MATH 212(3)  Course ID:005027  06-JUN-2018
Linear Algebra
Prerequisite:  MATH 132 or 162

This course provides an introduction to linear algebra in abstract vector spaces with an emphasis on R^n, covering topics such as Gaussian elimination, matrix algebra, linear independence and spanning, linear transformations and eigenvalues; software packages such as MAPLE may be used.

Outcome: Students will receive an introduction to abstract mathematics in a setting that encourages the thinking needed in more advanced mathematics courses.

Components: Lecture
Requirement Group: Pre-requisite: MATH 132 or MATH 162.
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

MATH 215(3)  Course ID:010343  06-JUN-2018
Object-Oriented Programming with Mathematics
Prerequisites: MATH 132 or MATH 162 or permission of instructor

This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.

Outcome: Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems.

## MATH 266(3)
### Course ID: 013161  15-JUN-2015
**Differential Equations and Linear Algebra**
This course provides an introduction to basic topics in ordinary differential equations and linear algebra. Topics include first and second-order differential equations, Laplace transform, systems of first-order differential equations, systems of linear algebraic equations, matrix algebra, bases and dimension for vector spaces, linear independence, linear transformations, determinants, eigenvalues, and eigenvectors.

**Prerequisites:** MATH 263

**Outcomes:** Students will learn fundamental results and methods in ordinary differential equations and linear algebra, with a strong emphasis on topics that are particularly relevant for Engineering Science.

### MATH 352(3)  Introduction to Real Analysis II  
**Course ID:** 005055  
**Date:** 06-JUN-2018  
**Prerequisite:** MATH 351  

This course, a continuation of Mathematics 351, provides the theoretical background for differentiability and integrability on $\mathbb{R}$ and $\mathbb{R}^n$ and Taylor’s theorem, the change of variable theorem, the inverse and implicit function theorems, Lebesgue integration, and other selected topics.

**Outcome:** Students will obtain an understanding of topics in advanced analysis that will prepare them for graduate level work in mathematics.

Introduction to Partial Differential Equations

This course provides an introduction to basic topics in partial differential equations (PDE). In addition to first order PDE, such as the transport equation, the main types of second order PDE, including the Laplace equation, the heat equation, and the wave equation, will be studied in detail.

- **Prerequisite:** MATH 264
- **Outcomes:** Students will learn fundamental results and methods in partial differential equations and their applications.

**MATH 366(3)**

Applied Dynamical Systems

Modeling, analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.

**Course Catalog**

**College of Arts and Sciences - Mathematical Sciences - Subject: Mathematical Sciences**

**MATH 388(1 - 3)**

**Course ID:** 005075  
**06-JUN-2018**

**Special Topics in Mathematics**

This course covers advanced topics in mathematics, including analysis, topology, algebra, applied mathematics, and logic.

**Outcome:** Students will obtain an understanding of an advanced topic in their major.

**Components:** Lecture

**Req. Designation:** Service Learning

**Room Requirements:** General Classroom(1)

**MATH 390(1)**

**Course ID:** 005076  
**06-JUN-2018**

**Undergraduate Seminar**

Prerequisites: Senior Standing, including completion of Math 304/Stat 304 or Math 313 or Math 351.

The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.

**Outcomes:** Students will gain the ability to present material in Mathematics and applications to a general audience.

**Components:** Seminar(In person)

**Requirement Group:** Senior Standing, including completion of Math 304/Stat 304 or Math 313 or Math 351

**Req. Designation:** Service Learning

**Room Requirements:** Electronic Classroom(1)

**MATH 395(3)**

**Course ID:** 012850  
**06-JUN-2018**

**Capstone Seminar**

Prerequisites: MATH 313 Abstract Algebra, MATH 351 Introduction to Real Analysis I, and MATH 390 Undergraduate Seminar

The course unifies the knowledge gained in previous Mathematics courses and provides an opportunity for in-depth study and presentation of advanced material not usually covered in the standard Mathematics curriculum.

**Outcomes:** Students will learn how to integrate previous knowledge in exploring new topics in Mathematics, discover applications to other disciplines, and refine their mathematical writing and presentation skills.

**Components:** Seminar(In person)

**Requirement Group:** Prerequisites: MATH 313 Abstract Algebra, MATH 351 Introduction to Real Analysis I, and MATH 390 Undergraduate Seminar

**Req. Designation:** Service Learning

**Room Requirements:** Electronic Classroom(1)

**MATH 396(1)**

**Course ID:** 005077  
**06-JUN-2018**

**Actuarial Seminar I**

Prerequisites: MATH 212, 263.

Topics in calculus of one and several variables and linear algebra directed toward preparing students for the first actuarial examination. May be repeated for credit.

**Components:** Seminar

**Req. Designation:** Service Learning

**Room Requirements:** Seminar(1)

**MATH 397(1)**

**Course ID:** 005078  
**06-JUN-2018**

**Actuarial Seminar II**

Prerequisite: STAT 304.

Topics in probability and risk management directed toward preparing students for the first actuarial examination. May be repeated for credit.

**Components:** Seminar

**Req. Designation:** Service Learning

**Room Requirements:** Seminar(1)
### MATH 398(1 - 6)
**Course ID:** 005079  
**06-JUN-2018**  
**Department Consent Required**  
**Independent Study**

This course allows students to engage in independent study on selected topics in mathematics under the supervision of a faculty member.

**Outcome:** Students will obtain an understanding of an advanced topic in their major.

**Components:** Independent Study

**Req. Designation:** Service Learning

**Introduction to Probability & Statistics**

This course is a Calculus-based rigorous introduction to basic topics in probability (distributions, expectations, variance, central limit theorem and the law of large numbers, moment generating functions, etc.) and statistics (estimation, hypothesis testing, regression, design of experiments) needed in engineering and science applications.

**Prerequisite:** MATH 132 or 162 (with grade of C or better)

**Outcomes:** The students will obtain required knowledge in probability and statistics useful in every area of engineering and science. They will learn how to assess data and outcomes of experiments.

**Components:** Lecture

**Requirement Group:** Pre-requisite: MATH 132 or MATH 162

**STAT 303(3) SAS Programming & Applied Statistics**

Prerequisite: STAT 103 or 203 or 335

This course provides an introduction to SAS programming in the context of practical problems taken from applied statistics.

Outcome: Students obtain extensive experience with data-set manipulations, SAS procedures, and their application in contexts such as t-tests, simple and multiple regression, ANOVA, and regression.

Components: Lecture

STAT 311(3)  Applied Survival Analysis  Course ID: 013571  15-JUN-2018
Prerequisite: STAT 308 (Applied Regression Analysis)

This course focuses on methods for analyzing time-to-event data. The course will explore non-parametric methods for analyzing time-to-event data like Life tables, the Kaplan-Meier method, the Nelson-Aalen method and the log-rank test. This course will also explore semi-parametric models such as the Cox proportional hazards regression models and parametric models including exponential, Weibull and log-logistic regression model.

Prerequisite: STAT 308 (Applied Regression Analysis)

Outcomes: Derive survival and hazard functions from an underlying distribution, calculate survival probabilities and hazard rates, compare survival probabilities and hazard ratios between two or more cohorts.

Nonparametric Statistical Methods
This course will cover the basic principles of nonparametric methods in statistics including: one, two and K sample location methods; tests of randomness; tests of goodness of fit; nonlinear correlation; histogram; density estimation; nonparametric regression.

Prerequisite: STAT 203 Introduction to Probability and Statistics

Students should learn how to apply the nonparametric techniques in real datasets, interpret the results and draw conclusions.

Components:
- Lecture (In person)

Requirement Group:
- Prerequisite STAT 203, C- or higher

Room Requirements:
- Electronic Classroom(1)

Data Science Consulting
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).

Prerequisite: STAT 308

Outcomes:
- Apply methods learned in classes to address a real world problem.
- Oral and Written presentation skills.
- Collaboration skills.

Components:
- Lecture

Requirement Group:
- Prerequisite: STAT 308, C- or higher

Room Requirements:

Undergraduate Seminar
Prerequisites: Senior Standing, including completion of Math 304/Stat 304

The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.

Outcomes:
- Students will gain the ability to present material in Statistics, and their applications to a general audience.

Components:

### ARAB 101 (3)

**Arabic I**  
This course is designed for beginners and those with modest acquaintance to Arabic. Through a culturally rich context, it focuses on functional articulation of Modern Standard Arabic with a limited exposure to Damascene (Shaami) dialect.

Outcome: Students will be able to write simple sentences, understand selected principles of basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect. Students will learn aspects of Arab culture.

**ARABIC 102**  
Prerequisite: ARABIC 101 OR EQUIVALENT, "Students' self-assessment is not sufficient for placement in an appropriate level of Arabic class."

This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect to help students develop speaking, listening, reading comprehension, and writing skills in diverse sociocultural contexts.

Outcome: Students are expected to be able to sustain conversations on daily life topics, to comprehend and compose simple authentic multimodal texts, and integrate interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a project.

Prerequisite: ARABIC 102 OR EQUIVALENT, "Students' self-assessment is not sufficient for placement in an appropriate level of Arabic class."

This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect in familiar topics reflecting the behavior of native speakers. Students are expected to reach low-mid intermediate proficiency levels.

Outcomes: Students are expected to be able to initiate and sustain simple social interactions about self and immediate environment. Students will be able to comprehend and compose simple authentic multimodal texts and apply such interdisciplinary knowledge of the Arab world (language, religion, history, geography, or other related fields).

American Sign Language II

This course is designed for students who have completed a college level ASL I course and have a basic knowledge of ASL. It is the second course in the ASL series at Loyola and presents intermediate skills and use of ASL and continued working knowledge of Deaf & Hard of Hearing culture.

Prerequisite ASL 101 or equivalent.

Students will:
1) demonstrate abilities to comprehend and communicate in ASL at an intermediate level.
2) demonstrate an understanding of Deaf & Hard of Hearing communities.

In an independent study format, students write a 10-15 page paper that synthesizes the knowledge gained in their coursework into an interdisciplinary project, combining that knowledge with the student's other academic interests. Alternatively, students may secure a supervised internship at a German-related institution or organization that also lines up with their interests.

Students must be near completion of most requirements for German Studies Minor in order to be eligible for enrollment.

Outcomes: Interdisciplinary synthesis of coursework into a paper, or outcomes based on a specific internship, including a reflection component.

### MSTU 326(3) - The Vikings
**Course ID: 010435**  | **06-JUN-2018**
---
The Vikings are popularly thought of as invaders, marauders, destroyers of civilized peace. However, recent research has focused on their society, culture, accomplishments and contributions in a much more positive sense.

**Outcome:** Students will gain an understanding of the impact of the Vikings on mainstream European development (and vice versa); a knowledge of recent historiographical issues concerning the Vikings; and an awareness of the various types of primary sources (written and material) for this period.
**Components:** Lecture*(In person)*
**Course Equivalents:** HIST 254A
**Req. Designation:** Undergraduate Research
**Room Requirements:** General Classroom(1)

### MSTU 328(3) - Formation Medieval Eur 300-1100

### MSTU 330(3) - Shipwreck Archaeology
**Course ID: 010436**  | **06-JUN-2018**
---
Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago.

**Outcome:** Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum.
**Components:** Lecture*(In person)*
**Course Equivalents:** CLST 324, ANTH 347, HIST 309
**Req. Designation:** Undergraduate Research
**Room Requirements:** General Classroom(1)

**PHYS 101(3) - Liberal Arts Physics**

*Requirement: UCSF 137 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience.*

For non-science majors. Selected topics from classical and modern physics emphasizing beauty, symmetry, and simplicity. Contemporary issues of physics and society.

**Outcome:** Understanding of interaction between theory and experiment, role of physics in society, science vs. nonscience; solve problems using algebra, geometry, vectors, and graphs; synthesize disparate physics topics.

**Components:** Lecture

**Attributes:** Tier 2 Scientific Knowledge

**Room Requirements:** Electronic Classroom(1)

---

**PHYS 102(3) - Planetary and Stellar Astronomy**

*Requirement: UCSF 137 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience.*

This course covers the astronomy of the solar system and planetary science as well as the astronomy of stars and galaxies. This includes study of earth and comparative study of all the planets, as well as the birth, evolution, and death of stars, the clustering of stars and galaxies, the expanding universe and cosmology.

**Outcome:** Students will demonstrate an understanding of the fundamental knowledge and concepts in astronomy, the qualitative and quantitative reasoning used, and how this science can be applied.

**Components:** Lecture(In person)

**Attributes:** Tier 2 Scientific Knowledge

**Room Requirements:** Electronic Classroom(1)

---

**PHYS 103(3) - Planet & Solar System Astronomy**

The development of planetary astronomy from ancient times to current knowledge, including the origin of the solar system, its components and the processes that formed them. Space probe and advanced telescope data may be used.

