowledge and Experience
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

FNAR 123(3)  Course ID: 003052  06-JUN-2018

Metalwork and Jewelry I
The methods and processes of construction using nonferrous metals applied to problems in design and function. Projects are designed to familiarize the student with processes in metalwork and the proper use of hand tools.

Outcomes: Students will demonstrate an understanding of the fundamental characteristics of metal; the ability to cut, shape and manipulate metals; to express visual ideas in low and high relief; and to form judgments about design on other than flat surfaces.

Components: Lecture
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

FNAR 124(3)  Course ID: 003053  06-JUN-2018

Sculpture I
An introduction to three dimensional concepts and materials, and associated techniques, in the process of articulating a personal artistic statement. Students will be guided in the fabrication of various 3-D constructions employing a wide range of building materials such as plaster, wood, clay, foam board, paper, and metals.

Outcomes: Students will be able to translate two-dimensional sketches and drawings into expressive three dimensional forms; demonstrate basic sculpting techniques and creative strategies; provide critical evaluation of the creative process; and produce objects that are viewable in the round, structurally stable with masses and appendages proportionate to one another.

Components: Lecture
Attributes: Artistic Knowledge and Experience
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

FNAR 132(3)  Course ID: 003057  06-JUN-2018

Visual Communication I
This course initiates a professional sequence whereby the student receives an introduction to typography and the use of two dimensional design principles necessary for visual communication.

Outcome: Students will gain an understanding of the fundamental principles of visual communication. They will develop technical skills in materials and techniques and they will be able to articulate both formal and artistic ideas to others.

Components: Lecture
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

The Crafts of China  
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.  
Outcome: Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture.

06-JUN-2018  
Three-Dimensional Design  
An examination of the basic elements and organizational systems of spatial expression through the application of design principles and theory.  
Outcome: Students will be able work with a variety of materials to produce three-dimensional objects in space, and understand how to control the viewer’s reaction to those objects through the manipulation of solidity, transparency, movement and time.  
Components: Lecture  
Req. Designation: Undergraduate Research  
Room Requirements: Studio - Fine Arts(1)

06-JUN-2018  
Color Theory  
Prerequisite: majors only  
An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, and symbolic dimensions through the application of past and current theory.  
Outcome: Students will be able to manipulate color papers, paints and inks in a series of specific exercises that explore the many aspects of color to the end of understanding how color influences human reactions to information and products.  
Components: Lecture  
Req. Designation: Undergraduate Research  
Room Requirements: Studio - Fine Arts(1)

Art History-Prehist to Ren.
A general survey which explores the development of art in Western culture from pre-history through the sources of the Renaissance in the fourteenth century.

Outcome: Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts. Students acquire the skills to critically analyze the relationships between various art forms and their relation to historical cultures.

Components: Lecture
Course Equivalents: FNAR 200R
Attributes: Artistic Knowledge and Experience, Catholic Studies, European Studies
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

Art History: Renaissance Modern
A general survey which explores the development of art in Western culture from the Renaissance to modern art in the twentieth century.

Outcome: Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts. Students acquire the skills to critically analyze the relationships between various art forms and their relation to historical cultures.

Components: Lecture
Course Equivalents: ACFNA 105
Attributes: Artistic Knowledge and Experience, European Studies
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

Modern Art
A survey of major art movements in Europe and America from Impressionism through the twentieth century, this course examines evolving ideas about the forms, content, techniques, and functions of art in the modern era considered within its social, political, and historical context.

Outcome: Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to the social-historical context of the modern era. Students acquire the skills to critically analyze the relationships between art forms and their relation to modern culture.

Components: Lecture(In person)
Course Equivalents: ICVM 202
Attributes: Artistic Knowledge and Experience, European Studies, Film & Digital Media Studies, Global & International Studies, International Film & Media Studies
 Req. Designation: Undergraduate Research
 Room Requirements: Studio - Fine Arts(1)

Women, Art, and Society
An examination of women artists in Western culture and the societies in which they worked from the medieval period to the present. Women’s artistic production, the styles and subject matter they embraced, and their relation to artistic trends of their eras are explored within the context of social attitudes about gender.

Outcome: Students will be able to demonstrate knowledge of women’s contribution to the visual arts, the factors that impacted their participation in the art world, the underlying ways that gender constructions impact society, and feminist theory and methodologies related to art.

Components: Lecture
Course Equivalents: WOST 207
Attributes: Women & Gender Studies
Req. Designation: Undergraduate Research

Drawing II
Prerequisite: FNAR 113
An intermediate level drawing course designed to extend the understanding of the visual elements of drawing introduced in FNAR 113. This course includes an emphasis on color, and an exploration of a broader range of drawing media. Observational and conceptual problems are introduced.

Outcome: Students will be able to demonstrate an understanding of more advanced drawing principles through expanded practice and articulation of both formal and artistic ideas.

Components: Lecture
FNAR 214(3)  Course ID: 003071  06-JUN-2018
Painting II
Prerequisite: FNAR 114

An intermediate level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114. This course will explore both oil and acrylic painting and a variety of substrates. Emphasis on the human figure and individualized conceptual problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.

Outcome: Students will be able to demonstrate an understanding of more advanced painting principles through expanded practice and articulation of both formal and artistic ideas.

Components:
- Lecture

FNAR 215(3)  Course ID: 003072  15-JUN-2017
Photography: Film and Darkroom
Prerequisite: FNAR 115 Foundations of Photography. A fully adjustable 35mm film camera (single-lens reflex camera) is required.

This course expands the students' knowledge of the photographic medium by introducing black and white film and darkroom printing. The students explore how the process and aesthetics of traditional black and white film make it unique from digital photography.

Outcomes: The course covers the steps of working in a darkroom environment, from the use of the enlargers to processing an exposed print. The students will apply the process and aesthetic qualities that are distinct to black and white film photography in their own projects.

Components:
- Performance(In person)

FNAR 218(3)  Course ID: 003074  06-JUN-2018
Printmaking II
Prerequisite: FNAR 118

This course explores specialized work in intaglio, monotypes, and mixed media. Emphasis is placed on the development and perfecting of technique.

Outcome: Students demonstrate understanding of mixed-media printing; knowledge of a wide range of printmaking media; apply drawing concepts to the materials of printmaking; produce a consistent body of work in a complex medium; recognize historical prototypes and articulate the differences to others; and form judgments needed to adapt image making in a highly technical area of expression.

Components:
- Lecture

FNAR 219(3)  Course ID: 009875  06-JUN-2018
Photography: Digital Imaging
Prerequisite: FNAR 115 - Foundations of Photography. A fully adjustable digital camera (DSLR) and an external hard drive are required.

The course focuses on advanced editing techniques in Photoshop in regards to color correction, color management, image compositing, and image manipulation. Students will also learn the technical and aesthetic concepts that are crucial components of the digital workflow to further develop their visual languages as photographic artists.

Outcomes: Students learn more complex editing in Photoshop, how to operate a professional inkjet printer and the importance of paper selection. The course examines possibilities with digital technology.

### FNAR 235(3)  
**Course ID:** 003083  
**06-JUN-2018**  
**Course:** Figure Studio  
**Prerequisite:** FNAR 113 or FNAR 114 or permission of the instructor  
An advanced level studio course designed to introduce the human form with an emphasis on the application of drawing and wet media. Skeletal anatomy and concepts of visualization and proportion will be explored. Observational and conceptual problems will be introduced. The course may be taken twice for credit.  
**Outcome:** Students will be able to demonstrate an understanding of the human form and anatomy through expanded practice and articulation of both formal and artistic ideas.  
**Components:** Lecture  
**Course Equivalents:** THTR 235  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Studio - Fine Arts(1)

### FNAR 304(3)  
**Course ID:** 009846  
**06-JUN-2018**  
**Course:** Paris in the Nineteenth Century  
An examination of Nineteenth Century art in Paris as shaped by contemporary changes in the physical, social and economic life of the city.  
**Outcome:** Students will be able to demonstrate knowledge of nineteenth century art and artists in the context of the emergence of a modern, industrial urban complex.  
**Components:** Lecture(In person)  
**Attributes:** European Studies  
**Req. Designation:** Undergraduate Research

### FNAR 306(3)  
**Course ID:** 003091  
**06-JUN-2018**  
**Course:** Contemporary Art 1945-Present  
An examination of recent developments in American and European art beginning with the physical shift of the center of artistic authority from Paris to New York during and immediately after World War II.  
**Outcome:** Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the mid-twentieth century to the present day. They will also understand the major theoretical issues of the period.  
**Components:** Lecture  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

### FNAR 311(3)  
**Course ID:** 003092  
**06-JUN-2018**  
**Course:** Std Wrkshp Advn Draw & Painting  
Prerequisite: FNAR 213 or FNAR 214 or equivalent  
The most advanced level studio course in painting and drawing and is designed to aid the student in developing a body of creative work from conception to production to presentation. This course is conducted as an individual studio practicum between the instructor and student. The course may be taken twice for credit.  
**Outcome:** Students will demonstrate a strong understanding of their own creative process through the development of a cohesive body of work.  
**Components:** Lecture  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Studio - Fine Arts(1)

### FNAR 316(3)  
**Course ID:** 003096  
**06-JUN-2018**  
**Course:** Photography: Advanced Darkroom  
Prerequisite: FNAR 215 - Photography: Film and Darkroom or FNAR 219 - Photography: Digital Imaging; concurrent enrollment in one of these courses is acceptable with FNAR 316.  
This advanced course encourages each student to synthesize the technical and creative concepts they have learned through the previous classes to develop a cohesive body of work that will form a portfolio.  
**Outcomes:** Students will learn to use medium and large format cameras, scan film and integrate analog photography into a digital workflow to produce high-resolution prints, developing a cohesive body of work.  
**Components:** Lecture(In person)  
**Requirement Group:** Prequisite: FNAR 215  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Studio - Fine Arts(1)
FNAR 319(3)  
Course ID: 011522  
06-JUN-2018  

**Lighting Techniques**  
Prerequisite: FNAR 219 - Photography: Digital Imaging; concurrent enrollment is acceptable. A fully adjustable digital camera (DSLR) and an external hard drive are required.  

An advanced course that introduces students to techniques with both available and artificial lights. The students learn how the understanding and control of lighting becomes an essential component in the creation of photographic images.  

