Introduction to Non-Fictional Prose

In this course, we will study nonfiction prose from a range of times and places. To focus our studies, we will investigate how a wide variety of authors have used writing to express, explore, and create a sense of self. When sharing their lives with an audience of readers, how do these authors navigate the territory between the private and public spheres, between internal experience and external reality, between self and environment? To answer this question, we will read a variety of nonfiction forms including diaries, essays, autobiographies, and graphic memoirs. Throughout the course, we will discuss issues of literary meaning, form and value.

Outcomes: Upon completion of this course, students will have demonstrated inquiry and pursue self-directed learning, mastered key literary terms, read for comprehension, read for analysis, and argued for literary

The capstone course is the last class students take in the MS Business Data Analytics program. As such, it asks students to integrate all the knowledge and skills they’ve developed in the foundation and elective courses, and to apply their efforts to solve a real-world business problem. The Capstone Project Coordinator will work with a set of host companies to identify projects that are suitable for students enrolled in the capstone course.

**Course is restricted to the MSBDA students**

**Students completing this course will:** 1. Gain a deep understanding of some of the tools and software that are used in modern-day analytics; 2. Learn how to transform large data sets into insightful and actionable insights.

- **Components:** Lecture (In person)
- **Requirement Group:** Restricted to students in the M.S. in Business Data Analytics program (BDAN-MS)
- **Req. Designation:** Internship

**Ethics, Economics & Entrepreneurship**  
Prerequisite: Junior Standing, 'C-' or better in MGMT 201

The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions:  
Who is the entrepreneur? that is, what activities or characteristics make one an entrepreneur?  
Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?  
How ought we to evaluate the entrepreneur morally? and does the answer depend upon who we understand the entrepreneur to be?

ANTH 213(3)  Course ID:001102  06-JUN-2018
Contemporary African Culture
This course investigates popular culture, traditional African philosophy, and political economy in the postmodern era. Engaging an interdisciplinary approach, the course includes an overview of pre-colonial Africa (primarily West Africa), African intellectual contributions to the West, and the reverse.
Outcome: Students will gain familiarization with Africana philosophy and orientation to the world as a prelude to understanding contemporary messages embedded within popular culture genres in specific regions of Africa.
Components: Lecture
Course Equivalents: AFR 213
Attributes: African Studies and the African Diaspora, Black World Studies, Global & International Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)

ANTH 214(3)  Course ID:001103  06-JUN-2018
African-American Anthropology
This course offers an historical and contemporary exploration of various efforts undertaken by African Americans and their supporters to achieve racial parity, social justice and equality with other Americans, from the early presence of Africans in the Americas to the present period.
Outcome: Students will understand landmark legal cases brought to U.S. courts of law by African Americans and their supporters and strengthen their critical thinking and writing skills on these and related topics.
Components: Lecture
Course Equivalents: AFR 214
Attributes: African Studies and the African Diaspora, Black World Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)

ANTH 215(3)  Course ID:001104  06-JUN-2018
Contemporary Japanese Culture
This course critically evaluates popular and scholarly characterizations and theories about Japan through investigation of ethnicity, gender roles, language, demographic change, and the impact and role of popular culture.
Outcome: Students will be able to demonstrate an awareness of how Japanese values and behavior are influenced by culture and history, an understanding of the relationships among cultural, economic, and social forces, and of contemporary social diversity.
Components: Lecture(In person)
Course Equivalents: ASIA 361
Attributes: Asian Studies, Global & International Studies

### ANTH 243(3) - North American Archaeology

**Course ID:** 001117  
**Run Date:** 06-JUN-2018  
**Prerequisite:** ANTH 101 or ANTH 104.

This course surveys archaeological evidence in North America with focus on regional patterns of indigenous adaptation and explanations for prehistoric culture change.

**Outcome:** Students will be able to describe the chronological pattern and regional diversity in the cultural evolution of prehistoric societies in North America from ice-age colonization to European contact.

**Components:** Lecture  
**Requirement Group:** Prerequisite: ANTH 101 or ANTH 104  
**Req. Designation:** Internship  
**Room Requirements:** General Classroom(1)

### ANTH 244(3) - Historical Archaeology

**Course ID:** 013503  
**Run Date:** 06-JUN-2018  
**Prerequisites:** ANTH 101 or ANTH 104. Recommended: Anth 241.

Historical archaeology views history through the lens of the archaeological record. This course is an introduction to contemporary method and theory in historical archaeology with a focus on the European colonization of North America, including the major topics of reconstructing everyday lifeways and understanding modernization and globalization.

**Outcomes:** Students will learn research strategies for using historic artifact analysis and archival documents in interpreting the unique physical evidence of the historical archaeological record.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ANTH 101 or ANTH 104  
**Req. Designation:** Internship  
**Room Requirements:** Electronic Classroom(1)

### ANTH 280(3) - Evolution of Human Disease

**Course ID:** 001119  
**Run Date:** 06-JUN-2018  

The complex interaction between humans and pathogens is explored throughout time, with particular emphasis on the role and impact of human biology, human culture and changing environments.

**Outcome:** Students will be able to demonstrate understanding of the human immunological system, competing paradigms of human health, the processes and mechanisms of biological evolution, the pathogenesis of specific diseases, and the archaeological, paleopathological, paleodemographic, and historical data used to explore the evolution of disease.

**Components:** Lecture  
**Course Equivalents:** BIOL 280  
**Attributes:** Bioethics  
**Req. Designation:** Internship  
**Room Requirements:** General Classroom(1)

### ANTH 301(3) - Refugee Resettlement

**Course ID:** 011659  
**Run Date:** 06-JUN-2018  

This course concerns investigation of contemporary issues associated with forced migration and refugee resettlement in applied anthropology and humanitarian work. It considers topics of globalization, transnational migration, human rights, and cross-cultural interactions. This course involves service-learning and civic engagement components providing assistance for local refugees and refugee resettlement agencies.

**Components:** Lecture(In person)  
**Attributes:** Engaged Learning, Peace Studies, Urban Studies  
**Req. Designation:** Service Learning  
**Room Requirements:** Electronic Classroom(1)

### ANTH 303(3) - People and Conservation

**Course ID:** 010267  
**Run Date:** 06-JUN-2018  

This course considers the interplay between indigenous peoples and environmental resources utilizing current perspectives from evolutionary and community ecology, conservation biology, anthropology, political ecology and economics.

**Outcomes:** Students will demonstrate an understanding of factors influencing this interplay, including environmental ethics, traditional environmental knowledge, resource management, community-based conservation, property rights, common-pool resources, sustainable development, land tenure, indigenous movements, and eco-tourism.

**Components:** Lecture(In person)  
**Attributes:** Bioethics, Global & International Studies  
**Req. Designation:** Service Learning  
**Room Requirements:** General Classroom(1)
### ANTH 304(3)
**Course ID:** 001121  **06-JUN-2018**

**History of Anthro Thought**

Focusing on the historical contexts in which anthropological theory developed, this course addresses relationships between historical circumstances and leading theorists, and the questions they asked.

**Prerequisite:** ANTH 100 or 102.

**Outcome:** Students will be able to demonstrate an understanding of Victorian evolutionism; the American historical school; cultural materialism; symbolic and interpretive anthropology; structuralism; functionalism; feminist anthropology; political economy; and post modernism.

**Components:**
- Lecture

**Requirement Group:** Prerequisite: ANTH 100 or ANTH 102

**Req. Designation:** Service Learning

**Room Requirements:** General Classroom(1)

### ANTH 305(3)
**Course ID:** 010264  **06-JUN-2018**

**Violence and Culture**

This course examines the complex relationships between violence and culture using the ethnographic method as practiced by anthropologists and other social scientists.

**Outcome:** Students will demonstrate an understanding of the ways violence destroys, alters or produces forms of cultural meaning and social action and the ways in which cultural difference impacts patterns of violence.

**Components:**
- Lecture (In person)

**Course Equivalents:** PAX 305

**Attributes:** Global & International Studies, Peace Studies, Sociolegal Studies

**Req. Designation:** Service Learning

**Room Requirements:** General Classroom(1)

### ANTH 306(3)
**Course ID:** 010268  **06-JUN-2018**

**Anthropology and Human Rights**

Prerequisite: ANTH 100 or 102

This course examines the concept of universal human rights, and the social movement that has developed to promote human rights, from an anthropological perspective.

**Outcomes:** Students will be able to demonstrate an understanding of the social and historical origins of the concept of human rights and analyze the debates that arise out of applying the concept of human rights in cross-cultural contexts.

**Components:**
- Lecture (In person)

**Course Equivalents:** PAX 306

**Attributes:** Global & International Studies, Peace Studies, Sociolegal Studies

**Req. Designation:** Service Learning

**Room Requirements:** General Classroom(1)

### ANTH 307(3)
**Course ID:** 010270  **06-JUN-2018**

**The Human Body in Cultural Perspective**

This course examines the significance and nature of surface and deep culturally originated modifications of the human body.

**Outcome:** The student will demonstrate an understanding of the cultural importance and meaning of body modifications through the use of a cross-cultural perspective on past and contemporary modification practices.

**Components:**
- Lecture (In person)

**Req. Designation:** Service Learning

### ANTH 308(3)
**Course ID:** 001122  **06-JUN-2018**

**Media and Cultural Change**

The course considers the transformative effects of communications technology on the social and cultural aspects of human life.

**Outcome:** Students will understand how anthropological ethnography can actually be set into the context of our contemporary electronic culture.

**Components:**
- Lecture

**Course Equivalents:** ICVM 308

**Attributes:** Film & Digital Media Studies, International Film & Media Studies

**Req. Designation:** Service Learning

**Room Requirements:** Electronic Classroom(1)
College of Arts and Sciences - Anthropology Department - Subject: Anthropology

ANTH 309(3)  
Urban Anthropology  
Prerequisite: ANTH 100 or ANTH 102.

This course is focused on defining characteristics of city life across a variety of societies. It particularly considers urban complexity in the context of the globalization of cities.

Outcome: Students will gain a cross-cultural and global outlook on the defining features of urbanism.

Components: Lecture
Attributes: Urban Studies
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

ANTH 310(3)  
Social Anthropology  
Prerequisite: ANTH 100 or 102.

Theoretical frameworks and methods used in the scientific study of culture, society, and personality.

Outcome: Students will be able to demonstrate a knowledge of various anthropological approaches to understanding social structure, social organization, and social institutions; major societal types; and selected classic problems in social anthropology.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

ANTH 311(3)  
Evolution of Culture  
Prerequisite: ANTH 100 or 102.

Examination of contemporary theories of cultural evolution including culture as environmental adaptation; systemic relationships between environments, technology, subsistence, socio-political organization, and ideology; socio-cultural development and the increasing scale of society and energy harvesting; modes of cultural transmission; and economic globalization.

Outcome: Students will be able to draw connections between theories of cultural evolution and historical and contemporary patterns of cultural diversity and change, including assessments of environmental sustainability.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

ANTH 313(3)  
Interpretive Anthropology  
Prerequisite: ANTH 100 or ANTH 102.

This course highlights the recent turn away from natural science models for ethnography. It stresses the relevance of literary studies to the writing and reading of ethnographic texts.

Outcome: Students will understand that **"objectivism"** in ethnography is an out-of-date theory of knowledge. Raised awareness of the interpretive dimensions of ethnographic writing is the course goal.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Service Learning
Room Requirements: General Classroom(1)
ANTH 314(3) Course ID: 001128 06-JUN-2018
Applied Anthropology
Prerequisite: ANTH 304 or Instructor approval

This course offers a hands-on introduction to the application of anthropological principles and methods to non-academic, "real world" problems. Course sessions will be dedicated to situating applied anthropology within the broader discipline, learning methods, and practicing applied cultural techniques. Students will also develop and carry out an applied cultural anthropology project.

Outcomes: Students will: situate applied anthropology in the broader discipline; practice a variety of applied methodological techniques; work with a community partner to design a project; prepare a comprehensive and clearly written report.

Components: Field Studies (In person)
Attributes: Engaged Learning
Requirement Group: Prerequisite: ANTH 304 or Instructor's Permission
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom (1)

ANTH 315(3) Course ID: 001129 06-JUN-2018
Identities: Race, Ethnicity, and Nationalism
Prerequisites: ANTH 100 or ANTH 102.

Drawing on case studies, this course examines anthropological understandings of "race," ethnicity, and nationalism.

Outcome: Students will emerge able to understand historical anthropological theories concerning group identities (tribes, race, ethnic groups); the symbolic construction of group identities; the political dimensions of collective identities; dynamics between religion and ethnicity; and the role of colonialism & the state in shaping ethnic relations.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Undergraduate Research
Room Requirements: General Classroom (1)

ANTH 316(3) Course ID: 001130 06-JUN-2018
Anthropology of Religion & Ritual
Prerequisites: ANTH 100 or ANTH 102.

The course considers religion as a form and part of culture. The innovative as well as conservative features of religion in culture change are addressed. Religion's role as both a belief-system and ritual practice are underscored.

Outcome: Students will develop the capacity to view religion in a broad perspective and to understand it as a significant factor of belief and practice in cultural systems.

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Undergraduate Research
Room Requirements: General Classroom (1)

ANTH 317(3) Course ID: 001131 06-JUN-2018 Instructor Consent Required
Ethnographic Methods

This course is designed to offer an introduction to qualitative methods in anthropology. Students will learn methodologies such as participant observation, interviewing, and document analysis, and we will also address ethical issues in field research. Students will design and carry out an ethnographic research project.

Outcomes: Students will: demonstrate in-depth knowledge of qualitative research techniques; critically discuss ethical implications of ethnographic research; undertake original ethnographic fieldwork; prepare a comprehensive, theoretically informed, and clearly written report based on original ethnographic data. Instructor permission required.

Components: Field Studies (In person)
Attributes: Engaged Learning, Urban Studies
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom (1)
Material Worlds: Art and Expressive Culture
Prerequisite: ANTH 100 or ANTH 102.

This course examines anthropological approaches to art and expressive culture, drawing on case studies from around the world.

Outcome: Students will be able to demonstrate an understanding of different theoretical models for analyzing expressive culture; the social organization of art; symbolic dimensions; psychological approaches; gender/identity issues; political aspects of art; and dynamics of change in culture and art (evolution of new meanings, tourist art).

Components: Lecture
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom(1)

Anthropology of Tourism
Prerequisite: ANTH 100 or ANTH 102.

This course explores the phenomenon of tourism from an anthropological perspective, addressing the social, cultural, economic, and environmental impact of tourism on host communities and nations.

Outcome: Students will demonstrate an understanding of the strengths/limitations of various theoretical models for understanding tourism dynamics; tourism's role in national development; the interplay between tourism and cultural imagery; gender dynamics in tourism; the role of tourism institutions (museums, souvenirs, travel literature) in the construction of "exotic others."

Components: Lecture
Attributes: Global & International Studies
Requirement Group: Prerequisite: ANTH 100 or ANTH 102
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom(1)

Animal Behavior
Prerequisites: ANTH 101 or 103; or BIOL 102 & 112.

This course is an interdisciplinary examination of animal behavior from the perspective of the anthropologist and biologist. ANTH 320 is cross-listed with BIOL 320.

Outcome: Students will be able to demonstrate an understanding of biological bases of animal behavior, including the function and evolution of behavioral patterns

Components: Lecture
Course Equivalents: BIOL 320
Attributes: Neuroscience
Requirement Group: Pre-requisites: ANTH 101 or 103; or BIOL 102 & 112
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom(1)

Human Rights in Latin America
This course examines human rights in Latin America from a multidisciplinary perspective. It asks: what are human rights? Why have human rights abuses occurred and how have Latin Americans responded?

Outcomes: Students will understand the international human rights legal framework, be able to analyze why abuses have occurred, and understand how Latin Americans have mobilized by studying specific cases.

Components: Lecture(In person)
Course Equivalents: LASP 398
Attributes: Catholic Studies, Global & International Studies, Latin American Studies, Peace Studies, Sociolegal Studies
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: Electronic Classroom(1)
ANTH 324(3)  
**Human Evolution**  
Prerequisite: ANTH 101 or ANTH 103.

This course provides a detailed assessment of the fossil record pertinent to the emergence and evolution of humans up through the origin of modern people. The interpretation of this record within the context of important biological principles is emphasized, as is the methodology of doing historical science with paleontological data.

Outcome: Students will develop an understanding of the course of human biological history from the perspective of the pertinent fossils record as well as a mastery of the biological principles and scientific methodology that apply to assessing that history.

**Components:** Lecture  
**Attributes:** Forensic Science, Neuroscience  
**Requirement Group:** Prerequisite: ANTH 101 or ANTH 103  
**Req. Designation:** Undergraduate Research and Writing Intensive  
**Room Requirements:** General Classroom(1)

ANTH 325(3)  
**Primatology-Behavior & Ecology**  
This course focuses on the interrelationship of the behavior and ecology of our closest living relatives, the primates (apes, monkeys, and prosimians).

Outcome: Students will be able to demonstrate an understanding of how ecological and reproductive factors influence primate behavior, and how this information relates to primate conservation strategies and to an increased understanding of human behavior and evolution.

**Components:** Lecture  
**Course Equivalents:** BIOL 325  
**Attributes:** Environmental Studies, Neuroscience  
**Req. Designation:** Undergraduate Research and Writing Intensive  
**Room Requirements:** General Classroom(1)

ANTH 326(4)  
**Human Osteology**  
Prerequisite: ANTH 101, or ANTH 103, or background in biology.

This course (and lab) focuses on the human skeletal system, providing a hands-on opportunity to explore anatomy and physiology, growth and development, and techniques used by biological and forensic anthropologists to evaluate individuals and populations.

Outcome: Students will be able to demonstrate superior knowledge of skeletal anatomy, analyses of skeletal remains from archaeological contexts, and apply current techniques designed to determine human variation, stature, ancestry, age-at-death, sex, and pathological conditions.

**Components:** Laboratory, Lecture  
**Course Equivalents:** BIOL 326  
**Attributes:** Forensic Science  
**Req. Designation:** Undergraduate Research and Writing Intensive  
**Room Requirements:** Lab - Archeology(1)

ANTH 327(3)  
**Dental Anthropology**  
This course will examine teeth, and is divided into two sections. Section one will provide a foundation to dental studies within an anthropological and biomedical context through the study of dental anatomy, morphology, and variation. Section two will examine the genetic and biological underpinnings of dental development and eruption.

Prerequisites: ANTH 101 or BIOL 101  

Outcomes: Gaining factual knowledge (terminology, classifications, methods, trends); learning to apply course material (to improve thinking, problem solving, and decisions); developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ANTH 101 or BIOL 101  
**Req. Designation:** Undergraduate Research and Writing Intensive  
**Room Requirements:** Electronic Classroom(1)

Language, Race, and Inequality  
This course addresses how and why languages and speakers are associated with racialized stereotypes, and how linguistic discrimination operates in U.S. culture today. In-depth case studies examine language and race in education, mass media, material culture, and everyday interaction. Critical perspectives on sociolinguistic norms and relationships between language, Whiteness, and power are also included.  
Prerequisite: ANTH 100 or ANTH 102, or Instructor permission  
Students will identify relationships between language and race in everyday life, recognize and analyze instances of linguistic discrimination, stereotypes, and covert racism. Critical thinking and writing are emphasized.  
**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ANTH 100 or ANTH 102

Ice Age America
This course surveys archaeological and paleoenvironmental evidence from the Late Pleistocene in North and South America with emphasis on the initial processes of human colonization/adaptation to the New World.
Outcomes: Students will demonstrate an understanding of the current debates and methods of critical assessment in evidence from environmental changes; megafaunal extinctions; and human biological, archaeological, and linguistic data.
Components: Lecture(In person)
Req. Designation: Undergraduate Research and Writing Intensive

ANTH 342(3)  Course ID:001140  06-JUN-2018  
Rise & Fall of Civilizations
Prerequisite: ANTH 101 or ANTH 104.
This course examines the socio-cultural process that produced complex societies in the past, particularly the contrasting trajectories of Old World and New World civilizations. Emphasis is on the material manifestations of status differences, power relations, and ideological control.
Outcome: Students will appreciate the complicated dynamics that underwrite increasing socio-cultural differentiation and will understand the archaeological methods used to chart that differentiation through time.
Components: Lecture
Requirement Group: Prerequisite: ANTH 101 or ANTH 104
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom(1)

Anthropology of Museums
This course explores the museum as a dynamic site of cultural production and consumption, and an important sphere for anthropological study. It examines the historical and contemporary relationships between museums, anthropology, and material culture, with particular attention to the broader socio-cultural context of collecting from and representing cultures.
Prerequisites: ANTH 100 or ANTH 102
Outcomes: Students will gain knowledge of museums as sites of anthropological study and practice, with specific attention to an understanding of the formation and use of anthropological collections, and cultural representations. Students will visit, discuss, and critique exhibitions in Chicago-based museums.
Components: Lecture(In person)
Requirement Group: Prerequisite: ANTH 100 or ANTH 102

### The Crafts of China

This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.

**Outcome:** Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture.

### BIOL 202(3)
**Course ID:** 013229  
**06-JUN-2018**

**Course Title:** Introduction to Neuroscience  
**Prerequisites:** PSYC 101 or BIOL 101; Biology Majors: BIOL 102 & 112.

This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), physiology, neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas; laying a foundation for advanced coursework in neuroscience. BIOL 202 is cross-listed with PSYC 202.

**Outcomes:** Knowledge of the organization of the nervous system, cellular events that underlie emotions, learning, and behavior, and awareness of classical and modern methods for advancing the field.

**Components:** Lecture (In person)

**Required Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1)

### BIOL 205(4)
**Course ID:** 001295  
**06-JUN-2018**

**Course Title:** Plant Biology Lect/Lab  
**Prerequisites:** BIOL 102, 112.

Lecture and laboratory. Survey of the principles of botany including development and reproduction, structure, phylogeny and metabolism.

**Outcome:** Students will understand the basic morphology of plants; utilize morphology in the identification of local plants; understand the anatomy of plants; understand the relationship between anatomy and basic physiology; recognize that differences in physiological function allow different plants to be found in specific environments; appreciate the diversity of organisms called “plants.”

**Components:** Laboratory, Lecture

**Required Designation:** Pre-requisite: BIOL 102 and 112.

**Room Requirements:** General Classroom(1)

### BIOL 210(2)
**Course ID:** 009680  
**06-JUN-2018**

**Course Title:** Laboratory Techniques  
**Prerequisites:** BIOL 102 and 112.

Lab sessions designed to prove a firm foundation in basic techniques and procedures, use of equipment and apparatus; keeping a lab notebook and in data collection and treatment.

**Outcome:** Students will acquire basic skills needed to work in a research laboratory.

**Components:** Laboratory (In person)

**Required Designation:** Pre-requisite: BIOL 102 and 112.

**Room Requirements:** Lab - Biology(1)

### BIOL 215(3)
**Course ID:** 009806  
**06-JUN-2018**

**Course Title:** Ornithology  

An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.