**Outcome:** Students will demonstrate an understanding of the fundamental knowledge and concepts in astronomy, the qualitative and quantitative reasoning used, and how this science can be applied.

**Components:** Lecture

**Attributes:** Service Learning

**Room Requirements:** Electronic Classroom(1)

## PHYS 104(3)
**Course ID:** 005847  
**Course Name:** Astronomy of Stars & Galaxies  
**Date:** 06-JUN-2018

This course for non-science majors studies basic concepts about the birth, evolution, and death of stars, the clustering of stars and galaxies, the expanding universe and cosmology.

**Outcome:** Demonstrate understanding of mechanics, interaction of light and matter, various observational tools, and an introduction to philosophy and methods of science.

**Components:** Lecture (In person)  
**Req. Designation:** Service Learning  
**Room Requirements:** Electronic Classroom(1)

---

## PHYS 105(3)
**Course ID:** 005848  
**Course Name:** Observational Astronomy  
**Date:** 06-JUN-2018

Prerequisite: PHYS 103 or 104.

This course builds on contents learned from PHYS 103 or PHYS 104.

**Outcome:** Learn the observational basis of astronomy with special emphasis on student projects. Projects provide introduction to instrumentation and methods used in astronomical observations including the use of a telescopes, as well as various spectroscopic and optics equipment.

**Components:** Lecture  
**Req. Designation:** Service Learning  
**Room Requirements:** Electronic Classroom(1)

## PHYS 106(3)
**Course ID:** 009876  
**Course Name:** Physics of Music  
**Date:** 06-JUN-2018

Requirement: UCSF 137 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience.

Language, structure, history and styles of music; motion, force, energy and waves applied to production of sound; physical properties of instruments and musical acoustics.

**Outcome:** Knowledge of music fundamentals; understand how instruments function; apply physics concepts and experimentation to analyze the production of music and acoustics.

**Components:** Lecture  
**Attributes:** Tier 2 Scientific Knowledge  
**Req. Designation:** Service Learning  
**Room Requirements:** General Classroom(1)

## PHYS 111(3)
**Course ID:** 005849  
**Course Name:** College Physics I Lec / Dis  
**Date:** 01-MAY-2016

Prerequisite: Math Placement Test or Math 118

Non-calculus introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics.

**Outcome:** Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems.

**Components:** Discussion (In person), Lecture (In person)  
**Attributes:** Forensic Science  
**Requirement Group:** Prerequisite: Math Placement Test or Math 118

Modern Physics Laboratory  
Corequisite: PHYS 235  
Course ID: 005871  
15-JUN-2013

Modern physics experiments including electromagnetic waves (microwaves), interferometry, spectroscopy, electron and quantum physics, and solid state physics.

Outcome: Students will gain hands on experience and familiarity with experiments from early modern physics, the ability to use spreadsheets and symbolic algebraic software for problem solving and data interpretation, and experience documenting and reporting results including historical background searches.

Electronics Laboratory
Prerequisite: PHYS 126 or its equivalent, Co-requisite PHYS 303.

Students will learn to use various electronic components, instruments, techniques, and applications. This course complements PHYS 303, which is a co-requisite or a prerequisite.

Outcome: Students should get a deeper understanding of the material covered in PHYS 303 (Analog and digital electronics) by experimentally verifying many of the concepts covered in that course. Students will also learn to recognize various components and develop confidence in using them.
Components: Laboratory(In person)
Req. Designation: Undergraduate Research
Room Requirements: Lab - Physics(1)

PHYS 304(3)  Course ID:005877  06-JUN-2018
Electronics II
Prerequisite: PHYS 303 and 303L

A continuation of PHYS 303.

Outcome: Students will gain an understanding of regulator and controlled rectifier circuits, modulation and detection, power amplifiers, active-filters, phase-locked loop, lock-in amplifier, and opto-electronic circuits.
Components: Lecture(In person)
Requirement Group: Prerequisite: PHYS 303 and PHYS 303L
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

PHYS 305(2)  Course ID:005878  06-JUN-2018
Nuclear Physics Laboratory
Components: Laboratory
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

PHYS 310(3)  Course ID:005879  23-JUN-2011
Optics
Prerequisites: PHYS 126 & PHYS 301
Corequisite: PHYS 310L

Electromagnetic nature of light, geometrical optics, polarization, Fresnel relations, interference, Fraunhofer and Fresnel diffraction, Fourier optics, lasers, and holography.

Outcome: Students will gain knowledge of the principles of classical and modern optics, the role of optics in the development of quantum mechanics and its applications to modern technology.
Components: Lecture(In person)
Requirement Group: Co-requisite for PHYS 310: PHYS 310L. Prerequisite: PHYS 235 and PHYS 301. Restricted to Physics majors.
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

PHYS 310L(1)  Course ID:011237  06-JUN-2018
Optics Lab
Prerequisites: PHYS 126 or its equivalent, Co-requisite PHYS 310.

Students will learn to use various optical components, instruments, techniques, and applications. This course complements PHYS 310, which is a co-requisite or a prerequisite.

Outcome: Students should get a deeper understanding of the material covered in PHYS 310 (Geometrical and wave optics) by experimentally verifying many of the concepts covered in that course. Students will also learn to recognize various components and develop confidence in using them.
Components: Laboratory(In person)
Req. Designation: Undergraduate Research
Room Requirements: Lab - Physics(1)
College of Arts and Sciences - Physics - Subject: Physics

**PHYS 314(3) Course ID:005880 06-JUN-2018**

**Theoretical Mechanics I**
Newtonian particle dynamics, conservation theorems, oscillations, gravitation, generalized coordinates, Lagrange and Hamilton formalisms.

Outcome: Students will gain understanding of analytical and numerical methods of mechanics, understanding of principles in dynamics, and experience in applying formalisms of Lagrange and Hamilton to mechanics in preparation for other areas of physics and engineering.

Components: Lecture (In person)
Requirement Group: Pre-requisite: PHYS 126; Co-Requisites: MATH 264 and PHYS 301
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

**PHYS 315(3) Course ID:005881 06-JUN-2018**

**Theoretical Mechanics II**
Prerequisite: PHYS 314

This course is a continuation of Physics 314 and covers dynamics of system of particles, moving coordinates, rigid body dynamics, systems of oscillators, motion in a central force field, relativity.

Outcome: Students will gain understanding of analytical and numerical methods of mechanics, and of the laws of dynamics and their applications.

Components: Lecture (In person)
Requirement Group: Prerequisite: PHYS 314
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

**PHYS 328(3) Course ID:005882 06-JUN-2018**

**Thermal Phys & Stat Mechanics**
Prerequisites: PHYS 235 and PHYS 301

This course examines the fundamental concepts of temperature, entropy, and thermodynamic equilibrium, the first and second law, engines, the third law, and Boltzmann, Fermi-Dirac, and Bose-Einstein statistics.

Outcome: Students will learn to compare thermodynamical versus statistical characterizations of macroscopic systems with applications ranging from analyzing Fermi gases and black body radiation to information theory.

Components: Lecture
Requirement Group: Prerequisite: PHYS 235 and PHYS 301
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)

**PHYS 338(1) Course ID:005872 15-JUN-2016**

**Intermediate Physics Laboratory**
Laboratories involve learning software, interfacing and areas of applied physics.

Outcome: Students will gain an understanding of elements of real measurements through signal processing, error estimation, equipment choice, and design.

Components: Laboratory (In person)
Requirement Group: Prerequisite: PHYS 235L. Restricted to Physics Majors and Theoretical Physics/Applied Math Majors
Req. Designation: Undergraduate Research
Room Requirements: Lab - Physics(1)

**PHYS 351(3) Course ID:005883 15-JUN-2019**

**Electricity and Magnetism I**
Prerequisite: PHYS 235, 301 & MATH 264

Electrostatics and magnetostatics in a vacuum as well as in linear media, and an introduction to electrodynamics.

Outcome: Students will gain an understanding of mathematical methods of electrodynamics, of static electricity and magnetism including Coulomb's, Gauss', Ampere's, and Faraday's laws and their applications, and of solutions of Laplace's and Maxwell's equations.

Components: Discussion, Lecture (In person)
Requirement Group: Prerequisite: PHYS 235, PHYS 301 and MATH 264. Restricted to Physics, Biophysics, and Theoretical Physics Majors
Req. Designation: Undergraduate Research
Room Requirements: Electronic Classroom(1)
College of Arts and Sciences - Physics - Subject: Physics

PHYS 352(3)  Course ID: 005884  06-JUN-2018  
Electricity and Magnetism II  
Prerequisite: PHYS 351. 
Introduction to electrodynamics and the special theory of relativity. 
Outcome: Students will gain an understanding of electromagnetic field energy and momentum, Maxwell's equations and their applications including electromagnetic radiation and emission, involving retarded potentials and Lorentz covariance. 
Components: Lecture  
Requirement Group: Prerequisite: PHYS 351  
Req. Designation: Undergraduate Research  
Room Requirements: Electronic Classroom(1)

PHYS 361(3)  Course ID: 005885  23-JUN-2011  
Quantum Mechanics I  
Prerequisites: PHYS 235 & PHYS 301  
Non-relativistic quantum mechanics. 
Outcome: Students will understand and use separation of variables, finite polynomials, and matrix algebra to solve the Schroedinger equation, explain microscopic structure of matter, and describe philosophical interpretations of quantum mechanics. 
Components: Discussion(In person), Lecture(In person)  
Requirement Group: Prerequisite: PHYS 235 & 301. Restricted to Physics and Theoretical Physics/Appplied Math majors.  
Req. Designation: Undergraduate Research  
Room Requirements: Lab - Chemistry(1), Electronic Classroom(1)

PHYS 362(3)  Course ID: 012109  06-JUN-2018  
Quantum Mechanics II  
Prerequisites: PHYS 361  
Continuation of PHYS 361. Emphasis of angular momentum, approximation methods, time evolution, quantum theory of radiation, scattering theory and selected topics. 
Outcome: Students will understand and use separation of variables, algebraic approach to representation of angular momentum. They will be able to compute scattering cross-sections of identical and non-identical particles. 
Components: Discussion(In person), Lecture(In person)  
Requirement Group: Prerequisite: PHYS 361  
Req. Designation: Undergraduate Research  
Room Requirements: Electronic Classroom(1), Electronic Classroom(1)

PHYS 366(3)  Course ID: 005886  06-JUN-2018  
Microcomputer Des & Interfac  
Prerequisite: MATH 362 or PHYS 266.  
Computer architecture, CPU logic, data acquisition, signal conditioning, analog/digital conversion and computer interfacing. 
Outcome: Students will gain a working knowledge of interfacing techniques and design, hands-on experience with professional interfacing hardware and software, and the ability to document and report experimental results. 
Components: Laboratory  
Course Equivalents: COMP 366  
Req. Designation: Undergraduate Research  
Room Requirements: Electronic Classroom(1)

PHYS 371(3)  Course ID: 013233  06-JUN-2018  Department Consent Required  
Biophysics  
An upper-level course in biological physics focused on a quantitative description of the physical processes driving molecular and cellular processes with an emphasis on experiment design and analysis. Prerequisites: PHYS 235 & 301; Restricted to Biophysocs and Physics Majors  
Outcomes: Students will understand how to apply physical principles and probabilistic analysis toward the study of biological phenomena at molecular and cellular levels. 
Components: Lecture(In person)  
Requirement Group: Prerequisites: PHYS 235 & 301; Restricted to Biophysocs and Physics Majors  
Req. Designation: Undergraduate Research  
Room Requirements: Seminar(1)
### PHYS 380 (1 - 3)  
**Course ID:** 005887  
**06-JUN-2018**

**Special Topics in Physics**

Prerequisite: Instructor's permission.

This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated.

**Outcome:** Students will understand the material of the course and develop an ability to apply the knowledge gained to other contexts.

**Components:** Lecture

**Topics:** General Relativity, Quantum Mechanics II, Solid State Phys & Material Sc, Mechanics, Astrophysics, Intro/Supersymmetric QuanMech, Quantum Mechanics II, Granular hydrodynamics research, BioPhysics, History of Physics, Concepts Mechanics, E&M and QM, Particle Physics, Mathematical Methods in Physics II, Introductory Astrophysics

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Physics(1)

### PHYS 391 (1 - 12)

**Course ID:** 005891  
**01-SEP-2012**

**Research**

Corequisite: PHYS 126

Research in physics or an associated field. This is a variable credit course and can be repeated.

**Outcome:** Under the guidance of a faculty member, students study and understand research methods employed by physicists and gain a deeper understanding of a particular area of physics.