Outcomes: Students learn the equipment, materials, and techniques in shooting with available and artificial lights in the creation of photographic works that will creatively apply the technical concepts covered in the course.  

| Components: | Lecture (In person)  |
| Requirement Group: | Prerequisite: FNAR 219  |
| Req. Designation: | Undergraduate Research  |
| Room Requirements: | Studio - Fine Arts(1)  |

FNAR 322(3)  
Course ID: 009859  
06-JUN-2018  

**Sculpture & Ceramics III: Advanced Studio**  
Prerequisite: FNAR 222 or FNAR 224 (prerequisite)  

An advanced studio course in which students investigate an expanded range of materials, techniques and concepts, towards further development of a personal approach to Ceramics and Sculpture. Visual and written research is a component of the course, as is personal reflection and group discussion.  

Outcomes: Demonstrate the ability to select and apply appropriate materials and methods to resolve complex visual and conceptual concepts; and meaningfully discuss key issues pertaining to the subject.  

| Components: | Lecture (In person)  |
| Requirement Group: | Prerequisite: FNAR 222 or 224  |
| Req. Designation: | Undergraduate Research  |
| Room Requirements: | Studio - Fine Arts(1)  |

FNAR 332(3)  
Course ID: 003103  
06-JUN-2018  

**Visual Communication III**  
Prerequisites: FNAR 232 and portfolio accepted or permission of instructor.  

A continued study of the principles underlying graphic design combined with an emphasis on the communicative power of typography and image.  

Outcome: Students gain an understanding of how contemporary design is used to communicate. They begin to develop a sophisticated body of work and advance in their ability to evaluate visual communication.  

| Components: | Lecture  |
| Requirement Group: | Pre-requisite: FNAR 232  |
| Req. Designation: | Undergraduate Research  |
| Room Requirements: | Studio - Fine Arts(1)  |

FNAR 334(3)  
Course ID: 009847  
06-JUN-2018  

**Digital Media III: Motion**  
Prerequisites: FNAR 234  

An exploration of time-based motion graphics using Adobe Flash. This industry standard software is introduced as a vehicle for learning graphic animation concepts and as a tool for creative expression.  

Outcomes: Students gain an understanding of software skills and design basics. They develop the ability and techniques to manipulate software in the production of motion graphics effectively combining image and typography.  

| Components: | Lecture (In person)  |
| Requirement Group: | Prerequisite: FNAR 234  |
| Req. Designation: | Undergraduate Research  |

### Art in Rome

**Course ID:** 003110  **06-JUN-2018**

A survey of Rome's artistic heritage, including architecture, mosaic, painting, and sculpture from antiquity to the present day studied within the context of Rome's changing roles in Western European history. Classes are taught on site.

**Outcome:** Students will demonstrate knowledge of Rome's cultural role in history and of its artistic traditions and how they relate to their historical context.

**Components:** Lecture

**Course Equivalents:** ROST 342

**Attributes:** Catholic Studies, European Studies, Rome Studies

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)

### Baroque Art

**Course ID:** 003111  **06-JUN-2018**

An examination of art and architecture in Europe during the seventeenth and eighteenth centuries with special concentration on the preeminence of Rome. (Rome Center students are expected to visit and study certain works of art in their original location).

**Outcome:** Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of seventeenth and eighteenth-century Western European art and their relation to relevant cultural, social and historical contexts. They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Baroque studies.

**Components:** Lecture

**Course Equivalents:** ROST 343

**Attributes:** Catholic Studies, European Studies, Rome Studies

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)

### Early Italian Renaissance Art

**Course ID:** 009848  **06-JUN-2018**

An examination of Italian art and architecture from the late thirteenth to the late fifteenth centuries with special emphasis on Florence, Siena, and centers in northern Italy such as Padua and Mantua. (Rome Center students visit and study certain works of art in their original location).

**Outcome:** Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of early Italian Renaissance art and their relation to relevant cultural, social, and historical contexts. They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian Renaissance art.

**Components:** Lecture (In person)

**Course Equivalents:** ROST 344

**Attributes:** Catholic Studies, European Studies, Rome Studies

**Req. Designation:** Undergraduate Research

**Room Requirements:** Studio - Fine Arts(1)

### Italian High Renaissance and Mannerist Art

**Course ID:** 009849  **06-JUN-2018**

An examination of Italian painting, sculpture, and architecture from the late fifteenth through the sixteenth centuries, focusing on the art of Florence, Rome, and Venice and including consideration of such artists as Leonardo da Vinci, Michelangelo, Raphael, and Titian. (Rome Center students visit and study works of art in their original location).

**Outcome:** Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of Italian High Renaissance and Mannerist art and their relation to relevant cultural, social, and historical contexts. Students acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian High Renaissance and Mannerist art.

**Components:** Lecture (In person)

**Course Equivalents:** ROST 345

**Attributes:** Catholic Studies, European Studies, Rome Studies

**Req. Designation:** Undergraduate Research

| ENGL 393   | Teaching English to Adults: Internship | Prerequisite: Sophomore Standing or above.  
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper. | Sophomore Standing or above.  
Prerequisite: Sophomore Standing or above. | Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills. |
| ENGL 394   | Internship                       | Prerequisites: junior standing, six English courses.                                     | Junior standing, six English courses.              | Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences. |
| ENGL 395   | Non Tutr:                        | Content will vary each time the course is offered, but in general will entail in-depth study of a literary genre or a major author or theme in literature. | Pre-requisites: UCWR 110 and one 200-level English course. | Students will strengthen their capacity to analyze literature and to discuss it, both orally and in writing, and will be able to demonstrate understanding of the materials studied and of relevant theoretical and critical perspectives. |
| ENGL 397   | Adv Writing Workshop: Poetry     | Prerequisite: ENGL 317.  
Students will read master poets as models and will write and revise poems of their own, which will be discussed by the class in a workshop format. | ENGL 317. | Students will produce original poems, building upon skills honed in English 317. They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original poetry, theirs and their fellow students'. |
| ENGL 398   | Adv Writing Workshop: Fiction    | Prerequisite: ENGL 318

Special Studies in Lit
Subject matter of this course will be designated by a subscript whenever the course is offered. Usually taken as an independent study.

Outcome: Students will be able to demonstrate understanding of the topic of the course, and of the research and critical skills necessary to analyze and discuss it. Usually students will work independently and produce a research paper, under the direction of a faculty member.

Components: Supervision

Requirement Group: Pre-requisites: UCWR 110 and one 200-level English course.

Req. Designation: Internship
Medical Device Systems

The relevant physiology, clinical need, history, and system descriptions of eighteen fundamental medical devices are discussed and analyzed. Students are also introduced to several medical device systems, including medical instruments, electrical stimulators, and combination products. These topics provide a foundational background for medical device product development and regulation.

Prerequisites: Restricted to Engineering Science majors. MATH 266, Concurrent enrollment in ENGR 313 and ENGR 341L

Outcomes: An understanding and analysis of the clinical need and common subsystems underlying eighteen fundamental medical devices; an evaluation of the battery requirements for commonly implantable medical devices;

Components: Lecture (In person)

Requirement Group: Restricted to Engineering Science majors. MATH 266, Concurrent enrollment in ENGR 313 and ENGR 341L

Req. Designation: Internship

Room Requirements: ENGR Design Lab (1)

Medical Device Systems Laboratory

Introduction to the graphical user interface, data acquisition, and sensors of common medical devices. The lab experiments are synchronized with the presentation of medical device topics in ENGR 341. Students also create an iPhone Nursing App for a Sponsor from the School of Nursing.

Prerequisites: Restricted to Engineering Science majors. Concurrent enrollment in ENGR 341

Outcomes: Use of common medical devices subsystems; application of FDA design control principles for creation of an iPhone Nursing App and accompanying requirement and design specifications.

Components: Laboratory (In person)

Requirement Group: Restricted to Engineering Science majors. Concurrent enrollment in ENGR 341

Req. Designation: Internship

Room Requirements: ENGR Design Lab (1)

Medical Device Software Development I

This is the second semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During the first four weeks, students increase their programming skills through exposure to recurrence solving, sorting, and data structures. They then learn how design and verify medical device software using model-based engineering.

Restricted to Engineering Science majors. ENGR 341, concurrent enrollment in ENGR 381

Outcomes: Design of medical device software code, and creation of Food and Drug Administration design control documents for a sensor platform.

Components: Lecture (In person)

Requirement Group: Prerequisite: ENGR 341 with a minimum grade of C minus; Co-requisite: ENGR 381; Restricted to Engineering Science majors

Req. Designation: Internship

Room Requirements: ENGR Design Lab (1)

Electronic Circuit Analysis and Design

A course for engineering science students (computer engineering) that introduces advanced topics in the design and analysis of analog and digital electronic circuits. Areas of emphasis include an introduction to semiconductor physics, diodes, BJT transistors, CMOS devices, advanced operational amplifier circuits and frequency response fundamentals.

Restricted to Engineering Science majors. MATH 266, ENGR 321, ENGR 323, Concurrent enroll. in ENGR 313 and ENGR 351L

Outcomes: Ability to understand and apply fundamental concepts of semiconductor physics. Ability to understand and apply complex models to analyze analog and digital microelectronic circuits.

Components: Lecture (In person)

Requirement Group: Restricted to Engineering Science majors. MATH 266, ENGR 321, ENGR 323, Concurrent enroll. in ENGR 313 and ENGR 351L

Req. Designation: Internship

Room Requirements: ENGR Design Lab (1)
Circuit Design Laboratory

A lab for engineering science students (computer engineering) to provide a first experience working with semiconductor devices (diodes, BJTs, MOSFETs, Operational Amplifiers) for the design, creation and analysis of microelectronics using lab instruments.

Restricted to Engineering Science majors. ENGR 321, ENGR 323, Concurrent enrollment in ENGR 351

Outcomes: Ability to identify integrated circuit design issues and develop applicable solutions. Ability to apply advanced principles in analog circuit design, creation and analysis.

Components: Laboratory (In person)
Requirement Group: Restricted to Engineering Science majors. ENGR 321, ENGR 323, Concurrent enrollment in ENGR 351
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

Methods and Algorithms for Computer Engineers

A course for computer engineering students that emphasizes the analysis of methods and algorithms used in computer engineering. The course includes hands-on experiments and a design project related to the computing performance and efficiency improvement of engineering systems.

Restricted to Engineering Science majors. MATH 266, ENGR 351, ENGR 351L. Concurrent enrollment in ENGR 382.