**Outcome:** Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area.

**Components:** Lecture (In person)

**Required Designation:** Pre-requisites: BIOL 102 and 112.

**Room Requirements:** Lab - Biology(1)
**College of Arts and Sciences - Biology - Subject: Biology**

**BIOL 242(4)**

**Course ID:** 010724  
**06-JUN-2018**

**Human Structure and Function I**

**Prerequisite:** BIOL 102, 112; CHEM 102, 112 or 106.

Lecture, laboratory, and demonstrations. Organization of the human body from the cellular to the organismal level. Anatomy of body systems and their physiology related to 1) support and movement (integumentary, skeletal and muscular systems) and integration and control (nervous and endocrine systems). Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111,112 and CHEM 101, 102, 111, 112.

Outcomes: Students will be able to demonstrate knowledge of human anatomy at the microscopic and gross levels. They will be able to correlate structure and function and will have a firm understanding of the organizing principle of human physiology, homeostasis and explain the role of the nervous and endocrine components.

**Components:** Laboratory (In person), Lecture

**Requirement Group:** Prerequisite: BIOL 102, 112; CHEM 102, 112 or CHEM 106.

**Req. Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1)

**BIOL 243(4)**

**Course ID:** 010725  
**06-JUN-2018**

**Human Structure and Function II**

**Pre-requisite:** BIOL 242.

Lecture, laboratory and demonstrations. A continuation of BIOL 242. Anatomy of body systems and their physiology related to 1) regulation and maintenance (cardiovascular, lymphatic respiratory, digestive and urinary systems) and reproduction and development (male and female reproductive systems.) Dissection of representative organs is required. Prerequisites are BIOL 101, 102, 111,112, BIOL 242 and CHEM 101, 102, 111, 112.

Outcomes: Students will be able to demonstrate a comprehensive integrated knowledge and understanding of human anatomy and physiology at all levels.

**Components:** Laboratory (In person), Lecture

**Requirement Group:** Pre-requisite: BIOL 242.

**Req. Designation:** Fieldwork

**Room Requirements:** Lab - Biology(1), Electronic Classroom(1)

**BIOL 251(3)**

**Course ID:** 001307  
**06-JUN-2018**

**Cell Biology**

**Prerequisites:** BIOL 102, 112 and CHEM 102 or 106.

This course covers basic molecular and cellular studies of living organisms, emphasizing the relationships between subcellular structures and biochemical and physiological functions of cells.

Outcome: Students will become familiar with a wide range of cell biological principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern cell biology research.

**Components:** Discussion (In person), Lecture

**Requirement Group:** Pre-requisites: BIOL 102, 112; CHEM 102 or 106.

**Req. Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1), Auditorium(1)

**BIOL 252(1)**

**Course ID:** 001308  
**06-JUN-2018**

**Cell Biology Laboratory**

**Prerequisite or corequisite:** BIOL 251.

Laboratory experiences designed to explore relationships between structure and function of subcellular components.

Outcome: Working knowledge of a variety of techniques utilized in the cell biology laboratory.

**Components:** Laboratory

**Requirement Group:** Pre-requisite or Co-requisite: BIOL 251.

**Req. Designation:** Fieldwork

**Room Requirements:** Lab - Biology(1)
College of Arts and Sciences - Biology - Subject: Biology

BIOL 265(3)  Course ID:001309  06-JUN-2018
Ecology
Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Restricted to Biology and Environmental Science/Studies students.

Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels.

Outcome: Students will understand the fundamental principles governing the interactions of organisms and their environment at the population, community, and ecosystem levels.

Components: Discussion(In person), Lecture(In person)
Attributes: Environmental Studies
Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106.
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1), Auditorium(1)

BIOL 266(1)  Course ID:001310  06-JUN-2018
Ecology Laboratory
Prerequisite or corequisite: BIOL 265.

Laboratory and field experience designed to illustrate the principles of ecology and to give students experience in collecting, processing, and analyzing data. Field trips required.

Outcome: Students will understand the methodology and use techniques in studying interactions of organisms to the environment and to each other at the organism, population, community, and ecosystem levels.

Components: Discussion, Laboratory
Attributes: Environmental Studies
Requirement Group: Pre-requisite or Co-requisite is BIOL 265.
Req. Designation: Fieldwork
Room Requirements: Lab - Biology(1)

BIOL 280(3)  Course ID:001311  06-JUN-2018
Evolution of Human Disease
Prerequisites: BIOL 102.

Introduces students to the complex interaction between human hosts and pathogens. Begins with an introduction to immunology and discussion and analysis of particular paradigms that strive to model host/pathogen interaction. Using the paradigms, paleopathological and paleodemographic information, students explore the patterns of human diseases throughout prehistory and history. Addresses the role of human biology, human culture, and changing environments.

Components: Lecture
Course Equivalents: ANTH 280
Attributes: Bioethics
Requirement Group: Prerequisite: Biology 102
Req. Designation: Fieldwork
Room Requirements: General Classroom(1)

BIOL 282(3)  Course ID:001312  06-JUN-2018
Genetics
Pre-requisites: BIOL 102, 112; CHEM 102 or 106.
Pre-requisites For Bioinformatics majors ONLY: BIOL 101; CHEM 102 or 106.

This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population and evolutionary genetics.

Outcome: Students will develop knowledge and awareness of the genetic bases of modern biology. They will understand Mendelian principles of inheritance, chromosome and DNA structure and replication, gene expression, molecular biology, genetic bases of development and other biological processes, and quantitative, population and evolutionary genetics.

Components: Discussion(In person), Lecture
Attributes: Bioinformatics, Forensic Science
Requirement Group: Pre-requisites: BIOL 102, 112; CHEM 102 or 106. Pre-requisites For Bioinformatics majors ONLY: BIOL 101
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1), General Classroom(1)
### BIOL 283(1)
#### Genetics Laboratory
- **Course ID:** 001313
- **Run Date:** 06-JUN-2018
- **Prerequisite or corequisite:** BIOL 282.

Experiments and demonstrations to illustrate chromosomal structures and transmission, molecular biology, gene linkage, gene frequencies and variation.

**Outcome:** Students will develop technical skills and ability to interpret data from a variety of types of genetics experiments.

**Components:** Laboratory

**Attributes:** Bioinformatics, Forensic Science

**Requirement Group:** Pre-requisite or Co-requisite: Biology 282.

**Req. Designation:** Fieldwork

**Room Requirements:** Lab - Biology(1)

### BIOL 296(1)
#### Introduction to Research
- **Course ID:** 011190
- **Run Date:** 06-JUN-2018
- **Instructor Consent Required**

Prerequisites: BIOL 102, 112; Permission of the instructor; Biology Core highly recommended.

Students will begin reading the literature in the field of their mentor, conduct experiments designed by the mentor, and give a presentation on their work or studies, in preparation for upper level undergraduate research.

**Learning Outcome:** Students will develop critical reading skills and become familiar with basic lab techniques in the area of their mentor.

**Components:** Lecture(Directed Research)

**Attributes:** Engaged Learning

**Requirement Group:** Pre-requisite: BIOL 102 and 112.

**Req. Designation:** Undergraduate Research

### BIOL 302(4)
#### General Microbiology Lec/Lab
- **Course ID:** 001319
- **Run Date:** 06-JUN-2018

Prerequisites: BIOL 251 and 282

Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.

**Outcome:** Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes.

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

### BIOL 303(1)
#### Seminar in Neuroscience
- **Course ID:** 007304
- **Run Date:** 06-JUN-2018

Prerequisites: BIOL 202 or PSYC 202

The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. BIOL 303 is cross-listed with NEUR 300.

**Outcome:** Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses.

**Components:** Seminar(In person)

**Course Equivalents:** NEUR 300

**Attributes:** Neuroscience

**Requirement Group:** Prerequisite PSYC 202 or BIOL 202

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Neuroscience(1)

### Models of Human Disease

This course explores approaches used to study human diseases from in vitro to in vivo levels and examines their strengths and weaknesses. Discussions will cover historical experiments and cutting-edge research to learn about the techniques used to generate data and how to interpret the results.

**Outcomes:** Students will gain knowledge about human diseases and techniques used to model aspects of those diseases in the laboratory.

**Components:** Lecture (In person)

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Room Requirements:** Electronic Classroom (1)

### General Virology

This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.

**Prerequisites:** BIOL 251 & BIOL 282

**Outcomes:** Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies.

**Components:** Lecture (In person)

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Room Requirements:** Electronic Classroom (1)

### Evolution

**Prerequisite:** BIOL 282; BIOL 265 recommended

This course focuses on analysis of processes and patterns of evolution. Topics include population genetic principles, fossil patterns and geologic ages, phylogenetic analysis of relationships of species, experimental approaches to evolutionary questions, and evolutionary perspectives on human biology and relationships.

**Outcome:** Students will develop knowledge and awareness of evolutionary processes and patterns, the evidence for them, and how evolutionary hypotheses are tested experimentally. They will develop an appreciation of the primary literature through reading and discussing research articles.

**Components:** Lecture (In person)

**Requirement Group:** Pre-requisite: BIOL 282.

**Room Requirements:** Electronic Classroom (1)

### Animal Behavior

**Prerequisites:** ANTH 101 or 103; or BIOL 102 & 112.

This course examines the biological basis of animal behavior including function and evolution of behavior patterns. Mechanisms and the adaptive significance of behaviors are examined and analyzed. BIOL 320 is cross-listed with ANTH 320.

**Outcome:** Students will have an understanding of both proximate and ultimate causes of a broad array of behaviors in animals and their implications for the life histories of those animals.

**Components:** Lecture

**Course Equivalents:** ANTH 320

**Attributes:** Environmental Studies, Neuroscience

**Requirement Group:** Pre-requisites: ANTH 101 or 103; or BIOL 102 & 112

**Room Requirements:** General Classroom (1)

### Comparative Anatomy Lec/Lab

**Prerequisites:** BIOL 251, 282

A study of homologous systems and vertebrate phylogeny in both lecture and lab.

**Outcome:** Students will understand the evolutionary relationships and processes that are involved in the development of vertebrate anatomy.

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

### BIOL 342(4) 06-JUN-2018  
**Human Anatomy**

**Prerequisites:** BIOL 242, 243, 251, 282; CHEM 222 or 224.

A mixed lecture and laboratory course providing an in-depth look at the human body at the level of gross anatomy.

**Outcome:** Students will acquire an advanced understanding of the structure and relationships of major organ systems in the human body.

**Components:** Laboratory (In person), Lecture (In person)

**Attributes:** Forensic Science

**Requirement Group:** Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology (1)

### BIOL 346(3) 06-JUN-2018  
**Biology of Women**

This course focuses on the anatomy and physiology of women at different and critical times in their life span. This course also addresses social issues that effect women at different points in their life. Topics include the evolution of sex, gender differentiation, and reproduction.

**Outcome:** Students will learn about the biology of the female system, and how it changes with age. Students will also learn through discussions and guest lectures the interplay between society, medicine and gender.

**Components:** Lecture (In person)

**Course Equivalents:** WOST 346, ANTH 346

**Attributes:** Women & Gender Studies

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom (1)

### BIOL 350(4) 06-JUN-2018  
**Vertebrate Physiology Lec/Lab**

**Prerequisites:** BIOL 242, 243, 251, BIOL 282, and CHEM 222 or 224.

Lecture and laboratory. Animal function and structure; emphasis on organ physiology. Feeding, digestion, water relations, respiration, hormone systems, receptor and effector mechanisms, central nervous coordination, regulation of homeostasis, dynamics of the circulatory system and the physiology of bone and musculature.

**Outcome:** Students will demonstrate detailed understanding of how organ function is regulated at cellular and systems level.

**Components:** Laboratory, Lecture

**Requirement Group:** Prerequisites: BIOL 242, 243, 251, 282; CHEM 222 or 224.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom (1)

### BIOL 351(3) 06-JUN-2018  
**Sleep/Circadian Rhythms**

We will cover circadian rhythms one very prominent circadian-regulated behavior: sleep. We will investigate these topics at several different levels, spanning from cellular and molecular mechanisms to systems and behavioral approaches, and finally will look at pathologies of these systems that lead to human disorders.

**Prerequisites:** BIOL 251, BIOL 282, PSYC/BIOI 202 (Introduction to Neuroscience, formerly Brain and Behavior)

**Outcomes:** Students will become familiar with a variety of model systems used to study circadian rhythms, and learn how to critically read primary literature and lead discussions of this reading.

**Components:** Lecture (In person)

**Attributes:** Neuroscience

**Requirement Group:** Prerequisites: BIOL 251, BIOL 282, PSYC/BIOI 202 (Intro to Neuroscience, formerly Brain and Behavior)

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom (1)

### BIOL 352(3) 06-JUN-2018  
**Mammalian Endocrinology**

**Prerequisite:** BIOL 242 and BIOL 243.

Survey of hormones that regulate metabolism, salt and water balance, calcium and phosphorus metabolism, and reproduction; special emphasis on hormonal transduction signals and integration of endocrine systems.

**Outcome:** Students will develop detailed understanding of how numerous aspects of metabolism are controlled at cellular and systems levels by hormone action.

**Components:** Lecture (In person)

**Requirement Group:** Pre-requisite: BIOL 242 & 243.
**BIOL 354(3)**  
**Course ID:** 001351  
**06-JUN-2018**

**Mammalian Reproduction**

Prerequisite: BIOL 251.

Anatomy and physiology of male and female reproductive systems, fertilization, implantation, pregnancy, and birth; immunological aspects of reproduction.

Outcome: Students will understand structure/function relationships in reproductive biology and how reproductive systems are regulated at cellular levels.

**Components:** Laboratory, Lecture

**Requirement Group:** Pre-requisite: BIOL 251.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)

---

**BIOL 355(4)**  
**Course ID:** 001352  
**06-JUN-2018**

**Parasitology Lec/Lab**

A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.

Outcome: Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation.

**Components:** Laboratory(In person), Lecture

**Requirement Group:** Pre-requisite: BIOL 251.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1), General Classroom(1)

---

**BIOL 357(3)**  
**Course ID:** 013219  
**06-JUN-2018**

**Neural Disease, Degeneration, and Regeneration**

This course offers an overview of cellular and molecular mechanisms underlying common neurodegenerative disorders. Mechanisms of neuronal cell death and application of stem cells in CNS regeneration will also be covered. Students will learn by reading assigned background materials and research articles, and participating in class discussions. Prerequisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior).

Outcomes: Students will understand current advances of genetic, developmental, molecular, and cellular mechanisms underlying the neurodegenerative diseases. Students will also learn how disease mechanisms affect neural function, cognition, and behavior.

**Components:** Lecture(In person)

**Attributes:** Neuroscience

**Requirement Group:** Pre-requisites: BIOL 251, BIOL 282, PSYC/BIOL 202 (Intro to Neuroscience, formerly Brain and Behavior).

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

**BIOL 358(3)**  
**Course ID:** 001355  
**06-JUN-2018**

**Developmental Neurobiology**

Prerequisites: BIOL 251, 282.

This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis.

Outcome: Students will become familiar with principles of neural development and the studies that led to those principles. Students will also learn how to critically read primary research papers and present these papers to the class.

**Components:** Discussion, Lecture

**Attributes:** Neuroscience

**Requirement Group:** Pre-requisites: BIOL 251 and BIOL 282.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)
### BIOL 360(3)
**Course ID:** 001357  
**Department:** Biology  
**Run Date:** 06-JUN-2018  
**Course Title:** Field Biology  
**Prerequisites:** BIOL 265 and permission of chair.  
**Outcome:** Students will become familiar with an ecosystem outside the Chicago Region; gain a first-hand understanding of the interrelationships of living things and their environment; develop a loving appreciation of "wilderness."  
**Components:** Lecture  
**Requirement Group:** Pre-requisite: BIOL 265  
**Room Requirements:** General Classroom(1)

### BIOL 362(3)
**Course ID:** 001358  
**Department:** Neurobiology  
**Run Date:** 06-JUN-2018  
**Course Title:** Neurobiology  
**Prerequisite:** PSYC/BIOL 202 and BIOL 251  
**Outcome:** Student will gain a solid foundation in nervous system structure and function.  
**Components:** Discussion(In person), Lecture(In person)  
**Attributes:** Neuroscience  
**Requirement Group:** Prerequisite: PSYC/BIOL 202 and BIOL 251  
**Room Requirements:** Electronic Classroom(1), Electronic Classroom(1)

**Course ID:** 001360  
**Department:** Entomology Lec/Lab  
**Run Date:** 06-JUN-2018  
**Course Title:** Entomology Lec/Lab  
**Prerequisite:** BIOL 265  
**Outcome:** Students will learn to identify major insect groups in the field and in the laboratory. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.  
**Components:** Laboratory, Lecture  
**Requirement Group:** Pre-requisite: BIOL 265  
**Room Requirements:** General Classroom(1)

### BIOL 366(3)
**Course ID:** 001364  
**Department:** Cell Physiol & Biochem  
**Run Date:** 01-JAN-2018  
**Course Title:** Cell Physiol & Biochem  
**Prerequisites:** BIOL 251 and CHEM 224  
**Outcome:** Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes. Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned.  
**Components:** Discussion, Lecture  
**Course Equivalents:** CHEM 361  
**Attributes:** Forensic Science  
**Requirement Group:** Pre-requisites: BIOL 251 & CHEM 224 or 222. Pre-requisites for Bioinformatics majors: CHEM 224 or 222.

Biological Neuroscience I

Prerequisites: BIOL/PSYC 240 or BIOL 284/PSYC 382 and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. BIOL 373 is cross-listed with NEUR 301 & PSYC 388.

Outcome: Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques.

Components: Laboratory

Course Equivalents: NEUR 301, PSYC 388

Requirement Group: Prerequisites: BIOL/PSYC 240 or BIOL 284/PSYC 382 and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

Req. Designation: Undergraduate Research

Room Requirements: Lab - Neuroscience(1)

Aquatic Insects Lecture & Laboratory

Prerequisite: BIOL 265.

This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.

Outcome: Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans.

Components: Laboratory(In person), Lecture(In person)

Requirement Group: Pre-requisite: BIOL 265

Req. Designation: Undergraduate Research

Room Requirements: Lab - Biology(1), Electronic Classroom(1)

Seminar in Molecular/Cellular Neuroscience

Prerequisites: BIOL 251, 282 and 362.

Lecture/discussions will focus on issues central to molecular/cellular neuroscience, emphasizing mechanisms of development, maturation, synaptic plasticity, regeneration, hormonal regulation and molecular underpinnings of normal and disease-affected circuitry. Professors will first discuss a range of questions being pursued in their general area of study, then present primary research papers, illustrating analytical skills that students will then employ in their own presentations. Presentations and exams will test students' general understanding of the topics that are covered.

Components: Lecture(In person)

Requirement Group: Prerequisite: BIOL 251, 282, 362

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)

Molecular Pathogenesis

Introduction to the molecular mechanisms of disease pathology and therapeutic and control strategies, using a particular disease as model.

Outcome: Students will be able to explain the molecular basis for particular disease symptoms, understand therapeutic strategies, and use experimental results to form conclusions about disease molecular mechanisms.

Components: Lecture(In person)

Requirement Group: Pre-requisites: BIOL 251 and BIOL 282.

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)
BIOL 380(3)  
Course ID: 009679  
06-JUN-2018  
Instructor Consent Required

Genetics and Evolution of Development

This course explores the evolution of the embryo and the patterns of gene regulation and morphogenesis that drive early development. Topics include evolution of nervous system patterning, shared human, mouse and frog regulatory systems and evolution of human genetic syndromes.

Outcome: Students will master the stages and regulation of development in a number of organisms through use of primary literature. Evidence of their mastery will be seen through grant writing exercises, in class presentations and conventional exams.

Components: Lecture (In person)

Room Requirements: Electronic Classroom(1)

BIOL 382(3)  
Course ID: 001377  
06-JUN-2018

Molecular Genetics

Prerequisites: BIOL 251, 282 and CHEM 222 or 224.

This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.

Outcome: Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes.

Components: Lecture

Requirement Group: Pre-requisite: BIOL 251, 282; CHEM 222 or 224.

Room Requirements: Undergraduate Research

BIOL 383(3)  
Course ID: 001378  
06-JUN-2018

Population Genetics

Prerequisites: BIOL 282 and MATH 132 or 162. BIOL 235 is recommended.

Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations.

Outcome: Students develop knowledge and awareness of population genetic theory and information. They learn how to apply basic tools of population genetic analysis.

Components: Lecture

Requirement Group: Prerequisite: BIOL 282 and MATH 132 or 162. BIOL 265 recommended.

Room Requirements: Undergraduate Research

BIOL 385(4)  
Course ID: 001380  
06-JUN-2018  
Instructor Consent Required

Prin Electron Microscopy Lec/Lab

Prerequisites: Permission of instructor, BIOL 341 recommended.

This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques.

Outcome: Student will become adept with the various techniques needed to produce research quality electron micrographs. Students will also learn how to correctly interpret their results, and properly present their data.

Components: Lecture (In person)

Room Requirements: Lab - Biology(1)

BIOL 387(3)  
Course ID: 009414  
06-JUN-2018

Genomics

Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce the students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution.

Outcome: Students will acquire an in-depth knowledge of the nature of gene and genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge. Students will be able to create meaningful web-based database search strategies and interpret the significance of results.