**Components:** Laboratory(In person)

**Topics:** Comp Study - Cuneo and Dumbach, Astrophysics

**Course Equivalents:** PHYS 385, PHYS 386

**Attributes:** Engaged Learning

**Requirement Group:** Corequisite: PHYS 126

**Req. Designation:** Undergraduate Research

**Room Requirements:** Lab - Physics(1)

### International Relations in an Age of Globalization

**Course ID:** 005944  
**Credit Hours:** 3  
**Run Date:** 15-JUN-2017

**Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism.**

**Outcome:** Students will be able to demonstrate an understanding of the main approaches to the study of international politics and to analyze and assess such major substantive issues as interstate war, terrorism, arms control, international political economy and sustainable development.

**Components:**  
Lecture (In person)

**Course Equivalents:**  
ACPOL 202, AFR 110, PAX 102

**Attributes:**  
Foundational Societal Knowledge, African Studies and the African Diaspora, Black World Studies, Global & International Studies, Peace Studies

### Mock Trial

**Course ID:** 013664  
**Credit Hours:** 3  
**Run Date:** 15-JUN-2019

**Mock Trial**  
Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments. Mock trial is an engaged learning course.

**Prior Permission is required.**

**Outcomes:**  
Mock trials are an activity that promotes critical thinking and reasoning. They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures.

**Components:**  
Lecture (In person)

**Attributes:**  
Engaged Learning

**Room Requirements:**  
Electronic Classroom(1)

### Moot Court

**Course ID:** 013666  
**Credit Hours:** 3  
**Run Date:** 15-JUN-2019

**Moot Court**  
Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course.

**Outcomes:**  
Moot court competitions are an activity that promotes critical thinking and reasoning. They will enhance their ability-to-think-on-their-feet skills, their legal research skills, and their public-speaking skills. Students gain knowledge of legal argumentation and constitutional law.

**Components:**  
Lecture (In person)

**Attributes:**  
Engaged Learning

*Catholicism, Islam and Democracy*

Prerequisites: Sophomore status

This course comparatively explores themes related to the process of democratization in Catholic and Muslim settings. The second half of the 20th century saw significant and sustainable expansion of political rights and civil liberties especially in predominantly Catholic countries in Europe and Latin America. Most recently, democratic struggles have gained impetus in several Muslim countries in the Middle East and South-East Asia. Particularly interesting is the transformation of religious actors (e.g., the Catholic Church, clergy, non-governmental organizations, political parties) from bastions of authoritarian status quo into supporters of progressive political change.

### PSYC 306(3)
**Course ID:** 006165  **06-JUN-2018**

**Research Methods in Psych**  
Prerequisite: PSYC 304.

Logic and theory of the scientific method. Basic principles of scientific research methodologies employed in approaching major problem areas in psychology. This class is writing intensive.

**Outcomes:**  
Students will demonstrate knowledge and skills necessary to formulate research questions and hypotheses, develop research designs, operationalize variables and gather data in an ethical manner, choose appropriate statistical methods for analyzing data, interpret results of statistical analyses, write a scientific paper in APA style, and critically evaluate research.

**Components:**  
Lecture (In person)

**Attributes:**  
Human Services, Urban Studies

**Requirement Group:** Prerequisite: PSYC 304 (C-)

**Req. Designation:** Writing Intensive

**Room Requirements:** General Classroom(1)

### PSYC 307(3)
**Course ID:** 006167  **06-JUN-2018**

**Psychology of Language**  
Prerequisite: PSYC 101

Analysis of language as symbol-behavior specific to humans, language structure and competence, language performance, and the neurophysiological basis of language. Methods for investigating language processing, acquisition, bilingualism, and language disorders will be considered.

**Outcomes:**  
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of language.

**Components:**  
Lecture (In person)

**Requirement Group:** Prerequisite: PSYC 101

**Req. Designation:** Writing Intensive

**Room Requirements:** General Classroom(1)

### PSYC 310(3)

### PSYC 312(3)
**Course ID:** 006170  **Date:** 15-JUN-2019

**Lab in Cognitive Neuroscience**
This course is a laboratory practicum in the techniques of cognitive neuroscience, with an emphasis on electrophysiological and hemodynamic methods of measuring nervous system function during cognitive and behavioral tasks and the effects of noninvasive brain stimulation.

**Prerequisite:** PSYC 306 and PSYC 382

**Outcomes:** Students will develop scientific research skills as they relate to the field of cognitive neuroscience, including experimental design, physiological methods of data collection, statistical analysis and interpretation, and reporting findings.

PSYC 318(3)  
Lab in Developmental Psych  
Prerequisites: PSYC 273 and 306.  

Lecture and laboratory on empirical studies of developmental processes in humans. Focus is on research in particular content areas within developmental stages (e.g., infancy, childhood, adolescence, adulthood) and research on changes in behavior across time.

Outcomes:  
Students will demonstrate skills and knowledge of developmental methodology, designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format.

Components: Laboratory

**Lab on Body Image**

Lab on Body Image is a new course that can be used by Psychology students to fulfill the B lab requirement. It will focus on the scholarly study of body image and eating disorders, as well as how research is conducted in the field. Students will complete smaller labs and a larger research project in the field.

Pre-requisites: PSYC 101, 304, 306.

**Outcomes:**

1. Learn about the scholarly study of body image and eating disorders.
2. Learn general research methods in Psychology and specific ones pertaining to the topic.
3. Learn about computer packages, including SPSS to analyze data.

**Components:**
- **Laboratory**

Affective Neuroscience
Affective experiences promote human adaptability and survival, and healthy emotion function is critical to promoting physical and psychological well being. The course will provide an overview of fundamental neurobiological correlates associated with emotion function and processing affective stimuli.

Prerequisite: PSYC 101 or NEUR 101 (formerly PSYC/Biol 202)

Outcome: Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms.

Components: Lecture (In person)
Attributes: Neuroscience
Requirement Group: Prerequisite: PSYC 101 (C-) and NEUR 101 (C-)

Psychology of Personality
Prerequisite: PSYC 101

Facts and principles of personality study. Nature of personality, its structure, development, expression, and measurement. Exposition and evaluation of personality study methods with critical review of traditional and modern theories of personality.

Outcomes:
Students will acquire an understanding of different personality theories, critically evaluate these theories, and apply what they have learned.

Components: Lecture
Course Equivalents: CPSY 338
Attributes: Psychology of Crime and Justice
Requirement Group: Prerequisite: PSYC 101
Req. Designation: Writing Intensive

Psychology of Women
Prerequisite: PSYC 101

Review of psychological aspects of women’s experiences. Topics include psychological aspects of biological events such as menarche, pregnancy, menopause; aspects of women’s work and family roles; and mental health issues relevant to women.

Outcomes:
Students will demonstrate knowledge of critical contemporary issues impacting women and girls, and critically evaluate/analyze academic theory, social institutions, and media.

Components: Lecture
Course Equivalents: WOST 340
Attributes: Human Services, Women & Gender Studies
Requirement Group: Prerequisite: PSYC 101

Developmental Cognitive Neuroscience
An overview of theory and research relevant to the study of the developing child through the use of neuroscience methods; topics may include: brain plasticity and maturation, sensorimotor systems, attention, memory, executive function, language, social cognition, and typical and atypical development.

Prerequisite: PSYC 101, NEUR 101 (formerly PSYC/Biol 202)

Outcomes: Students will gain knowledge of basic theory and research in the field of developmental cognitive neuroscience and will acquire understanding of brain and behavior relationships in a developmental context.

Components:
Lecture(In person)
Attributes:
Neuroscience

Requirement Group:
Prerequisite: PSYC 101(C-) and NEUR 101 (C-)

Neuropsychology
Neuropsychology is the interdisciplinary study of the relation between human brain function and behavior. This course is an undergraduate survey of topics related to neuropsychology, including neuroanatomy, psychophysiology, and cognitive neuroscience. A primary goal of the course is to introduce undergraduate students to neuropsychological concepts in research and applied settings.

Prerequisites: PSYC 101 and NEUR 101

Outcomes: Successful completion of this course leads to mastery of CNS function and structure. The ability to integrate this information will allow students to develop and test hypotheses about brain-behavior relationships.

Components:
Lecture(In person)
Attributes:
Neuroscience

Requirement Group:
Prerequisites: PSYC 101 (C-) and NEUR 101 (C-)

Applied Social Psychology
Prerequisite: PSYC 275.
Applications of principles and methods of social psychology to social issues and problems in such areas as: law and justice, health and health care, education, natural and built environments, population, work, life and intergroup relations.

Outcomes:
Students will demonstrate the ability to apply knowledge of major theories, research methodologies, and empirical knowledge in social psychology to real-world issues and problems.

Components:
Lecture

Requirement Group:
Prerequisite: PSYC 275

Req. Designation:
Writing Intensive

Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness. BIOL 284 is cross-listed with PSYC 382.  
Outcomes: Students will understand theories regarding brain mechanisms, underlying mental events and the technologies used for studying these mechanisms.
### Practicum in Peace Activism

**Course ID:** 011514  
**Instructor Consent Required:**

**Prerequisites:**
- Seminar (In person)

**Course Equivalents:**
- PAX 385

**Attributes:**
- Peace Studies

**Requirement Group:**
- Prerequisite: PSYC 101

**Room Requirements:**
- Electronic Classroom (1)

**Outcomes:**
- Students will learn how to recognize and navigate the psychological pitfalls that accompany work as a peace activist. Topics include building programs, recruiting volunteers, managing media messages, avoiding burnout, handling conflict within organizations, and securing funding for peace activities. Psychological constructs and theories such as group dynamics, perceived control, learned helplessness, attitude change, and altruism will be used to increase understanding of processes related to peace activism.

PSYC 397(3)  Course ID:006223  06-JUN-2018  Department Consent Required
Independent Research
Prerequisites: PSYC 306 and approval of internship coordinator. Limited to psychology majors with senior standing.
Capstone opportunity to conduct research under the guidance of a psychology faculty member. Only one of PSYC 397 and 399 may count toward the psychology major.

Outcomes:
Students will gain experience in all aspects of psychological research, including literature review, formulating hypotheses, designing and conducting research, analyzing data and interpreting results, communicating the results of research in written reports.

Components: Lecture
Attributes: Engaged Learning, Neuroscience
Req. Designation: Undergraduate Research

PSYC 399(1 - 3)  Course ID:006225  06-JUN-2018  Department Consent Required
Special Studies in Psychology
Prerequisites: permission of instructor and department.
Opportunity for individual reading or research in a specialized area not otherwise covered by the Department's course offerings. Only one of PSYC 397 and 399 may count toward the psychology major.

Outcomes:
Students will gain experience (e.g., integrating research results from various sources, conducting research) working directly with a faculty member on a current topic in psychology.

Components: Supervision
Topics: Globalization & Group Relations, Special Studies
Req. Designation: Undergraduate Research

PSYC 401(3)  Course ID:006226  06-JUN-2018
History & Systems of Psych
Description: History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.

Outcome: Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology. The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure.

Components: Seminar
Requirement Group: Restricted to Graduate School students.

Introduction to the Profession of Clinical Psychology

Required course for PhD program in Clinical Psychology—an introduction to our field.

Outcome: Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences.

Components:
- Seminar (In person)
- Requirement Group: Restricted to Graduate School students.
- Req. Designation: Undergraduate Research
- Room Requirements: General Classroom(1)

Principles of Clinical Research

Description: An intensive coverage of classical and current clinical research methodology and a review and implementation of various strategies for collection and analysis of data.

Outcome: Students will learn multiple methods for conducting clinical research, the ability to critique published research, and to construct an NIH grant proposal.

Components:
- Lecture
- Requirement Group: Restricted to Graduate School students.
- Req. Designation: Undergraduate Research
- Room Requirements: General Classroom(1)

Research Methods in Psychology

An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.

Outcome: Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports.

Components:
- Lecture
- Requirement Group: Restricted to Graduate School students.
- Req. Designation: Undergraduate Research
- Room Requirements: General Classroom(1)

Sensory Processes

A survey of the psychophysical and neurophysiological findings in audition, vision, somatosensation, and the chemical senses are covered. Emphasis will be given to the development and testing of theories in the sensory sciences. Students will learn fundamentals of sensory information processing.

Seminar in Cognitive Neuroscience
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

## Structural Equation Modeling

**Course Code:** PSYC 493

**Course ID:** 006282

**Date:** 06-JUN-2018

An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.

**Outcome:** An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses.

- **Components:** Lecture
- **Requirement Group:** Restricted to Graduate School students.
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Lab - Computer(1)

### THEO 176B(3) 06-JUN-2017
#### Early African Christianity
This course offers theological Egyptological, and Black World perspectives on the formative development of Christianity in Africa's Nile Valley during the third, fourth, and fifth centuries. It investigates the distinctly African spiritual understandings and practices of ancient Egypt that were assimilated by early Christianity, giving special attention to the religious experiences of Egypt's Coptic monastic leaders whose wisdom and discipline were widely known and revered throughout the Mediterranean world at that time. The interdisciplinary approach of the course produces knowledge about early African Christianity and its intersections with both contemporary spirituality and the liberation movements of African descended peoples.