Understanding of data abstraction, algorithmic performance analysis, algorithmic verification, computational complexities, and ability to analyze the trade-offs among various algorithmic strategies, parts and patterns.

Components: Lecture (In person)
Requirement Group: Pre-requisites: MATH 266, ENGR 351, ENGR 351L; Co-requisite: ENGR382; Restricted to ENGR majors
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

Fundamentals of Environmental Engineering

This course covers fundamental topics in environmental engineering, with particular emphasis on principles of aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate-and-transport modeling of contaminants in natural and engineered systems.

Restricted to Engineering Science majors. MATH 266, ENGR 322, Concurrent enrollment in ENGR 313 and ENGR 361L

Outcomes: Ability to apply principles of environmental engineering to describe and quantify key physical, biological and chemical phenomena in natural and engineered systems

Components: Lecture (In person)
Requirement Group: Restricted to Engineering Science majors. MATH 266, ENGR 322, Concurrent enrollment in ENGR 313 and ENGR 361L
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

Fundamentals of Environmental Engineering Lab

This laboratory course introduces students to the analytical techniques such as mass spectrometry and titration, relevant to environmental engineering practice. This course emphasizes the design of field sampling campaigns of water and soil environments and the statistical data analysis of experimentally estimated water and soil parameters.

Restricted to Engineering Science majors. ENGR 322, Concurrent enrollment in ENGR 361

Outcomes: Quantification of fundamental environmental parameters with emphasis on water quality. Ability to design and conduct a field sampling campaign.

Components: Laboratory (In person)
Requirement Group: Restricted to Engineering Science majors. ENGR 322, Concurrent enrollment in ENGR 361
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 362(3) Course ID:013582 15-JUN-2018
Water and Wastewater Engineering
Theoretical and conceptual design of systems for treating municipal wastewater and drinking water which include reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Re-use of water and waste products are also covered.

Restricted to Engineering Science majors. ENGR 361, 361L. Concurrent enrollment in ENGR 383.

The ability to undertake the required calculations to design a municipal water and wastewater treatment facility.

Components: Lecture(In person)
Requirement Group: Pre-requisites: ENGR 361, ENGR 361L; Co-requisite: ENGR 383; Restricted to Engineering Science majors.
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 381(4) Course ID:013568 15-JUN-2018
Biomedical Engineering Capstone Design I
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group is assigned an industry-sponsored medical device software problem to solve. Each week, a medical device product development or regulation topic is also introduced.

Restricted to Engineering Science majors. ENGR 341

Outcomes: ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors.

Components: Lecture(In person)
Requirement Group: Prerequisites: ENGR 341 with a minimum grade of C-, restricted to Engineering Science Majors.
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 382(4) Course ID:013569 15-JUN-2018
Computer Engineering Capstone Design I
First part of the team-based Capstone Design series for Computer Engineering students. Students focus on the design of an industry-sponsored project with practical, economic, and ethical constraints. They learn the fundamentals of product development, quality, reliability, ethics and project management as it relates to the field of computer engineering.

Restricted to Engineering Science majors. ENGR 351

Outcomes: ABET Student Outcome (2): An ability to apply engineering design to produce microelectronic solutions that meet specified needs with consideration for public health, safety, welfare, and other factors.

Components: Lecture(In person)
Requirement Group: Prerequisite: ENGR 351 with a minimum grade of C- , restricted to Engineering Science Majors.
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 383(4) Course ID:013570 15-JUN-2018
Environmental Engineering Capstone Design I
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating engineering standards and multiple realistic constraints. Each group is assigned an environmental engineering industry-sponsored design problem to solve. During the semester, specific environmental design and regulation case studies will be introduced.

Restricted to Engineering Science majors. ENGR 361

Outcomes: ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solution that meet specified needs with consideration for public health, safety, environmental and other factors.

Components: Lecture(In person)

Internship in Global and International Studies

Students earn course credit while serving as an intern in government agencies, non-profit organizations, and businesses relevant to the field of international studies.

Outcome: Students will obtain in-depth knowledge and practical experience in a professional work setting relevant to the student's future career path.

Components: Field Studies
Attributes: Engaged Learning, Global & International Studies
Requirement Group: Global & International Studies major in junior and senior standing only
Req. Designation: Internship

Topics in Global & Internatl Studies: Advanced

This course allows faculty participating in the Global & International Studies Program to offer courses on special topics that are not covered by existing courses.

Outcome: Students will obtain in-depth knowledge of a unique topic in the interdisciplinary field of Global & International Studies.

Components: Lecture
Attributes: Global & International Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)

Directed Readings in Global and International Stud

This course offers an independent program of research under the direction of a faculty sponsor leading to a major research paper.

Outcome: Students will hone research and writing skills in close collaboration with a faculty sponsor.

<td>Shipwreck Archaeology</td>
<td>Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. Outcome: Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures.

This course will study the works of selected authors, in translation, of a selected culture or nation.

Outcome: Students will gain an appreciation of the writings of authors of another culture or nation.

Components: Lecture(In person)
Attributes: Tier 2 Literary Knowledge, Global & International Studies
Req. Designation: Undergraduate Research

**LITR 290(3) Classical Chinese Literature**
- This course is a survey of the classical Chinese literature from ancient time to the fall of Qing Dynasty.
- Outcome: Students will reach aesthetical appreciations and cultural understandings of classical Chinese literature, and grasp the styles and creative skills of different Chinese poets and writers. They will learn to read literary texts within their particular Chinese social, historical, cultural and mental contexts.
- Components: Lecture
- Attributes: Chinese Language & Culture, Global & International Studies

**LITR 291(3) Italian Women Writers**
- This course is a comparative study of 20th century Italian & Italian-American writers from different periods and geographic areas. What unites these writers in addition to their nationality and ethnicity is that the city of Rome played a central role in their development as artists. Special emphasis will be given to the construction of the female and male subject; ties among women, and the dynamic interplay of gender, politics, spirituality, etc.
- Outcomes: To identify the differences between women and men who hail from different parts of Italy and different immigrant communities in America, while highlighting their common national heritage. To understand the city of Rome as having played a central role in literary history from the 19th century to the present.

**Modern Chinese Fiction**

This course introduces selected fictional works by some of the most insightful writers of modern China. The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture.

**Outcome:** Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course.

**Course ID:** 005010  
**06-JUN-2018**  
**Applied Calculus I**  
Prerequisite: Math Placement Test or Math 118  
An introduction to differential and integral calculus, with an emphasis on applications. This course is intended for students in the life and social sciences, computer science, and business. Topics include: modeling change using functions including exponential and trigonometric functions, the concept of the derivative, computing the derivative, applications of the derivative to business and life, social and computer sciences, and an introduction to integration.  
**Outcome:** Students will obtain an understanding of calculus and methods for applying calculus (especially differential calculus), including modeling/analyzing processes (such as population growth and cooling),  
**Components:** Lecture  
**Attributes:** Bioinformatics, Forensic Science

**Geometry for Middle Grade Teachers**  
The content covered in this course will include: Area, perimeter, volume, surface area, Properties of two and three dimensional figures, points, lines, planes, space, the Pythagorean theorem, transformations, fractals, tessellations, perspective drawings and informal proofs. The material covered will address Illinois Learning Standard Goal 7 and Goal 9 and related content performance descriptors for educators. The course is designed for Elementary education majors that wish to enhance, enrich and deepen their knowledge of Geometry and apply for a 6th-8th grade Mathematics endorsement from the State of Illinois.  
Mathematics Content Area Standards 7 (Measurement) and 9 (Geometry) from the Content-Area Standards for Educators document published by the Illinois State Board of Education will be emphasized.

Number Theory for Middle Grade Teachers

Greatest common divisors, prime factorization, decimal fractions, continued fractions, primes, composite numbers, tests for divisibility, perfect numbers, polygonal numbers, numbers bases, and patterns in addition and multiplication tables are a sample of the topics covered. (Illinois Learning Standard Goal 6 and related performance descriptors). Appropriate use of technology (spread sheets, CAS, etc.) will also be addressed.

Outcome: Students will obtain an understanding of topics from Number Theory that are addressed in the middle grade mathematics curriculum.

Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

MATH 142L(3)  Course ID:011068  06-JUN-2018
History of Mathematics for Middle Grade Teachers

This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonjs Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.

Outcome: Students will obtain a unique historical perspective on the various areas of mathematics that are studied in the middle grade mathematics curriculum.

Components: Lecture(In person)
Req. Designation: Undergraduate Research

This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.

Outcome: Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems.

Components:
- Lecture (In person)
- Course Equivalent: COMP 215
- Requirement Group: Pre-requisite: MATH 132 or MATH 162
- Req. Designation: Service Learning
- Room Requirements: Electronic Classroom(1)

This course covers the theory, solution techniques, and applications surrounding linear and non-linear first and second-order differential equations, including systems of equations; software packages such as MAPLE may be used.

Outcome: Students will obtain an understanding of elementary differential equations and their applications.

Components:
- Lecture

In a seminar setting, students discuss and present proofs (or computer examples) as solutions to regional and national mathematics contest problems usually involving techniques drawn from elementary logic, calculus of one and several variables, combinatorics, number theory, geometry, basic algebra, and abstract algebra.

Learning Outcome: To improve a student's ability to communicate mathematically and to strengthen the student's problem-solving skills.

Components:
- Seminar (In person)
- Req. Designation: Service Learning
- Room Requirements: General Classroom(1)

This course is a sophomore-level seminar covering topics in areas such as number theory, logic, set theory, metric spaces, or history of mathematics.

Outcome: Students will obtain an initial insight into a number of areas of advanced study in mathematics.

Components:
- Seminar
- Req. Designation: Service Learning
- Room Requirements: Seminar(1)

This course explores selected topics in the history of mathematics ranging from Babylonian and Egyptian mathematics to Pythagoras and Euclid to the Hindu-Arabic numeration system to Newton and Leibniz to geometries other that Euclid's to the mathematical art of Escher.

Outcome: Students will obtain a unique historical perspective on the various areas of mathematics that they are studying in their other courses.

MATH 320(3)  Course ID:005048  15-JUN-2018
Mathematical Logic
Prerequisite: MATH 201
This course in modern mathematical logic begins with a study of propositional logic and leads to the study of first-order predicate logic, including quantifiers, models, syntax, semantics, the completeness and compactness theorems, and other selected topics.
Outcome: Students will develop a fuller understanding of mathematical logic and therefore of the underlying theory behind proofs of mathematical assertions.