Components: Discussion (In person), Lecture (In person)

Attributes: Bioinformatics

Room Requirements: Electronic Classroom(1), Electronic Classroom(1)
BIOL 388(3)  Course ID:001383  06-JUN-2018
Bioinformatics
Students will engage in the applications of computer-based tools and database searching to better understand DNA and protein structure, function, and evolution.
Outcome: Students will be able to apply their understanding of genetic and evolutionary processes to the appropriate use of computer software and manipulation of large databases to accurately predict structural, informational, functional, and evolutionary characteristics of DNA and protein sequences.
Components: Discussion(In person), Lecture(In person)
Course Equivalents: COMP 381
Attributes: Bioinformatics
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1), Electronic Classroom(1)

BIOL 389(3)  Course ID:001384  06-JUN-2018
Introduction to Pharmacology
Prerequisite: BIOL 243, 251, 282; CHEM 224 or 222.
Principles and mechanisms of drug action. Topics discussed include drug-receptor interaction, pharmacokinetics, drug distribution, metabolism, and neuro-transmission, blood-brain barrier, and toxicology.
Outcome: Students will be able to describe the cellular and molecular mechanisms of action for a variety of the most commonly used drugs in current medical use.
Components: Lecture
Requirement Group: Prerequisite: BIOL 243, 251, 282; CHEM 222 or 224
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

BIOL 390(4)  Course ID:001385  06-JUN-2018
Molecular Biology Laboratory
Prerequisites: BIOL 251, 282, 283 and CHEM 222 or 224
Prerequisites for Bioinformatics Majors: BIOL 282 & 283 and CHEM 222 or CHEM 224
This course is an intensive laboratory course in the basic principles and techniques of molecular biology, including bacterial cloning, polymerase chain reaction, restriction mapping, agarose gel electrophoresis, and DNA sequencing.
Outcome: Students will be able to demonstrate basic molecular biology skills including manipulation of bacterial cultures and DNA, plasmid minipreps, gel electrophoresis, cloning, polymerase chain reaction, and other molecular techniques that may be specific to their chosen independent projects.
Components: Laboratory(In person)
Attributes: Engaged Learning, Bioinformatics, Neuroscience
Requirement Group: Prerequisites: BIOL 251, 282, 283 and CHEM 222 or 224 Prerequisites for Bioinformatics Majors: BIOL 282 & 283
Req. Designation: Undergraduate Research
Room Requirements: Lab - Biology(1)

BIOL 391(5)  Course ID:009427  15-JUN-2017
Forensic Molecular Biology Lecture and Lab
Prerequisite: BIOL 282, 283 & FRSC-BS Major.
This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.
Outcome: Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses, and will be able to isolate and process DNA for STR scoring.
Components: Laboratory(In person)
Course Equivalents: FRSC 371
Attributes: Forensic Science
Req. Designation: Undergraduate Research
Room Requirements: Lab - Biology(1)
### BIOL 392(3)
**Course ID:** 013055  
**Date:** 06-JUN-2018  
**Instructor Consent Required**

**Metagenomics**
Exploration of next-generation sequencing technologies for assessing microbial diversity in ecological niches. Prerequisite: BIOL 282

**Outcomes:** Students will gain hands-on experience with metagenomic methodologies while working in an interdisciplinary, collaborative setting.

**Components:** Lecture (In person)

**Attributes:** Engaged Learning, Bioinformatics

**Requirement Group:** Pre-requisite: Biol 282.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Computer (1)

---

### BIOL 395(3)
**Course ID:** 001387  
**Date:** 06-JUN-2018

**Special Topics in Biology**
Special areas of study outside the usual curriculum, that vary each time the course is offered.

**Outcomes:** Students will master a unique topic in biology.

**Components:** Laboratory (In person), Lecture (In person)

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology (1), Electronic Classroom (1)

---

### BIOL 395L(1 - 4)
**Course ID:** 001388  
**Date:** 06-JUN-2018  
**Instructor Consent Required**

**Special Topics Laboratory**

**Components:** Laboratory

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Biology (1)

---

### BIOL 396(3)
**Course ID:** 009787  
**Date:** 06-JUN-2018  
**Department Consent Required**

**Research**
Prerequisite: BIOL 296 (min. 1 credit), Permission of Instructor; Contract Required.

Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.

**Outcomes:** Students will learn the full set of research skills required in doing an independent project and reporting the results.

**Components:** Lecture

**Attributes:** Engaged Learning, Neuroscience

**Requirement Group:** Prerequisite: Minimum grade of "C-" in BIOL 296.

**Req. Designation:** Undergraduate Research

---

### BIOL 397H(3)
**Course ID:** 001390  
**Date:** 06-JUN-2018  
**Department Consent Required**

**Senior Honors Thesis**
Prerequisite: BIOL 296.

For students in the Honors Program. Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques. Written thesis and research presentation required.

**Outcomes:** Students will learn the full set of research skills required in doing an independent project and reporting the results.

**Components:** Supervision

**Attributes:** Engaged Learning, Neuroscience

**Requirement Group:** Prerequisite: Minimum grade of "C-" in BIOL 296. Restricted to students in the Honors Program.

**Req. Designation:** Honors/Undergraduate Research

---

### BIOL 398(1 - 3)
**Course ID:** 001391  
**Date:** 06-JUN-2018  
**Department Consent Required**

**Internship in Biology**
Prerequisites: Permission of Instructor; Contract required.

A supervised field placement intended to give students training or work experience in aspects of biology that cannot be obtained on campus.

**Outcomes:** Students will acquire practical experience in biology-related job settings.

**Components:** Supervision (Directed Research)

**Attributes:** Engaged Learning

**Req. Designation:** Internship

CHEM 101(3)  Course ID:001578  06-JUN-2018
General Chemistry A Lecture/Discussion
Prerequisite: MATH 117 or equivalent. A year of high school chemistry is recommended.
Co-requisite: CHEM 111 and MATH 118.

This non-majors course deals with the development of basic chemical principles. Multiple perspectives of matter will be used to describe and explain characteristics, properties, and relationships across the following topics: atomic structure, nuclear chemistry, periodicity, molecular structure, chemical bonding, chemical reactions, thermochemistry, aqueous solutions, gases

Outcome: Students will learn the foundational concepts of chemistry in these topic areas and develop skills

Components: Discussion, Lecture
Attributes: Bioinformatics, Forensic Science
Requirement Group: Prerequisite: Math Placement Test or Math 117
Req. Designation: Internship
Room Requirements: General Classroom(1)

CHEM 102(3)  Course ID:001581  06-JUN-2018
General Chemistry B Lecture/Discussion
Prerequisites: CHEM 101 or CHEM105; MATH 118 or equivalent.

This non-majors course further develops principles from CHEM 101 & requires in-depth integration of concepts. Multiple perspectives of matter will be used to describe/explain characteristics, properties, & relationships across the following topics: liquids & solids, solutions, reaction kinetics, equilibria, acids & bases, reaction thermodynamics, electrochemical reactions.

Outcomes: Students will deepen their understanding of foundational concepts of chemistry and advance their skills in scientific problem solving, critical thinking and synthesis of concepts.

Components: Discussion, Lecture(In person)
Attributes: Bioinformatics, Forensic Science
Requirement Group: Prerequisite: Chem 101 or 105 and Math 118 or equivalent
Req. Designation: Internship
Room Requirements: Auditorium(1)

CHEM 102D(0)  Course ID:001582  06-JUN-2018
General Chemistry B Discussion

Req. Designation: Internship
Room Requirements: General Classroom(1)

CHEM 105(4)  Course ID:001583  06-JUN-2018
Chemical Principles
Prerequisite: Math Placement Test or Math 117

Lecture, discussion and laboratory course for majors covering stoichiometry, reactions in aqueous solution, states of matter, electronic structure, thermodynamics, chemical bonding, molecular geometry and intermolecular forces. Emphasis given to writing electron configurations and Lewis diagrams, predicting molecular geometry and properties, mass/mole conversions and solving thermodynamic and gas law problems.

Outcome: Students will learn basic chemical principles in these areas.

Components: Discussion, Laboratory, Lecture
Requirement Group: Prerequisite: Math Placement Test or Math 117
Req. Designation: Internship
Room Requirements: General Classroom(1)

CHEM 106(4)  Course ID:001586  06-JUN-2018
Basic Inorganic Chemistry
Prerequisite: CHEM 105 and MATH 118 or equivalent. Chemistry & Biochemistry majors only.

Lecture, discussion and laboratory course for majors that is a continuation of 105 with particular emphasis on acid/base chemistry and other ionic equilibria, gas phase equilibria, electrochemistry, transition metal chemistry, and chemical thermodynamics.

Outcome: Students will learn basic chemical principles in these areas.

Components: Discussion, Laboratory, Lecture
Attributes: Bioinformatics, Forensic Science
Requirement Group: CHEM 105 and MATH 118 or equivalent. Chemistry & Biochemistry majors only.
Req. Designation: Internship
Room Requirements: General Classroom(1)
CHEM 111(1)  
**Course ID:** 001589  
**06-JUN-2018**  
**General Chemistry Lab A**  
Pre or co-requisite: CHEM 101.

Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.

Outcome: Students will be able to use equipment properly and demonstrate correct laboratory technique.

Components: Laboratory

Attributes: Bioinformatics, Forensic Science

Requirement Group: The pre or co-requisite for CHEM 111 is CHEM 101 and prerequisite: Math Placement Test or Math 117; or Pre-Prof Health Science.

Req. Designation: Internship

Room Requirements: Lab - Chemistry(1)

---

CHEM 112(1)  
**Course ID:** 001590  
**06-JUN-2018**  
**General Chemistry Lab B**  
Pre or co-requisite: CHEM 102. Prerequisite: CHEM 111.

The second semester of general chemistry laboratory exposes students to qualitative analysis and continues the process of experimenting and collecting data to test the validity of theories and models presented in lecture.

Outcome: Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements.

Components: Laboratory

Attributes: Bioinformatics, Forensic Science

Requirement Group: Pre or co-requisite: CHEM 102. Prerequisite: CHEM 111.

Req. Designation: Internship

Room Requirements: Lab - Chemistry(1)

---

CHEM 151(4)  
**Course ID:** 001591  
**15-JUN-2017**  
**Elem Physiological Chemistry A**  
Prerequisite: high school chemistry or permission of chairperson.

Lecture, quiz and laboratory course primarily for nursing students emphasizing basic chemical properties, electron configuration, states of matter, gas laws, stoichiometry and energetics of reactions, aqueous equilibria, use of radioisotopes in medicine, environmental considerations, and nomenclature and structure in organic chemistry.

Outcome: Students will learn basic chemical principles in these areas.

Components: Discussion, Laboratory, Lecture

Course Equivalents: GNUR 160

Req. Designation: Internship

Room Requirements: General Classroom(1)

---

CHEM 171(3)  
**Course ID:** 013250  
**06-JUN-2018**  
**General Chemistry for Engineering Science Majors**  
This course is designed to acquaint students in engineering science with fundamental concepts of chemistry as well as their applications in the field of engineering. Students will survey topics in atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry. A good background in high school chemistry is recommendation.

Pre-requisite MATH 118 or Math Placement Test; Co-requisite CHEM 173; Restricted to Engineering Science Students. A good background in high school chemistry is recommendation.

Outcomes: Students should demonstrate proficient understanding of fundamental concepts and skills of general

Components: Discussion(In person), Lecture(In person)

CHEM 173(1)  Course ID:013251  06-JUN-2018
General Chemistry Lab for Engineering Science Majors
This lab course is a companion course to CHEM 171 General Chemistry for Engineering Science and is designed to support the development of chemistry concepts within the following topics: atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry.
Prerequisite: MATH 118 or equivalent. Co-req: CHEM 173. Enrollment is restricted to declared ENGR majors. A good background in high school chemistry is recommendation.

Components:
- Laboratory(In person)

Requirement Group:
- Pre-requisite: MATH 118;
- Co-requisite: CHEM 171;
- Restricted to Engineering Science majors.

Room Requirements:
- Lab - Chemistry(1)

CHEM 212(3)  Course ID:011179  06-JUN-2018
Quantitative Analysis Lecture
Prerequisite: CHEM 106 or 102 and 112.
This lecture course provides an introduction to modern analytical quantitative chemistry. Topics include chemical equilibrium, statistical analysis of data as well as modern and classical methods of chemical analysis.

Components:
- Discussion(In person), Lecture(In person)
- Forensic Science

Requirement Group:
- Prerequisites: Chem 106 or Chem 102 & 112

Room Requirements:
- Laboratory(In person), Auditorium(1)

CHEM 214(1)  Course ID:011180  06-JUN-2018
Quantitative Analysis Laboratory
Prerequisite: CHEM 106 or 102 and 112. Pre or co-requisite: CHEM 212.
This laboratory course introduces students to classical and modern methods of chemical analysis and teaches wet chemical laboratory techniques.

Components:
- Laboratory(In person)
- Forensic Science

Requirement Group:
- Prerequisite: Chem 106 or 102 & 112. Pre or co-req: Chem 212

Room Requirements:
- Lab - Chemistry(1)

CHEM 221(4)  Course ID:001601  06-JUN-2018
Organic Chem I Lec/Disc
Prerequisites: CHEM 106. Chemistry and Biochemistry majors only.
A lecture, discussion and laboratory course for chemistry majors covering structure and bonding in organic molecules; nomenclature, chemical and physical properties and reactions of non-aromatic hydrocarbons, alkyl halides, alcohols, ethers; stereochemistry and conformational analysis; and spectroscopy.
Outcome: Students will understand the chemical behavior of organic molecules and the mechanisms of reactions.

Components:
- Discussion, Laboratory, Lecture
- Bioinformatics, Forensic Science

Requirement Group:
- Prerequisites: CHEM 106, restricted to Chemistry & Biochemistry majors.

Room Requirements:
- General Classroom(1)

CHEM 222(4)  Course ID:001604  06-JUN-2018
Organic Chem II Lec/Disc
Prerequisite: CHEM 221. Chemistry & Biochemistry majors only.
A lecture, discussion and laboratory course for chemistry majors continuing from 221 covering nomenclature, properties, reactions, syntheses, and spectroscopy of further classes of aliphatic and aromatic compounds, carbohydrates and other polyfunctional compounds.
Outcome: Students will be able to assign IUPAC names, spectroscopically identify, prepare, and propose reactions for these groups.

Components:
- Discussion, Laboratory, Lecture
- Bioinformatics, Forensic Science

Requirement Group:
- Prerequisites: CHEM 221. Chemistry & Biochemistry majors only.

Room Requirements:
- General Classroom(1)
Chemistry

CHEM 223(3) Course ID:001607 06-JUN-2018
Organic Chemistry A Lect & Disc
Prerequisites: CHEM 102 or 106.

Lecture and discussion course for non-chemistry majors surveying nomenclature, structures, properties, stereochemistry, reactions, mechanisms, and syntheses of aliphatic hydrocarbons, alkyl halides, alcohols, and ethers.

Outcome: Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data.

Components: Discussion, Lecture
Attributes: Bioinformatics, Forensic Science
Requirement Group: Prerequisite: CHEM 102 or 106
Req. Designation: Internship
Room Requirements: General Classroom(1)

CHEM 224(3) Course ID:001609 06-JUN-2018
Organic Chem B Lec/Disc
Prerequisite: CHEM 223 or 221

The second semester lecture and discussion course of a two semester sequence, a continuation of 223 for non-chemistry majors emphasizing the organic chemistry of conjugated systems, aromatic compounds, carbonyl compounds, amines, carboxylic acids and their derivatives, carbohydrates, lipids, and proteins.

Outcome: Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data.

Components: Discussion, Lecture
Attributes: Bioinformatics, Forensic Science
Requirement Group: Prerequisite: CHEM 223 or 221
Req. Designation: Internship
Room Requirements: General Classroom(1)

CHEM 225(1) Course ID:001611 06-JUN-2018
Organic Chemistry Lab A
Pre-requisites: CHEM 102 & 112; Or CHEM 106.
Co-Requisite: CHEM 223

A laboratory course for non-chemistry majors designed to reinforce lecture topics from 223 and to expose students to the safe handling of organic chemicals.

Outcome: Students will acquire basic laboratory techniques and practices for working with organic chemicals.

Components: Laboratory
Attributes: Forensic Science
Requirement Group: Pre-requisites: CHEM 102 AND 112; Or CHEM 106. Co-Requisite: CHEM 223
Req. Designation: Internship
Room Requirements: Lab - Chemistry(1)

CHEM 226(1) Course ID:001612 06-JUN-2018
Organic Chemistry Lab B
Co- or prerequisite: CHEM 224.

Prerequisite: CHEM 225.

A laboratory course for non-chemistry majors designed to reinforce lecture topics from 224 and to expose students to organic synthesis.

Outcome: Students will perform reactions to prepare known organic compounds and then isolate and characterize the reaction products.

Components: Laboratory
Attributes: Forensic Science
Requirement Group: Prerequisite: CHEM 225. Co- or Prerequisite: CHEM 224.
Req. Designation: Internship
Room Requirements: Lab - Chemistry(1)
### CHEM 300 (1 - 6)
**Course ID:** 001613  **06-JUN-2018**  **Instructor Consent Required**

**Undergraduate Research**
Prerequisites: prior consultation with the instructor and a completed agreement form. Agreement forms for this directed study course are obtained from the department office, and the completed form (signed by the student, instructor, and chairperson) must be deposited in the chemistry office before the student can register for the course.

This course gives undergraduate students an opportunity to participate in research in a selected area.

**Outcome:** Students will accomplish the research task defined in the contractual arrangement between the student and the instructor.

**Components:** Lecture  
**Attributes:** Engaged Learning  
**Req. Designation:** Undergraduate Research

### CHEM 301 (4)
**Course ID:** 001615  **06-JUN-2018**

**Physical Chemistry I**
Prerequisites: Chem 222 or 224; Phys 112 or 112K; Math 263 or the equivalent.

Lecture and discussion course covering principles and applications of thermodynamics and kinetic theory and emphasizing the laws of thermodynamics and statistical theory and their ramifications for equilibrium and non-equilibrium systems.

**Outcome:** Students will acquire fundamental knowledge of work, heat, their interconversions and the relationships between entropy, free energy and heat capacity.

**Components:** Discussion, Lecture  
**Requirement Group:** Prerequisite: Chem 222 or 224; Phys 112 or 112K; Math 263 or the equivalent; BA Chemistry, BS Chemistry, Forensic Science Majors  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

### CHEM 302 (3)
**Course ID:** 001617  **06-JUN-2018**

**Physical Chemistry II**
Lecture and discussion course covering principles of quantum mechanics with the applications to chemical properties and spectroscopy of atoms and molecules.

**Outcome:** Students will acquire fundamental knowledge of the physical laws that govern chemical processes, and learn how to apply these laws to predict the structure and properties of chemical systems.

**Components:** Discussion, Lecture  
**Requirement Group:** Prerequisite: Chem 222 or 224; Phys 112 or 112K; Math 263 or the equivalent; BA Chemistry, BS Chemistry, Forensic Science Majors  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

### CHEM 303 (1)
**Course ID:** 001619  **06-JUN-2018**

**Physical Chemistry Lab**
Pre or Co-requisite: CHEM 302.

This course covers principles and techniques of experimental physical chemistry including the practice of numerical data analysis, solid-state electronics, and vacuum technology along with their applications to magnetic resonance, high-resolution spectroscopy, and chemical thermodynamics.

**Outcome:** Students will acquire broad-based knowledge of laboratory skills central to experimental physical chemistry.

**Components:** Laboratory  
**Requirement Group:** Pre or Co-requisite: CHEM 302  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Lab - Chemistry(1)

### CHEM 306 (1)
**Course ID:** 011970  **01-JAN-2018**

**Physical Biochemistry Lab**
Pre-Req: CHEM 305

This laboratory course will introduce apparatus, and analysis used in experimental physical chemistry for biochemistry students.

**Outcome:** Students will acquire broad-based knowledge of laboratory skills central to biophysical chemistry.

**Components:** Laboratory(In person)  
**Requirement Group:** Prerequisite: CHEM 305. Restricted to Biochemistry Majors.  
**Req. Designation:** Undergraduate Research  
**Room Requirements:** Lab - Chemistry(1)
### CHEM 323(3) Medicinal Chemistry

**Course ID:** 012591  
**Run Date:** 06-JUN-2018

**Prerequisites:** CHEM 222 or 224

This course examines how medicinal chemists design and synthesize drug candidates to meet FDA requirements of efficacy and safety, and how a testing strategy measures efficacy vs. toxicity comprising the therapeutic index. Topics include drug-receptor/enzyme binding, PK, ADME, patenting of IP, and the ethical aspects of pharmaceuticals.

**Outcomes:** Students will be able explain the strategy of drug candidate analog design, synthesis, binding and inhibition constants, drug testing strategies, pharmacokinetics, structure-activity relationships (SAR), and the therapeutic index of drugs.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite: CHEM 222 or 224

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

### CHEM 340(3) Advanced Inorganic Chemistry

**Course ID:** 001630  
**Run Date:** 06-JUN-2018

**Prerequisite:** CHEM 302.

Lecture course covering modern theories of atomic and molecular structure as applied to inorganic chemistry with discussion of acid-base theories, the chemistry, spectra and reaction mechanisms of coordination and organometallic compounds. Symmetry is used to develop molecular orbital diagrams, predict geometry, hybridization schemes and interpret electronic spectra.

**Outcome:** Students will learn chemical principles in these areas.

**Components:** Discussion (In person), Lecture (In person)

**Requirement Group:** Pre-requisite: CHEM 302.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1), General Classroom(1)

### CHEM 341(1) Advanced Inorganic Laboratory

**Course ID:** 001631  
**Run Date:** 06-JUN-2018

**Prerequisite or Co-requisite:** CHEM 340.

A laboratory course illustrating topics and techniques used in modern inorganic chemistry; coordination and organometallic compounds are prepared and characterized by IR, UV-Vis and NMR spectroscopy, and magnetic susceptibility measurements. All experimental work is recorded in a laboratory notebook and includes a formal written report.

**Outcome:** Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements.

**Components:** Laboratory

**Requirement Group:** Pre or Co-req Chem 340

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Chemistry(1)

### CHEM 361(3) Principles of Biochemistry

**Course ID:** 001633  
**Run Date:** 06-JUN-2018

**Prerequisites:** CHEM 222 or 224 and 226.

This course examines the structural' functional relationships in proteins, nucleic acids, carbohydrates and lipids as well as their metabolic pathways. CHEM 361 is cross-listed with BIOL 366.

**Outcome:** Students will be able to demonstrate an understanding of biological molecules and how they are metabolized.

**Components:** Discussion, Lecture

**Course Equivalents:** BIOL 366

**Attributes:** Bioinformatics

**Requirement Group:** Prerequisite: CHEM 222 or 224

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)
## Proteomics

### Components:
- Lecture (In person)

### Requirement Group:
- Prerequisite: CHEM 361 or 370

### Req. Designation:
- Undergraduate Research

### Room Requirements:
- General Classroom (1)

## Biochemistry Laboratory II

### Course ID: 011978
### 01-JAN-2018

**Biochemistry Laboratory II**

**Prerequisite:** CHEM 371

This laboratory course is designed to simulate a research project in which molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. The course theme involves an investigation of the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form.

### Components:
- Discussion (In person), Laboratory (In person)

### Requirement Group:
- Prerequisite: CHEM 372

### Req. Designation:
- Undergraduate Research

### Room Requirements:
- Electronic Classroom (1), Lab - Chemistry (1)
Special Topics in Biochemistry
1) Course content varies from semester to semester and includes advanced topics in biochemistry.
2) Satisfactory progress toward completion of the core chemistry courses, and junior or senior status.
3) Students will acquire an advanced understanding of a selected topic in biochemistry.

Components: Lecture (In person)
Requirement Group: Prerequisite - CHEM 222 or 224 Junior or Senior standing. Restricted to BIOCHEM and CHEM students
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

Medicinal Chemistry
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.

Outcomes:
1. Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window.
2. Summarize interactions of drugs with receptors, enzymes, or nucleotides.
3. Analyze structure-activity relationships given potency data.

Components: Lecture (In person)
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

**Art of Ancient Greece**

This course is an introduction to the art of the ancient Greek world from the Bronze Age through the Hellenistic period (to c. 50 B.C.E.), focusing on major trends and developments in Classical Greek architecture, sculpture, pottery and painting through close study of individual examples.