**Components:** Lecture(In person)
**Course Equivalents:** AFR 279
**Attributes:** African Studies and the African Diaspora, Black World Studies
**Req. Designation:** Internship

College of Arts and Sciences - Urban Affairs & Public Policy - Subject: Master of Public Policy

MPP 411(3)  Course ID:012608  23-MAY-2013

Environmental Governance
Environmental governance examines the institutions used to manage the environment and natural resources. The class pulls from political, economic, sociological and ecological frameworks to develop an interdisciplinary examination of the management of resources, both in the US and abroad.

Components: Seminar(In person)
Requirement Group: Restricted to Master in Urban Affairs and Public Policy (MUAPP) students
Req. Designation: Service Learning / Internship
Room Requirements: Electronic Classroom(1)

MPP 412(3)  Course ID:013114  15-JUN-2015

Urban Politics and Policy
The course examines sources of power in the city and their impact on city policies, including the role of economic power, federalism, government structures, neighborhood groups, and voting. The focus is on any systematic bias in city policies and how likely that the bias could be overcome.

Outcomes: Understand the major theories of urban politics and use them to analyze potential policy outcomes in cities.

Components: Seminar(In person)
Requirement Group: Restricted to Graduate School students.
Req. Designation: Service Learning / Internship
Room Requirements: Seminar(1)

MPP 413(3)  Course ID:013204  01-JAN-2020

Intergovernmental Relations
This class looks at what determines the allocation of responsibility and power across U.S. levels of government, how do the different levels interact with each other, and how does this system affect why some policy problems appear to receive a lot of attention and others do not.

Department consent required.

Outcome:
Understand how principles of federalism shape policy subsystems, which then affects who addresses policy problems and how outcomes are shaped by the various governments.

Components: Seminar(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Service Learning / Internship
Room Requirements: Seminar(1)

MPP 414(3)  Course ID:013900  01-JAN-2020

Affordable Housing Finance and Policy
This course focuses on how affordable housing programs work - the policy side, the development side, the investment side, and the legal side. This requires an understanding of the legal principles underlying real estate finance, the principles of investment, impact of tax laws, and demographic and economic factors that affect the supply and demand for housing.

Department Consent Required

Outcomes:
Gain knowledge of affordable housing criteria, needs assessments, financial and investment factors that affect supply, structure of common affordable housing policies.

Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Service Learning / Internship
Room Requirements: Seminar(1)

MPP 461(3)  Course ID:013186  05-AUG-2015

Education Law & Policy
This seminar explores legal, political and practical issues confronting American education. The course begins with analysis of fundamental political and philosophical principles underlying the educational system. Students then apply these principles to areas of education law -- such as school finance, governance, the balance between federal and state roles in curriculum.

Department consent required for enrollment.

Outcomes: Students will be able to: understand fundamental legal doctrines governing U.S. education law, research legal and political issues in education policy; analyze education problems and develop policy options.

Components: Lecture(In person)
Course Equivalents: LAW 461
Req. Designation: Service Learning / Internship
Room Requirements: Electronic Classroom(1)
### MPP 499(3) Directed Readings

An independent study course provides the opportunity for a student to develop knowledge regarding a particular topic of interest, beyond that available in traditional courses. The student will develop a contract with the faculty member who supervises the independent study to specify the topics covered, the tasks to be performed, and the grading criteria. Students are expected to participate in development of a reading list. Regular meetings of the student and the faculty supervisor will occur throughout the semester.

**Components:** Independent Study (Directed Research)

**Req. Designation:** Service Learning / Internship

### MPP 500(3) Public Policy Evaluation

Prerequisite: PLSC 476 or SOCL 414.

This class covers basic methods of evaluating the impact of public policies. We will read examples of each type of evaluation and discuss the difficulties each case illustrates in doing applied research -- including statistical problems, ethical issues, and the potential impact of the evaluation on policy change.

**Components:** Seminar (In person)

**Req. Designation:** Service Learning / Internship

**Room Requirements:** Electronic Classroom (1)

### MPP 501(3) Public Policy Internship

Enrollment is restricted to students in MUAPP program.

Students will work with an organization in the public sector (typically nonprofit or government) to apply concepts and skills from the first-year MUAPP curriculum. They will develop a portfolio of work products to demonstrate their competencies and interests to future employers.

Students will gain relevant work experience; apply concepts and skills developed in other courses in the MUAPP curriculum; create a portfolio of work products to demonstrate abilities to future employers.

**Components:** Supervision (In person)

**Req. Designation:** Service Learning / Internship

**Room Requirements:** Electronic Classroom (1)

### MPP 502(1) Professional Development Skills

Requirement for MPP graduate students.

The class develops professional skills for students to identify and pursue internship and career options. Policy practitioners discuss their experiences, illustrating different work in the policy field. Job search strategies, resume writing, and informational interviews are covered.

**Components:** Seminar (In person)

**Requirement Group:** Restricted to Master in Urban Affairs and Public Policy (MUAPP) students

**Req. Designation:** Service Learning / Internship

**Room Requirements:** Electronic Classroom (1)

### MPP 503(3) Public Policy Practicum

Enrollment is restricted to students in MUAPP program.

This is a capstone course for the masters degree in public policy or urban affairs. The goal is to gain experience working as a team conducting a policy analysis or program evaluation project. Faculty will determine the topic for the course, often based on a real world client's interests.

Outcome: Students apply concepts and skills developed in the MUAPP curriculum to a real world problem; work with a client and stakeholders; create a research report appropriate to an applied environment.

**Components:** Seminar (In person)

**Req. Designation:** Service Learning / Internship

**Room Requirements:** Electronic Classroom (1)

### MPP 605(0) Master's Study

**Components:** FTC-Supervision (Independent Study)

**Req. Designation:** Service Learning / Internship
Course ID: 012873
15-JUN-2014
Instructor Consent Required

Childlaw Legislation and Policy Clinic
Permission of instructor is required prior to registration.

Students work on a legislative project under faculty supervision that involves: developing an advocacy and coalition building strategy, drafting bills, developing fact sheets and summaries for pending legislative in Springfield, visiting the state legislature to observe and participate in the process of policy advocacy regarding a child or family law issue.

Outcomes: Develop skills necessary in policy advocacy: critiquing legislation, assessing a legislative problem, researching the problem, proposing solutions, and drafting materials and presenting information orally.

Components: Seminar (In person)
Requirement Group: Enrollment Restricted to Graduate or Law Students
Req. Designation: Service Learning / Internship
Room Requirements: Electronic Classroom(1)

CIEP  M03(6)  Course ID:011263  29-JUN-2012
Student Teaching: Infants, Toddlers and PreSchoolers
This course (along with the related field experiences) serves as a continuation of the Methods courses and meets the requirements of a preprimary student teaching experience.

Outcome: Teacher candidates will be provided with supervised applied experience in assessment and instruction with children in early childhood special education and will be prepared to work in an early childhood special education setting.

Components: Field Studies(In person)
Attributes: Engaged Learning
Requirement Group: Illinois Basic Skills Test Prerequisite
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom(1)

CIEP  M04(9)  Course ID:011264  29-JUN-2012
K-3 Student Teaching
Prerequisites: CIEP M03
This course is the culminating experience of the Early Childhood Special Education Teacher Education Program. Candidates are placed in a classroom with an experienced cooperating teacher.

Outcome: In addition to their planning and teaching responsibilities, student teachers also are expected to reflect on their experience, develop their planning and instructional skills, and compile a teaching portfolio.

Components: Field Studies(In person)
Attributes: Engaged Learning
Requirement Group: Illinois Basic Skills Test Prerequisite
Req. Designation: Fieldwork

Techniques of Teaching in Secondary Schools
This course introduces the secondary education student to the realities of the public, urban middle or high school setting. It provides students with an initial experience to the actual teaching of adolescents within their major discipline. Supervision and feedback are provided by the university course instructor and a subject specific high school teacher in the field. Students enroll concurrently in CIEP M14.

Outcome: Students will be able to demonstrate principles of lesson design in a specific subject content, create instruction designed for students in a diverse urban setting, analyze and apply best practices pedagogy, and develop a personal philosophy of teaching.

Components: Lecture
Requirement Group: Illinois Basic Skills Test Prerequisite
Req. Designation: Fieldwork

Teaching English Language Arts in the Middle Grades
This course is based on the fundamental beliefs that people learn to write by writing; writing is a process; writing is a tool for thinking, and that writing is a social process. Candidates will be introduced to research based strategies, design effective writing lessons, develop a philosophy of teaching writing based on best practices, and recognize elements of valid writing assessment.

Outcomes: Teacher candidates will recognize the significance of their role as writing models and will recognize and create connections to literacy instruction across the curriculum. Teacher candidates will become familiar with developmental issues related to learning to write across grades K - 12, and issues related to struggling writers and students with culturally and linguistically diverse backgrounds.

**System Consultation in School Discipline Reform**

The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and)

**RMTD 400(3) Course ID:006378 20-DEC-2012**

**Introduction to Research Methodology**

This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.

**Outcome:** Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects.

**Components:**
- Lecture

**Requirement Group:** Restricted to Graduate Education Students.

#### Introduction to Evaluation Theory
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.

**Outcomes:** Students will engage major theoretical concepts of the field—methods, use, values, and practice—from the perspectives of various evaluation theorists. Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories.

#### RMTD 410(3)
**Course ID:** 006385  **01-APR-2018**

**Communicating Research Findings**

This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.

**Outcome:** Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing.

**Components:** Seminar

**Requirement Group:** Pre-requisites: RMTD 400 or equivalent; Restricted to Graduate Education Students

**Room Requirements:** General Classroom(1)

#### RMTD 411(3)
**Course ID:** 012180  **20-DEC-2012**

**Introduction to Human Performance Technology**

This course introduces students to the models, practices and competencies associated with the field of Human performance improvement.

**Outcomes:** Students will be able to apply the practices associated with the roles of an HPT professional. Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy.

**Components:** Lecture(In person)

**Requirement Group:** Restricted to students in the Graduate School or Graduate School of Education

**Room Requirements:** Electronic Classroom(1)

#### RMTD 412(3)
**Course ID:** 012179  **15-APR-2017**

**Needs Assessment**

In this course, students will learn the principles of needs assessment to improve programs and organizations.

Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.

**Outcomes:** Students will plan a needs assessment, develop data collection tools and conduct a practice assessment.

**Components:** Lecture(In person)

**Requirement Group:** Pre-requisites: RMTD 400 or equivalent; Restricted to Graduate Education Students

**Educational Research I: Building a Body of Evidence With Qualitative Methods**

Prerequisite: RMTD 400 or equivalent.

This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.

**Outcome:** Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize,
### Educational Research II: Building a Body of Evidence With Quantitative Methods

**Course ID:** 009878  
**Run Date:** 01-NOV-2013

This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.

**Outcome:** Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis.

**Components:** Lecture (In person)

**Requirement Group:** Restricted to Graduate Education Students. Prerequisite of RMTD 404 or Equivalent.

**Req. Designation:** Internship

**Room Requirements:** Lab - Computer(1)

### Single Subject Design

**Course ID:** 011873  
**Run Date:** 20-DEC-2012

This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

**Components:** Lecture (In person)

**Requirement Group:** Restricted to Graduate Education Students.

**Req. Designation:** Internship

**Room Requirements:** Electronic Classroom(1)

### Psychological Measurement

**Course ID:** 006386  
**Run Date:** 15-JUN-2017

This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.

**Outcome:** Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument.

**Components:** Lecture

**Requirement Group:** Prerequisite of RMTD 404 or equivalent; or Department permission

**Req. Designation:** Internship

**Room Requirements:** General Classroom(1)

### Item Response Theory

**Course ID:** 006387  
**Run Date:** 01-NOV-2016

**Components:** Lecture

**Course Equivalents:** CPSY 488

**Requirement Group:** Restricted to Graduate Education Students.

**Req. Designation:** Internship

**Room Requirements:** General Classroom(1)

### Mixed Methods Research

**Course ID:** 012859  
**Run Date:** 09-JUN-2015

**Enrollment:** Restricted to Graduate Education Students.

**Prerequisites:** RMTD 420 and RMTD 421

The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice.

**Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.**

**Components:** Lecture (In person)

**Requirement Group:** Prerequisite of RMTD 420 and RMTD 421

**Req. Designation:** Internship

**Room Requirements:** Electronic Classroom(1)

#### RMTD 470(3)  
**Course ID:** 011765  
**Term:** 20-DEC-2012  
**Course Title:** Case Study Research  
**Prerequisite:** RMTD 420

This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

**Components:** Lecture (In person)  
**Requirement Group:** Restricted to Graduate School and Graduate School of Education students. Prerequisite: RMTD 420  
**Req. Designation:** Internship  
**Room Requirements:** Electronic Classroom (1)

#### RMTD 481(3)  
**Course ID:** 006388  
**Term:** 20-DEC-2012  
**Course Title:** Advanced Educational Statistics  

This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.

**Outcome:** Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis.

**Components:** Lecture

#### RMTD 482(3)  
**Course ID:** 006389  
**Term:** 15-JUN-2016  
**Course Title:** Introduction to Linear Models  

**Description:** This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.

**Outcome:** Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations.

**Components:** Lecture  
**Requirement Group:** Prerequisite: RMTD 404 or equivalent; or Department permission  
**Req. Designation:** Internship  
**Room Requirements:** Lab - Computer (1)

#### RMTD 483(3)  
**Course ID:** 006390  
**Term:** 01-JAN-2019  
**Course Title:** Multivariate Statistics  

This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.

**Prerequisite:** RMTD 421 (B or Better)  
**Outcome:** This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics. Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations.

**Components:** Lecture  
**Requirement Group:** P RMTD 421 (B or Better)  
**Req. Designation:** Internship  
**Room Requirements:** Lab - Computer (1)
# Research Methods

## RMTD 484(3)

**Course ID:** 006391  
**01-JAN-2017**

**Course Title:** Hierarchical Linear Models  
**Description:** This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.

**Outcome:** Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis.

**Components:** Lecture  
**Requirement Group:** Pre-requisite: RMTD 482  
**Req. Designation:** Internship  
**Room Requirements:** Lab - Computer(1)

## RMTD 487(3)

**Course ID:** 006392

## RMTD 488(3)

**Course ID:** 006393  
**01-JAN-2017**

**Course Title:** Meta-Analysis  
**Description:** This course introduces statistical methods in the design and analysis of quantitative research syntheses.

**Outcome:** Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results.

**Components:** Lecture  
**Requirement Group:** Pre-requisite: RMTD 482  
**Req. Designation:** Internship  
**Room Requirements:** Lab - Computer(1)

## RMTD 520(3)

**Course ID:** 013766  
**01-JAN-2019**

**Course Title:** Research Seminar I  
**Description:** This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.

**Outcome:** Students will develop a plan of study for their degree as well as prospectus for their dissertation.

**Components:** Lecture (In person)  
**Req. Designation:** Internship  
**Room Requirements:** Electronic Classroom(1)

## Seminar: Advanced Mixed Methods

**Course ID:** 006396  
**Semester:** 20-DEC-2012

This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.

**Outcome:** Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on. Students will develop knowledge for identifying and critiquing mixed method research. They will also be able to develop a mixed methods study.

**Components:** Lecture (In person)

## TLSC 110(1)

**Course ID:** 012536  
**29-JUL-2016**

**The Profession and Our Program (TLLSC)**

This module (course) introduces teacher candidates (students) to the profession and our program (TLLSC) with a focus on collaborative relationships within and among schools, families, and communities. This module (course) will expose teacher candidates (students) to specific knowledge and skill indicators necessary for educators to embody the dispositions of the profession.

**Outcomes:** Teacher candidates (students) will reflect on the knowledge, skills, and dispositions of educators with regard to teaching diverse students, the mission of Professionalism in Service of Social Justice, and the connection between research and practice related to collaborative relationships.

**Components:** Lecture (In person)  
**Attributes:** Engaged Learning  
**Requirement Group:** Corequisites: TLSC 120 and TLSC 130. TLSC 110, 120 and 130 must be taken together. Register for TLSC 120 and 130 first.

**Req. Designation:** Service Learning

## TLSC 120(2)

**Course ID:** 012537  
**29-JUL-2016**

**Bringing Language, Learning & Dev Theory into Practice**

In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.

**Outcomes:** Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with

**Course Title:** Educational Policy For Diverse Students  
Prerequisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better. Restricted to All SOE Undergraduate Majors

This module (course) specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs). Candidates will learn the policies, laws and court cases that impact classrooms, see how educational policies are enacted into classroom practice to support students, and make suggestions on continued ways to improve the achievement of students in urban classrooms and schools. Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution.

**Course Title:** Individualized Assessment & Instruction for Diverse Students  
This module is specifically designed for candidates to appreciate, discern and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural and linguistic; in this way, candidates will explicitly focus on the multifaceted nature of planning for students with special needs and those who have been labeled as ELL. Through the use of case study research to collect individualized, authentic language and literacy assessment with one student, candidates will apply learning to the specific instructional context of a student who qualifies with at least one of the following labels: (a) student with special needs, (b) English language learner, or (c) struggling reader.

Professional Learning Communities

Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners discussing and making meaning of all learning and experiences in schools and communities.

Outcome: Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

Components: Discussion(In person)
Req. Designation: Fieldwork

Language, Learning & Development Theories in Practice

Students will learn key principles and stages of language acquisition, developmental and learning theories through clinical experiences with children from birth to grade 12. Field experiences provide opportunities to explore ways in which physical characteristics, communication skills, cognitive capacities, and the social-emotional needs of children are used to understand theory and inform adult-child interaction and developmentally appropriate practice.

Outcome: Students will explore the ways in which social, cultural, and environmental contexts shape language, development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12.

Community Immersion

This module is designed to engage teacher candidates in an authentic exploration of the inherent relationship between schools and the surrounding community. Teacher candidates are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities.

Outcome: Teacher candidates will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection.

TLSC 403(1) Course ID:012801 15-APR-2014
Teaching Learning & Leading for Social Justice
This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy.
Outcome: Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc.

TLSC 404(3) Course ID:012796 12-JAN-2016
Constructive Learning Environments for Diverse Students
This module is designed for candidates to discern and utilize students' needs and design classroom environment and instruction to support learning and development. In this module, candidates hone knowledge and skills for working with students with special needs, specifically taking the lens on social, emotional, and behavioral needs.
Outcome: Candidates will demonstrate learning through the completion of a functional behavioral analysis (FBA) of one student within the specific environmental and instructional classroom context.

TLSC 405(3) Course ID:012799 12-JAN-2016
Analyzing Culturally Responsive Classroom Instruction
This module builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning.
Outcome: Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching.
Components: Field Studies(In person)
Req. Designation: Fieldwork

Individualized Assessment & Instruction for English Learners.
This module is specifically designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural, and linguistic. Through the use of case study research to conduct individualized assessments with diverse students, candidates will be able to apply learning to the instructional context with culturally, linguistically, and cognitively diverse students, specifically working with a labeled English language learner (ELL) and a student with special needs.
Outcome: Through the use of case study research to collect individualized, authentic language and literacy assessments, candidates will apply learning through work a labeled English learner.

### TLSC 410(3)  
**Course ID:** 013346  
**Date:** 01-JAN-2017

**Language, Culture and Pedagogy in Bilingual Classrooms**

This module deals with bilingual education, schools, classrooms and learners with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school’s approach to family and community involvement with a specific lens on L1 maintenance and bilingualism.

**Outcomes:** Candidates will engage with parents, families and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities.

**Date:** 15-JUN-2014

**Teaching Mathematics in Elementary Grade Classrooms**

This module introduces teacher candidates (students) to developmentally appropriate instruction in mathematics in the elementary grades and how to use assessment data to inform instruction.

**Outcome:** Teacher candidates will develop, teach, and reflect upon mathematics instruction that develops conceptual understanding, targets the use of Specialized Content Knowledge, guides student problem solving through extended response questions, builds mathematical knowledge, strategies and explanation.

- **Components:** Lecture (In person)
- **Requirement Group:** Prerequisite: TLSC 407

**Teaching Science in Elementary Grade Classrooms**

This module introduces candidates to the discipline of science, providing them experiences engaging in the teaching and learning of elementary science, and specifically works to help candidates integrate literacy into their science instruction. Candidates develop knowledge and skills needed to teach science through an inquiry approach and integrate literacy into their science teaching.

**Outcome:** Candidates will set and work towards professional development goals related to science content, science pedagogy, and science assessment. They will compile a portfolio of evidence to show they have worked towards their goals and reflect on how their understanding of science teaching and learning has shifted throughout the module.

- **Components:** Field Studies (In person)
- **Requirement Group:** Prerequisites: TLSC 407 and Graduate Education Students

**Date:** 15-JUN-2014

**Teaching Social Studies in Elementary Grade Classrooms**

Prerequisites: TLSC 407 and Graduate Education Students in the Elementary and Special Education Programs.

This module introduces candidates to the disciplines of the social studies, providing them experience in the teaching and learning of elementary social studies, and specifically helps candidates integrate literacy into their social studies instruction. Candidates develop knowledge and skills needed to teach social studies through an inquiry approach and integrate literacy into their social studies teaching.

**Outcome:** Teacher candidates will develop and implement an interdisciplinary social studies unit over the course of the module and will develop an essay of demonstrating their understanding of role social studies plays in the elementary school curriculum.

**Foundations of Teaching Literacy**

The purpose of this graduate foundations course is to provide pre-service teacher candidates with a solid foundation for effective literacy instruction in elementary and middle grade classrooms. Special emphasis will be placed on the major five elements of reading: phonemic awareness, phonics, vocabulary, fluency, and comprehension.

Outcome: Teacher candidates will develop the knowledge and skills base required for effective core curriculum based literacy instruction.

- **Components:** Lecture (In person)
- **Requirement Group:** Prerequisites: TLSC 407 and Graduate Education Students

**Teaching Internship in Informal Education Settings**

The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences, digest the relevant literature and draw research to practice connections.

Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

Language and Literacy for Diverse Students

This module introduces teacher candidates to essential foundations in teaching reading. Emphasis on developmentally-appropriate skills for the candidate’s teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.

Outcome: Teacher candidates will learn to design and teach lessons, focusing on standard-based reading skills to linguistically diverse students through use of research based reading strategies.

Components: Field Studies (In person)
Requirement Group: Prerequisite: TLSC 407
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom (1)

Using Classroom Data in a Collaborative Environment

This module develops candidates’ ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates’ decisions regarding instructional adjustment and individual student needs.

Outcome: Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students’ academic and behavioral modifications.

Components: Field Studies (In person)
Requirement Group: Prerequisite: TLSC 407
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom (1)

Discipline-Specific Literacy for Diverse Students

This module supports teacher candidates in developing their knowledge and skills in teaching and assessing literacy in discipline specific contexts. Emphasized will be the identification and use of culturally responsive texts, evidence based strategies, data based decision making skills and new literacies designed to target all students’ literacy needs, including those with linguistically diverse backgrounds.

Outcome: Teacher candidates will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts. They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery.

Components: Field Studies (In person)
Requirement Group: Prerequisite: TLSC 407
Req. Designation: Fieldwork
Room Requirements: Electronic Classroom (1)

Teaching and Learning in an Area of Specialization

This module further develops and deepens candidates’ (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12 students in a particular curricular area.

Outcome: Teacher candidates will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching.

Components: Field Studies (In person)
Requirement Group: Prerequisite: TLSC 407
Req. Designation: Fieldwork

### TLSC 451(3) Teaching and Learning with a Global Framework

**Course ID:** 012818  
**Start Date:** 01-JAN-2016

Teacher candidates will work with PreK-12 teachers to develop and implement a trans-disciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates for teaching in schools that offer an International Baccalaureate program.

**Outcome:** Teacher candidates assess their instruction using a global framework in this module and develop an action plan to improve practice as they move into the final phase of the teacher preparation program.

**Components:** Field Studies (In person)  
**Req. Designation:** Fieldwork  
**Room Requirements:** Electronic Classroom (1)

### TLSC 460(2) Developing Rigorous and Relevant Instruction and Assessment

**Course ID:** 012819  
**Start Date:** 15-JUN-2016  
**Department Consent Required**

This module requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.

**Outcome:** Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment.

**Components:** Field Studies (In person)  
**Req. Designation:** Fieldwork  
**Room Requirements:** Electronic Classroom (1)

### TLSC 461(3) Designing and Implementing Rigorous and Relevant Instruction

**Course ID:** 012821  
**Start Date:** 15-JUN-2016  
**Department Consent Required**

This module requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.

**Outcome:** Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students.

**Components:** Field Studies (In person)  
**Req. Designation:** Fieldwork  
**Room Requirements:** Classroom Not Needed (1)

### TLSC 470(7) TLLSC Internship: Student Teaching

**Course ID:** 012822  
**Start Date:** 15-JUN-2014  
**Department Consent Required**

This module represents the candidates' full-time student teaching experience. It serves as the culmination of candidates' full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.