MATH 322(3)  Course ID:005049  06-JUN-2018
Advanced Number Theory
Prerequisites: MATH 201
This course will cover Pythagorean triples, problems related to Fermat's Last Theorem, Pell's equation, Fermat's method of descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA public key encryption, quadratic residues, and quadratic reciprocity. Additional topics will be covered as time permits.
Outcomes: Students will be able to solve important practical and theoretical number theory problems. Students will be exposed to both significant recently solved number theory problems and currently unsolved conjectures.

Introduction to Real Analysis I
Prerequisite: MATH 201 and 212

This course provides a rigorous treatment of the real numbers and real-valued functions of a real variable, including sequences, the Bolzano-Weierstrass and Heine-Borel theorems, topology, uniform continuity, fixed-point theorems, derivatives, and other selected topics.

Outcome: Students will obtain an understanding of the fundamentals of real analysis that will prepare them for advanced work in mathematics.

Components: Discussion, Lecture
Requirement Group: Prerequisite: MATH 201 and 212
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

Introduction to Real Analysis II
Prerequisite: MATH 351

This course, a continuation of Mathematics 351, provides the theoretical background for differentiability and integrability on R and Rn and Taylor's theorem, the change of variable theorem, the inverse and implicit function theorems, Lebesgue integration, and other selected topics.

Outcome: Students will obtain an understanding of topics in advanced analysis that will prepare them for graduate level work in mathematics.

Components: Lecture
Requirement Group: Prerequisite: MATH 351
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

Introductory Complex Analysis
Prerequisite: MATH 264 and 351

This course provides an introduction to the theory of functions of a complex variable, including analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, and other selected topics.

Outcome: Students will obtain an understanding of the fundamentals of complex analysis that will prepare them for advanced work in mathematics.

Components: Lecture
Requirement Group: Prerequisite: MATH 264 and 351
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

Methods of Applied Mathematics
Prerequisite: MATH 264

Vector calculus, linear transformations, matrices, series solutions of differential equations, special functions; Fourier series, Fourier and Laplace transforms; Partial differential equations and topics from complex analysis, Green's functions, integral equations, the calculus of variations.

Outcome: Facility with mathematical methods used in sciences and engineering.

Components: Lecture
Course Equivalents: PHYS 301
Requirement Group: Prerequisite: MATH 264
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

Mathematical Modeling
Prereq: MATH 266 Linear Algebra and Differential Equations or (MATH 264 Ordinary Differential Equations and MATH 212 Linear Algebra)

Outcome: Students will learn how to formulate mathematical models.

Components: Lecture(In person)
MATH 360(3)  
Introduction to Game Theory  
Course ID: 010321  
15-JUN-2018  

Prerequisites: MATH 162  

The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.  

Students will obtain an understanding of the fundamentals of mathematical game theory.  

Components:  
Lecture(In person)  

Requirement Group: Pre-requisite: MATH 162.  

Req. Designation: Service Learning  

Room Requirements: Electronic Classroom(1)  

MATH 365(3)  
Introduction to Partial Differential Equations  
Course ID: 013280

STAT 311(3) Course ID: 013571 15-JUN-2018

Applied Survival Analysis
This course focuses on methods for analyzing time-to-event data. The course will explore non-parametric methods for analyzing time-to-event data like Life tables, the Kaplan-Meier method, the Nelson-Aalen method and the log-rank test. This course will also explore semi-parametric models such as the Cox proportional hazards regression models and parametric models including exponential, Weibull and log-logistic regression model.

Prerequisite: STAT 308 (Applied Regression Analysis)

Outcomes: Derive survival and hazard functions from an underlying distribution, calculate survival probabilities and hazard rates, compare survival probabilities and hazard ratios between two or more cohorts.

Components:  Lecture(In person)

Requirement Group:  Prerequisite: STAT 308, C- or higher

Room Requirements: Electronic Classroom(1)

STAT 321(3) Course ID: 006777 15-JUN-2018

Computational Aspects of Modeling and Simulation
Prerequisites: STAT 308

This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs.

Outcomes: Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable.

Components:  Lecture(In person)

Course Equivalents: COMP 321

Requirement Group:  Prerequisite: STAT 308, C- or higher

Room Requirements: Electronic Classroom(1)

STAT 351(3) Course ID: 013552 01-JAN-2018

Nonparametric Statistical Methods
This course will cover the basic principles of nonparametric methods in statistics including: one, two and K sample location methods; tests of randomness; tests of goodness of fit; nonlinear correlation; histogram; density estimation; nonparametric regression.

Prerequisite: STAT 203 Introduction to Probability and Statistics

Students should learn how to apply the nonparametric techniques in real datasets, interpret the results and draw conclusions.

Components:  Lecture(In person)

Requirement Group:  Prerequisite STAT 203, C- or higher

ARAB 101(3)  
Course ID: 001157  
15-JUN-2018
Arabic I
This course is designed for students who have had little or no previous knowledge or experience of Standard Arabic. It first introduces students to the alphabet, then proceeds to teach basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect. Students will learn aspects of Arab culture.
Outcome: Students will be able to write simple sentences, understand selected principles of basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect. Students will learn aspects of Arab culture.
Components: Lecture
Course Equivalents: IWS 101A
Attributes: Arabic Language and Culture, Islamic World Studies

CHIN 101(3)  Course ID:001677  15-JUN-2018
Chinese I
This is an introductory course in Modern Standard Chinese (Mandarin) for students with none or little prior experience in Chinese. This course introduces the four basic communicative skills in Chinese: listening, speaking, reading and writing, and emphasizes on conversation.

Outcome: Students will achieve active control of Chinese sound system and writing system. They will be able to understand and respond to greetings, as well as talk about family members, time, hobbies and friends. They will learn nearly 200 characters.

Components: Lecture
Attributes: Asian Studies, Chinese Language & Culture
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

CHIN 102(3)  Course ID:001679  06-JUN-2018
Chinese II
Prerequisite: CHIN 101

CHIN 102 is a continuation of CHIN 101. Students will expand their knowledge of Chinese characters, vocabulary and grammar, improve their skills on listening, speaking, reading, and writing skills, and learn more cultural knowledge.

Outcome: Students will be able to make appointments, talk about Chinese learning experience, school life, shopping, weather and transportation. Aside from dialogues, they will also read a short dairy and a letter. They will learn some 200 new characters.

Components: Lecture
Attributes: Asian Studies, Chinese Language & Culture
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

CHIN 103(3)  Course ID:001681  15-JUN-2018
Chinese III
Prerequisite: CHIN 102

CHIN 103 builds on the knowledge and skills gained in CHIN 101-102. This course develops conversational skills by using fundamental grammatical patterns and vocabulary in functional contexts.

Outcome: Students will learn dialogues used in the contexts of dinning out, studying in library, asking directions, attending birthday party, seeing a doctor, and dating.

Components: Lecture
Attributes: Asian Studies, Chinese Language & Culture
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

CHIN 104(3)  Course ID:001683  15-JUN-2018
Chinese IV
Prerequisite: CHIN 103

Chinese 104 is the continuation of Chinese 103. This course further extends students' knowledge of Chinese vocabulary and grammar, and improves their skills in listening, speaking, reading, and writing.

Outcome: Students will learn expressions in the contexts of renting an apartment, mailing a letter and traveling in both mainland China and Taiwan, talking about hometown and sports, and checking in at the airport.

Components: Lecture
Attributes: Asian Studies, Chinese Language & Culture

Business Chinese I
Business Chinese I is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. Examples of topics include meeting with a manager, being introduced to colleagues, and attending social events.

Prerequisite: CHIN 101

Outcomes: 1) An expanded vocabulary (500-600 characters in total); 2) deeper knowledge of Chinese grammar; and 3) a multi-faceted introduction to Chinese business culture.

Components: Lecture(In person)
Attributes: Chinese Language & Culture
Req. Designation: Service Learning
### CHIN 191(3)

**Business Chinese II**
As a follow-on course to Business Chinese I (CHIN 190), this course is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. In CHIN 191, all the topics are practical for a real world business environment, for instance, making an appointment, visiting a company, introducing production facilities and products, dining etiquette, and socializing with colleagues after work.

**Outcome**
Upon completion of Business Chinese II, the student should have 1) an expanded vocabulary frequently encountered in a business environment, 2) deeper knowledge of Chinese syntax (sentence patterns and habitual usages), morphology (character construction and combinations), and other aspects of grammar (e.g., verb tense

Elementary French I
Prerequisite: No previous knowledge of French is expected. Please go to http://www.luc.edu/modernlang/exam.shtml for placement test instructions, especially if you took any French courses in high school or college.

Description: Taught in French. Instructs basic communicative French, the people and cultures where it is spoken, using formal and informal registers, and speaking in present and future time. Students will listen and respond, read and write, ask and answer simple questions in basic functional French. Content: personal topics, everyday living

Outcomes: Student will successfully interpret and express needs pertaining to home, work, college, leisure, etc.

Components:

Course ID:003181  06-JUN-2018

Elementary French II
Taught in French. Continuation of basic French inter-communication skills both producing French (speaking and writing), and interpreting French (listening and reading.) The aim is to comprehend and contribute to discussions about families, housing, sports, travel, and traditions in French.

Enrollment Conditions: FREN 101 or one semester college French with C- or better, or placement test score. Please go to Modern Languages home page for placement test instructions. You must take the placement test if you took any French courses in high school.

Outcomes: Students will comprehend and speak in present, future, and past narrative; get and give simple direction; share personal information. Achievement level desired: ACTFL* Novice Low to Mid.

Intermediate French I
Taught in French. Course continues to work on focus on pronunciation, grammar, and developing conversational and writing fluency. Students will read excerpts of French and francophone media or literature. Topics include the environment and the many francophone cultures and tasks include narrating in more complex past, future and hypothetical contexts.

Enrollment Conditions: FREN 102, or equivalent French at another college, with C- or better, or placement test score. Exam required for placement on the basis of high-school work: please go to Modern languages home page for placement test instructions.

Outcomes: Students become more fluent and precise in expressing opinions, asking and answering more probing questions.

### TLSC 140(1)
**Course ID:** 012539  **06-JUN-2018**
**Teaching, Learning and Leading for Social Justice**
This module (course) builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy. Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc.