Outcome: Students should be able to recognize and interpret selected examples of ancient Greek art, including painting, sculpture, architecture, and other types; they should be able to apply their art-critical and appreciation skills to other types of art.

**Art of the Roman World**

This course is an introduction to the art of the Roman world from c. 3000 B.C.E. to c. the fifth century CE. It focuses on major trends and developments in Etruscan, Roman and later Greek art, including architecture, painting, mosaic, and sculpture through close study of individual examples.

Outcome: Students should be able to recognize and be able to interpret selected examples of ancient Roman art, including painting, mosaic, sculpture, architecture, and other types; they will be able to apply their art-critical and appreciation skills to other types of art.

**Classical Mythology**

Requirement: UCLR 100 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures.

This course focuses on Greek and Roman literature involving myth and how ancient and modern peoples use traditional narratives, characters, images and conceptions to explore, explain, and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts.

Outcome: Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual

No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of English, Department of Classical Studies, or Department of Modern Languages and Literatures.

This course centers upon the epics of the ancient Mediterranean world, their nature and significance, and, especially, the concepts of heroes and heroism.

Outcome: Students should be able to demonstrate knowledge of ancient epic as a literary genre, what heroes are and why they are featured in epics, and how epics began and evolved to reflect audiences and their social, cultural, political and other concerns, values (such as leadership) beliefs and practices.

College of Arts and Sciences - Classical Studies - Subject: Greek

GREK 101(3)  Course ID:009836  06-JUN-2018
Ancient Greek I
This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of ancient Greek, and simple readings in the language.
Outcome: students should be able to demonstrate basic knowledge of ancient Greek vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Greek sentences and passages into English.
Components:  Lecture(In person)
Req. Designation:  Internship
Room Requirements:  General Classroom(1)

GREK 102(3)  Course ID:009837  06-JUN-2018
Ancient Greek II
Prerequisite: GREK 101.
This course continues the study of the fundamentals of the ancient Greek language, including more vocabulary, grammar, syntax and more advanced readings. (Ancient Greek I or its equivalent is a prerequisite for this course.)
Outcome: students should be able to demonstrate more advanced knowledge of ancient Greek vocabulary, syntax and grammar, and deploy it to be able to translate accurately more advanced Greek sentences and passages into English.
Components:  Lecture(In person)
Req. Designation:  Internship
Room Requirements:  General Classroom(1)

GREK 303(3)  Course ID:003448  01-JAN-2018
Greek Composition
Prerequisite: two other GREK author courses.
This course involves practical exercises to develop correct and fluent expression in written ancient Greek prose.
Outcome: students should be able to write ancient Greek in various styles, demonstrating facility in deploying fluent knowledge of vocabulary, syntax and grammar in the writing of ancient Greek prose.
Components:  Supervision
Req. Designation:  Internship
Room Requirements:  Classroom Not Needed(1)
Latin I
This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of Latin, and simple readings in the language.

Outcome: students should be able to demonstrate basic knowledge of Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Latin sentences and passages into English.

Components: Lecture (In person)
Req. Designation: Internship
Room Requirements: General Classroom(1)

Latin II
Prerequisite: LATN 101.
This course continues the study of the fundamentals of the Latin language, including more vocabulary, grammar, syntax and more advanced readings. (Latin I or its equivalent is a prerequisite for this course.)

Outcome: students should be able to demonstrate advanced knowledge of basic Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately more advanced Latin sentences and passages into English.

Components: Lecture (In person)
Req. Designation: Internship
Room Requirements: General Classroom(1)

The Age of Caesar
Prerequisites: LATN 101 and 102 or their equivalents.
This course focuses on the literature and society of Rome at the time of Julius Caesar, in particular translation of selected readings from such authors as Lucretius, Catullus, Sallust, Caesar and Cicero.

Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Components: Lecture
Attributes: Rome Studies, Shakespeare Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)

The Age of Augustus
Prerequisites: LATN 101 and 102 or their equivalents.
This course focuses on the literature and society of Rome at the time of Augustus. Selected readings are from such authors as Vergil, Horace, Livy, Ovid, Tibullus and Propertius.

Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Components: Lecture
Attributes: Rome Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)

The Age of Nero
Prerequisites: LATN 101 and 102 or their equivalents.
This course focuses on the literature and society of Rome at the time of Nero. Selected readings are from such authors as Tacitus, Petronius, Seneca, and Lucan.

Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Components: Lecture
Attributes: Rome Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)
College of Arts and Sciences - Classical Studies - Subject: Latin

LATN 287(3)  Course ID:004337  06-JUN-2018

Age of Flavians
Prerequisites: LATN 101 and 102 or their equivalents.
This course focuses on the literature and society of Rome at the time of the emperors Vespasian, Titus and Domitian. Selected readings are from such authors as Tacitus, Suetonius, Martial and Juvenal.

Outcome: students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings.

Components: Lecture
Attributes: Rome Studies
Req. Designation: Internship
Room Requirements: General Classroom(1)
COMP 111(3)  Course ID:009860  15-JUN-2018
History of Computing
The social and organizational history of humanity is intricately entangled with the history of technology in general and the technology of information in particular. Advances in this area have often been closely involved in social and political transformations. While the contemporary period is often referred to by such names as the Computing and Information Age, this is the culmination of a series of historical transformations that have been centuries in the making. This course will provide a venue for students to learn about history through the evolution of number systems and arithmetic, calculating and computing machines, and advanced communication technology via the internet.

Components: Lecture(In person)
Course Equivalents: HIST 279C
Req. Designation: Internship
Room Requirements: Lab - Computer(1)

COMP 122(3)  Course ID:013170  06-JUN-2018
Introduction to Digital Music
Computers and digital tools have been seeping into the world of music, this course aims to explore this newly formed territory. This course is intended for students who wish to learn more about electronic music, signal processing, and algorithmic music composition.

Prerequisites: MATH 118 or equivalent (COMP 150 is preferred)

Outcomes: Understanding of the physics of musical sound and digital audio, facility with hands-on applications of algorithmic music composition and musicology, and ability to design and render digital instruments.

Components: Lecture(In person)
Course Equivalents: MUSC 122
Requirement Group: Prerequisite: Math Placement Test or Math 118
Req. Designation: Internship
Room Requirements: Lab - Computer(1)

COMP 125(3)  Course ID:002163  06-JUN-2018
Visual Information Processing
This course, intended primarily for non-majors, provides an introduction to computer programming using a language well-suited to beginning programmers and practical applications, e.g., Visual Basic.Net.

Outcome: Understanding of computer mechanisms for representing and analyzing numerical and logical information and the power of programmability; practical ability to implement useful computing tools.

Components: Laboratory(In person)
Attributes: Quantitative Knowledge
Req. Designation: Internship
Room Requirements: Lab - Computer(1)

COMP 150(3)  Course ID:002164  06-JUN-2018
Introduction to Computing
The world overflows with electronic data. This course introduces programming in a simple, powerful language like Python, with selection, repetition, functions, graphical effects, and dynamic interaction with the Internet, plus connections to lower level computer organization and computer implications in the wider world.

Outcome: Empowerment to manage and transform masses of data; understanding of technical, societal, and ethical issues involved.

Components: Lecture
Attributes: Quantitative Knowledge
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

COMP 163(3)  Course ID:009645  06-JUN-2018
Discrete Structures
This course covers the mathematical foundations of computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.

Outcome: The student will be prepared for the study of advanced ideas in computer science, from cryptography to databases to algorithms to computer architecture.

Components: Lecture
Attributes: Quantitative Knowledge, Bioinformatics
Req. Designation: Internship
COMP 170(3)  Course ID:002165  06-JUN-2018
Introduction to Object-Oriented Programming
Prerequisite: MATH118 or Placement or COMP125 or COMP150 or COMP163 or permission. Experience programming in a procedural or object-oriented language recommended. Students in the School of Continuing and Professional Studies may enroll with no further prerequisites.

This programming intensive course with its weekly lab component introduces basic concepts of object-oriented programming in a language such as Java.

Outcome: Ability to take a problem, break it into parts, specify algorithms, and express a solution in terms of variables, data types,

Components: Laboratory, Lecture
Attributes: Bioinformatics
Requirement Group: At least C- in MATH 118 or Math Placement or COMP 125 or COMP 150 or COMP 163 or Permission. Students

Req. Designation: Internship
Room Requirements: General Classroom(1)

COMP 180(3)  Course ID:013334  06-JUN-2018
Computing and Data Analysis for the Sciences
Scientific computing emphasizes data analysis and visualization in a scientific context - analyzing data quickly for understanding by the individual, sharing automated workflows with collaborators, and preparing results for later publication. This course will emphasize rapid, interactive, and reproducible collaborative analysis of data for scientific contribution.

Students are required to have taken MATH 117: College Algebra as a prerequisite or to have been placed in MATH 118: Precalculus or higher.

At the end of this course, students will be well versed in the use of a specific, interactive environment for data analysis (likely Python, R, or MATLAB as indicated in the course notes) for analyzing data and sharing

Components: Lecture(Blended)
Attributes: Neuroscience
Requirement Group: Prerequisite: MATH 117 (or any higher MATH course such as 118, 131, 132, 161, 162) with grade of at least C-

Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

COMP 250(3)  Course ID:009503  06-JUN-2018
Introduction to Scientific and Technical Communication
Prerequisite: A minimum grade of C- in COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215.

This course trains students in writing clear, readable, and well-organized technical communications, including presentations, end-user documentation, internal project documentation, and scientific papers.

Outcome: students will learn to write clear technical documentation.

Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

Req. Designation: Writing Intensive

COMP 251(3)  Course ID:002171  06-JUN-2018
Introduction to Database Systems
Prerequisites: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.

Outcomes: Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data.

Components: Lecture(In person)
Requirement Group: Prerequisite: COMP 125 or COMP 150 or COMP 170 or COMP/MATH 215

Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)
Introduction to Computer Systems
Prerequisites: COMP 170 or COMP 215
Co-requisites: COMP 163 or MATH 201 or declared Computer Science, Computer Crime & Forensices or Information Technology Minor.

This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.

Outcome: Understanding of system issues that affect the performance, correctness, or utility of user-level programs.

Components: Lecture
Requirement Group: Prerequisites: COMP 170 or COMP 215 Co-requisites: COMP 163 or MATH 201 or declared Computer Science, Computer Crime & Forensices or Information Technology Minor.
Req. Designation: Writing Intensive

Data Structures: Algorithms and Applications
Prerequisites: COMP 170 or COMP 215
Co-requisite: COMP 163 or MATH 201 or declared Computer Science Minor, Computer Crime and Forensics Minor, or Information Technology Minor.

This course introduces key data structures such as lists, sets, and maps, as well as their implementations. Performance and analysis of algorithms are covered along with applications in sorting and searching.

Outcome: Students will learn to design new data structures as well as learn to use existing data structures in applications.

Components: Laboratory, Lecture
Attributes: Bioinformatics
Requirement Group: Prerequisites for COMP 300: ( At least C- in COMP 251 or COMP 271) and (at least C- in STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)
Req. Designation: Writing Intensive
Room Requirements: General Classroom(1)

Database Administration
Prerequisites: Comp 251 or Comp 271

Business and scientific institutions increasingly use large commercial data base systems. This course teaches the theory and practice for the definition, security, backup, tuning, and recovery of these systems.

Outcome: Students will be able to use theory and pragmatic approaches to define and implement realistic solutions for large database administration environments.

Components: Lecture(In person)
Requirement Group: Prerequisite: Comp 251 or Comp 271
Req. Designation: Writing Intensive
Room Requirements: Lab - Computer(1)
COMP 310(3)  Course ID:002204  15-JUN-2018
Intro to Operating Systems
Prerequisite: COMP 271

This course introduces principles of operating systems and how they are designed. Various important parts of operating systems such as memory addressing, file structures, processes, and threads are covered.

Outcome: Students will learn the different parts of an operating system at a functional level and how they interact with each other.

Components:
- Lecture

Requirement Group: Prerequisite: COMP 271, at least a C-

Room Requirements: General Classroom(1)

COMP 312(3)  Course ID:010231  15-JUN-2018
Open Source Software Practicum
Prerequisite: Comp 251 or Comp 271

This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.

Outcome: Students will learn to implement projects involving Free and Open Source software and learn how to participate in open-source projects effectively.

Components:
- Lecture(In person)

Attributes: Engaged Learning

Requirement Group: Prerequisite: Comp 251 or Comp 271

Room Requirements: Electronic Classroom(1)

COMP 313(3)  Course ID:009966  06-JUN-2018
Intermediate Object-Oriented Development
Prerequisite: COMP 271.

Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects.

Outcome: A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java.

Components:
- Lecture(In person)

Requirement Group: Prerequisite: COMP 271, at least a C-

Room Requirements: Lab - Computer(1)

COMP 314(1)  Course ID:010224  06-JUN-2018
Problem Solving Strategies I
Co-requisite or Prerequisite: COMP 271

This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.

Outcome: Ability to work in small groups, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge.

Components:
- Seminar(In person)

Requirement Group: Co-requisite or prerequisite: Comp 271

Room Requirements: General Classroom(1)

COMP 315(2)  Course ID:010232  06-JUN-2018
Problem Solving Strategies II
Prerequisite: Comp 314

This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.

Outcome: Ability to lead a small group, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge.

**COMP 317(3)**  
Social, Legal, and Ethical Issues in Computing  
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.

Outcome: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system.

Components:  
- Lecture (In person)  
Attributes: Sociolegal Studies  
Req. Designation: Undergraduate Research  
Room Requirements: General Classroom(1)

**COMP 320(3)**  
Software Systems Analysis  
Pre-requisite: COMP 163 and 170 or Instructor Approval.

Software systems analysis and design document user needs, create system architecture, and guide implementation. This course teaches the Unified Modeling Language (UML), and uses current software tools for analysis and design.

Outcome: Students will be able to use techniques of analysis and design, document results using UML, and understand how to communicate in team-oriented settings.

Components:  
- Lecture (In person)  
Req. Designation: Undergraduate Research  
Room Requirements: Lab - Computer(1)

**COMP 321(3)**  
Computational Aspects of Modeling and Simulation  
This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs.

Prerequisites: STAT 203 or STAT 335

Outcomes: Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable.

Components:  
- Lecture (In person)  
Course Equivalents: STAT 321  
Requirement Group: Prerequisite: STAT 203 or 335  
Req. Designation: Undergraduate Research  
Room Requirements: General Classroom(1)

**COMP 322(3)**  
Software Development for Wireless and Mobile Devices  
This course will focus on the unique challenges, methods, tools, and technologies for developing software applications for wireless and mobile devices, smart mobile phones, and the growing world of mobile connected devices.

Prerequisite: Comp 313 Intermediate Object Oriented Development

Outcomes:  
1. Understand challenges of software design for resource limited devices.  
2. Know the architecture for one or more state-of-the-art mobile operating systems

Components:  
- Lecture (In person)  
Req. Designation: Undergraduate Research  
Room Requirements: Electronic Classroom(1)

**COMP 323(3)**  
Game Design and Development  
This course studies design, development, and publication of games and game-based applications. This includes example games and designers, industry practices, and team-based project development.

Prerequisite: COMP 271

Outcomes: Students will acquire an awareness of different game design and development methods, technologies, and techniques suitable for the development of a variety of game based environments.

Components:  
- Lecture (In person)  
Requirement Group: Prerequisite: COMP 271, at least a C-
COMP 324(3)  Course ID:013155  06-JUN-2018
Client-Side Web Development
This course covers the design and implementation of the presentation layer of dynamic web applications. Topics include visual design and usability, multi-channel and multi-modal applications, markup of static and dynamic content, and client-side executable content. HTML/CSS/JavaScript are introduced quickly, followed up with the stack of current JavaScript frameworks and libraries used in practice.
Prerequisite: COMP 271 or Instructor permission
Outcomes: Familiarity with the most common effective tools for creating responsive, dynamic, and interactive web content with client-side tools.
Components: Lecture(Blended)
Requirement Group: Prerequisite: COMP 271, at least a C-
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

COMP 325(3)  Course ID:013459  15-JUN-2017
Rapid Application Development Methodology
1: This course will teach students how to effect rapid application development using a software framework such as the .NET Framework. Particular emphasis will be placed on enhancing object-oriented programming skills using a language such as C#.NET.
2: Pre-requisite  COMP 271 with a grade of C- or above .
3: Outcomes: Students will gain enhanced skill in object-oriented programming and development of such applications as database applications, web applications, Microsoft .NET services, Silverlight applications, and WCF Services.
Components: Lecture(In person)
Requirement Group: Pre-requisite: COMP 271
Req. Designation: Undergraduate Research
Room Requirements: Lab - Computer(1)

COMP 329(3)  Course ID:013580  15-JUN-2018
Introduction to Natural Language Processing
This course provides an introduction to the field of natural language processing (NLP). NLP is concerned with computational approaches to analyzing, generating, and understanding human language. This course will introduce the students to the problems, methods, and applications of NLP.
Prerequisites - COMP 271 AND (MATH 131 OR MATH 161) AND (COMP 163 OR STAT 103)
Outcomes - Students will become familiar with such areas of natural language processing as information retrieval, sentiment analysis, machine translation, document classification, and question answering.
Components: Lecture(In person)
Requirement Group: At least C- in COMP 271 AND (MATH 131 OR MATH 161) AND (COMP 163 OR STAT 103)
Req. Designation: Undergraduate Research
Room Requirements: Lab - Computer(1)

COMP 330(3)  Course ID:002184  06-JUN-2018
Software Engineering
Prerequisite: COMP 271.
Students learn real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcome: Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others.
Components: Lecture
Requirement Group: Prerequisite: COMP 271, at least a C-

**COMP 331(3) Mathematical Foundations of Cryptography**

**Prerequisites:** Theoretical Foundations: MATH 201 or COMP 363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215.

This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.

**Outcome:** Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed.

**Components:** Lecture (In person)

**Course Equivalents:** MATH 331

**Requirement Group:** Prerequisite: Theoretical Foundations: MATH201 or COMP363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)

---

**COMP 333(3) Web Services Programming**

Web services are building blocks for enterprise applications that use open data exchange standards and transport protocols to exchange data with calling clients. This course studies the architectures, frameworks, and tools required to develop and compose web services and clients, as well as integrate service-oriented systems with legacy systems.

**Prerequisite:** COMP 313

**Outcomes:** An understanding of the design space of software architecture. Proficiency in designing, implementing, deploying and composing systems from web services.

**Components:** Lecture (In person)

**Requirement Group:** Pre-requisite: COMP 313.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

---

**COMP 335(3) Formal Methods in Software Engineering**

As embedded and networked systems are becoming ever more ubiquitous, we depend increasingly on the correctness of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.

**Prerequisite:** Comp 313

**Outcomes:** An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as UML and ESC.

**Components:** Lecture

**Requirement Group:** Pre-requisite: COMP 313.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)

---

**COMP 336(3) Markup Languages**

Pre-requisite: Comp 271

This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.

**Outcome:** After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite: COMP 271, at least a C-

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Computer(1)
Distributed Programming
Course ID: 009583 06-JUN-2018
This course covers topics in modern distributed systems. This course places special emphasis on scalability (performance), reliability/fault tolerance, and security.
Outcome: After taking this course, students should understand the essential ingredients of distributed systems and how to build distributed systems that are resilient to transient network failures and other potential anomalies.
Components:
- Lecture (In person)
Requirement Group: Prerequisite: COMP 313 or 363 or 374
Req. Designation: Undergraduate Research
Room Requirements: Lab - Computer(1)

Computer Forensics
Course ID: 010307 06-JUN-2018
The course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcome: The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols.
Components:
- Lecture (In person)
Requirement Group: Prerequisites: (COMP 150 or COMP 170 or COMP/MATH 215) and (COMP 264 or COMP 317 or COMP 343)
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

Intro to Computer Networks
Course ID: 002190 06-JUN-2018
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. Some Java programming is required.
Outcome: Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed.
Components:
- Lecture
Requirement Group: Prerequisite: Comp 264 or Comp 271
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

Internet of Things Device and Application Security
Course ID: 013433 06-JUN-2018
It introduces the Internet of Things (IoT) comprising embedded devices and cloud-based resources. The course studies concepts and techniques used in designing and implementing IoT systems providing valuable functionality to consumers and valuable data to organizations. The course discusses methods for addressing related safety, security, reliability, and privacy concerns.
Outcomes: Ability to design and implement secure software and establish safety, security, reliability, and privacy goals for embedded and IoT-based systems. Ability to visualize and analyze data from an IoT system.
Components:
- Lecture
Req. Designation: Undergraduate Research
Room Requirements: Lab - Computer(1)

Intro Telecommunications
Course ID: 002191 06-JUN-2018
This course introduces the fundamental concepts of telecommunication networks, including requirements of voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system.
Outcome: Students will understand how modern telephone systems work.
Components:
- Lecture
Requirement Group: Prerequisite: Comp 264 or Comp 271
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)
### COMP 347(3) Introntrusion Detection and Computer Security

_Course ID:_ 010233  
**Prerequisite:** COMP 150 or COMP 170

This course covers techniques and algorithms for detecting unusual usage patterns that typically signal a break-in, including techniques for detecting evasive or stealthy attacks. Also covered are differences in detecting local versus network intruders. Additional topics: computer viruses, computer security management, computer forensics.

**Outcomes:** Students will learn to configure ID systems (e.g., SNORT) and analyze their output. They will also understand both network-based and host-based monitoring techniques.

**Components:**
- Lecture (In person)
- Requirement Group: Prerequisite: COMP 150 or COMP 170
- Req. Designation: Undergraduate Research
- Room Requirements: Electronic Classroom(1)

### COMP 348(3) Network Security

_Course ID:_ 009857  
**Prerequisite:** COMP 264 or COMP 271 or COMP 347

This course continues some of the topics introduced in COMP 347. The course covers methods and tactics to keep network attackers at bay and teaches mechanisms to identify and potentially stop potential intruders. Analyses of specific attack mechanisms may be considered.

**Outcomes:** An understanding of how to secure networks using encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.

**Components:**
- Lecture (In person)
- Requirement Group: Prerequisite: COMP 264 or COMP 271 or COMP 347
- Req. Designation: Undergraduate Research
- Room Requirements: Lab - Computer(1)

### COMP 349(3) Wireless Networking and Security

_Course ID:_ 010234  
**Prerequisite:** Comp 264 or Comp 271

This course will explore the wireless standards, authentication issues, and common configuration models for commercial versus institutional installations and analyze the security concerns associated with this ad-hoc method of networking.

**Outcome:** Students will gain an understanding of wireless networking, protocols, and standards and security issues.

**Components:**
- Lecture (In person)
- Requirement Group: Prerequisite: Comp 264 or Comp 271
- Req. Designation: Undergraduate Research
- Room Requirements: Electronic Classroom(1)

### COMP 351(3) Network Management

_Course ID:_ 009423  
**Prerequisite:** Comp 264 or Comp 271

This course introduces the current state of the art in automated management of computer networks, including protocols such as SNMP and its attendant naming conventions, network management systems, and important issues in administrative network configuration.