**Outcome:** Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates also complete the School of Education's Professional Practice Profile essay.

**Components:** Field Studies (In person)  
**Req. Designation:** Fieldwork  
**Room Requirements:** Electronic Classroom (1)

### TLSC 470A(3) TLLSC Internship: Student Teaching I

**Course ID:** 012823  
**Start Date:** 01-APR-2018  
**Department Consent Required**

This module represents the candidates full-time student teaching experience. It serves as the culmination of candidates full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.

**Outcome:** Candidates will complete part of the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter.

**Components:** Field Studies (In person)

#### Curriculum Processes in the IB PYP
This course focuses on developing an understanding of the International Baccalaureate Organization and its curriculum with a particular focus on the Primary Years Programme.

**Outcomes:** Candidates will create a presentation focusing on how the PYP curriculum supports and promotes aspects of the International Baccalaureate learner profile.

**Components:**
- Lecture(Online)

**Room Requirements:** Classroom Not Needed(1)

### TLSC 472(3) Course ID:013131 24-APR-2015
#### Teaching and Learning in the IB Primary Years Prog
This course focuses on unit and lesson planning within the International Baccalaureate Primary Years Programme curriculum.

**Outcomes:** Candidates will be able to design and carry out transdisciplinary global instruction for diverse learners.

**Components:**
- Lecture(Online)

**Room Requirements:** Classroom Not Needed(1)

### TLSC 473(3) Course ID:013132 24-APR-2015
#### Assessment and Learning in the IB PYP
In this course, candidates examine a PYP unit and the summative assessment used to assess students' understanding of the central idea and PYP essential elements. Prerequisites: TLSC 471 & 472

**Outcomes:** Candidates will develop an assessment plan using the PYP unit planner.

**Components:**
- Lecture(Online)
- Prerequisites: TLSC 471 & TLSC 472

**Room Requirements:** Classroom Not Needed(1)

### TLSC 474(1) Course ID:013133 24-APR-2015
#### Professional Learning IB Primary Years Programme
In this course, candidates implement an IB Impact on Student Learning project in which they implement a PYP unit. Prerequisites: TLSC 471 & 472

**Outcomes:** Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results.

**Components:**
- Lecture(Online)
- Prerequisites: TLSC 471 & TLSC 472

**Room Requirements:** Classroom Not Needed(1)

### TLSC 475(3) Course ID:013134 24-APR-2015

Course ID: 013135 24-APR-2015

TLSC 476(3)
Teaching and Learning in the IB MYP
This course focuses on unit and lesson planning within the International Baccalaureate Middle Years Programme curriculum.

Outcomes: Candidates will be able to design interdisciplinary global instruction for diverse learners.

Components: Lecture(Online)
Req. Designation: Fieldwork
Room Requirements: Classroom Not Needed(1)

Course ID: 013136 24-APR-2015

TLSC 477(3)
Assessment in the IB Middle Years Programme
In this course, candidates analyze the MYP community project and the MYP personal project. Candidates become familiar with the DP Theory of Knowledge, Creativity, Arts & Service, and the extended essay.

Outcomes: Candidates develop an assessment plan using the MYP unit planner.

Components: Lecture(In person)
Req. Designation: Fieldwork
Room Requirements: Classroom Not Needed(1)

Course ID: 013137 24-APR-2015

TLSC 478(1)
Professional Learning IB MYP
In this course, candidates conduct an IB Impact on Student Learning project in which they implement the MYP unit designed in TLSC 476 and TLSC 477. Prerequisites: TLSC 475 and TLSC 476.

Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results.

Components: Lecture(Online)

Restricted to School of Engineering students.

This course is the first of four engineering design courses in the Engineering Science curriculum. Major topics in this course include engineering estimation, three dimensional computer-aided design, 2k factorial design, teamwork, engineering ethics, requirement specifications, and design iteration.

Outcomes:
1. Demonstration of proficiency in engineering design.
2. Application of teamwork principles to an open-ended design project.

**ENGR 102(1) Engineering Science Freshman Seminar**
This seminar offers a shared learning experience with an assignment of a service project and exposure to Industrial Advisory Board members and Loyola administrators and faculty. In addition to providing intellectual enhancement to the program, these seminars give us a time and place to regularly interact. This class is restricted to Engineering Science freshman.

Outcomes: Encourage bonding through a service project, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader industry community.

Components: Seminar

Requirement Group: Prerequisite: ENGR 101 with a minimum grade of "C-"; Restricted to Engineering Science freshman students

Room Requirements: ENGR Design Lab(1)
## Engineering Science – Engineering Science – Subject: Engineering

### ENGR 201(3)  
**Course ID:** 013143  
**Run Date:** 15-JUN-2019

**Experiential Engineering**  
This course introduces students to environmental, biomedical and computer engineering-based sensors and signal analysis techniques. Major topics in this course include an introduction to common biomedical sensors, electronics, signals, sampling, analog-to-digital conversion, C programming, microcontroller system architectures, and microcontroller programming.

Restricted to Applied Mathematics majors OR restricted to Engineering Science majors with prerequisites (minimum C-) ENGR 101, COMP 170, PHYS 112K, and concurrent enrollment in CHEM 171.

**Outcomes:** Provide an experiential environment to learn about instrumentation and sensors in biomedical, computer and environmental engineering. Introduce complex devices and systems to understand, measure and analyze signals. Utilize software tools for data analysis and visualization.

**Components:** Laboratory (In person)  
**Requirement Group:** Prerequisites: ENGR 101, COMP 170, PHYS 112K, each with a minimum grade of C-. Co-requisite: CHEM 171.

**Req. Designation:** Fieldwork  
**Room Requirements:** Lab - Computer (1)

### ENGR 311(3)  
**Course ID:** 013144  
**Run Date:** 15-JUN-2019

**Engineering Systems I**  
ENGR 311 covers the fundamentals of signal and system analysis, focusing on representations of discrete-time and continuous-time signals and representations of linear, time-invariant systems. Major topics in this course include convolution, Fourier series, Fourier Transform, and unit impulse and unit step functions. Applications are drawn broadly from engineering and physics.

Restricted to Applied Mathematics and Engineering Science majors. Prerequisite: ENGR 201 with a minimum grade of C-. Concurrent enrollment in MATH 266 (Engineering Science majors only).

**Outcome:** Understand basic concepts of discrete and continuous time signals. Employ Fourier analysis to analyze simple LTI systems. Proficiently use MATLAB as a numerical analysis tool.

**Components:** Lecture (In person)  
**Requirement Group:** Prerequisite: ENGR 201 with a minimum grade of C-. Co-requisite: Math 266 (Engineering Science majors only).

**Req. Designation:** Fieldwork  
**Room Requirements:** Electronic Classroom (1)

### ENGR 312(3)  
**Course ID:** 013145  
**Run Date:** 15-JUN-2019

**Engineering Systems II**  
ENGR 312 introduces numerical methods and control systems theory. Students are exposed to root finding, numerical integration and differentiation, numerical solutions to ODEs, curve fitting and regression techniques, classical control system theory methods (Laplace transforms and transfer functions, root locus design, Routh-Hurwitz stability analysis, Bode and Nyquist plots) and the state variable method (controllability and observability).

Restricted to Engineering Science and Applied Mathematics majors. Prerequisite: ENGR 311 with a minimum grade of C-.

**Outcomes:** Understand the concepts of numerical methods, their strengths and weaknesses. Use MATLAB as a computational tool.

**Components:** Lecture (In person)  
**Requirement Group:** Prerequisite: ENGR 311 with a minimum grade of C-. Restricted to Engineering Science and Applied Mathematics majors.

**Req. Designation:** Fieldwork  
**Room Requirements:** Electronic Classroom (1)

### ENGR 313(3)  
**Course ID:** 013146  
**Run Date:** 15-JUN-2019

**Engineering Systems III**  
This course is an introduction to discrete-time signal processing and system identification. Major topics include the z-transform, infinite/finite impulse response filters, discrete/rapid Fourier transform, models of linear time-invariant systems, and parameter estimation methods.

Restricted to Applied Math and Engineering Science majors. Prerequisite: ENGR 312 with a minimum grade of C-.

**Outcomes:** Reinforce fundamental knowledge of signal processing concepts. Execute discrete-time signal processing techniques. Solve real-world problems through use of modeling, prediction, and estimation methods.

**Components:** Lecture (In person)  
**Requirement Group:** Prerequisite: ENGR 312 with a minimum grade of C-. Restricted to Engineering Science and Applied Mathematics majors.

**Req. Designation:** Fieldwork  
**Room Requirements:** Electronic Classroom (1)

Materials Engineering
This course introduces concepts related to the structure, properties, and processing of materials commonly used in engineering applications. Major topics include material structure, bonding, crystalline and non-crystalline structures, imperfections, properties of metals, metal alloys, ceramics and polymers, phase transformation, and material failures.

Restricted to Engineering Science majors. Prerequisites: ENGR 322, ENGR 323, ENGR 324, ENGR 324L, each with a minimum grade of C-.

Outcomes: Describe the microscale structure of metals, ceramics, polymers, and composites; quantify and describe relationships among structure, processing, and properties; understand the role of material selection

Medical Device Software Development II
This is the third semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During four weeks, students increase their programming skills through exposure to advanced data structures and graph algorithms. Separately, software issues that the Food and Drug Administration considers during medical device submissions are highlighted.

Restricted to Engineering Science majors. ENGR 342 with a minimum grade of C-, concurrent enrollment in ENGR 391.

Outcomes: Analyze software issues that the FDA considers during medical device submissions. Create user interface and cybersecurity code, according to Requirements Specifications provided by the instructor

ENGR 353 is the third semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The course consists of an introduction to programmable logic controllers, relays, timers, counters, shift registers, human-machine interfaces and programmable embedded systems. The course includes hands-on experiments and a design project to evaluate the performance and efficiency of programmable systems, related safety issues and hardware troubleshooting for control and automation systems.

Restricted to Engineering Science majors. Prerequisite: ENGR 352 with minimum grade of C-, concurrent enrollment in ENGR 392.

Outcomes: Evaluate the performance and efficiency of programmable controllers, embedded systems and

**Components:** Lecture
**Requirement Group:** Restricted to Graduate School students.
**Req. Designation:** Fieldwork
**Room Requirements:** General Classroom(1)

### BMB 490(1 - 3) Spec Tps in Molecular Biology

**Course ID:** 005136  
**15-JUN-2016**

**Components:** Lecture
**Topics:** Chromatin Structure and Gene Regulation, Stem Cell Biology, Epigenetics and Stem Cells, Grant Writing
**Requirement Group:** Restricted to Graduate School students.
**Req. Designation:** Fieldwork
**Room Requirements:** General Classroom(1)

### BMB 499(1 - 9) Research in Molecular Biology

**BMB 502(0)**
**Course ID:**005139 **15-JUN-2016**
**Seminar in Molecular Biology**
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.

Outcome: To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work.

Components: Seminar

Requirement Group: Restricted to Graduate School students.

Req. Designation: Fieldwork

Room Requirements: General Classroom(1)

**BMB 524(2)**
**Course ID:**005141 **15-JUN-2016**
**Mol Biol & Genet of Develop**
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.

Outcome: An understanding of the principles of developmental biology with emphasis in the molecular genetics of development.

Components: Lecture

Course Equivalents: BICH 524

Req. Designation: Fieldwork

Room Requirements: General Classroom(1)

**BMB 526(2)**
**Course ID:**005142 **15-JUN-2016**
**DNA Repair & Recombination**
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.

Outcome: An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining.

Components: Lecture

Course Equivalents: BICH 526

Req. Designation: Fieldwork

Room Requirements: General Classroom(1)

**BMB 590(2)**
**Course ID:**005145 **15-JUN-2016**
**Molec Biol of Oncogenesis**
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.

Outcome: A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject.

Components: Lecture

Requirement Group: Restricted to Graduate School students.

Req. Designation: Fieldwork

Room Requirements: General Classroom(1)

**BMB 600(0)**
**Course ID:**005147 **15-JUN-2016**
**Dissertation Supervision**
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given a letter grade.

Outcome: Development of the dissertation project, writing and defense of the dissertation.

Components: FTC-Supervision

Requirement Group: Restricted to Graduate School students.

Req. Designation: Fieldwork

**Neuroanatomy Lect & Lab**

- **Components**: Lecture
- **Req. Designation**: Fieldwork

**Struct of the Human Body**

The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and student dissection.

- **Components**: Lecture
- **Req. Designation**: Fieldwork
- **Room Requirements**: General Classroom(1)

**Medical Histology**

The student gains a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. Clinical and research application of the course material are also stressed. Basic physiology and metabolic biochemical principals are emphasized as they apply to organ systems.