**Components:** Field Studies (In person)
**Requirement Group:** Prerequisite: TLSC 130. Corequisites: TLSC 150 and TLSC 160. TLSC 140, 150 and 160 must be taken together. Register for TLSC 150 and 160 first.
**Req. Designation:** Internship
**Room Requirements:** Electronic Classroom (1)

### TLSC 150(1)
**Course ID:** 012540  **06-JUN-2018**
**Constructive Learning Environments For Diverse Students**
This module (course) deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments. Candidates will complete a classroom management self-assessment and develop a related action plan for enhancing a constructive classroom environment.

**Components:** Field Studies (In person)
**Req. Designation:** Internship
**Room Requirements:** Electronic Classroom (1)

### TLSC 160(1)
**Course ID:** 012541  **06-JUN-2018**
**Analyzing Culturally-Responsive Classroom Instruction**
This module (course) builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning. Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching.

**Components:** Field Studies (In person)
**Req. Designation:** Internship
**Room Requirements:** Electronic Classroom (1)

### TLSC 210(2)
**Course ID:** 012542  **06-JUN-2018**
**Educational Policy For Diverse Students**
This module (course) specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs). Candidates will learn the policies, laws and court cases that impact classrooms, see how educational policies are enacted into classroom practice to support students, and make suggestions on continued ways to improve the achievement of students in urban classrooms and schools. Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution.

**Components:** Field Studies (In person)
**Requirement Group:** Prerequisite: TLSC 160. Corequisite: TLSC 220. TLSC 210 and 220 must be taken together. Register for TLSC 220 first.
**Req. Designation:** Internship
**Room Requirements:** Electronic Classroom (1)

### TLSC 220(4)
**Course ID:** 012543  **06-JUN-2018**
**Individualized Assessment & Instruction for Diverse Students**
This module is specifically designed for candidates to appreciate, discern and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural and linguistic; in this way, candidates will explicitly focus on the multifaceted nature of planning for students with special needs and those who have been labeled as ELL. Through the use of case study research to collect individualized, authentic language and literacy assessment with one student, candidates will apply learning to the specific instructional context of a student who qualifies with at least one of the following labels: (a) student with special needs, (b) English language learner, or (c) struggling reader.

Integrated Teach/Learn Sci & Writing in Elem Grades
This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing.
Co-Requisite: TLSC 232

Outcomes: Candidates will develop, implement, analyze, and reflect upon instructional and materials that ensure rigorous, relevant, inquiry-based science instruction is accessible to all students. Candidates complete an authentic personal inquiry project.

Components: Field Studies (In person)

Language, Culture, and Pedagogy in Bilingual Classrooms
This module deals with bilingual education, schools, classrooms, and learners, with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism. Candidates will engage with parents, families, and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities.

Language, Culture, and Pedagogy in Spanish Language Classrooms
This module offers a cultural, linguistic, and pedagogical immersion in a school setting to prepare teachers who will use Spanish as a medium of instruction. Participants spend two weeks in Mexico City living in a homestay and pairing with an elementary school teacher for a classroom teaching experience. Teacher candidates surround themselves with the rich cultural heritage and linguistic resources of Mexico, gaining a better understanding of the largest group of linguistically diverse students in Chicago and the broader United States.

Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families

Infants-Toddlers-EI 1 is the first of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course explores current knowledge and research findings about high-quality, developmentally appropriate early childhood care and education in the context of programs for infants and toddlers (including those with special needs) and their families and is designed to prepare future teachers to fill the role of an effective early interventionist and infant/toddler specialist.

Outcomes: As a result of this experience (which includes components related to assessment, intervention, work with families, and infant/toddler development), students will demonstrate proficiency at designing safe, supportive environments of nurturing care for infants and toddlers (including those with special needs) and

Family-Centered Assessment and Intervention in Early Intervention

Infants-Toddlers-EI 1 is the second of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course includes intensive clinical experiences in EI with infants and toddlers with special needs and their families, and is designed to complement Infants-Toddlers-EI 1 (Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families) in preparing future teachers to fill the role of an effective early interventionist and infant/toddler specialist.

Outcomes: As a result of this experience which (like I-T-EI 1) includes components related to assessment, intervention, diverse families, and infant/toddler development, students will develop their skills in working directly with families in designing assessment systems and interventions for infants and toddlers with

**TLSC 320(2) - Using Classroom Data in a Collaborative Environment to Advance Student Achievement**

This module (course) develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs.

**Outcomes:** Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications.

**Components:**
- Field Studies (In person)

**Room Requirements:**
- Electronic Classroom (1)

**TLSC 330(2) - Discipline-Specific Literacy for Diverse Students**

This module (course) supports teacher candidates (students) in developing their knowledge and skills in teaching and assessing literacy in discipline specific contexts. Emphasized will be the identification and use of culturally responsive texts, evidence based strategies, data based decision making skills and new literacies (technology and online resources) designed to target all students' literacy needs, including those with linguistically diverse backgrounds.

**Outcomes:** Teacher candidates (students) will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts. They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery.

**Components:**
- Field Studies (In person)

**Room Requirements:**

Narrative Ethics  
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.

Outcomes: This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics.

The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice.

Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.

Outcomes: The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation.

Science & Conservation of Freshwater Ecosystems
Prerequisite: ENVS/UCCSF 137

Focus: Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.

Prerequisites: ENVS/UCCSF 137

Outcome: Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face.

Components: Lecture (In person)
Attributes: Tier 2 Scientific Knowledge
Requirement Group: Prerequisite: ENVS 137, BIOL 101 or UCSF 137
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom (1)
Foundations of Environmental Science II
Prerequisite: ENVS 137, UCSF 137 or BIOL 101; Restricted to students within IES

This course is the second in a three-course sequence required of all ENVS majors. It will provide the basic scientific grounding needed to intelligently discuss environmental policy and to prepare students for more advanced study in the environmental sciences. It focuses on physical science, especially thermodynamics, energy and climate change.

Outcome: Student will gain understanding of the physics dictating global climate dynamics and climate change, as well as the energetic of different energy sources and technological aspects of alternative energy sources.

Components:
- Lecture (In person)

Requirement Group:
- Prerequisites: ENVS 137, UCSF 137, BIOL 101; Restricted to students within IES.

Foundations of Environmental Science Lab
Prerequisites: ENVS 237 (prerequisite or co-requisite) or CHEM 111 or BIOL 111

A lab course designed to be associated with ENVS 237, this course is designed to introduce all ENVS majors to lab safety, basic lab techniques such as use of balances and microscopes, data analysis, and the application of these techniques to the study of environmental science.

Outcome: Students will understand and demonstrate safe lab practices and learn to use basic lab equipment to take and analyze environmental science data.

Components:
- Laboratory (In person)

Requirement Group:
- Prerequisites: ENVS 237 (may be taken as co-requisite) or CHEM 111 or BIOL 111

Room Requirements:
- Lab - Biology(1)

Bird Conservation and Ecology
This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management

Pre-Requisites : ENVS 137 or BIOL 102

Outcome: Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation.

Components:
- Lecture (In person)

Requirement Group:
- P ENVS 137 or BIOL 102

Room Requirements:

Chemistry of the Environment
Introduction to chemical principles in the natural and altered environment. This course covers the fundamentals of organic and inorganic chemistry in the context of the pressing environmental issues: air pollution, stratospheric ozone depletion, climate change, water pollution, and environmental contaminants.

Outcomes: Understand chemistry behind environmental problems; predict solubility, reactivity, storage in environmental compartments; understand different chemical models used to determine fate and transport of chemicals in the environment.

Components: Lecture(In person)
Course Equivalents: CHEM 312
Requirement Group: Prerequisites: ENVS 137 & CHEM 101; Restricted to IES majors.
Req. Designation: Service Learning

Chemistry of the Environment Lab
Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills.

Pre-requisites: ENVS 137 & CHEM 101; Restricted to IES majors

Plan experiments, develop good lab techniques, conduct accurate chemical analyses on environmental samples, interpret chemical data, short and long reports describing work and interpreting significance of results.

Components: Laboratory(In person)
Course Equivalents: CHEM 313
Requirement Group: Prerequisites: ENVS 137 & CHEM 101; Restricted to IES majors.

Principles of Ecology
Prerequisites: ENVS 237 & Major within Institute of Environmental Sustainability

The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation. Restricted to majors within IES.

Outcome: Students will understand key concepts and principles concerning ecological processes in nature at

Components: Lecture
Requirement Group: Prerequisite: ENVS 237 or CHEM 101 & Major within Institute of Environmental Sustainability

Humans and the Environment in Contemporary Vietnam

This course is intended to provide students with deep and practical understandings of three interrelated concepts: sustainability, conservation, and biodiversity. Students will also learn about the current condition of Vietnam's environment, causes of environmental degradation in Vietnam, and current efforts towards environmental sustainability in Vietnam.

Outcome: Students will grasp the concept of sustainability as it applies to Vietnam, understand the current state of the environment, and current efforts to mitigate problems in Vietnam.

Components: Lecture (In person)
Attributes: Engaged Learning, Tier 2 Scientific Knowledge, Asian Studies, Global & International Studies
Requirement Group: Prerequisite: ENVS 137 or UCSF 137

Principles of Ecology Lab

Prerequisites: ENVS 237, ENVS 238 and ENVS 280; Restricted to majors within IES
ENVS 280 may be taken concurrently with ENVS 286

This course will allow students to develop experience and skills employed in ecological studies, with an emphasis on field work, laboratory analysis, and hypothesis testing. Topics for lab exercises will correspond closely with material from Ecology (ENVS 280) lecture. Course does not satisfy requirements for BIOL major.

Outcome: Students will understand basic ecological principles, apply these to design experiments, develop skills in data analysis and interpretation, and learn techniques used to characterize ecosystem properties

Components: Laboratory (In person)
Requirement Group: Prerequisites: ENVS 237, ENVS 238 and ENVS 280; Restricted to Majors within IES ENVS 280 may be taken

Environmental Health
Epidemiology is the study of the distribution and determinants of disease in populations. This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

Introduction to Epidemiology
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

ENVS 319(3) Course ID:013075 06-JUN-2018
Winter Ecology
Prerequisite: BIOL 265 or ENVS 280 or permission of instructor
Students will immerse themselves in the winter environment and learn about habitats on, in, and under snow, both terrestrial and aquatic, organisms that live in these habitats and their physiological, behavioral and morphological adaptations for survival. Students will gain an understanding of research on winter ecosystems.