**Outcome:** Students will become familiar with the SNMP protocol, with how large-scale Network Management Systems operate and are configured, and with advanced network configuration.

**Components:**
- Lecture (In person)
- Requirement Group: Prerequisite: Comp 264 or Comp 271
- Req. Designation: Undergraduate Research
- Room Requirements: Lab - Computer(1)

### COMP 352(3) Introduction to Computer Vulnerabilities

_Course ID:_ 013434  
**Prerequisites:** COMP 264 and COMP 347

This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.

**Outcomes:** Describe some recent computer software vulnerabilities at the machine-code level and how they can be leveraged into an attack.

Run a virus in a virtual-machine sandbox with appropriate monitoring.

**Components:**
- Lecture (In person)
COMP 353(3)  Database Programming
Prerequisite: COMP 251 or COMP 271

This course introduces relational and object databases to support database creation and application development. Use of commercial database products will give a practical orientation.

Outcome: Students will learn SQL, database design and application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation.

COMP 363(3)  Design and Analysis Computer Algorithms
Prerequisites: (Comp 163 or Math 201) and Comp 271 and (Math 131 or Math 161)

Theoretical design and analysis of computer algorithms may be supplemented by small amounts of programming.

Outcome: The ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes.

COMP 364(3)  High Performance Computing
Prerequisite: COMP 313, COMP 363 or COMP 374

This course covers parallel architectures and parallel models of computation. Algorithms for achieving high performance in various computational contexts are discussed. Models such as shared memory, message passing, and hybrid modes of computing are introduced.

Outcome: Students will learn how to engineer solutions to practical problems in multiprocessor architectures and using large physical memories.

COMP 366(3)  Microcomputer Des & Interfac
Prerequisite: COMP 271

This course covers computer architecture, CPU logic, data acquisition, signal conditioning, analog/digital conversion and computer interfacing.

Outcome: Students will gain a working knowledge of interfacing techniques and design, hands-on experience with professional interfacing hardware and software, and the ability to document and report experimental results.

## COMP 367(3)  
**Course ID:** 002200  
**15-JUN-2017**  
**Robotics Software Development**

This course is an introduction to robotics and robotic software development using humanoid robots. The course will use modern robot platforms and provide hands on experience with robotic sensor systems, motion and navigation, robot behavior planning and implementation.

**Prerequisites:** COMP 271. COMP 313 recommended.

**Outcomes:** Students will explore the history of robotics, overview the theory of autonomous robotic systems, and develop complete robot projects.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite: COMP 271, at least a C-

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

## COMP 369(3)  
**Course ID:** 013499  
**15-JUN-2017**  
**Physical Design and Fabrication**

This course explores the role of products in the economy and how things are made, including: product conceptualization and design, physical design vs. design of things that are not physical, rapid prototyping, 3D printing, 2D conceptualization and sketching, 3D modeling, and design reviews.

**Outcomes:** Students will be able to visualize ideas via sketching basic shapes, create 3D models using 3D modeling software, use a 3D Printer, and give constructive feedback in peer review sessions.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite: COMP 271, at least a C-

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom(1)

## COMP 370(3)  
**Course ID:** 009418  
**06-JUN-2018**  
**Software Quality and Testing**

Prerequisite: Comp 271.

The course teaches software testing and quality control concepts, principles, and techniques including black box and white box testing, coverage testing, test case development, and regression testing.

**Outcomes:** Students will learn how to prevent errors, how to get 'bugs' out of software, and be able to apply this knowledge in other courses and projects.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite: COMP 271, at least a C-

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Computer(1)

## COMP 371(3)  
**Course ID:** 002202  
**15-JUN-2018**  
**Programming Languages**

Prerequisite: Comp 313.

There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

**Outcomes:** An understanding of key principles and paradigms underlying the design and implementation of commonly used programming languages; exposure to formal mechanisms for describing language syntax and semantics; programming experience in several representative languages.

**Components:** Lecture

**Requirement Group:** Pre-requisite: COMP 313.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)

## COMP 373(3)  
**Course ID:** 002203  
**06-JUN-2018**  
**Objects, Frameworks, and Patterns**

Prerequisite: Comp 313.

Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.

**Outcomes:** Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development.

**Components:** Lecture

**Requirement Group:** Pre-requisite: COMP 313.

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom(1)
COMP 377(3)  Course ID:012849  06-JUN-2018

IT Project Management
Prerequisite: COMP 251 or COMP 271

This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure and responsibilities, a written interim report, and a final oral and written report.

Outcomes: Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects.

Components:
- Lecture(In person)

Requirement Group: Prerequisite: Comp 251 or Comp 271

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)

COMP 379(3)  Course ID:013158  06-JUN-2018

Machine Learning

Machine learning is the process of making predictions and decisions from data without being explicitly programmed. Topics include a variety of supervised learning methods. Ensemble approaches are used to combine independent models efficiently. Unsupervised and semi-supervised methods demonstrate the power of learning from data without an explicit training goal.

Prerequisite: COMP 271 and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

Outcomes: Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making.

Components:
- Lecture(Blended)

Requirement Group: C- in COMP 271 and (at least C- in MATH 131 or MATH 161) and (at least C- in STAT 103 or STAT 203 or ISSCM 241 or PSYC 304 or instructor permission)

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)

COMP 381(3)  Course ID:010122  06-JUN-2018

Bioinformatics

Students will engage in the applications of computer-based tools and database searching to better understand DNA and protein structure, function, and evolution.

Outcome: Students will be able to apply their understanding of genetic and evolutionary processes to the appropriate use of computer software and manipulation of large databases to accurately predict structural, informational, functional, and evolutionary characteristics of DNA and protein sequences

Components:
- Lecture(In person)

Course Equivalents: BIOL 388

Attributes: Bioinformatics

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)

COMP 383(4)  Course ID:009421  06-JUN-2018

Computational Biology

Prerequisites: COMP 271 and COMP 381 (Equivalencies: BIOI/BIOL 388)

This course presents an algorithmic focus to problems in computational biology. It is built on earlier courses on algorithms and bioinformatics. Problems and solutions covered in this course include gene hunting, sequence comparison, multiple alignment, gene prediction, trees and sequences, databases, and rapid sequence analysis.

Outcome: Students will learn, in detail, foundational methods and algorithms in bioinformatics.

Components:
- Lecture(In person)

Attributes: Bioinformatics

Requirement Group: Prerequisites: COMP 271 and COMP 381 (Equivalencies: BIOI/BIOL 388)

Req. Designation: Undergraduate Research

Room Requirements: Lab - Computer(1)
### COMP 388 (1 - 6) 
**Course ID:** 002210  
**06-JUN-2018**

**Topics in Computer Science**
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.

**Outcome:** Understanding of an emerging area of Computer Science.

**Components:** Lecture  
**Reg. Designation:** Undergraduate Research  
**Room Requirements:** General Classroom(1)

### COMP 390 (1 - 3)
**Course ID:** 002211  
**15-JUN-2018**

**Broaden Particip STEM (Computing, Math & Science)**
Students will learn about underrepresentation of various population groups in STEM fields (science, technology, engineering, mathematics), as well as some of the reasons and negative effects of this situation. They will learn about techniques and educational materials for ameliorating this situation and will engage in relevant service learning activities.

**Outcomes:** Students gain first-hand experience with broadening STEM participation and seeing how they can make a difference in the lives of other students and contribute to national needs.

**Components:** Lecture (In person)  
**Attributes:** Engaged Learning  
**Reg. Designation:** Service Learning  
**Room Requirements:** Electronic Classroom(1)

### COMP 391 (1 - 6)
**Course ID:** 002212  
**06-JUN-2018**

**Internship in CS**
Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Program Director, followed by final reports from the student and the employer.

**Outcome:** Application of classroom skills to real-world situations.

**Components:** Field Studies  
**Attributes:** Engaged Learning  
**Reg. Designation:** Internship

### COMP 392 (3)
**Course ID:** 013121  
**06-JUN-2018**

**Metagenomics**
Exploration of next-generation sequencing technologies for assessing microbial diversity in ecological niches.

**Prerequisite:** BIOL 282

**Outcomes:** Students will gain hands-on experience with metagenomic methodologies while working in an interdisciplinary, collaborative setting.

**Components:** Lecture (In person)  
**Course Equivalents:** BIOL 392  
**Attributes:** Engaged Learning, Bioinformatics  
**Reg. Designation:** Undergraduate Research  
**Room Requirements:** Lab - Computer(1)

### COMP 397 (1)
**Course ID:** 013044  
**06-JUN-2018**

**Research Methods in Computer Science**
Supplements CS Seminar by targeting students directly engaging in research and facilitating contributions in ongoing projects. Progress in outside projects tracked through milestones such as abstracts, small fellowship-style proposals, informal updates, and outcome-oriented goal setting. Emphasizes creating lasting impacts through establishing project continuity and presenting posters, papers, and slide shows.

**Outcomes:** Regular progress on research projects and final presentations of results for demonstration to department faculty and students, and potential use at professional conferences.

**Components:** Seminar (In person)  
**Reg. Designation:** Undergraduate Research  
**Room Requirements:** Electronic Classroom(1)

**Independent Study**

The student and a sponsoring faculty member will determine an advanced topic for the student to work on.

**Outcome:** Knowledge of an advanced topic.

**Components:** Independent Study

**Attributes:** Engaged Learning

**Req. Designation:** Undergraduate Research

### COMP 399 (1)

**Course ID:** 002214  
**Department Consent Required**  
**Course ID:** 002214  
**Department Consent Required**

**Computer Science Seminar**

The department seminar is designed to bring together students interested in understanding and engaging in extracurricular applications of computer science, with a focus on ongoing research. Speakers will include department faculty, research students, and invited outside speakers. Students will be asked to read relevant literature and participate in discussions.

**Outcome:** Students will be exposed to a wide range of topics in computer science, participate in discussions, and provide feedback to assess their general understanding of the presented material.

**Components:** Lecture (In person)

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom (1)

### COMP 400 (3)

**Data Mining**

This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.

**Pre-requisites:** COMP 251 or COMP 271

**Outcomes:** Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing.

**Components:** Lecture (Blended)

**Requirement Group:** Restricted to graduate students.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom (1)

### COMP 403 (3)

**Course ID:** 013528  
**Department Consent Required**  
**Course ID:** 013528  
**Department Consent Required**

**Operations Management**

Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support

**Pre-requisites:** COMP 150 or COMP 170

**Outcomes:** Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making.

**Components:** Lecture (Blended)

**Requirement Group:** Restricted to graduate students.

**Req. Designation:** Undergraduate Research

**Room Requirements:** Electronic Classroom (1)

### COMP 410 (3)

**Course ID:** 002217  
**Department Consent Required**  
**Course ID:** 002217

**Operating Systems**

The course introduces advanced operating system concepts including distributed, real-time and multi-threaded systems in addition to reviewing memory management, files, and processes.

**Prerequisites:** COMP 271 and COMP 264

**Outcome:** Students will learn important topics in advanced operating systems and be able to make presentations on the topics.

**Components:** Lecture

**Req. Designation:** Undergraduate Research

**Room Requirements:** General Classroom (1)
COMP 412(3)  Course ID:009707  06-JUN-2018
Open Source Computing
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Prerequisite COMP 271
Outcome: Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively.
Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 413(3)  Course ID:012365  06-JUN-2018
Intermediate Object-Oriented Development
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Prerequisite: COMP 271
Outcomes: Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development.
Components: Lecture(In person)
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

COMP 417(3)  Course ID:009708  06-JUN-2018
Social and Ethical Issues in Computing
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcome: Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system.
Components: Lecture(In person)
Requirement Group: Restricted to Graduate School students.
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 418(3)  Course ID:002220  06-JUN-2018
Combinatorial Mathematics
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Prerequisite MATH 313 or COMP 163
Outcome: Students will learn mathematical techniques in discrete mathematics and applied combinatorics.
Components: Lecture
Course Equivalents: MATH 418
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 422(3)  Course ID:009709  06-JUN-2018
Software Development for Wireless and Mobile Devices
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcome: Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming.
Components: Lecture(In person)
Requirement Group: Prerequisites: COMP 313 or 413
Req. Designation: Undergraduate Research

### COMP 441(3) Human-Computer Interaction

This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.

**Prerequisite:** COMP 271

**Outcome:** Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscious methods for improving systems and their interfaces.

**Components:**
- Lecture (In person)

**Room Requirements:** General Classroom(1)

### COMP 443(3) Computer Networks

This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.

**Prerequisite COMP 271 or COMP 264**

**Outcome:** Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed.

**Components:**
- Lecture

**Room Requirements:** General Classroom(1)

### COMP 446(3) Telecommunications

This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.

**Prerequisite COMP 271 or COMP 264**

**Outcome:** Students will learn how telephone and data networks work. They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system.

**Components:**
- Lecture (In person)

**Room Requirements:** General Classroom(1)

### COMP 447(3) Intrusion Detection and Computer Forensics

This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally, issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.

**Co-requisite or prerequisite COMP 271**

**Outcome:** Students will learn to configure ID systems (e.g., snort) and analyze their output. They will also understand both network-based and host-based monitoring techniques.

**Components:**
- Lecture (In person)

**Room Requirements:** General Classroom(1)

### COMP 448(3) Network Security

This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.

**Prerequisite: COMP 271 or COMP 447**

**Outcome:** Students will gain an understanding of how to secure computers and network environments.

**Components:**
- Lecture (In person)

**Room Requirements:** General Classroom(1)
COMP 449 (3)  Course ID: 009718  06-JUN-2018

Wireless Networking and Security
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.

Prerequisite: COMP 271

Outcome: Students will gain an understanding of wireless networking, protocols, and standards and security issues.

Components:
- Lecture (In person)

COMP 451 (3)  Course ID: 012364  15-JUN-2017

Network Management
Prerequisite: COMP 271

Outcomes: Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms.

Components:
- Lecture (In person)

Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom (1)

COMP 453 (3)  Course ID: 009719  06-JUN-2018

Database Programming
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.

Outcome: Students will learn application development using the latest software tools. Students will also learn techniques for web based data retrieval and manipulation.

Components:
- Lecture (In person)

Req. Designation: Undergraduate Research
Room Requirements: General Classroom (1)

COMP 460 (3)  Course ID: 002227  06-JUN-2018

Algorithms & Complexity
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.

Outcome: Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes.

Components:
- Lecture

Req. Designation: Undergraduate Research
Room Requirements: General Classroom (1)

COMP 462 (3)  Course ID: 002228  15-JUN-2017

Advanced Computer Architecture
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.

Outcome: Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems.

Components:
- Lecture

Req. Designation: Undergraduate Research
Room Requirements: General Classroom (1)
COMP 464(3) Course ID:002229 06-JUN-2018
High-Performance Computing
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcome: Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems.
Components: Lecture
Requirement Group: Prerequisites: COMP 313 or 413

COMP 472(3) Course ID:002232 15-JUN-2017
Compiler Construction
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcome: Students will learn the theory and practice of how to build a compiler.
Components: Lecture
Requirement Group: Prerequisites: COMP 313 or 413
Req. Designation: Undergraduate Research
Room Requirements: General Classroom(1)

COMP 473(3) Course ID:002233 06-JUN-2018
Advanced Object Oriented Programming
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcome: Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development.

**Seminar in Undergraduate Research Methods**

This seminar course offers undergraduate students the experiential opportunity to engage in research while building their foundation of research methods. Students may be part of the Loyola Undergraduate Research Opportunities Program (LUROP) through a funded fellowship, or students may be working independently with a faculty mentor (volunteering in a lab, working on a research team). All students must have a research project with a faculty mentor identified prior to enrolling in this course. As an experiential learning course, students will need to be engaging in research with a faculty mentor concurrently to taking this course. Students must work a minimum of 5 - 10 hours each week over the semester on their research projects (10 - 15 hours per week over the summer session). Students will reflect on research experience in the context of understanding research paradigms, application of research methodologies, understanding the implications of ethical research, and preparing to present research professionally. This course will provide students engaged

Intimate Partner Violence
This course will address the nature and scope of intimate partner violence, the factors that contribute to it as well as the theories that have been developed to explain it. Attention will be paid to society's responses to intimate partner violence.

Outcomes: Students will be able to describe the theory, extent, nature, and impact of intimate partner violence, and how the community and criminal justice system respond to this problem.
Components: Lecture
Course Equivalents: PAX 374, WOST 392
Attributes: Human Services, Peace Studies, Psychology of Crime and Justice, Women & Gender Studies
Req. Designation: Undergraduate Research and Writing Intensive

Child Sexual Exploitation
This course introduces students to the theoretical and empirical literatures relating to child abuse, child
sexual abuse, child sexual exploitation, and the commercial sexual exploitation of children. The course will
include a strong global component as well as an examination of efforts to prevent and intervene in this
social problem.

Outcomes: Students will be able to know the prevalence, correlates, consequences, and methods of prevention of child sexual exploitation, and the theoretical perspectives used to understand this phenomenon in a global context.
Components: Lecture
Attributes: Psychology of Crime and Justice
Req. Designation: Undergraduate Research and Writing Intensive
Room Requirements: General Classroom(1)

International Criminal Justice
This course is an introduction to the nature and scope of international and transnational crime, and the
emerging legal framework for its prevention and control. It includes the history of the internationalization
of crime control and measurement, and international trends in law enforcement, victim assistance, courts,
sentencing, and corrections.

Outcomes: Students will examine globalization of crime; learn about international crime statistics;
understand the prevalence of common crimes internationally; identify emerging crime threats; and understand international trends in criminal justice.
Components: Lecture(In person)
Attributes: Global & International Studies
Req. Designation: Undergraduate Research and Writing Intensive

Introduction to Forensic Science
This course provides an overview of the basic principles and uses of forensic science within the field of
criminal justice. The course is designed for criminal justice majors emphasizing the application of the forensic sciences in the criminal justice system.

Outcome: Students will be able to identify the uses and limitations of the existing forensic science
techniques used within the field of criminal justice.
Components: Lecture(In person)
Req. Designation: Undergraduate Research and Writing Intensive

Circle Court  
This course is a culmination of the student's study of crime and criminal justice issues. It consists of projects aimed at integrating theory, knowledge, and research in the context of a variety of contemporary criminal justice problems, issues, and policies.

Outcomes: Students will apply all that they have learned throughout their criminal justice courses and apply this knowledge to demonstrate a sophisticated understanding of criminal justice professions, practices, and policy.

Components: Lecture  
Required Designation: Internship  
Room Requirements: General Classroom(1)  

Advanced Topics in Corrections  
Prerequisites: Graduate students only

An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CRMJ 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.

Components: Seminar(In person)  
Requirement Group: Restricted to Graduate School students.  
Required Designation: Internship  
Room Requirements: Electronic Classroom(1)  

General Special Topics  
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.

Outcomes: To analyze and discuss topics in criminal justice.

Components: Seminar(In person)  
Required Designation: Internship  
Room Requirements: Electronic Classroom(1)  

International Criminal Justice  
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.

### CJC 417(3)  
**Course ID:** 012610  
**06-JUN-2018**  
**Forensic Science and the Criminal Justice System**  
Graduate Students Only.

This course introduces the basic principles and applications of the biological, chemical, physical, medical and behavioral sciences currently practiced and the limitations of the modern crime laboratory. The course then explores uses of forensic science and the applicability to the criminal justice system. Current issues, examples, and presentations are integrated into course material.

**Outcomes:** Understand the basic concepts, strengths, limitations and challenges of the forensic sciences discipline, the application of the forensic sciences to the management, operations, and policies of criminal justice system, from crime scene processing through adjudication.

**Components:** Seminar (in person)  
**Requirement Group:** Restricted to graduate students.  
**Req. Designation:** Internship  
**Room Requirements:** Electronic Classroom (1)

### CJC 499(1 - 6)  
**Course ID:** 002421  
**06-JUN-2018**  
**Independent Study**

Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic.

Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

**Components:** Independent Study  
**Requirement Group:** Restricted to Graduate School students.  
**Req. Designation:** Internship  
**Room Requirements:** Classroom Not Needed (1)

Introduction to Forensic Science  
Prerequisites: CJC 101; Forensic Science Majors Only.

This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.

Outcome: Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice.

Components:  
Lecture (In person)

Attributes: Forensic Science

Requirement Group: Prerequisite: CJC 101, Forensic Science Majors only

Req. Designation: Internship

Forensic Ethics and Professional Practice  
Prerequisite: FRSC 340; Forensic Science Majors only

This course develops a basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought and application of ethics to the field and professional practice of forensic science.

Outcome: Students will demonstrate an understanding and application of ethics in the forensic sciences. Students will be able to articulate the role and challenges of ethical issues facing forensic science today, the applicability of ethics in the profession and their individual careers.

Components:  
Lecture (In person)

Attributes: Forensic Science

Expert Witness Testimony and Court Room Demeanor  
Prerequisite: FRSC 341; Forensic Science Majors Only

The goal for this course is to give you the information necessary to be an effective and ethical witness. This should help throughout your career and help make testimony not so much something to be feared as something which represents the culmination of your work in a case.

Outcomes: Students should develop courtroom and expert witness testimony literacy, understanding of the dynamics during court and appreciate the impact to the judicial system.

Components:  
Lecture (In person)

Attributes: Forensic Science

Requirement Group: Prerequisite: FRSC 341 Forensic Science Majors Only

Req. Designation: Internship

Pattern Evidence I  
Prerequisites - FRSC 341; Forensic Science Majors only

This course introduces the basic principles and methods of forensic pattern evidence: latent fingerprints, firearms and tool marks, and question documents.

Outcome: Students will demonstrate an understanding of the three (3) forensic pattern evidence areas. Students will develop techniques, work on non-probative cases, and written formal reports of findings.

Components:  
Lecture (In person)

Attributes: Forensic Science

Requirement Group: Prerequisite: FRSC 341 Forensic Science Majors Only

Req. Designation: Internship

Room Requirements: Lab - Biology(1)
**College of Arts and Sciences - Criminal Justice & Criminology - Subject: Forensic Science**

**FRSC 350L(1) Course ID: 012382  15-JUN-2018**

**Pattern Evidence Lab I**
This course introduces the basic laboratory methods of forensic pattern evidence: latent prints, firearms and toolmarks, and questioned documents.

Pre/co-requisites - FRSC 350; Forensic Science Majors only.

Students will demonstrate a basic competency through development of various techniques. Students will work non-probative cases, along with written formal reports of their findings.

**Components:** Laboratory (In person)

**Attributes:** Forensic Science

**Requirement Group:** Prerequisite or Co-requisite: FRSC 350 Forensic Science Majors Only

**Req. Designation:** Internship

**Room Requirements:** Lab - Biology (1)

**FRSC 360(3) Course ID: 013395  15-JUN-2018**

**Forensic Drug Chemistry I**
This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed.

Prerequisites - CHEM 212, CHEM 214, CHEM 224, CHEM 226, FRSC 342; Co-requisites - FRSC 360L; Forensic Science Majors only - Chemistry option.