- **Components**: Lecture
- **Req. Designation**: Fieldwork
- **Room Requirements**: General Classroom(1)

**Medical Neuroscience**

The student gains a fundamental knowledge of gross and microscopic structure of the human nervous system. This also includes the organs of special sense. Integrated into this structural base are the major physiological, pharmacological, and neurological aspects of the nervous system. Laboratory sessions permit individual study of the structure of the human brain and spinal cord.

- **Components**: Lecture
- **Req. Designation**: Fieldwork
- **Room Requirements**: General Classroom(1)

**Neuroscience**

The student gains a fundamental knowledge of gross and microscopic structure of the human nervous system. This also includes the organs of special sense. Integrated into this structural base are the major physiological, pharmacological, and neurological aspects of the nervous system. Laboratory sessions permit individual study of the structure of the human brain and spinal cord.

- **Components**: Lecture
- **Requirement Group**: Restricted to Graduate School students.
- **Req. Designation**: Fieldwork
- **Room Requirements**: General Classroom(1)

**Developmental Biology**

The focus of this course is on the cellular mechanisms of differentiation, chiefly in vertebrate system. Topics include factors involved in commitment and induction, differential gene expression, role of growth factors, extracellular matrix, and cell-cell interactions.

- **Components**: Lecture
- **Requirement Group**: Restricted to Graduate School students.
- **Req. Designation**: Fieldwork
- **Room Requirements**: General Classroom(1)

**Cellular Biology**

A course that provides knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology (this course is the same as the BMSC 312 in the Core Curriculum).

- **Components**: Lecture
- **Requirement Group**: Restricted to Graduate School students.
- **Req. Designation**: Fieldwork

Moral Theology for Bioethics
This course provides an introduction to Catholic moral theology through a historical review of its
development and a consideration of key documents, events, arguments and concepts beginning with the
scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon
contemporary Catholic moral theology.
Outcomes: Its goal is to assist in establishing an historical and theoretical foundation for those who are
interested in bioethics as it is considered and practiced in the Catholic tradition.
Components: Lecture (In person)
Req. Designation: Fieldwork
Room Requirements: Classroom Not Needed (1)

BEHL 415(3)  Course ID: 012007  15-JUN-2018
Catholic Bioethics in Clinical Practice
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic
context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for
Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts
considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life
support, care of the dying, cooperation, conscience, human dignity and personhood.
Outcomes: This course aims to assist students in establishing a substantive familiarity with the positions
and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church
documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics.
Components: Lecture (In person)
Course Equivalents: IPS 654

**Catholic Bioethics and Social Justice**  
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.

Outcomes: Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context.

**Narrative Ethics**  
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.

Outcomes: This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics.

Infections and Immunology
IDIM400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.

Outcomes:
1. Explain the cellular basis of immune development
2. Differentiate between the mechanisms of activation of immune systems
3. Analyze the mechanisms involved in combating bacterial and viral infections.

Conceptual Bases of Infectious Diseases
IDIM401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.

Outcome:
1) Describe differences between bacteria and eukaryotes;
2) Understand mechanisms by which bacteria cause disease;
3) Understand limitations of current antimicrobial therapies;
4) Differentiate between similar diseases with different causes.

Components:
- Discussion(In person)

Parasitology and Virology
Prerequisite: IDIM 400

The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.

Outcomes:
1. Explain the mechanisms of pathogenicity of various infectious agents.
2. Analyze the mechanisms by which emerging viruses arise.
3. Apply knowledge to viral vaccine development.

**Course: The Molecular Biology of Viruses**

**Prerequisites:** Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and/or prior approval from the course director(s).

The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.

**Outcomes:** Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies.

**Components:** Lecture (in person)

**Req. Designation:** Fieldwork

**Room Requirements:** General Classroom(1)

### MIIM 441(3) - Course ID: 005297

**Course: Immunology-Imunochemistry**

This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.

**Outcome:** Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells.

**Components:** Lecture

CMO 499(1 - 4)  
Course ID:013692  
01-JAN-2019

Research
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.

Restricted to students enrolled in CMO MS program

The outcomes are: 1. Clearly communicate, describe, and implement techniques used for a research problem; 2. Describe results-obtained; 3. Draw conclusions based on data-obtained; 4. List future directions; and 5. Understand the significance of the work.

Components: Thesis Research(In person)

Req. Designation: Fieldwork

Room Requirements: Classroom Not Needed(1)

CMO 502(1)  
Course ID:013694  
01-JAN-2019

Seminar
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research.

Restricted to students enrolled in CMO MS program

The course outcomes are: 1. Describe results or conclusions from a given seminar presentation 2. Understand how research is advancing knowledge in a given field covered by a representative seminar 3. Question new data

Components: Seminar(In person)

Req. Designation: Fieldwork

Room Requirements: Classroom Not Needed(1)

CMO 503(1)  
Course ID:013693

Special Topics in Oncology
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars.

Restricted to students enrolled in CMO MS program

The outcomes will be: 1. Describe cutting edge research in the particular area of investigation covered by the course; 2. Discuss limitations to experimental approaches; 3. Discuss real-world application of the research topic being studied; and 4. Critically read scientific literature on cancer biology.

The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences.  
There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.  
Outcomes: Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental

Signal Transduction  
This course is open to all Ph.D., M.D./Ph.D., and M.S. students.  
Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic.  
Outcomes: Students will be able to interpret data and design experiments examining signal transduction pathways. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.

**PIOL 305(4) - Neurosciences**

- **Components:** Lecture
- **Req. Designation:** Fieldwork
- **Room Requirements:** General Classroom(1)

**PIOL 401(3) - Physiology**

This course integrates specific contents of the Function of the Human Body course PIOL 301. Students will learn cardiovascular and reproduction-endocrine physiology at graduate level. Topics will include: Cell & neurophysiology, skeletal, smooth muscle, cardiac electrophysiology and muscle mechanics, circulation, endocrine, and reproductive physiology.

This course is limited to graduate students who have passed the Systems Biology course BMSC 414.

Students will understand selected physiology topics in an integrative fashion with emphasis on normal physiological and biochemical systems in healthy humans and selected aspects of pathophysiological processes.

- **Components:** Lecture(In person)

The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.

**Outcomes:**
- Understand the relationships among molecular, cellular and systems physiology.  
- Understand membrane structure and function.  
- Understand distinct metabolic and signaling pathways.

Function of the Human Body I  
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will focus on clinical application and integration of conceptual information presented in lectures.

Components:  
- Lecture (In person)  
- Requirement Group: Restricted to students pursuing a M.S. in Physiology.  
- Req. Designation: Fieldwork

Function of the Human Body II  
Enrollment limited to Masters of Science in Physiology students.  

This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.

Outcomes: Students will be able to:
- Explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology.

Components:  
- Lecture (In person)  
- Requirement Group: Restricted to students pursuing a M.S. in Physiology.  
- Req. Designation: Fieldwork

Biochemical Physiology  
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical processes in a way that is relevant to human physiology.

Outcomes: Students completing this course should be able to:
- Understand the biochemical mechanisms which underlie physiological processes
- Understand protein structure dynamics and how these structures are dictated by secondary structure

Components:  
- Lecture

Basic Human Anatomy  
Enrollment limited to Masters of Science in Physiology students.  

This course will provide students with the basic concepts and facts of human gross anatomy as they relate to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.

Outcomes: Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine.

FUNDAMENTALS OF NEUROPHYSIOLOGY
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.

Outcomes: Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions.

This course encompasses an overview of key Exercise Science, training methodology and health behavior change principles. Students will then apply each principle into practice through screening and evaluation, exercise program design, and ethical, legal and professional responsibilities and guidelines.

Upon successful completion of the course, the student will be able to:
- Apply key exercise science, training methodology and health behavior change principles in context to the provision of exercise.
- Apply the practice of exercise and fitness screening and assessment, health appraisal and risk stratification, while simultaneously integrating ethical considerations and client preferences.

**Outcomes:**

Upon successful completion of the course, the student will be able to:
- Apply effective, exercise science-based group sessions for different fitness levels.
- Explain proper technique, demonstrate exercise, and teach appropriate methods to strengthen and stretch certain muscles.

This course focuses on the design, implementation and evaluation of exercise programs through case-based application and classroom activities. Health-related components of fitness and fitness assessments are reviewed. Individual and group exercise program designs within community-based settings for individuals through the life cycle are discussed. Evidence-based content is identified to critically analyze and develop conditioning programs and techniques for a broad range of sports and activities. Important elements of program design are used to emphasize desired client program outcomes.

Prerequisite: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)

This course will present the general principal and foundational skills for each component of the injury examination. These general principles will be applied to the recognition and examination of injuries/conditions specific to each body region. Address general medical conditions will likely encounter with patients.

Components: Lecture(In person)
Requirement Group: Prerequisite: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)
Req. Designation: Service Learning

Intro to Clinical Exercise Testing and Prescription
Prerequisite: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)

This class summarizes recommended procedures, including EKG and other stress testing modalities, for exercise testing and exercise prescription in healthy and diseased individuals.

Components: Lecture(In person)
Requirement Group: Prerequisite: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)
Req. Designation: Service Learning

EXCM 368(3)  Course ID:013885  15-JUN-2019
Advanced Clinical Testing and Prescriptions

This course focuses on physiological implications of metabolic conditions such as diabetes, cardiac and pulmonary disease on exercise. The course includes modifications to exercise testing and in-depth preparation for exercise prescription based on diseases and special conditions. The course reviews contraindications and considerations for exercise, EKG interpretation and implications of physiological responses to exercise. Behavioral strategies to implement in client exercise planning and education are addressed. Exercise prescription is discussed as part of the ongoing evaluation of client performance.

Prerequisite: EXCM 364

Outcomes:

Components: Lecture(In person)
Requirement Group: Prerequisite: EXCM 364 C-. Restricted to Undergraduate Exercise Science Majors
Req. Designation: Service Learning
Room Requirements: Classroom Not Needed(1)

EXCM 375(2)  Course ID:013886  01-JUL-2019
Special Populations in Exercise Science

This course provides practical information on exercise for persons with a wide range of health conditions, diseases and disabilities. Best-practice exercise prescription protocols for individuals across the life span will be addressed. An overview of unique physiology, effects of the condition on the exercise response, and effects of exercise training on the condition will be discussed. Recommendations for exercise testing and programming are presented for select populations.

Prerequisite: EXCM 201 and EXCM 364

Outcomes - At the successful completion of the course, the student will be able to:

**Movement Anatomy in Exercise**

Concepts and principles from anatomy and biomechanics are integrated into the analysis of human movement. This course focuses on application of the principles of human movement for normal function and application to different levels of physical performance through case based applications and classroom activities. Content includes anatomical lever systems, moment arms, stability and laws of motion. Systematic analysis of human movement in clinical conditions, performance, and wellness settings will be reviewed. Development of individual plans to improve movement is woven throughout the course.

Schl of Health Sci & Pub Hlth - Applied Health Sciences - Subject: Exercise Physiology

EXCM 401(4)  Course ID:013912  01-JUL-2019
Applied Physiology of Exercise
This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. Laboratory and field experiences provide students with opportunities to apply theory to practice.

Outcomes:

Components: Lecture
Requirement Group: Restricted to MS students in Exercise Science.
Req. Designation: Internship
Room Requirements: Classroom Not Needed(1)

EXCM 424(3)  Course ID:013909  01-JUL-2019
Motor Learning and Performance
The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.

Outcomes:

1. Understand theoretical approaches that drive motor control and motor learning research.

Components: Lecture

Health Promotion and Wellness Theories and Frameworks
This course emphasizes health promotion in diverse and changing cultures and societies. Determining and influencing factors of health are examined from a cultural competence perspective. Major health promotion, wellness, behavioral, and lifestyle theories that influence the professional practice of exercise science in community settings are integrated throughout the course. The role of the exercise scientist in health education for the prevention and treatment of health problems, health promotion, and enhancing quality of life is emphasized.

Outcomes:

1. Relate concepts of health, health promotion, and wellness that influence individual and group health and

Strength Training and Conditioning
This course focuses on the analysis of theory in the improvement of athletic performance, with specific emphasis on assessment and implementation of resistance training programs. Foundational knowledge in human physiology and biomechanics is applied to principles of speed, agility, power, flexibility, and technique development specific to individual goals. Principles of anaerobic and aerobic metabolism in relation to strength training and conditioning are a major focus in the course. This course provides foundational preparation for students interested in taking the National Strength and Conditioning Association Certified Strength and Conditioning Specialist's exam.

Outcomes:

1. Analyze the relation between resistance training and human performance.

**Nutrition, Health and Performance**  
This course focuses on advanced concepts of nutrition as these relate to health, exercise, fitness, and performance. The role of micronutrients and macronutrients in major dimensions of health and fitness are addressed. Advanced concepts in nutrient selection, metabolism, and timing are integrated into plans for supporting and improving health and performance. Collaborative practice with dietetics professionals and the interprofessional team in optimizing health, fitness, and performance capacity is a major unifying concept of the course.