Outcomes: Students will gain understanding of habitats and organisms present during winter in temperate ecosystems and gain experience with field techniques employed when studying these ecosystems.

Components: Field Studies(In person)
Course Equivalents: BIOL 329
Requirement Group: Prerequisite: BIOL 265 or ENVS 280

Conservation Biology
Prerequisites: ENVS 280 & 286
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.

Outcome: Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems.

Components: Lecture(In person)
Requirement Group: Prerequisites: ENVS 280 & 286
Req. Designation: Service Learning

Conservation Biology Lab
Prerequisites: Prerequisite: ENVS 280/286; co-requisite ENVS 320.
Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.

Outcomes: This course will provide practical field and lab experience in population, community and ecosystem conservation. Students will learn how the principles of Conservation Biology are applied, and the associated challenges.

Components: Laboratory(In person)
Requirement Group: Prerequisites: ENVS 280, ENVS 286 Pre- or Co-requisite: ENVS 320
Req. Designation: Service Learning
Room Requirements: Lab - Biology(1)

Sustainable Agriculture
Prerequisites: ENVS 280 or BIOL 265
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.

Outcomes: Students will be able to explain the characteristics of the U.S. agricultural system, the inter-relationship among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system.

Components: Lecture(In person)
Requirement Group: Prerequisite: ENVS 280 or BIOL 265
Req. Designation: Service Learning

### Agroecosystems (ENVS 326)
**Course ID:** 012734  **06-JUN-2018**

- **Prerequisites:** ENVS 237 & 238; OR BIOL 102 & 112; ENVS 223 is recommended.

In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.

**Outcomes:** Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating.

**Components:**
- **Lecture (In person)**
- **Requirement Group:** ENVS Majors: ENVS 237 & 238; OR BIOL 102 & 112
- **Req. Designation:** Service Learning
- **Room Requirements:** Electronic Classroom (1)

### Food Systems Analysis (ENVS 327)
**Course ID:** 012735  **06-JUN-2018**

- **Prerequisite:** ENVS 237

This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.

**Outcomes:** Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis.

**Components:**
- **Lecture (In person)**
- **Requirement Group:** Prerequisite: ENVS 237
- **Req. Designation:** Service Learning
- **Room Requirements:** Electronic Classroom (1)

### Restoration Ecology (ENVS 330)
**Course ID:** 012739  **06-JUN-2018**

- **Prerequisites:** ENVS 280 & 286

This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.

**Outcomes:** Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to

**Components:**
- **Lecture (In person)**
- **Requirement Group:** Prerequisites: ENVS 280 & 286 or BIOL 265 & 266; Co-requisite: ENVS 331
- **Req. Designation:** Service Learning
- **Room Requirements:** Electronic Classroom (1)

### Restoration Ecology Lab (ENVS 331)
**Course ID:** 012740  **15-JUN-2017**

- **Prerequisites:** ENVS 280 & 286 or BIOL 265 & 266; Co- or Pre-requisite: ENVS 330

Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.

**Outcomes:** Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects.
Industrial Ecology

Industrial ecology combines Business, Environment, & Engineering to shift industrial processes from linear (open loop) systems, where resources move through the system to become waste, to circular (closed loop) systems where waste becomes inputs for new processes. Students will learn life cycle assessment (LCA) to measure environmental impacts.

Outcomes: Students will understand how business and industry can create zero waste systems, how a circular economy works, and the tools of industrial ecology, including life cycle assessment.

Components:
- Lecture (In person)
- Requirement Group: Pre-requisite: ENVS 363
- Req. Designation: Service Learning
- Room Requirements: Electronic Classroom(1)

Ecological Economics

Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges.

Outcomes: Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic components:
- Lecture (In person)

Biomimicry: Design Inspired by Nature

This course provides an introduction to biomimicry (or biomimetics) and the application of biomimicry design principles. Biomimicry is the design of business products, processes, and systems modeled after nature's wisdom. In biomimicry, nature serves as the design inspiration for sustainable solutions to solve complex human problems.

Prerequisites: UCFS 137 or ENVS 137; MGMT 201 for Quinlan School of Business students

Outcomes: Students will learn the concept of biomimicry and life principles, be able to identify examples, apply biomimicry design principles, and view nature as model, mentor, and measure.

Components:
- Lecture (In person)
- Requirement Group: Prerequisites: ENVS 137 or UCSF 137; MGMT 201 for Quinlan School of Business students
- Req. Designation: Service Learning
- Room Requirements: Electronic Classroom(1)

Natural History of Belize

Prerequisites: For Environmental Science or Environmental Studies Majors/Minors: ENVS 137
For Biology Majors/Minors: BIOL 102 & 112
For Anthropology or International Studies Majors/Minors: Junior or Senior Standing

This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.

Components:
- Field Studies (In person)

**Conservation and Sustainability of Neotropical Ecosystems**

Prerequisites: For Biology Majors/Minors: Bio 265; For Environmental Science Majors: ENVS 280

This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.

Outcomes: Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture.

Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences.

Prerequisites: ENVS 224 or instructor permission

Outcomes: Develop understanding of environmental problems related to climate change, demonstrate skills/knowledge needed to address those problems and recognize/articulate future possibilities for environmental leadership/civic engagement.

**Components:** Lecture (In person)  
**Attributes:** Engaged Learning

**Sustainable Business Management**

Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.

**Prerequisites:** ENVS 137 or UCSF 137 or MGMT 201 for Quinlan School of Business Students

**Outcomes:**
- Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

**Components:**
- Lecture (Blended)

**Sustainability Management in the Global Context**

This study abroad course takes students to international destinations to learn about business and sustainability management in the global context. Students hear presentations from local experts on sustainability in government, nonprofit, & for-profit entities, visit entities that have adopted sustainability practices, & visit local cultural sites. Fulfills MGMT elective.

**Prerequisites:** UCSF 137 or ENVS 137 (ENVS 363 recommended); MGMT 201 for Quinlan School of Business students

**Outcomes:**
- Students will understand sustainability perspectives outside the U.S., practical examples of circular operations and strong sustainability, and global, regional, and local sustainability concerns.

Class Actions

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

### Law and Psychology

For many years, the field of psychology focused primarily on mental illness. But more recently, many psychologists have begun to analyze happiness and to study the ways in which all people, healthy or ill, can increase their enjoyment of life. This course will explore the new field of hedonic psychology, evaluating its methods and examining its findings. We will consider whether legal policy can or should be shaped by these findings in an effort to help people become happier.

### International Arbitration: Public and Private

This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today’s global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e., the U.S. and U.K.) and civil law (i.e., most of Europe, Asia, and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules.

Education Law Practicum
This unique course has a classroom component and a field work component. The classroom component covers substantive education law issues and the development of skills tailored to the practice of education law. For the field work component of the class, students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose from the following different areas of work: (1) providing direct representation and legal assistance to children and families in need of support relating to special education and/or school discipline matters; (2) representing school districts or other educational institutions in education law matters; or (3) working on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may also participate in Loyola's Educational Advocacy Project as an alternative to an external field placement.

International Trade Law
The primary goal of this course is to learn the fundamental or basic principles of the international trading system contained in the General Agreement on Tariffs and Trade (GATT) and the treaties of the World Trade Organization (WTO). Students will learn how rules of the GATT/WTO legal system are made and how they are used in domestic legal systems such as the United States. There are five additional learning goals in this course. First, students will gain factual knowledge about how the WTO is run and how disputes are resolved among WTO member countries. Second, students will learn to analyze and critically evaluate how GATT/WTO legal rules are applied in specific cases with a view to gaining and improving their problem solving skills in international trade law. Third, students will gain a broader understanding of how law works in an increasingly global and heterogeneous world. Fourth, the course will promote student interest in learning more about international law on their own including where to find the resources they need for further study. Finally, the paper

Introduction to Chinese Law
This variable-credit course provides students with an overview of the modern Chinese legal and political systems and lawyering in China. With an economy and society undergoing rapid change, China is facing many challenges as it makes the transition from a socialist to market economy with Chinese characteristics. The course is divided into two components (with a little Chinese culture, language, and survival tips sprinkled in as appropriate). Spring semester component (1 credit): Adopting a "law-in-action" approach, this course will introduce students to the philosophical and historical foundations of Chinese law and China's present legal system, sources of law, and legal/political institutions; it also will explore specific substantive areas of law in modern China, including constitutional law, civil and criminal law and human rights. Beijing campus summer component (1 credit, compulsory for 1Ls): introduction to Chinese commercial law, focusing on laws applicable to US companies doing business in China, and the pitfalls of which international legal

Secured Transactions

This course examines the law of consensual liens on personal property under Article 9 of the Uniform Commercial Code. (I know; it sounds boring, but it's actually pretty cool.) The course deals with the use of personal property, tangible and intangible, as collateral to secure payment or performance obligations (ugh! Who talks like this?). Course materials cover creation of the security interest, validity of the security interest as against the claims of third parties, priorities of claims between competing secured parties and other lien holders and rights upon foreclosure.

Having spent my career as a partner-level transactional lawyer (corporate matters, secured debt work, securitization, bankruptcy) at two large firms (Mayer Brown and Kirkland & Ellis) as well as several years as general counsel at a NASDAQ-listed company, I want students to get a deep sense of the practical

Bankruptcy

This course will provide a comprehensive survey of basic bankruptcy law. We will devote roughly equal time to consumer bankruptcy and business bankruptcy. Throughout the course, we will touch on the economic, political, and ethical issues underlying bankruptcy's competing goals: providing overextended consumer and business debtors with a fresh start and satisfying creditors' claims in an orderly, fair way. There are no prerequisites. Students' grades will be based on classroom participation and a take-home final exam.

Advanced Mediation Advocacy Practicum

Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law.

This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest-based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. J.D. students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required.

**Workways of the U.S. Supreme Court**
This course will address the role of the U.S. Supreme Court in our tri-partite framework of representative government and interacts with the other branches of the federal government (and the states) as it exercises the power of judicial review, consistent with the authority provided by Article III of the Constitution and the statutes which Congress has passed with respect to the jurisdiction of the federal courts, including the Supreme Court. The preliminary lectures by Professor Sullivan will provide the course foundation, exploring the constitutional and statutory provisions relating to the Court and its work and the ways in which the Court has structured its work within those constraints. The course will pay particular attention to the Court’s case selection process and the ways in which lawyers succeed in getting their clients’ cases to the Court. Justice Ginsburg will discuss the landmark cases of the current 2017-2018 court term; the workways of the Court; and the road to her appointment to the U.S. Supreme Court. Judge Ann Williams, Senior U.S.