**Outcomes:** The techniques, skills, advances and limitations of the modern forensic laboratory discussed. The students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting.

**Components:** Lecture (In person)

**Attributes:** Forensic Science

**Requirement Group:** Pre-requisites: CHEM 212, CHEM 214, CHEM 224, CHEM 226, FRSC 342; Co-requisite FRSC 360L; Forensic Science Majors only

**FRSC 360L(2) Course ID: 013396  15-JUN-2018**

**Forensic Drug Chemistry Laboratory I**
This course provides both basic and advanced foundations to the principles of forensic drug analysis. The use of basic and advanced analytical techniques to gather data, interpret results and form conclusions are developed. Additionally, national forensic laboratory operational standards and requirements are incorporated.

**Outcomes:** The techniques, skills, advances and limitations of the modern forensic laboratory will be discussed. The students will be able to demonstrate basic/advanced concepts of forensic drug analysis,

**Components:** Laboratory (In person)

**Attributes:** Forensic Science

**Requirement Group:** Pre-requisites: CHEM 212, CHEM 214, CHEM 224, CHEM 226, and FRSC 342. Co-requisites: FRSC 360. Forensic Science Majors Only

Forensic Molecular Biology Lecture and Laboratory
This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.
Prerequisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, FRSC 370L; Forensic Science Majors only - Biology/DNA Option
Outcomes: Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses, and will be able to isolate and process DNA for STR scoring.
Components: Laboratory(In person), Lecture(In person)
Course Equivalents: BIOL 391
Attributes: Forensic Science
Requirement Group: Pre-requisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, FRSC 370L; Forensic Science Majors only - Biology/DNA Option

**Forensic Science Seminar**

A weekly seminar course with presentations, generally given by outside speakers, covering topics in chemistry usually not encountered in the classroom.

FRSC 342 Forensic Science Majors Only

Outcomes: Students will demonstrate their understanding by writing a one page summary of each presentation.

Components: Lecture(In person)

Attributes: Forensic Science

Requirement Group: Restricted to Forensic Science majors.

Req. Designation: Internship

Room Requirements: Electronic Classroom(1)

FRSC 394 (1 - 4)

**Forensic Science Research**

This course gives undergraduate students an opportunity to participate in research in a selected area.

FRSC 342 Forensic Science Majors Only

Prerequisites: Prior consultation with the instructor and a completed agreement form. Agreement forms for this directed study course are obtained from the program office, and the completed form (signed by the student, instructor, and program director) must be deposited in the program office before

Outcomes: Students will accomplish the research task defined in the contractual arrangement between the student and the instructor.

Components: Laboratory(In person)

Attributes: Engaged Learning, Forensic Science

Requirement Group: Restricted to Forensic Science majors.

**Special Topics in the Forensic Science**

Special topics courses provide students with an opportunity to examine various forensic science topics not normally offered as part of the Program's regular curriculum.

FRSC 341 Forensic Science Majors Only

Outcomes: Students will be able to gain an understanding of new issues confronting the forensic sciences, or an advanced understanding of traditional subjects covered in basic courses.

Components: Lecture(In person)

Attributes: Forensic Science

Requirement Group: Prerequisite: FRSC 341 Forensic Science Majors Only

Req. Designation: Undergraduate Research

Room Requirements: Electronic Classroom(1)
BIOI 300(1 - 3) 
Directed Readings
Readings from the scientific literature in any focused area of bioinformatics agreed upon by the student and the supervising faculty member.
Outcome: Students will gain knowledge, journal reading expertise, and scientific writing skills.
Components: Independent Study (In person)
Req. Designation: Undergraduate Research

BIOI 395(1 - 3) 
Special Topics: Bioinformatics
Special areas of bioinformatics outside the usual curriculum that vary each time the course is offered.
Outcome: Students will gain knowledge in and master a unique topic in bioinformatics.
Components: Lecture (In person)
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom (1)

BIOI 398(1 - 4) 
Bioinformatics Internship
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola.
Outcome: All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work. Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools.
Components: Independent Study (Independent Study)
Attributes: Engaged Learning, Bioinformatics
Req. Designation: Internship

BIOI 399(1 - 4) 
Bioinformatics Research
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed under the mentorship of one or more Bioinformatics faculty members.
Outcome: All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work. Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools.
Components: Independent Study (Independent Study)
Attributes: Engaged Learning, Bioinformatics
Req. Designation: Undergraduate Research

BIOI 498(1) 
Bioinformatics Internship
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning.
Prerequisites: BIOI 500. Limited to MS Bioinformatics Non-Thesis track students only. Students can apply foundational principles in bioinformatics into practice.
Components: Internship (In person)
Requirement Group: Restricted to students in the Bioinformatics Master's Degree Plan
Req. Designation: Undergraduate Research
Room Requirements: Classroom Not Needed (1)

BIOI 499(1 - 8) 
Bioinformatics Research
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis.
Prerequisites: Prerequisite: BIOI 494. Limited to MS Bioinformatics Thesis track students only.
Outcomes: Students can develop and utilize techniques for bioinformatics research.
Components: Thesis Research (In person)
Requirement Group: Restricted to students in the Bioinformatics Master's Degree Plan
Req. Designation: Undergraduate Research
Room Requirements: Classroom Not Needed (1)
BIOI 500(2)  
Course ID:013480  
15-JUN-2017  
Advanced Bioinformatics  
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.  
Prerequisites - BIOL 388 or BIOL 488  
Outcomes - Students can describe, design, implement, and evaluate bioinformatics algorithms.  
Components: Discussion(In person), Lecture(In person)  
Course Equivalents: BIOL 450  
Requirement Group: Restricted to graduate students.  
Req. Designation: Undergraduate Research  
Room Requirements: Seminar(1), Seminar(1)

BIOI 501(1 - 2)  
Course ID:013476  
15-JUN-2018  
Bioinformatics Seminar  
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.  
Prerequisite: BIOL 388 or BIOL 488  
Students can summarize, critique, and present bioinformatics research.  
Components: Discussion(In person), Seminar(In person)  
Course Equivalents: BIOL 451  
Requirement Group: Undergraduate Research  
Room Requirements: Seminar(1), Seminar(1)

15-JUN-2017  
Department Consent Required  
Thesis Supervision  
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.  
Prequisites - BIOI 499  
Outcomes - Students will develop skills in scientific writing and presentation. At the conclusion, students will present (written and oral) the results of their research.  
Components: Thesis Research(In person)  
Requirement Group: Restricted to students in the Bioinformatics Master's Degree Plan  
Req. Designation: Undergraduate Research

**FNAR 112(3) - Two-Dimensional Design**
An examination of the basic elements and organizational systems of visual expression through the application of design principles and theory.

Outcome: Students will be able manipulate various forms of media to produce desired spatial effects, and understand how to control by- using such design methods as scale, perspective, and composition - the viewer's understanding of and reaction to visual information on a two-dimensional surface.

Components:
- Lecture

Course Equivalents: ACFNA 112
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

**FNAR 113(3) - Drawing I**
An introduction to the basic elements of drawing including: line, value, texture, volume, shape, proportion, perspective and visual composition. A variety of drawing materials will be explored with an emphasis on observation problems designed to build technical, perceptual, and personal expressive interpretation of form through the drawing idiom.

Outcome: Students will be able to demonstrate an understanding of basic drawing principles and vocabulary, through practice and articulation of both formal and artistic ideas.

Components:
- Lecture

Attributes:
- Artistic Knowledge and Experience

Req. Designation: Undergraduate Research

**FNAR 115(3) - Foundations of Photography**
This course introduces photography as a form of visual art. Students learn the technical concepts in order to develop their ability to express ideas through photography. The course also emphasizes strengthening visual literacy through lectures, discussions, and critiques.

Requirements: A fully adjustable digital camera (DSLR) and an external hard drive are required.

Outcomes: Students will learn how to formulate and communicate ideas through photography. The course focuses on building the student's visual literacy and understanding of photography as a form of visual art.

Components:
- Lecture

Course Equivalents: ICVM 115
Attributes:
- Artistic Knowledge and Experience, Film & Digital Media Studies, International Film & Media Studies

Req. Designation: Undergraduate Research
Room Requirements: Lab - Mac(1)

**FNAR 118(3) - Printmaking I**
An exploration of the production of fine art multiples as they are created utilizing zinc and copper plates. Techniques of etching and engraving aquatint and color printing as well as innovative processes are taught.

Outcome: Students will demonstrate understanding of the techniques needed to produce images on metal plates and alternative surface; the intrinsic qualities particular to expression in print media, recognize fine prints, specific techniques, and archival quality in historical examples, use intaglio presses as a means of production and form evaluative judgments about printed imagery.

### FNAR 120(3) - Ceramics: Handbuilding

An exploration of various handbuilding techniques, surface design techniques, and firing ranges available to the contemporary ceramist. Students are encouraged to pursue individual expression in the context of a broad range of methods and creative concepts.

Outcomes: Students will be able to demonstrate the basics of successful construction and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present.

Components: Lecture  
Attributes: Artistic Knowledge and Experience  
Req. Designation: Undergraduate Research  
Room Requirements: Studio - Fine Arts(1)

### FNAR 121(3) - Ceramics: Wheelthrowing

An introduction to the potter's wheel. Students learn basic throwing skills, explore utilitarian design concepts, and learn to balance spontaneous and practiced approaches to process. Emphasis is on the successful integration of craft and personal expression.

Outcomes: Students will be able to demonstrate basic wheelthrowing and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present.

Components: Lecture  
Attributes: Artistic Knowledge and Experience  
Req. Designation: Undergraduate Research  
Room Requirements: Studio - Fine Arts(1)

### FNAR 123(3) - Metalwork and Jewelry I

The methods and processes of construction using nonferrous metals applied to problems in design and function. Projects are designed to familiarize the student with processes in metalwork and the proper use of hand tools.

Outcomes: Students will demonstrate an understanding of the fundamental characteristics of metal; the ability to cut, shape and manipulate metals; to express visual ideas in low and high relief; and to form judgments about design on other than flat surfaces.

Components: Lecture  
Req. Designation: Undergraduate Research  
Room Requirements: General Classroom(1)

### FNAR 124(3) - Sculpture I

An introduction to three dimensional concepts and materials, and associated techniques, in the process of articulating a personal artistic statement. Students will be guided in the fabrication of various 3-D constructions employing a wide range of building materials such as plaster, wood, clay, foam board, paper, and metals.

Outcomes: Students will be able to translate two-dimensional sketches and drawings into expressive three dimensional forms; demonstrate basic sculpting techniques and creative strategies; provide critical evaluation of the creative process; and produce objects that are viewable in the round, structurally stable with masses and appendages proportionate to one another.

Components: Lecture  
Attributes: Artistic Knowledge and Experience  
Req. Designation: Undergraduate Research  
Room Requirements: Studio - Fine Arts(1)

### FNAR 132(3) - Visual Communication I

This course initiates a professional sequence whereby the student receives an introduction to typography and the use of two dimensional design principles necessary for visual communication.

Outcome: Students will gain an understanding of the fundamental principles of visual communication. They will develop technical skills in materials and techniques and they will be able to articulate both formal and artistic ideas to others.

Components: Lecture  
Req. Designation: Undergraduate Research  
Room Requirements: Studio - Fine Arts(1)
The Crafts of China

This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.

Outcome: Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China. Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture.

Components: Lecture
Course Equivalents: ASIA 160
Attributes: Asian Studies
Requirement Group: Restricted to Beijing Students
Req. Designation: Undergraduate Research

Three-Dimensional Design

An examination of the basic elements and organizational systems of spatial expression through the application of design principles and theory.

Outcome: Students will be able work with a variety of materials to produce three-dimensional objects in space, and understand how to control the viewer's reaction to those objects through the manipulation of solidity, transparency, movement and time.

Components: Lecture
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

Color Theory

Prerequisite: majors only

An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, and symbolic dimensions through the application of past and current theory.

Outcome: Students will be able to manipulate color papers, paints and inks in a series of specific exercises that explore the many aspects of color to the end of understanding how color influences human reactions to information and products.

Components: Lecture
Req. Designation: Undergraduate Research
Room Requirements: Studio - Fine Arts(1)

Art and Visual Culture

An introduction to the principles of art and their application to broader visual culture, this course explores the complex nature of art through an examination of its visual elements, techniques, functions, critical methodologies, and related social issues. The course takes advantage of Chicago's artistic resources.

Outcome: Students will demonstrate knowledge of the elements of visual language; means of visual expression in diverse cultures and eras; media and techniques of art; artistic terminology; and critical approaches to the study of visual culture and related social issues. Students will acquire the skills to interpret art and visual culture in oral and written form.

### Theatrical Design I

**Course:** THTR 252 (3)  
**Code:** Course ID: 007070  
**Date:** 15-JUN-2017

This course introduces the theatre student to the fundamentals of design especially as they relate to the theatrical design of sets, lights, and costumes.

**Outcome:** Students will demonstrate understanding of the tools a set, costume, and lighting designer use to express their ideas; improve their abilities to communicate their creative ideas; appreciate how design affects an overall theatrical experience; and be prepared to engage in practical design experience in our theatre.

**Components:** Lecture

**Attributes:** Artistic Knowledge and Experience, Film & Digital Media Studies, International Film & Media Studies

**Req. Designation:** Public Performance

**Room Requirements:** General Classroom(1)

### Design Technology: Special Effects, Sound Engineer

**Course:** THTR 300 (3)  
**Code:** Course ID: 007082  
**Date:** 15-JUN-2017

Special Effects, Sound Engineering, Moving Light Programming, Projections, Computer Aided Drafting and Automation Design

**Outcomes:** To provide a broad overview of current state of the art stage design technologies through lectures, demonstrations, and hands-on work.

**Components:** Lecture

**Req. Designation:** Public Performance

**Room Requirements:** General Classroom(1)

### Practicum: Costumes

**Course:** THTR 321C (2)  
**Code:** Course ID: 007087  
**Date:** 15-JUN-2017

This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.

**Outcome:** Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production.

**Components:** Laboratory(In person)

**Same As Offering:** THTR 321

**Req. Designation:** Public Performance

**Room Requirements:** Lab - Theater(1)

### Practicum: Electrics

**Course:** THTR 321E (2)  
**Code:** Course ID: 011657  
**Date:** 15-JUN-2017

This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with electrics.

**Outcome:** Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production.

**Components:** Laboratory(In person)

**Req. Designation:** Public Performance

**Room Requirements:** Lab - Theater(1)

### Practicum-Scenic

**Course:** THTR 321S (2)  
**Code:** Course ID: 013374  
**Date:** 15-JUN-2017

Theatre Practicum (Scenery) is one of four experiential learning courses that will provide the student with an opportunity for practical application of varied techniques and theories in planning and construction of theatrical scenery and properties. The specific topics and skills the course will focus on vary from semester to semester as per the demands of each design.

**Components:** Lecture(In person)

**Req. Designation:** Public Performance

**Room Requirements:** Lab - Theater(1)

### Theatrical Design II

**Course:** THTR 352 (3)  
**Code:** Course ID: 013373  
**Date:** 15-JUN-2017

An Intermediate course of study to explore the process of Theatre Design (Scenic, Costumes, and Lighting.) Collaboration and storytelling thru visual means is the key to understanding text-based theatre. Each individual will have the opportunity to express ideas in class discussions, written critical analysis and execution of design while enhancing the process of design

**Pre-requisite:** THTR 252

**Outcomes:** The purpose of this course is to develop intermediate design skills building upon those learned in THTR 252

**Components:** Lecture(In person)
THTR 353(3)  Course ID:013372  15-JUN-2017
Theatrical Design III
This team taught course will alternate between full group discussions on topics valuable to all disciplines and small group instruction on specific techniques within sub-disciplines. Students will declare a discipline at beginning of the course. Students can repeat the course to pursue a second discipline. Students will be placed in teams of complimentary disciplines.

Prerequisites: THTR 252 and THTR 352

Components: Lecture(In person)

Room Requirements: Lab - Theater(1)

THTR 354(3)  Course ID:013371  15-JUN-2017
Storytelling Design: Puppetry, Properties and Toy
Puppetry is one of the oldest forms of storytelling. This course is intended to allow the student to several explore different forms of storytelling through the use of puppets and puppetry. The course will explore shadow puppetry, toy theatre and hand & rod puppetry. Each student will develop, as a member of a series of "production teams"", a brief performance piece base.

Prerequisites THTR 252, and either THTR 261 or 266

Outcomes: Students will gain skill in design through the storytelling techniques of puppetry and toy theatre.

Components: Lecture(In person)

Room Requirements: Lab - Theater(1)

THTR 375(3)  Course ID:007114  01-JAN-2018
Play Direction: THTR Capstone
Prerequisite: THTR 203, 252, 266, 267, 364, 365, 366 and 367, or 375 may be taken concurrently with THTR 367.

This course explores the fundamental principles of play direction. Students are required to direct a monologue, select a play script for production, develop a production concept, stage a fifteen-minute scene, and develop a detailed Director's Notebook.

Outcome: Students acquire the skills to identify the basic elements of stage direction; analyze a play script from the point of view of the director; articulate and defend a production concept; develop actor-coaching skills; and identify elements of direction that communicate story, theme, and concept.

Components: Performance(In person)

Room Requirements: Lab - Theater(1)
**DIGH 500(3)**

Course ID: 012004  
01-APR-2018

**Digital Humanities Practicum**

Prerequisites: DIGH 400 and DIGH 402

This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.

Outcomes:
- A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

*Components:*
- Practicum (In person)

*Requirement Group:*
- Prerequisites: DIGH400 and DIGH 402

*Req. Designation:*
- Public Performance

*Room Requirements:*
- Seminar(1)

**DIGH 595(3)**

Course ID: 012005  
15-JUN-2018

**Digital Humanities Project**

Prerequisites: DIGH 400 and DIGH 402

In this capstone, students will apply skills they’ve learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.

Outcomes:
- A working, practical final digital humanities project published online

*Components:*
- Supervision (In person)

*Requirement Group:*
- Prerequisites: DIGH400 and DIGH 402

*Req. Designation:*
- Public Performance

*Room Requirements:*
- Classroom Not Needed(1)
### ENGL 100(3) - Developmental Writing

**Course ID:** 002564  
**Run Date:** 06-JUN-2018

### ENGL 393 (1 - 3)
**Course ID:** 002674  
**06-JUN-2018**  
**Department Consent Required**

**Teaching English to Adults: Internship**  
**Prerequisite:** Sophomore Standing or above.  
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper.  

**Outcome:** Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills.

**Components:** Field Studies  
**Attributes:** Engaged Learning

**Requirement Group:** Pre-requisites: UCWR 110 and one 200-level English course.

**Req. Designation:** Service Learning / Internship

### ENGL 394 (3)
**Course ID:** 002675  
**06-JUN-2018**  
**Department Consent Required**

**Internship**  
**Prerequisites:** junior standing, six English courses.

This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.  

**Outcome:** Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences.

**Components:** Field Studies  
**Attributes:** Engaged Learning

**Requirement Group:** Pre-requisites: UCWR 110 and one 200-level English course.

### ENGL 395 (3)
**Course ID:** 002676  
**06-JUN-2018**  
**Department Consent Required**

**Hon Tutr:** Content will vary each time the course is offered, but in general will entail in-depth study of a literary genre or a major author or theme in literature.

**Outcome:** Students will strengthen their capacity to analyze literature and to discuss it, both orally and in writing, and will be able to demonstrate understanding of the materials studied and of relevant theoretical and critical perspectives.

**Components:** Seminar  
**Course Equivalents:** ENGL 395H

**Requirement Group:** Pre-requisites: UCWR 110 and one 200-level English course.

**Req. Designation:** Internship

### ENGL 397 (3)
**Course ID:** 002680  
**06-JUN-2018**

**Adv Writing Workshop: Poetry**  
**Prerequisite:** ENGL 317.

Students will read master poets as models and will write and revise poems of their own, which will be discussed by the class in a workshop format.  

**Outcome:** Students will produce original poems, building upon skills honed in English 317. They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original poetry, theirs and their fellow students'.

**Components:** Seminar

**Requirement Group:** Pre-requisites: UCWR 110 and one 200-level English course.

**Req. Designation:** Internship

### ENGL 398 (3)
**Course ID:** 002681  
**06-JUN-2018**

**Adv Writing Workshop: Fiction**  
**Prerequisite:** ENGL 318

This course allows students to develop further their skills in writing and analyzing original fiction begun in English 318, in a supportive workshop atmosphere.

**Outcome:** Students will produce original short stories, building upon skills honed in English 318. They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original fiction, theirs and their fellow students'.

**Components:** Seminar

**Requirement Group:** Pre-requisites: UCWR 110 and one 200-level English course.

ENGR 341(3) Course ID:013511 15-JUN-2017

Medical Device Systems
The relevant physiology, clinical need, history, and system descriptions of eighteen fundamental medical devices are discussed and analyzed. Students are also introduced to several medical device systems, including medical instruments, electrical stimulators, and combination products. These topics provide a foundational background for medical device product development and regulation.

Prerequisites: Restricted to Engineering Science majors. MATH 266, Concurrent enrollment in ENGR 313 and ENGR 341L

Outcomes: An understanding and analysis of the clinical need and common subsystems underlying eighteen fundamental medical devices; an evaluation of the battery requirements for commonly implantable medical components.

Components: Lecture(In person)
Requirement Group: Restricted to Engineering Science majors. MATH 266, Concurrent enrollment in ENGR 313 and ENGR 341L
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 341L(1) Course ID:013510 15-JUN-2017

Medical Device Systems Laboratory
Introduction to the graphical user interface, data acquisition, and sensors of common medical devices. The lab experiments are synchronized with the presentation of medical device topics in ENGR 341. Students also create an iPhone Nursing App for a Sponsor from the School of Nursing.

Prerequisites: Restricted to Engineering Science majors. Concurrent enrollment in ENGR 341

Outcomes: Use of common medical devices subsystems; application of FDA design control principles for creation of an iPhone Nursing App and accompanying requirement and design specifications.

Components: Laboratory(In person)
Requirement Group: Restricted to Engineering Science majors. Concurrent enrollment in ENGR 341
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 342(3) Course ID:013592 15-JUN-2018

Medical Device Software Development I
This is the second semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During the first four weeks, students increase their programming skills through exposure to recurrence solving, sorting, and data structures. They then learn how design and verify medical device software using model-based engineering.

Restricted to Engineering Science majors. ENGR 341, concurrent enrollment in ENGR 381

Outcomes: Design of medical device software code, and creation of Food and Drug Administration design control documents for a sensor platform.

Components: Lecture(In person)
Requirement Group: Prerequisite: ENGR 341 with a minimum grade of C minus; Co-requisite: ENGR 381; Restricted to Engineering Science majors
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 351(3) Course ID:013514 15-JUN-2017

Electronic Circuit Analysis and Design
A course for engineering science students (computer engineering) that introduces advanced topics in the design and analysis of analog and digital electronic circuits. Areas of emphasis include an introduction to semiconductor physics, diodes, BJT transistors, CMOS devices, advanced operational amplifier circuits and frequency response fundamentals.

