**Course ID:** 013001  
**01-JAN-2017**

**Course Title:** Introductory Accounting II  
**Prerequisite:** ACCT 201 Introductory Accounting I

**Course Description:** This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.

Enterprise risk management considers all the risks faced by the firm and attempts to integrate these disparate risks into a single unified analytical framework. Traditionally, risk has been managed in the compartments of financial risk, operating risk, and credit risk. Rather than allowing risk to remain in such "silos," ERM insists that these must be brought together into one system of risk management.

Culture, Identity and Performance
This course examines the beliefs, values, sub-cultural traditions and performance of identity(ies) typically associated with persons of African heritage in various areas and contexts across the African world. This interdisciplinary approach will engage early black film, ethnography, slave narratives, performance and performance theory as tools to unpack multiple contested ideas, beliefs and ideologies concerning the nature of black self-identity and expression.

### Research Methods in Black World Studies

Chicago has a growing number of newly formed communities whose ancestors are/were African. Among such populations are Cuban, Haitian, Nigerian, Belizean, and Jamaican peoples. These neo-African communities in Chicago tend to cluster in patterns related to available housing, ethnicity and natality. Many factors including language barriers, educational and employment disadvantages as well as cultural ubiquity often leave these newcomers’ needs unattended. This course provides instruction in research methods useful in understanding the social and political needs of such marginalized populations. The primary research model for this course is Participatory Action Research methods.