**Separation of Powers**
This course will consider the dynamic nature of separation of powers in the American constitutional system, particularly with respect to the relationship between the executive and legislatives branches of the national government, but consideration will also be given to the role of the judicial branch and its interactions with the executive and legislative branches (to which the courts typically refer as the political branches). The readings will include some of the founding era documents, constitutional cases, materials such as presidential messages and statements, executive branch legal opinions, and secondary materials. Students will gain a working knowledge of the field through the required readings and develop seminar paper topics during the first part of the semester; they will present the results of their research to the class in the latter part of the semester and will submit papers at the end of the semester. Advanced Legal Research: Foreign and International Legal Research

This course is designed to meet the growing demand for research competency in the fields of foreign, comparative, and international law (FCIL). Students in the class will be introduced to research techniques and resources specific to these fields that will be useful in practice and academic settings. Print and electronic resources will both be discussed, but emphasis will be placed on resources in electronic format. Resources on the WWW and at Loyola will be highlighted, although students will have an opportunity to explore the international and foreign holdings of another local law library. Weekly research exercises and a final project will allow students to apply specific FCIL sources.

International Human Rights

This course examines the civil, political, economic and other rights secured to individuals and groups by international law. It examines the major source of those rights, including the United Nations and regional organizations, and it discusses the substantive content of those rights. Particular attention is given to how those rights are enforced, from judicial decisions in national and international tribunals through other mechanisms developed in various international and regional settings, including the role of NGOs. No prerequisite.

Police Accountability

This course examines how the law regulates policing in the United States. We will spend part of the class exploring important court decisions related to police accountability. We will also study other legal mechanisms designed to combat police misconduct, like civil litigation, criminal prosecution, and federal oversight. Ultimately, this course will encourage students to consider whether existing regulatory tools effectively combat police misconduct, and whether these regulations impair the ability of law enforcement to fight crime.

Hedge Funds

There are over two trillion dollars invested in hedge funds—investment giants that move and shape today’s international financial markets. Yet many do not understand their significance or their complex workings. This course is designed to give you a practical understanding of hedge funds and the documentation that supports the formation and operation of these funds. We will examine the regulatory, compliance and business issues surrounding hedge funds and provide tools for successful fund implementation. We will also explore practical concerns with the Investment Advisers Act of 1940 and the Investment Company Act of 1940 as well as current changes to the regulatory scheme, including Dodd-Frank. Prerequisite: Business Organizations. Securities Regulation is not a prerequisite but will be helpful.

Jurisprudence I
This course will consider a number of topics residing at the cutting edge where law and legal philosophy meet, including: What is law? Must law be related to morality? What is the interpretative function of courts? Should integrity constrain what courts decide? From whence does the duty to obey law come? Are there any human rights? Might some of these rights be manifested by our ideas of liberty, privacy and freedom of expression? Need we respond to terrorism by changing our values? What is distributive justice as compared with corrective or retributive justice? Are distributive justice questions implicated by court decisions involving affirmative action, gender, and sexual orientation? How is corrective justice manifested in tort and contract law? What is ownership? Is ownership of intellectual property morally justified? What is the relationship of causation to responsibility, and what is punishment and how is it justified? Students may take this three hour course either as a lecture course with a midterm and final exam or a seminar with a 20

U.S. Foreign Trade and Customs Law
The goal of this course is to provide students with an overview of International Trade and U.S. Customs law, in its domestic and international contexts. Students should be prepared to learn about the history and current role of international trade organizations; U.S. government agencies and their roles in international trade; U.S. Customs law and compliance issues. Students will receive an overview of antidumping law and the litigation of antidumping and U.S. Customs issues at the U.S. Court of International Trade and the U.S. Court of Appeals for the Federal Circuit. The role of NAFTA and other free trade agreements in international trade will be discussed, in both legal and political settings. The class will also cover compliance issues that arise under U.S. Customs law, and how a client's non-compliance can incur penalties from the U.S. government and affect overall client profitability.

State & Local Taxation
State and local taxes in the United States are numerous, diverse and constantly evolving. These taxes are also the source of some of the most significant controversies in tax practice today. This course explores the federal and state constitutional and statutory frameworks that underlie state and local income tax (corporate and personal), sales and use taxes, and as time permits, the other significant types of state and local taxes (property taxes, capital based franchise taxes and gross receipts taxes, etc.). While there is a special focus on Illinois, the course is designed to equip a tax practitioner with the tools to approach and understand the tax regimes in most states and localities.

American Legal History
Deep controversies over political issues present now, including immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

Storytelling and Presentation Skills for Lawyers
This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. **Mediation Advocacy**

This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

**Restorative Justice Workshop**

In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

Professional Identity Formation
Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the field.

### LAW 456(1 - 2) Mediation Seminar
**Course ID:** 004651  **15-MAR-2018**

Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works.

This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation.

### LAW 458(2) Canon Law Seminar
**Course ID:** 004653  **28-JUN-2017**

Canon law plays a central role in determining how the Catholic Church handles the broad spectrum of issues involved in the daily management of a worldwide multinational organization that includes dioceses, parishes, colleges, universities, grade schools, high schools, hospitals, nursing homes and other charitable entities. Examples of these issues involve personnel and real estate matters, rights and duties of the faithful, professional misconduct, foreign religious workers, the administration of ecclesiastical goods, mergers and joint ventures, and, of course, marriage and family law, especially divorces and annulments. This Canon Law Seminar should be of particular interest for students interested in the management of Catholic institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law.

Information technologies have created new challenges with regard to human rights protection, especially in the areas of data privacy and freedom of expression. These present complex legal questions and moral dilemmas with multiple tension points, which are at the heart of the ICT industry, but also evaporate through almost any other industry in the digital age, by means of the ¿internet of things.¿ A growing discrepancy between the U.S. and EU privacy doctrines and the allowed government limits on freedom expression make this topic highly salient for any U.S. business operating in Europe, in particular. The course will include an optional practicum, which involves assigning the interested students to a real-life project on the topic with an ICT company, relevant international body, consulting firm, think tank in the field, law firm, relevant</td>

### LAW 472(2) - Securitization

Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets.

As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and...

### LAW 482(3 - 4) - Advising Not-For-Profit Organizations: Business Practicum

This course counts as a Comprehensive Simulation and Skills

Please note: This course is offered in a 4-credit version in the spring semester, and in a 3-credit version in the summer. The differences between the spring and summer versions are noted at the end of this description. Students may take elect to take this course in the spring or in the summer, but not both.

There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well.

Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net...

### LAW 483(2 - 4) - Federal Tax Clinic I

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a ""skills center"" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite.

This is a Skills and Live Client Experience course.

### LAW 486(1 - 2) - Federal Tax Clinic II

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. Federal Tax Clinic II affords students from the tax clinic the opportunity to carry their cases through to completion. It is more independent and sophisticated than tax clinic I. Students continue to develop the skills that they learned in tax clinic I, including client interviewing, negotiations, tax litigation, correspondence with the IRS, and preparation of petitions to Tax Court. Federal Income Tax and Tax Clinic I are prerequisites.

This is a Skills and Live Client Experience course.

**Federal Courts**

This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client’s substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this context, federal courts frequently offer advantages over state courts with respect to the allocation of judicial power. As such, this course will provide students with a foundation for understanding how federal courts are structured, the rules they will encounter, and how best to serve them. **Election Law**

The legal regulation of elections and electoral politics is the foundational infrastructure of American democracy. This 2 credit course on Election Law will give students an understanding of the themes in the legal regulation of elections and politics. It will cover all the major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. The course will also cover voter fraud and vote suppression. Election law is a product of federal and state law, both constitutional and statutory. Consequently, this course provides a good foundation for students interested in constitutional or statutory litigation. The course will be graded by class participation and either a paper or a take-home exam.

Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment.

The course will be taught by legal professionals with extensive experience in legislative drafting and

Alternative Dispute Resolution

This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical. Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures, seminars, simulations, and role-playing.

Design Thinking and Early Childhood Education

This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration.

In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality.

This course will provide the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

Health Care Compliance
This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs.

Business Law Center Clinical & Seminar

The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not-for-profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Wednesday from 3:30 to 5 p.m.), which covers relevant substantive law, ethical issues, and pragmatic lawyering skills, such as drafting, negotiating, and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 6 hours per week, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an organized and professional manner, and develop communication and counseling skills.

European Union Privacy Law

European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy laws impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

#### PLAW 101(3) Comparative and Ethical Lawyering for the Rule of Law

This course will develop the students' key knowledge and skills required to provide effective advice and assistance in a country with a culture and a legal system different from the culture and legal system in which students received their legal educations. The course will examine and compare the main elements of particular relevance to rule of law assistance work in each of the three major world legal systems: common law, continental civil law and Islamic law and the typical institutional frameworks adopted to organize each of these legal systems. It will also explore customary law sources in developing countries and how they are integrated in a formal way into modern legal systems and/or applied in practice. The course will also provide practical examples of successes and failures of cross-system rule of law assistance efforts attributable to success or failure to manage differences in legal systems and culture and explore relevant strategies for success. Finally, the course will encourage students to consider the ethical dimension of these legal systems.

| Requirement Group | Restricted to students in the Rule of Law Development M.J. and LL.M. programs. |
| Components | Writing Intensive |
| Room Requirements | Seminar(In person) |

#### PLAW 102(3) History, Theory and Practice of Law for Development

This course will develop the students' working knowledge of the history, theoretical models and current approaches of academics and practitioners to understanding the rule of law. It will examine the relationship between law and development and how that relationship operates in rule of law advising. The course will survey academically-oriented rule of law work in the 1960's and the earlier theoretical work upon which it was based and follow the development of the field to date with a focus on theory and practice of rule of law initiatives undertaken in the setting of international development assistance programs. Examples from bilateral and multilateral assistance efforts will be analyzed to learn from the successes and failures of rule of law initiatives aimed at the promotion of human rights, the promotion of democracy and good governance and the improvement of the legal framework for investment and trade. The course will also explore alternative change models to which rule of advisors can refer in their engagement with counterparts and in ways.

| Components | Seminar(In person) |
| Room Requirements | Seminar(In person) |

#### PLAW 103(3) Theory and Practice of Assessments in Rule of Law Advising

This course will provide students with the knowledge and skills required to undertake the assessments of needs, the crucial lynchpin required for the design of specific rule of law initiatives. As this aspect of rule of law work requires the performance of tasks, which are generally outside the experience and training of law graduates, students will be provided with a new set of research and analytic tools and methodologies from outside their field. While concentrating on examples from the legal and justice sector, these tools will include interviewing skills, use of data from existing sources, the generation of new data, the design and conduct of reliable surveys, the use and interpretation of statistical data and the drafting of the assessment documents themselves. The course will relate closely to the courses on Comparative and Ethical Lawyering for the Rule of Law and the International Development Architecture, insofar as assessments will require analysis and description of the state of the target country's legal system, the functioning of the legal and justice sector, and the role of law and the legal system in development.

| Components | Seminar(In person) |
| Room Requirements | Seminar(In person) |

#### PLAW 250(3) Research and Writing on the Rule of Law

Each student shall be expected to undertake research under the supervision of a faculty member for three credit hours. Supervised Research provides a seminar-type experience to a student in those areas where there is no curricular offering or where a student wishes to explore a subject in greater depth than would be possible in an existing course or seminar. The supervisor and student will establish a calendar of face-to-face meetings and e-mail feedback sessions that allows for substantial interaction and discussion. The supervisor will also provide feedback on research methodology and counsel the student on areas within the topic on which the quality of the research can be improved or the breadth or depth of the research can be extended.