Restricted to Engineering Science majors. MATH 266, ENGR 321, ENGR 323, Concurrent enroll. in ENGR 313 and ENGR 351L

Outcomes: Ability to understand and apply fundamental concepts of semiconductor physics. Ability to understand and apply complex models to analyze analog and digital microelectronic circuits.

Components: Lecture(In person)
Requirement Group: Restricted to Engineering Science majors. MATH 266, ENGR 321, ENGR 323, Concurrent enroll. in ENGR 313 and ENGR 351L
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)
**College of Arts and Sciences - Engineering Science - Subject: Engineering**

**ENGR 351L(1) Course ID: 013515 15-JUN-2017**

**Circuit Design Laboratory**

A lab for engineering science students (computer engineering) to provide a first experience working with semiconductor devices (diodes, BJTs, MOSFETs, Operational Amplifiers) for the design, creation and analysis of microelectronics using lab instruments.

Restricted to Engineering Science majors. ENGR 321, ENGR 323, Concurrent enrollment in ENGR 351

Outcomes: Ability to identify integrated circuit design issues and develop applicable solutions. Ability to apply advanced principles in analog circuit design, creation and analysis.

Components: Laboratory (In person)

Requirement Group: Restricted to Engineering Science majors. ENGR 321, ENGR 323, Concurrent enrollment in ENGR 351

Req. Designation: Internship

Room Requirements: ENGR Design Lab(1)

**ENGR 352(3) Course ID: 013581 15-JUN-2018**

**Methods and Algorithms for Computer Engineers**

A course for computer engineering students that emphasizes the analysis of methods and algorithms used in computer engineering. The course includes hands-on experiments and a design project related to the computing performance and efficiency improvement of engineering systems.

Restricted to Engineering Science majors. MATH 266, ENGR 351, ENGR 351L. Concurrent enrollment in ENGR 382.

Understanding of data abstraction, algorithmic performance analysis, algorithmic verification, computational complexities, and ability to analyze the trade-offs among various algorithmic strategies, parts and patterns.

Components: Lecture (In person)

Requirement Group: Pre-requisites: MATH 266, ENGR 351, ENGR 351L; Co-requisite: ENGR382; Restricted to ENGR majors

Req. Designation: Internship

Room Requirements: ENGR Design Lab(1)

**ENGR 361(3) Course ID: 013516 15-JUN-2017**

**Fundamentals of Environmental Engineering**

This course covers fundamental topics in environmental engineering, with particular emphasis on principles of aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate-and-transport modeling of contaminants in natural and engineered systems.

Restricted to Engineering Science majors. MATH 266, ENGR 322, Concurrent enrollment in ENGR 313 and ENGR 361L

Outcomes: Ability to apply principles of environmental engineering to describe and quantify key physical, biological and chemical phenomena in natural and engineered systems.

Components: Lecture (In person)

Requirement Group: Restricted to Engineering Science majors. MATH 266, ENGR 322, Concurrent enrollment in ENGR 313 and ENGR 361L

Req. Designation: Internship

Room Requirements: ENGR Design Lab(1)

**ENGR 361L(1) Course ID: 013517 15-JUN-2017**

**Fundamentals of Environmental Engineering Lab**

This laboratory course introduces students to the analytical techniques such as mass spectrometry and titration, relevant to environmental engineering practice. This course emphasizes the design of field sampling campaigns of water and soil environments and the statistical data analysis of experimentally estimated water and soil parameters.

Restricted to Engineering Science majors. ENGR 322, Concurrent enrollment in ENGR 361

Outcomes: Quantification of fundamental environmental parameters with emphasis on water quality. Ability to design and conduct a field sampling campaign.

Components: Laboratory (In person)

Requirement Group: Restricted to Engineering Science majors. ENGR 322, Concurrent enrollment in ENGR 361

Req. Designation: Internship

ENGR 362(3) Course ID:013582 15-JUN-2018
Water and Wastewater Engineering
Theoretical and conceptual design of systems for treating municipal wastewater and drinking water which include reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Re-use of water and waste products are also covered.

Restricted to Engineering Science majors. ENGR 361, 361L. Concurrent enrollment in ENGR 383.

The ability to undertake the required calculations to design a municipal water and wastewater treatment facility.

Components: Lecture(In person)
Requirement Group: Pre-requisites: ENGR 361, ENGR 361L; Co-requisite: ENGR 383; Restricted to Engineering Science majors.
Req. Designation: Internship
Room Requirements: ENGR Design Lab(1)

ENGR 381(4) Course ID:013568 15-JUN-2018
Biomedical Engineering Capstone Design I
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group is assigned an industry-sponsored medical device software problem to solve. Each week, a medical device product development or regulation topic is also introduced.

Restricted to Engineering Science majors. ENGR 341

Outcomes: ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors.

Components: Lecture(In person)
Requirement Group: Prerequisites: ENGR 341 with a minimum grade of C-, restricted to Engineering Science Majors.
Req. Designation: Internship

ENGR 382(4) Course ID:013569 15-JUN-2018
Computer Engineering Capstone Design I
First part of the team-based Capstone Design series for Computer Engineering students. Students focus on the design of an industry-sponsored project with practical, economic, and ethical constraints. They learn the fundamentals of product development, quality, reliability, ethics and project management as it relates to the field of computer engineering.

Restricted to Engineering Science majors. ENGR 351

Outcomes: ABET Student Outcome (2): An ability to apply engineering design to produce microelectronic solutions that meet specified needs with consideration for public health, safety, welfare, and other factors.

Components: Lecture(In person)

Introduction to European Studies

This course serves as an introduction to the interdisciplinary field of European studies. It provides an overview of the major disciplines represented in the program, introduces the main approaches covered in the program, and discusses some of the most important topics involving European states, regions, and the European Union.

Restricted to European Studies minors.

Outcomes: Students will gain a basic understanding of how different disciplines contribute to the study of Europe at the state, sub-state and supra-state levels.

Components: Lecture (In person)
Attributes: European Studies
Requirement Group: Restricted to European Studies Minors.
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

European Studies Capstone

This capstone class is intended to provide seniors a chance to reflect on what they have learned as European Studies minors by focusing on a particular theme. The class takes an interdisciplinary and cross-national approach. Students develop a major research project.

Restricted to Juniors and Seniors minoring in European Studies.

Outcomes: Through this course students will gain an understanding of the ways in which various fields and their approaches to European Studies can help answer specific important questions about the region.

Components: Lecture (In person)
Attributes: European Studies
Requirement Group: Must be a European Studies minor. Restricted to juniors and seniors.

MATH 161(4) Course ID: 005023 06-JUN-2018
Calculus I
Prerequisite: Math Placement Test or Math 118

This course provides a standard introduction to differential and integral calculus and covers topics ranging from functions and limits to derivatives and their applications to definite and indefinite integrals and the fundamental theorem of calculus and their applications.

Outcome: Students will obtain the background needed to enroll in Calculus II. This course satisfies the quantitative literacy requirement of the core curriculum.

Components:
- Lecture

Attributes:
- Bioinformatics, Forensic Science

Requirement Group:

This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.

Outcome: Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems.

Components:
- Lecture (In person)
- Pre-requisite: MATH 132 or MATH 162
- Service Learning
- Electronic Classroom(1)

This course covers the theory, solution techniques, and applications surrounding linear and non-linear first and second-order differential equations, including systems of equations; software packages such as MAPLE may be used.

Outcome: Students will obtain an understanding of elementary differential equations and their applications.

Components:
- Lecture
- Prereq: MATH 263 or MATH 263 concurrently
- Service Learning
- General Classroom(1)

In a seminar setting, students discuss and present proofs (or computer examples) as solutions to regional and national mathematics contest problems usually involving techniques drawn from elementary logic, calculus of one and several variables, combinatorics, number theory, geometry, basic algebra, and abstract algebra.

Learning Outcome: To improve a student's ability to communicate mathematically and to strengthen the student's problem-solving skills.

Components:
- Seminar (In person)
- Service Learning
- General Classroom(1)

This course is a sophomore-level seminar covering topics in areas such as number theory, logic, set theory, metric spaces, or history of mathematics.

Outcome: Students will obtain an initial insight into a number of areas of advanced study in mathematics.

Components:
- Seminar
- Service Learning
- General Classroom(1)

This course explores selected topics in the history of mathematics ranging from Babylonian and Egyptian mathematics to Pythagoras and Euclid to the Hindu-Arabic numeration system to Newton and Leibniz to geometries other that Euclid's to the mathematical art of Escher.

Outcome: Students will obtain a unique historical perspective on the various areas of mathematics that they are studying in their other courses.

MATH 328(3)  
Algebraic Coding Theory
Course ID:010322  06-JUN-2018
Prerequisite: MATH 212

Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.

Components: Lecture(In person)

Introduction to Financial Mathematics Derivatives
Course ID:012569  06-JUN-2018
Prerequisites: MATH 264 and MATH 304

The course provides an introduction to the mathematical theory of option pricing. We will rigorously derive option relationships using no arbitrage conditions, introduce rudimentary stochastic calculus and Brownian motion as models for stock prices, and give an introduction to methods for solving partial differential equations to give explicit Black-Scholes formulas.

Outcomes: The students will gain knowledge of the theory of options, bond and stock pricing, portfolio optimization, and will be exposed to other relevant applications of Mathematics to Finance.

This course comparatively explores themes related to the process of democratization in Catholic and Muslim settings. The second half of the 20th century saw significant and sustainable expansion of political rights and civil liberties especially in predominantly Catholic countries in Europe and Latin America. Most recently, democratic struggles have gained impetus in several Muslim countries in the Middle East and South-East Asia. Particularly interesting is the transformation of religious actors (e.g., the Catholic Church, clergy, non-governmental organizations, political parties) from bastions of authoritarian status quo into supporters of progressive political change.

**Language and Literacy for Diverse Students**

This module (course) introduces teacher candidates (students) to essential foundations in teaching reading. Emphasized will be skills developmentally appropriate for the candidate's teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.

**Outcomes:** Teacher candidates (students) will learn to design and teach lessons, focusing on standards based reading skills to linguistically diverse students, through use of research based reading strategies.

**Components:** Field Studies (In person)

**Requirement Group:** Prerequisite: TLSC 220. Corequisites: TLSC 320 and 330. TLSC 310, 320 and 330 must be taken together.

Catholic Bioethics and Social Justice
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influence healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Outcomes: Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context.

Urinalysis and Body Fluids
Theoretical and applied concepts related to the formation, collection, processing, and evaluation of urine and body fluids. Study of urine and body fluids including chemical, physical, and microscopic properties. This course also encompasses the evaluation of normal fluid characteristics, and those that reflect abnormality or disease.

Admission to M.S. in Medical Laboratory Science program

Upon completion, students will be able to explain the formation of fluids in the human body and correlate normal and pathological states associated with chemical, physical and microscopic findings.

Clinical Chemistry I
This course is designed for medical laboratory science students to gain an understanding of the analytical principles and components of instrumentation utilized in clinical chemistry laboratories.

Prerequisite: Admission to M.S. in Medical Laboratory Science program

Outcomes: Upon completion of this course, students will describe chemical constituents of bodily fluids, their regulation and laboratory methods of analysis for compounds including electrolytes, carbohydrates, lipids and proteins.

Components:  
Lecture(In person)  
Requirement Group: Restricted to Medical Laboratory Science Graduate School students.

The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice.

Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.

Outcomes: The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation.

**Biodiversity & Biogeography**  
Course ID:012715  
06-JUN-2018  
Prerequisite: ENVS 137 or UCSF 137

This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.

Outcome: Students will gain knowledge of and appreciation for the biodiversity of life, its formation through the process of evolution, and the importance of biodiversity to ecosystem function and human welfare.

Components: Lecture(In person)  
Attributes: Tier 2 Scientific Knowledge  
Requirement Group: Prerequisite: ENVS 137, BIOL 101 or UCSF 137

Prerequisite: ENVS/UCSF 137

Focus: Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.

Prerequisites: ENVS/UCSF 137

Outcomes: Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face.

Humans and the Environment in Contemporary Vietnam
Prerequisite: ENVS 137 or UCSF 137

This course is intended to provide students with deep and practical understandings of three interrelated concepts: sustainability, conservation, and biodiversity. Students will also learn about the current condition of Vietnam’s environment, causes of environmental degradation in Vietnam, and current efforts towards environmental sustainability in Vietnam.

Outcome: Students will grasp the concept of sustainability as it applies to Vietnam, understand the current state of the environment, and current efforts to mitigate problems in Vietnam.

Components: Lecture (In person)
Attributes: Engaged Learning, Tier 2 Scientific Knowledge, Asian Studies, Global & International Studies
Requirement Group: Prerequisite: ENVS 137, BIOL 101 or UCSF 137

**Environmental Health**
Epidemiology is the study of the distribution and determinants of disease in populations. This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

**Introduction to Epidemiology**
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

### Winter Ecology

**Course ID:** 013075  
**Semester:** 06-JUN-2018

**Prerequisite:** BIOL 265 or ENVS 280 or permission of instructor

Students will immerse themselves in the winter environment and learn about habitats on, in, and under snow, both terrestrial and aquatic, organisms that live in these habitats and their physiological, behavioral and morphological adaptations for survival. Students will gain an understanding of research on winter ecosystems.

**Outcomes:** Students will gain understanding of habitats and organisms present during winter in temperate ecosystems and gain experience with field techniques employed when studying these ecosystems.

### Conservation Biology

**Course ID:** 012751  
**Semester:** 06-JUN-2018

**Prerequisites:** ENVS 280 & 286

Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.

**Outcome:** Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisites: ENVS 280 & 286

**Req. Designation:** Service Learning

### Conservation Biology Lab

**Course ID:** 012732  
**Semester:** 06-JUN-2018

**Prerequisites:** Prerequisite: ENVS 280/286; co-requisite ENVS 320.

Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.

**Outcomes:** This course will provide practical field and lab experience in population, community and ecosystem conservation. Students will learn how the principles of Conservation Biology are applied, and the associated challenges.

**Components:** Laboratory (In person)

**Requirement Group:** Prerequisites: ENVS 280, ENVS 286 Pre- or Co-requisite: ENVS 320

**Req. Designation:** Service Learning

**Room Requirements:** Lab - Biology (1)

### Sustainable Agriculture

**Course ID:** 012733  
**Semester:** 06-JUN-2018

**Prerequisites:** ENVS 280 or BIOL 265

This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.

**Outcomes:** Students will be able to explain the characteristics of the U.S. agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system.

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite: ENVS 280 or BIOL 265

**Req. Designation:** Service Learning

**Agroecosystems**
Prerequisites for Environmental Science and Environmental Studies majors: ENVS 237 & 238; OR BIOL 102 & 112; ENVS 223 is recommended.

In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.

Outcomes: Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating

**Food Systems Analysis**
Prerequisite: ENVS 237

This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.

Outcomes: Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis.

**Restoration Ecology**
Prerequisites: ENVS 280 & 286

This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.

Outcomes: Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to

**Restoration Ecology Lab**
Prerequisites: ENVS 280 & 286 or BIOL 265 & 266; Co- or Pre-requisite: ENVS 330

Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.

Outcomes: Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects.

**Industrial Ecology**

Industrial ecology combines Business, Environment, & Engineering to shift industrial processes from linear (open loop) systems, where resources move through the system to become waste, to circular (closed loop) systems where waste becomes inputs for new processes. Students will learn life cycle assessment (LCA) to measure environmental impacts.

**Outcomes:** Students will understand how business and industry can create zero waste systems, how a circular economy works, and the tools of industrial ecology, including life cycle assessment.

**Biomimicry: Design Inspired by Nature**

This course provides an introduction to biomimicry (or biomimetics) and the application of biomimicry design principles. Biomimicry is the design of business products, processes, and systems modeled after nature's wisdom. In biomimicry, nature serves as the design inspiration for sustainable solutions to solve complex human problems.

Prerequisites: UCFS 137 or ENVS 137; MGMT 201 for Quinlan School of Business students

**Outcomes:** Students will learn the concept of biomimicry and life principles, be able to identify examples, apply biomimicry design principles, and view nature as model, mentor, and measure.

Conservation and Sustainability of Neotropical Ecosystems
Prerequisites: For Biology Majors/Minors: Bio 265; For Environmental Science Majors: ENVS 280
This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.
Outcomes: Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture.

**Sustainable Business Management**

Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.

Prerequisites: ENVS 137 or UCSF 137 or MGMT 201 for Quinlan School of Business Students

Outcomes:

1. Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

**Components:**

**Sustainability Management in the Global Context**

This study abroad course takes students to international destinations to learn about business and sustainability management in the global context. Students hear presentations from local experts on sustainability in government, nonprofit, & for-profit entities, visit entities that have adopted sustainability practices, & visit local cultural sites. Fulfills MGMT elective.

Prerequisites: UCFS 137 or ENVS 137 (ENVS 363 recommended); MGMT 201 for Quinlan School of Business students

Outcomes: Students will understand sustainability perspectives outside the U.S., practical examples of circular operations and strong sustainability, and global, regional, and local sustainability concerns.

**Components:**

- Lecture(In person)

**Requirement Group:** Prerequisites: ENVS 137 or UCSF 137; MGMT 201 for Quinlan School of Business students

**Introduction to Geographic Information Systems**

Prerequisites: This course is intended for upper-division undergraduates (junior/senior) and graduate students.

Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.

Outcomes:

1. Describe the conceptual/theoretical and practical/technological background of GIS.

Human Dimensions of Conservation
This course will increase student knowledge of the social, political, economic, psychological, and cultural
dimensions that influence the success of conservation projects and develop skills in conducting human
dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute
to preparation for employment in the conservation field and/or graduate study.
Outcomes: Students will understand the importance of treating the human dimensions of conservation problems
with the same scientific rigor customarily given to the ecological dimensions.

Introduction to Spirituality Praxis
Investigation of the ministry of spiritual direction/accompaniment in a Christian context. Understanding spiritual direction/accompaniment as a particular form of mentoring and teaching, the course helps students to become critically aware of and explicitly articulate their working spiritual theology.
Outcomes: Understand the nature of the ministry of spiritual direction. Interpret primary sources on the theme of spiritual formation. Analyze their working spiritual theology and their potential to become spiritual directors.

Essentials of Spiritual Direction
Prerequisite: IPS 428
This course invites students to consider the practical conditions, requirements and main challenges of the ministry of spiritual direction/accompaniment so as to further their discernment process and prepare them for the Contextual Education component of their program of study, where they will begin to serve as spiritual directors/companions.
Outcome: Identify relational dynamics operative in spiritual direction. Measure the significance of developmental, relational and social-cultural factors for spiritual direction. Employ open listening, questioning and verbatim accounts.

Components: Seminar
Requirement Group: Prerequisite: IPS 428. Enrollment is restricted to Institute of Pastoral Studies students.

Psychopathology
Students will learn how to use the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) for diagnosing various psychopathological disorders.

Pre-requisites: IPS 517
Outcomes: Familiarity with the DSM-5; DSM-IV TR multi-axial system; examine the etiology, treatment, and prognosis of selected mental disorders; develop interviewing skills to identify psychopathology; integrate a pastoral dimension of dealing with persons suffering from psychopathology.

Components: Seminar(In person)

Internship Supervision I
Internship Supervision/Practicum I intends to facilitate entrance into the clinical internship site. Students will obtain further development of theory and skills of pastoral counseling. The course will facilitate the integration of theory and praxis, psychological and theological, and the personal and professional dimensions of one's identity as a pastoral counselor.

Outcomes: Demonstrate growing integration of pastoral counseling skills and psychological theory into practice. Develop knowledge and understanding of competencies and diverse perspectives needed by spiritually integrated and clinically informed pastoral counselors.

**Class Actions**

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

For many years, the field of psychology focused primarily on mental illness. But more recently, many psychologists have begun to analyze happiness and to study the ways in which all people, healthy or ill, can increase their enjoyment of life. This course will explore the new field of hedonic psychology, evaluating its methods and examining its findings. We will consider whether legal policy can or should be shaped by these findings in an effort to help people become happier.

International Arbitration: Public and Private
This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules.

Education Law Practicum
This unique course has a classroom component and a field work component. The classroom component covers substantive education law issues and the development of skills tailored to the practice of education law. For the field work component of the class, students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose from the following different areas of work: (1) providing direct representation and legal assistance to children and families in need of support relating to special education and/or school discipline matters; (2) representing school districts or other educational institutions in education law matters; or (3) working on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may also participate in Loyola's Educational Advocacy Project as an alternative to an external field placement.

The primary goal of this course is to learn the fundamental or basic principles of the international trading system contained in the General Agreement on Tariffs and Trade (GATT) and the treaties of the World Trade Organization (WTO). Students will learn how rules of the GATT/WTO legal system are made and how they are used in domestic legal systems such as the United States. There are five additional learning goals in this course. First, students will gain factual knowledge about how the WTO is run and how disputes are resolved among WTO member countries. Second, students will learn to analyze and critically evaluate how GATT/WTO legal rules are applied in specific cases with a view to gaining and improving their problem solving skills in international trade law. Third, students will gain a broader understanding of how law works in an increasingly global and heterogeneous world. Fourth, the course will promote student interest in learning more about international law on their own including where to find the resources they need for further study. Finally, the paper

Secured Transactions
This course examines the law of consensual liens on personal property under Article 9 of the Uniform Commercial Code. (I know; it sounds boring, but it's actually pretty cool.) The course deals with the use of personal property, tangible and intangible, as collateral to secure payment or performance obligations (ugh! Who talks like this?) Course materials cover creation of the security interest, validity of the security interest as against the claims of third parties, priorities of claims between competing secured parties and other lien holders and rights upon foreclosure.

Having spent my career as a partner-level transactional lawyer (corporate matters, secured debt work, securitization, bankruptcy) at two large firms (Mayer Brown and Kirkland & Ellis) as well as several years as general counsel at a NASDAQ-listed company, I want students to get a deep sense of the practical

Advanced Mediation Advocacy Practicum
Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law.

This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest - based dispute resolution through a negotiation, mediation, client counseling or adr course or through participation on a team. LL.M students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required.

Workways of the U.S. Supreme Court
This course will address the role of the U.S. Supreme Court in our tri-partite framework of representative government and interacts with the other branches of the federal government (and the states) as it exercises the power of judicial review, consistent with the authority provided by Article III of the Constitution and the statutes which Congress has passed with respect to the jurisdiction of the federal courts, including the Supreme Court. The preliminary lectures by Professor Sullivan will provide the course foundation, exploring the constitutional and statutory provisions relating to the Court and its work and the ways in which the Court has chosen to structure its work within those constraints. The course will pay particular attention to the Court's case selection process and the ways in which lawyers succeed in getting their clients' cases to the Court. Separation of Powers
This course will consider the dynamic nature of separation of powers in the American constitutional system, particularly with respect to the relationship between the executive and legislative branches of the national government, but consideration will also be given to the role of the judicial branch and its interactions with the executive and legislative branches (to which the courts typically refer as the "political branches"). The readings will include some of the founding era documents, constitutional cases, materials such as presidential messages and statements, executive branch legal opinions, and secondary materials. Students will gain a working knowledge of the field through the required readings and develop seminar paper topics during the first part of the semester; they will present the results of their research to the class in the latter part of the semester and will submit papers at the end of the semester. The goal of the course is to provide students with a fundamental understanding of the separation of powers doctrine in the American system of government.

**American Legal History**

Deep controversies over political issues present now—immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

**Privacy Law**

This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. Students will prepare and

**International Business Trans**

An introduction to the legal aspects of international business. The course emphasizes what lawyers need to know to represent clients doing business in the 21st century. It covers international treaties like the Convention on International Sales of Goods (CISG), international letters of credit, international commercial terms, conflicts of laws, international trade policy, the Foreign Corrupt Practices Act, international corruption, international arbitration, and import and export issues and how to draft international agreements. Students will actually draft an international distribution agreement, and will also deal with drafting issues for international agency agreements, international licensing agreements and international franchise agreements. A focus will be on advising clients who are doing international business, in order to help them engage in best practices and avoid pitfalls. (Moses)

**Title:** Mediation Advocacy  
This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

**Date:** 19-JUL-2017  
**Title:** Restorative Justice Workshop  
In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

Professional Identify Formation
Loyola’s mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one’s own is critical to professional development and success in the

**Mediation Seminar**
Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works.

This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation.

**Canon Law Seminar**
Canon Law plays a central role in determining how the Catholic Church handles the broad spectrum of issues involved in the daily management of a worldwide multinational organization that includes dioceses, parishes, colleges, universities, grade schools, high schools, hospitals, nursing homes and other charitable entities. Examples of these issues involve personnel and real estate matters, rights and duties of the Christian faithful, professional misconduct, foreign religious workers, the administration of ecclesiastical goods, mergers and joint ventures, and, of course, marriage and family law, especially divorces and annulments. This Canon Law Seminar should be of particular interest for students interested in the management of Catholic institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law.

**Information Technology and Human Rights Practicum**  
This course examines the relationship between information communication technologies (ICT) and human rights in their interaction with governments, civil society, industry peers, and other stakeholders. Information technologies have created new challenges with regard to human rights protection, especially in the areas of data privacy and freedom of expression. These present complex legal questions and moral dilemmas with multiple tension points, which are at the heart of the ICT industry, but also evaporate through almost any other industry in the digital age, by means of the "Internet of things." A growing discrepancy between the U.S. and EU privacy doctrines and the allowed government limits on freedom expression make this topic highly salient for any U.S. business operating in Europe, in particular. The course will include an optional practicum, which involves assigning the interested students to a real-life project on the topic with an ICT company, relevant international body, consulting firm, think tank in the field, law firm, relevant

### LAW 472(2) - Securitization

Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets.

As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and

### LAW 482(3 – 4) - Advising Not-For-Profit Organizations: Business Practicum

This course counts as a Comprehensive Simulation and Skills.

Please note: This course is offered in a 4-credit version in the spring semester, and in a 3-credit version in the summer. The differences between the spring and summer versions are noted at the end of this description. Students may take elect to take this course in the spring or in the summer, but not both.

There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well.

Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net

### LAW 483(2 – 4) - Federal Tax Clinic I

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite.

This is a Skills and Live Client Experience course.

### LAW 486(1 – 2) - Federal Tax Clinic II

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. Federal Tax Clinic II affords students from the tax clinic the opportunity to carry their cases through to completion. It is more independent and sophisticated than tax clinic I. Students continue to develop the skills that they learned in tax clinic I, including client interviewing, negotiations, tax litigation, correspondence with the IRS, and preparation of petitions to Tax Court. Federal Income Tax and Tax Clinic I are prerequisites.

This is a Skills and Live Client Experience course.

**LAW 499(1 - 3)  Trial Practice I Applied**

This graded 3 unit course requires instructor permission to enroll. Students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. Students are required to participate in the mandatory evidence boot camp at the start of the semester. Each student is required to apply their learned skills in one or more local, regional, national or invitation mock trial competition. This course satisfies the requirements of Trial Practice I (LAW 411 or LAW 416).

**LAW 509(3)  Federal Courts**

This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client’s substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this context, the federal courts are the main battleground for contesting the allocation of judicial power, but they are also the forum where judges are most likely to determine the allocation of power.

**LAW 522(2)  Election Law**

The legal regulation of elections and electoral politics is the foundational infrastructure of American democracy. This 2 credit course on Election Law will give students an understanding of the themes in the legal regulation of elections and politics. It will cover all the major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. The course will also cover voter fraud and vote suppression. Election law is a product of federal and state law, both constitutional and statutory. Consequently, this course provides a good foundation for students interested in constitutional or statutory litigation. The course will be graded by class participation and either a paper or a take-home exam.

The Legislative Drafting Workshop will provide law students with an introduction to legislative drafting with a specific focus on the unintended consequences that can result from well-meaning legislation. Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment.

The course will be taught by legal professionals with extensive experience in legislative drafting and

**Alternative Dispute Resolution**  
This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical.  
Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures,

This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration.

In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality

Child, Parent and the State

This course examines the legal relationships among children, family and the state, primarily in the context of issues over which dependency (child welfare) courts traditionally have jurisdiction. The subject matter is divided into two sections, the first exploring Supreme Court jurisprudence on the issue of parental rights and family privacy. The second explores the emerging doctrine of children’s rights, also looking to Supreme Court cases that have pronounced limited, but distinct, rights for minors, as well as civil matters including child neglect, abuse, termination of parental rights, and adoption. Law and the Life Sciences
This course will examine a variety of legal, policy, and ethical issues impacting advancements in life sciences. Topics will be explored using an interdisciplinary approach, drawing upon a diverse set of reading materials. Topics to be covered include the intersection of law and science, genetics, stem cell research, biotechnology, nanotechnology, neuroscience, and synthetic biology. A science background is not necessary.

The course is a 2-credit course with a final paper (8-10 pages) and presentation, including two short reaction essays during the semester. It will examine a variety of legal, policy, scientific, social, and ethical issues at the forefront of advancements in the life sciences. The course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials spanning various legal fields such as food and drug law, antitrust law, consumer protection law, and electronic privacy law.

Risk Management, Patient Safety & Quality
Students will utilize reading materials, case studies, hospital risk management scenarios and data sets provided in class to apply knowledge to specific RM and patient safety scenarios and to use critical thinking skills to solve problems. Through the readings and case study analysis students will learn to identify legal, ethical, administrative, compliance, risk management and patient safety issues and to reach resolutions for the problems presented, even when a clear legal response may not be available or in the best interests of the patient. We will be learning how to respond to a variety of risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed. We will also discuss how these perceptions of key stakeholders are in conflict and how those conflicts can be managed. Finally, students will also learn how principles of risk management have changed since the 1998 IOM Report and how the changes in our current health care system will further

Privacy Breach Incident Management and Reporting

A breach of privacy is considered inappropriate use or disclosure of personal data. Numerous laws regulate what constitutes a breach and the legal obligations if there is a breach. This course will examine: (a) what constitutes a "breach" or "incident" under a variety of scenarios and industries, (b) what legal obligations regulated entities have to act on a breach or incident, (c) what liabilities in tort or contract may exist as the result of breaches, (d) corrective actions to manage breaches and minimize recurrence, (e) electronic security measures to minimize breaches and incidents, (f) a survey of the most common cyberattacks for students to gain familiarity with trends in electronic breaches, and (g) practice in drafting notices, incident reports, and corrective actions.

European Union Privacy Law
European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy laws impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

### LAW 871(2)  European Union Competition Law

European Union (EU) competition law is generally considered one of the two most sophisticated systems of competition law in the world (in addition to the United States). It is also the model for the majority of the world's other national and regional systems of competition law. This course is a survey of the substantive competition law of the EU, how it is enforced, and the relationship between EU competition law and the competition law of the 28 EU member states.

<td>Comparative and Ethical Lawyering for the Rule of Law</td>
<td>19-JUL-2017</td>
<td>This course will develop the students' key knowledge and skills required to provide effective advice and assistance in a country with a culture and a legal system different from the culture and legal system in which students received their legal educations. The course will examine and compare the main elements of particular relevance to rule of law assistance work in each of the three major world legal systems: common law, continental civil law and Islamic law and the typical institutional frameworks adopted to organize each of these legal systems. It will also explore customary law sources in developing countries and how they are integrated in a formal way into modern legal systems and/or applied in practice. The course will also provide practical examples of successes and failures of cross-system rule of law assistance efforts attributable to success or failure to manage differences in legal systems and culture and explore relevant strategies for success. Finally, the course will encourage students to consider the ethical dimension of the research.</td>

<td>History, Theory and Practice of Law for Development</td>
<td>19-JUL-2017</td>
<td>This course will develop the students' working knowledge of the history, theoretical models and current approaches of academicians and practitioners to understanding the rule of law. It will examine the relationship between law and development and how that relationship operates in rule of law advising. The course will survey academically-oriented rule of law work in the 1960's and the earlier theoretical work upon which it was based and follow the development of the field to date with a focus on theory and practice of rule of law initiatives undertaken in the setting of international development assistance programs. Examples from bilateral and multilateral assistance efforts will be analyzed to learn from the successes and failures of rule of law initiatives aimed at the promotion of human rights, the promotion of democracy and good governance and the improvement of the legal framework for investment and trade. The course will also explore alternative change models to which rule of advisors can refer in their engagement with counterparts and in the field.</td>

<td>Theory and Practice of Assessments in Rule of Law Advising</td>
<td>19-JUL-2017</td>
<td>This course will provide students with the knowledge and skills required to undertake the assessments of needs, the crucial lynchpin required for the design of specific rule of law initiatives. As this aspect of rule of law work requires the performance of tasks, which are generally outside the experience and training of law graduates, students will be provided with a new set of research and analytic tools and methodologies from outside their field. While concentrating on examples from the legal and justice sector, these tools will include interviewing skills, use of data from existing sources, the generation of new data, the design and conduct of reliable surveys, the use and interpretation of statistical data and the drafting of the assessment documents themselves. The course will relate closely to the courses on Comparative and Ethical Lawyering for the Rule of Law and the International Development Architecture, insofar as assessments will require analysis and description of the state of the target country's legal system, the functioning of the legal sector, the role of institutions and the role of stakeholders.</td>

The supervisor and student will establish a calendar of face-to-face meetings and e-mail feedback sessions that allows for substantial interaction and discussion. School of Nursing - Food and Nutrition - Subject: Food and Nutrition

FONU 215(3)  Course ID:003148  06-JUN-2018
Fundamentals of Nutrition
For non-majors.
Nutrients essential to a healthy diet, consideration of nutrition issues of public concern.
Components: Lecture
Req. Designation: Fieldwork
Room Requirements: General Classroom(1)

FONU 410(3)  Course ID:011734  06-JUN-2018
Nutrition Focused Physical Assessment
Prerequisite: admission to MS/Dietetics program.
This course provides an introduction to the development of physical and lab skills that are necessary for support of the dietitian's practice; in particular these skills are used in nutrition assessment and the provision of medical nutrition therapy. Building upon basic nutrition assessment knowledge and skills, the focus of this course is on development of physical assessment and skills relevant to nutrition care of the individual, and/or to support nutrition program development, delivery or evaluation. Learning methods include lecture, demonstration, laboratory of physical skills, electronic media, and readings.
Components: Lecture(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Lab - Nursing(1)

FONU 422(3)  Course ID:011728  06-JUN-2018
Medical Nutrition Therapy Theory
Prerequisite: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, renal and disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.
Components: Lecture(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1)

FONU 423(2)  Course ID:011729  06-JUN-2018
Supervised Practice (SP) in Medical Nutrition Therapy
Prerequisite: FONU 420 and admission to the Loyola Dietetic Internship.
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.
Components: Field Studies(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1)

FONU 424(3)  Course ID:011730  06-JUN-2018
Public Health Nutrition and Research Theory for Dietetic Practice
Prerequisite: FONU 420 and admission to the Loyola Dietetic Internship.
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.
Components: Lecture(In person)
Requirement Group: Restricted to Graduate Nursing Students.
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1)
### Supervised Practice in Public Health Nutrition, Research, Professional Development & Marketing

Course ID: FONU 425 (2)  
**Prerequisite:** FONU 420 and admission to the Loyola Dietetic Internship.

This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

**Components:**  
- Lecture (In person)  
- Requirement Group: Restricted to Graduate Nursing Students.  
- Req. Designation: Fieldwork  
- Room Requirements: Electronic Classroom (1)

### Food Management Theory: Geriatric Nutrition

Course ID: FONU 426 (1)  

This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

**Components:**  
- Lecture (In person)  
- Requirement Group: Restricted to Graduate Nursing Students.  
- Req. Designation: Fieldwork  
- Room Requirements: Electronic Classroom (1)

### Supervised Practice: Food Management, Geriatric Nutrition

Course ID: FONU 427 (1)  

This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

**Components:**

### Trends in Dietetic Practice

Course ID: FONU 505 (2)  

**Prerequisite:** admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission.

This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergies and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including motivational interviewing for behavior change.

**Outcomes:** Student will demonstrate knowledge in emerging areas related to dietetic practice.

<td>Bridge Course and Nursing Concepts</td>
<td>This course provides conceptual linkage between student's previous nursing education and clinical experiences to professional nursing. The student's background in liberal arts, science and nursing is used as the basis for exploration of theories that guide contemporary nursing practice and leadership. Historical, cultural and political factors that have shaped contemporary nursing and the U.S. health care system are explored. Emphasis is placed on developing an understanding of scientific problem-solving, by accessing and evaluating data from a variety of sources. Critical thinking skills and the ability to evaluate evidence for practice are stressed.</td>

- Lab - Nursing (1)

## Concepts in Older Adult Health

This course introduces students to the care of older adults. It is designed to explore current concepts and practices pertaining to aging. This course provides an overview of the normal physical, psychological, and social-cultural aspects of the aging process. It addresses health and health alterations of aging and exploration of attitudes toward care of the older adult. Enrollment is restricted to students admitted to the BSN program.

**Components:**
- Lecture (In person)

**Requirement Group:**
- Restricted to undergraduate nursing students.

**Room Requirements:**
- Electronic Classroom (1)

## Pathophysiology

Prerequisites: BIOL 152 and BIOL 209.

This course provides the student with knowledge of the basic mechanisms involved in pathophysiological processes.

**Outcome:** The student will be able to use critical thinking skills in the application of pathophysiological processes to clinical practice.

**Components:**
- Seminar

Theories & Concepts for Advanced Clinical Practice
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.

Upon successful completion of the course the student will be able to: 1. Understand the history and driving forces for knowledge development in nursing. 2. Describe the philosophical foundations of nursing and advanced nursing practice. 3. Understand the levels of theory development in nursing. 4. Explain the use of selected concepts and middle-range theories to guide advanced nursing practice. 5. Analyze concepts and theories for use in nursing practice. 6. Analyze the relation between theory, research, and nursing practice.

Social Justice and Ethics in Health Care
This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.

Outcomes:
Upon successful completion of this course the student will be able to: 1. Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics. 2. Analyze social justice and ethical issues at local, national, and global levels. 3. Apply professional codes to individual and interwoven issues of social justice, ethics and leadership. 4. Develop a plan to address population

Research for Advanced Clinical Practice
This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include: understanding relationships among theory, research, principles of epidemiology and practice; formulating research and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

Population-Focused Health
This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.
1. Analyze the role of federal, state, and local governments in population health. 2. Assess population specific health needs using Healthy People and the determinants of health as frameworks. 3. Examine the role of the World Health Organization and non-governmental organizations in population health. 4. Analyze health disparities and needs of priority populations using databases. 5. Apply epidemiologic concepts when completing a population needs assessment. 6. Examine evidence-based interventions for population specific health needs.

Health Care Policy and Economics
Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.
Outcomes:
Upon successful completion of this course the student will be able to: 1. Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels. 2. Analyze the effects of health policy. 3. Analyze the effects of economic factors on health care decision making. 4. Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research. 5. Design practice improvement recommendations that account for policy, economic and

Research Internship
This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

Adv Prac Nurs Substance Use & Addictive I
This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and manage clients with substance use and addictive disorders. Pharmacological and non-pharmacological interventions for management of substance use and addictive disorders are addressed.
Prerequisite: GNUR 474 - Psychiatric Mental Health Care Across the Lifespan II
Outcomes: Upon successful completion of the course, the student will be able to: 1. Synthesize evidence-based scientific theories of substance use and addictive disorders. 2. Understand the neurobiological aspects of addiction, 3. Assess and diagnose substance use and addictive disorders for clients. 4. Apply pharmacologic,

Philosophy of Nursing: Nursing as a Moral Practice
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Grantsmanship
Prerequisite: GNUR 512 and GNUR 513.
This course provides students with a basic understanding of the research grant application process. The overarching objective is to foster fundamental skills and strategies needed to prepare and submit a competitive research grant proposal. Emphasis is placed on the means by which to best position a research grant application for success. Sources and types of funding from governmental agencies, private foundations and professional societies are considered, with an emphasis on federal (NIH, AHRQ) grant programs, mechanisms, application and review process. Key aspects of successful proposal development from conceptualization of an idea or research question to submission of the application is fully developed and explored. Strategies for successful writing of each component of a research grant are provided using examples

Nursing and Health Policy
The course focuses on policy dimensions affecting nursing and health care clinical practice, research, and educational environments. The history, structure, and processes of health policymaking at national through local levels are examined. Influential forces that shape health policy are addressed, including the leadership role of nurse scholars as members of the nursing profession and discipline. Issues of health care access, health disparities, quality, cost and global health are examined.

**Evidence Translation for Adv Clinical Practice**

This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.

Upon successful completion of this course the student will be able to:  
7. Formulate questions about population-based practice problems, issues and areas for improvement in context.

Introduction to Health Care Fiscal Management

This course introduces the student to the fundamental concepts and issues related to the financial management of health care organizations. Building on previous courses in the Health Systems Management major, the student will analyze the impact of the U.S. health care payment system on both the provision of care and on managerial decision-making regarding how care is organized and delivered. The course examines the concepts of cost accounting, including activity-based costing, cost behavior, budgeting, cost/benefit, and cost-effectiveness analysis as applied to health care management. Financial concepts and reimbursement mechanisms for health providers are examined including the cost of health care in society. Examination of the impact of the uninsured on the cost of health care, along with access and quality, will be included.

Reimbursement coding, coverage, and payment will be explored. The use of technology to manage data is explored. Describes how cost data can be used for decision-making.

Organizing and Planning Techniques for Leaders

This course provides the framework for setting and maintaining priorities and setting efficiencies throughout the organization, balancing priorities and time, and establishing team and individual roles. Integration of ethical practices is reviewed within the processes of organizing and planning high performance functions.

Prerequisite: CPST 210; Restricted to Leadership majors only

At the end of this course, the student will be able to:
1. Identify best practices for large and small group project organizing and planning.
2. Develop techniques for prioritizing competing priorities and individual work responsibilities.
3. Establish methods for building tactical and operational plans.
4. Differentiate team roles and individual roles and required organizational structures.

Relationship Building for Organizational Leaders

Relationship building calls on the critical skill set of emotional intelligence. This course develops the framework for productive leader-follower relationships. Reflecting on intra-personal leadership skill and building on inter-personal leadership capabilities is of primary focus. Personal assessment and active assignments provide opportunity to develop the important ability to perceive needs of followers in order to ethically motivate towards accomplishment of organizational goals.

Prerequisite: CPST 210; Restricted to Leadership majors only

At the end of this course, the student will be able to:
1. Identify and apply skills of emotional intelligence.
2. Develop best practices for building trust and motivation within teams.
3. Recognize the basics of mobile-application architecture and design.
4. Be familiar with the basics of user-interface design.

Software Development for Mobile Devices

Pre-requisites for this course are COMP 251, CPST 291. Restricted to students in the School of Continuing & Professional Studies.

This course introduces software development for the Android environment, using the AppInventor framework. The course also introduces the basics of user-interface design and mobile architecture. Development work may be done on either an Android device or on an Android emulator running on a Windows/Mac/Linux laptop.

Requirements:
- Be able to develop simple Android applications using the App Inventor framework
- Be able to explain the basics of mobile-application architecture and design
- Be familiar with the basics of user-interface design

Influence and Leadership

Influence allows leaders to motivate follower movement towards organizational goals. This course establishes methods for leveraging expertise, communicating skillfully, and functioning with integrity. It integrates general management skills with the motivation to assume responsibility over others and create a positive and ethical organizational climate.

Prerequisite: CPST 210; Restricted to Leadership majors only

At the end of this course, the student will be able to:
1. Differentiate between the roles of leaders and managers, and various sources of power.
2. Identify ethical influencing principles that guide teams towards accomplishment of goals.

Introduction to Global Trade Compliance

- Restricted to students in the School of Continuing & Professional Studies. Prerequisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201
- At the end of the course, the student will be able to:
  1. Identify the basic regulatory framework for import compliance (e.g., customs valuation, tariff classification and country of origin)
  2. Identify the basic components of the government's role in the regulatory framework, and common risk areas that impact business activities.

Environmental Economics & Resource Management

- The purpose of this course is to help students understand the role of economics in analyzing natural resource management and the role of economics in the development of environmental policy. An understanding of economic models of efficiency is integral to any discussion of innovative ways to approach our natural resource constraints in the 21st century and beyond. The focus of the course will be on energy, energy efficiency and renewable energy sources, and the cost of pollution and climate change. The renewed interest in innovative technologies that reduce emissions, waste and improve bottom lines provides a new impetus for investment in renewables and new technologies. The second part of the course will be devoted to highlighting opportunities for companies, citizens and entrepreneurs to create jobs and improve communities. By the end of the course, it is hoped that students will find that as citizens, entrepreneurs or corporate executives, they can do well financially by doing good environmentally.

Development and Change in Organizations

- Prerequisites: CPST 250
- Outcome: Students will provide case studies that integrate data; design interventions, change strategies and an evaluation for diagnosing organizations, groups and jobs.
Intra-personal Leadership
Intra-personal leadership principles highlight the drive, energy and motivation one has toward leading effectively. Exploring what it means to bring positive organizational energy to the leadership role in a way that ethically supports organizational mission is at the foundation of this course. Effectively leading through complexity begins at the individual level and requires the ability to develop, motivate, and support the accomplishment of others.

Prerequisite: CPST 210; Restricted to Leadership majors only

At the end of this course, the student will be able to 1. Examine personal goals for growth, challenge, achievement, and success 2. Develop requirements for fulfilling relationships and balancing work and life 3.