#### PLAW 251(3) Rule of Law Thesis Supervision and Completion

This course will provide a seminar-type experience to a student in those areas where there is no curricular offering or where a student wishes to explore a subject in greater depth than would be possible in an existing course or seminar. The course will also provide practical examples of successes and failures of cross-system rule of law assistance efforts attributable to success or failure to manage differences in legal systems and culture and explore relevant strategies for success. Finally, the course will encourage students to consider the ethical dimension of these legal systems.

Fundamentals of Nutrition
For non-majors.
Nutrients essential to a healthy diet, consideration of nutrition issues of public concern.

Components: Lecture
Req. Designation: Fieldwork
Room Requirements: General Classroom(1)

FONU 410(3)  
Course ID: 011734  06-JUN-2018
Nutrition Focused Physical Assessment
Prerequisite: admission to MS/Dietetics program.
This course provides an introduction to the development of physical and lab skills that are necessary for support of the dietitian's practice; in particular these skills are used in nutrition assessment and the provision of medical nutrition therapy. Building upon basic nutrition assessment knowledge and skills, the focus of this course is on development of physical assessment and skills relevant to nutrition care of the individual, and/or to support nutrition program development, delivery or evaluation. Learning methods include lecture, demonstration, laboratory of physical skills, electronic media, and readings.

Components: Lecture(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Lab - Nursing(1)

FONU 422(3)  
Course ID: 011728  06-JUN-2018
Medical Nutrition Therapy Theory
Prerequisite: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, renal and disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

Components: Lecture(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1)

FONU 423(2)  
Course ID: 011729  06-JUN-2018
Supervised Practice (SP) in Medical Nutrition Therapy
Prerequisite: FONU 420 and admission to the Loyola Dietetic Internship.
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 424(3)  
Course ID: 011730  06-JUN-2018
Public Health Nutrition and Research Theory for Dietetic Practice
Prerequisite: FONU 420 and admission to the Loyola Dietetic Internship.
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.

Components: Lecture(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1)
Supervised Practice in Public Health Nutrition, Research, Professional Development & Marketing

Prerequisite: FONU 420 and admission to the Loyola Dietetic Internship.

This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

Components:
- Lecture (In person)
- Requirement Group: Restricted to Graduate Nursing Students.
- Req. Designation: Fieldwork
- Room Requirements: Electronic Classroom (1)

Food Management Theory: Geriatric Nutrition

This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

Components:
- Lecture (In person)
- Requirement Group: Restricted to Graduate Nursing Students.
- Req. Designation: Fieldwork
- Room Requirements: Electronic Classroom (1)

Supervised Practice: Food Management, Geriatric Nutrition

This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

Components:
- Lecture (In person)
- Requirement Group: Restricted to Graduate Nursing Students.
- Req. Designation: Fieldwork

Trends in Dietetic Practice

Prerequisite: admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission.

This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergies and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including motivational interviewing for behavior change.

Outcomes: Student will demonstrate knowledge in emerging areas related to dietetic practice.

Bridge Course and Nursing Concepts
This course provides conceptual linkage between student's previous nursing education and clinical experiences to professional nursing. The student's background in liberal arts, science and nursing is used as the basis for exploration of theories that guide contemporary nursing practice and leadership. Historical, cultural and political factors that have shaped contemporary nursing and the U.S. health care system are explored. Emphasis is placed on developing an understanding of scientific problem-solving, by accessing and evaluating data from a variety of sources. Critical thinking skills and the ability to evaluate evidence for practice are stressed.
Components: Lecture (Online)
Requirement Group: Restricted to School of Nursing students.

Concepts of Professional Nursing Practice
This course explores nursing concepts for professional nursing practice in the care of individuals, families, communities, and populations, along the health-illness continuum. Content includes client and family-centered care, client teaching, levels of prevention, the determinants of health and illness, and the principles of population- focused and culturally sensitive care. Students are introduced to the historical and political influences of the current US health care delivery system with an emphasis on the issues of health care access, health care disparities, social determinants of health, biases in the healthcare setting, and health literacy among culturally diverse and vulnerable populations.
Restricted to RN-BSN Students Only.

### GNUR 384(3) Clinical Role Transition

- **Course Description:** Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
- **Outcomes:** Upon successful completion of this course, the student is able to: 1. Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care. 2. Apply principles of quality and safety in patient care settings. 3. Apply knowledge of prioritization and delegation in the management of care. 4. Collaborate with patients, families, and members of the

**Theories & Concepts for Advanced Clinical Practice**

This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.

Upon successful completion of the course the student will be able to: 1. Understand the history and driving forces for knowledge development in nursing. 2. Describe the philosophical foundations of nursing and advanced nursing practice. 3. Understand the levels of theory development in nursing. 4. Explain the use of selected concepts and middle-range theories to guide advanced nursing practice. 5. Analyze concepts and theories for use in nursing practice. 6. Analyze the relation between theory, research, and nursing practice.

**Research for Advanced Clinical Practice**

This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include: understanding relationships among theory, research, principles of epidemiology and practice; formulating research and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

This course builds on the critical thinking, diagnostic reasoning, clinical judgment and decision making competencies developed in Psychiatric Mental Health Care Across the Lifespan I. A major focus of the course is the inter-professional integration of prevention and treatment strategies for clients and families.

Upon successful completion of the course, the student will be able to:

1. Apply clinical judgment and critical thinking to formulate collaborative psychiatric mental health care for clients.
2. Strategize coordinated care for children, adolescents, adult and older adults with psychiatric mental health disorders.
3. Evaluate evidence-based psychotherapeutic and psychopharmacological treatment strategies for clients with psychiatric mental health disorders.

Population-Focused Health

This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctoral-prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.

1. Analyze the role of federal, state, and local governments in population health.
2. Assess population specific health needs using Healthy People and the determinants of health as frameworks.
4. Analyze health disparities and needs of priority populations using databases.
5. Apply epidemiologic concepts when completing a population needs assessment.
6. Examine evidence-based interventions for population specific health needs.

Health Care Policy and Economics

Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.

Outcomes:
Upon successful completion of this course the student will be able to:
1. Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels.
2. Analyze the effects of economic factors on health care decision making.
3. Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research.
4. Design practice improvement recommendations that account for policy, economic and financial factors.

Research Internship

This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

Adv Prac Nurs Substance Use & Addictive I

This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and manage clients with substance use and addictive disorders. Pharmacological and non-pharmacological interventions for management of substance use and addictive disorders are addressed.

Prerequisite: GNUR 474 - Psychiatric Mental Health Care Across the Lifespan II

Outcomes: Upon successful completion of the course, the student will be able to:
1. Synthesize evidence-based scientific theories of substance use and addictive disorders.
2. Understand the neurobiological aspects of addiction.
3. Assess and diagnose substance use and addictive disorders for clients.
4. Apply pharmacologic, psychological, and social interventions for substance use and addictive disorders.

**Philosophy of Nursing: Nursing as a Moral Practice**  
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

The overarching objective is to foster fundamental skills and strategies needed to prepare and submit a competitive research grant proposal. Emphasis is placed on the means by which to best position a research grant application for success. Sources and types of funding from governmental agencies, private foundations and professional societies are considered, with an emphasis on federal (NIH, AHRQ) grant programs, mechanisms, application and review process. Key aspects of successful proposal development from conceptualization of an idea or research question to submission of the application is fully developed and explored. Strategies for successful writing of each component of a research grant are provided using examples

### Evidence Translation for Adv Clinical Practice

This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.

Upon successful completion of this course the student will be able to: 6. Evaluate theory, concepts and methods to guide translation of evidence. 7. Formulate questions about population-based practice problems, issues and areas for improvement in context. 8. Synthesize the state of evidence with regard to a specific

**Neurodevelopment and Trauma**
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma.

Prerequisites: Completion of all 500 level courses with the exception of SOWK 506 and SOWK 509. A current or past internship involving direct work with at least one client who has experienced developmental trauma.

Outcomes: Students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma.

**Ethics: Theory and Application**
This course is designed to provide students with an in depth and critical understanding of the ethical principles and practices within the helping profession. A variety of perspectives (historical, political, etc.) theories (moral authority, paternalism, etc.) are utilized in understanding the complexity of ethics and ethical advocacy.

**Crisis Intervention**
This class examines crises, emergencies and stressful phenomena. The definitions and implications of crisis and emergency are explored. A model of crisis intervention is presented, with a variety of case examples, along with an understanding of the importance of not conducting crisis intervention when a client is not in crisis.

**Staff Management and Development**
This course prepares students for leadership and development practice in staff management and development in social service organizations. The terms "staff management and development" and "supervision" are used interchangeably. Content focuses on providing knowledge, values, ethics, and skills in guiding the work and development of others within social/human service organizations.

**Organizational Leadership**
This course will provide knowledge of ethics, values, and skills involved in organizational leadership in human service agencies. The focus is on the theoretical perspectives, organizational functions and structures, leadership styles, techniques and skills, and ethical and value-driven leadership needed by those who seek to specialize in human services agency administration.