Outcomes:
1. Attribute major functions of macronutrients and micronutrients to health, exercise, fitness and performance.

**Cardiac and Pulmonary Disease and Rehabilitation**  
This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.

Outcomes:
1. Understand anatomy and physiology associated with cardiopulmonary health and disease.

**Application of Advanced Clinical Exercise Testing & Prescription**  
This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.

Outcomes:

This course focuses on the advanced knowledge and competencies needed to evaluate health behaviors and risk factors in special populations across the lifespan. The administration of fitness assessments and the design, implementation, and evaluation of exercise programs in special populations are addressed. Exercise is approached as a therapeutic and treatment modality for individuals and groups with a variety of anatomic, physiologic, cognitive and sensory alterations.

Outcomes:
1. Understand the advanced physiology of growth and development, aging, and the pathophysiology of health conditions, disease and disability in special populations.

Advanced Exercise Assessment and Programming
This course focuses on principles of periodization applied to a performance enhancement setting. Major dimensions of the course include cycles and periods, peaking for competition, and rest and recovery. Periodization models and theories are examined, with a special emphasis on contemporary research findings that are applied to enhance athletic training and physical performance. Assessment of training programs based on performance requirements are a major emphasis throughout the course.

Outcomes
1. Apply periodization models in the optimization of athletic or physical training and performance.
2. Analyze the relationship between training volume and intensity over time.
3. Analyze principles of program design for performance enhancement.

**Nutrition Focused Physical Assessment**

This course focuses on physical and laboratory assessment skills necessary for the dietitian's practice, particularly in nutritional assessment and medical nutrition therapy. Emphasis is placed on skill development relevant to nutrition care of the individual, and/or for nutrition program delivery or evaluation. This course incorporates both classroom and lab activities.

**Components:** Laboratory(In person)

**Medical Nutrition Therapy Theory**

This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, renal, and/or gastrointestinal disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

**Components:** Lecture(In person)
Supervised Practice (SP) in Medical Nutrition Therapy

This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

### Clinical Chemistry II

**Course ID:** 013712  
**Course Date:** 01-JUL-2019

**Description:** Advanced course in clinical chemistry/biochemistry which continues study of measurement and interpretation of chemical constituents in human blood and body fluids. Topics include endocrinology, organ systems, therapeutic drug monitoring, toxicology, tumor markers and nutritional chemistry. This course will prepare students for their clinical practicum in Clinical Chemistry.

**Enrollment Condition:** Admission to the M.S. in Medical Laboratory Science program

**Outcomes:** Upon completion, students will be able to identify interrelated human metabolic functions in normal and disease states, analyze laboratory data, interpret results, and utilize information to determine a diagnosis.

**Components:**
- Lecture (In person)

Outcomes: Upon completion of this course students will be able to utilize leadership theories to evaluate and demonstrate effective management through evaluation of common clinical laboratory issues.

Components: Lecture (In person)
Requirement Group: Completion of MLS 401 with a minimum grade of C. Restricted to Medical Laboratory Science Graduate School students.
Req. Designation: Internship
Room Requirements: Seminar (1)

Laboratory Leadership II
The second installment in the three course Leadership series prepares the student for a laboratory position by developing skills in basic laboratory management practices including financial considerations, laboratory regulations, and laboratory operations.

Admission to the M.S. in Medical Laboratory Science program

Upon completion of this course students will exhibit knowledge of the financial requirements needed for effective laboratory management and the role of laboratorians in regulation and accreditation of laboratories.

Components: Seminar (In person)
Requirement Group: Prerequisite: Completion of MLS 465 with a minimum grade of C. Restricted to Medical Laboratory Science Graduate School students.
Req. Designation: Internship
Room Requirements: Seminar (1)

Laboratory Leadership III
The final installment in the Leadership series of courses prepares the student for a laboratory position by developing skills in career planning, introduction to professional development, grant writing, and process improvement planning.

Completion of MLS 466 Laboratory Leadership II and good academic standing as defined by the M.S. in Medical Laboratory Science handbook.

Upon completion of this course students will exhibit skills needed for effective laboratory management including departmental improvement planning, professional development and performance feedback.

Components: Lecture
Requirement Group: Prerequisite: Completion of MLS 465 with a minimum of a B. Restricted to Medical Laboratory Science Graduate School students.
Req. Designation: Internship
Room Requirements: Seminar (1)

Bacteriology and Virology
Introduction to bacteria and viruses, with a focus on organisms that are medically relevant to humans. Specimen collection, processing, identification techniques, and recognition of key diagnostic features will be emphasized. Students will correlate clinical features to laboratory findings. This course will prepare students for their clinical practicum in Microbiology.

Prerequisite: Admission to the M.S. in Medical Laboratory Science program.

Outcomes: Upon completion, students will be able to identify bacterial or viral organisms by characteristic clinical features of infections through laboratory testing.

Components: Seminar (In person)
Requirement Group: Completion of MLS 401 with a minimum grade of C. Restricted to Medical Laboratory Science Graduate School students.
Req. Designation: Internship
Clinical Parasitology and Mycology
Study of parasites and fungi that are medically relevant to humans. This course introduces students to the taxonomy and identification of morphologic and microscopic characteristics of parasites and fungi. Diagnosis of disease states based upon laboratory findings will be emphasized.

Admission to the M.S. in Medical Laboratory Science program
Upon completion of this course, students will be able to identify the pathogenesis, symptomatology, laboratory diagnosis, and treatment for the parasites and fungi included in the course.

Components: Lecture (In person)
Requirement Group: Prerequisite: Completion of MLS 470 with a minimum grade of C. Restricted to Medical Laboratory Science Graduate students.

Req. Designation: Internship
Room Requirements: Seminar (1)

Clinical Practice in Hematology
Clinical experience in Hematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.

Prerequisite: Completion of MLS 410, MLS 415, MLS 450, MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook.

Outcomes: Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Hematology testing in a medical laboratory.

Components: Practicum (In person)
Requirement Group: Prerequisite: Completion of MLS 465 with a minimum of a B. Restricted to Medical Laboratory Science Graduate students.

Req. Designation: Internship
Room Requirements: Classroom Not Needed (1)

Clinical Practice in Chemistry
Clinical experience in Chemistry under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.

Prerequisite: Completion of MLS 440, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook.

Outcome: Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Chemistry testing in a medical laboratory.

Components: Practicum
Requirement Group: Prerequisite: Completion of MLS 465 with a minimum of a B. Restricted to Medical Laboratory Science Graduate students.

Req. Designation: Internship
Room Requirements: Classroom Not Needed (1)

Clinical Practice in Immunohematology
Clinical experience in Immunohematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.

Completion of MLS 455, MLS 460, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook.

Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Immunohematology testing in a medical laboratory.

Components: Practicum
Requirement Group: Prerequisite: Completion of MLS 465 with a minimum of a B. Restricted to Medical Laboratory Science Graduate students.

Medical Laboratory Science Capstone

The MLS Capstone exposes students to leadership and ancillary niche aspects beyond those of a standard Medical Laboratory Science curriculum. Students will create a Capstone project to reflect on their unique experience in the field and demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding laboratory medicine.

Prerequisite: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook.

Outcome: This course will provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework, professional practice, and their Capstone Experience.

<td>Healthcare in America</td>
<td>This course provides an introduction to the U.S. healthcare system including its overall structure and function. The history of health care in the U.S. is explored and used to frame the role and function of healthcare stakeholders including providers, suppliers, payers, workforce and consumers. Emphasis is given to the government's dominant role in health care delivery, payment and regulation, as well as the differences between public health and for profit as well as not for profit health care systems. The social justice implications of cost, quality and access are highlighted. Outcomes: At the successful completion of the course, the student will be able to: 1. Describe the evolution of health care in America and the influence of history on the current health care system. 2. **Healthcare Project Management**

Project management framework, terms, and fundamental concepts are introduced in this course. The application of project management processes and tools within healthcare environments is emphasized. Students learn to manage a project from concept to completion and share responsibilities in the execution of a real-world team project.

Outcomes: Upon successful completion of this course, the student will be able to: 1. Perform the developmental steps necessary to execute a project. 2. Utilize tools critical to project management. 3. Produce project deliverables within a team environment. 4. Differentiate between a functional manager and a project manager. 5. Apply problem-solving techniques to the project management process. 6. Explore concept of risk control in project management.

Course ID: 010370  
01-SEP-2019  

This course introduces fundamental concepts related to financial management of healthcare organizations. Students explore financial-decision tools and the role of financial decision-making in managing delivery of care. How the U.S. health system impacts an organization's financial health and management is considered. Major concepts include cost-accounting, budgeting, cost/benefit analysis, and reimbursement mechanisms.

Prerequisite: FIN 301.

Outcomes: At the successful completion of the course, students will be able to: 1. Describe the impact of political, social, and economic factors on the cost of patient care delivery. 2. Analyze the impact of U.S.

**Field Internship**  
This course is a formalized professional experience that may or may not be compensated. Students work on-site with an organization in the healthcare industry under the supervision of both a field preceptor and faculty advisor. Students develop skills and practical knowledge beyond the classroom by conducting a goal-based project of value to the internship site. Project objectives are developed and agreed to by student, faculty and preceptor. The experience involves four on-campus seminars plus a minimum of 196 on-site hours fulfilled on a weekly basis as mutually agreed between student and preceptor.

**Pre-Requisites:** ISSCM 241 or PSYC 304, HSM 358 or GNUR 360, ECON 201, ACCT 201, FINC 332, COMM 101, HSM 110, 210, 220, 230, 240, 310, 315, 330, 340, 368, and 386.

**Foundations of Health Informatics**
Health Informatics / Biomedical Informatics is the information as studied in or applied to biomedical science, healthcare, and public health. Thus, its focus is on the use of informatics methods to transform data into actionable knowledge within the broad context of health, from basic science, to public health.

Outcomes: By the end of this course, students will be able to understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge.

**Translational Bioinformatics**
This course covers the fundamental issues of bioinformatics and how they apply to translational and clinical problems. The course is organized in 4 parts: sequence analysis, databases and ontologies, genome-wide association and linkage analysis, and networks.

Prerequisite: HIDS 411 Clinical Data Science

Outcomes: Students will be able to understand and apply a broad range of bioinformatics algorithms, and their computational efficiency; apply and analyze informatics techniques to retrieve, store, and analyze `omics¿ data.

Components:  
Lecture  
Req. Designation: Internship

**Security and Privacy in Healthcare**
This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.

Outcomes: Students will be able to understand the role of information security and data privacy in healthcare; apply basic principles of computer security; apply/analyze security principles in research data management.

**Ontologies in Health**
This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.

Outcomes: Students will be able to understand the role of ontologies in knowledge representation; understand the differences between realist and anti-realist ontologies and apply different types of ontologies in biomedical research.

**Determinants of Population Health**

This course will introduce students to the public health perspective population perspective. A major focus of the course is understanding the fundamentals of health disparities and how they are produced and reproduced, and how simple solutions to our most pressing public health problems are unlikely to succeed.

**Environmental Health**

This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

**Introduction to Epidemiology**

Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

### MPH Capstone

The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice.

Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.

**Outcomes:** The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation.

**Components:** FTC-Supervision (In person)

**Req. Designation:** Internship

**Room Requirements:** Classroom Not Needed

### Intro to Statistical Computing for Public Health

This course introduces students to statistical computing. The emphasis is on manipulating data sets and basic statistical procedures such as t-tests, chi-square tests, and correlations. The course currently focuses on the use of SAS and STATA software packages.

**Prerequisites:** This course is designed for students who have taken or are taking Introduction to Epidemiology (MPBH 403) and Biostatistics I (MPBH 404 or 409).

**Outcomes:** Upon completion of this course, students will be able to use statistical software to: read in data files, subset data, create variables, recode data values, analyze data, summarize the results.

**Components:** Lecture (Blended)

**Req. Designation:** Internship

**Room Requirements:** Lab - Computer

### The Epidemiology of Obesity: An Energy Balance Perspective

This course is a survey course designed to expose MPH and other interested inter-professional students, e.g. nursing and dietetic students, to the multiple domains of the worldwide obesity epidemic. The course will explore determinants, outcomes and public health policy associated with obesity from the perspective of energy balance, i.e. that ultimately all determinants and outcomes of obesity.

**Outcomes:** Describe the concept of energy balance and how it is related to the development, treatment and prevention of overweight and obesity. Explain the scope and historical trends of obesity prevalence among children and adults in both the industrialized and developing worlds.

**Components:** Lecture (In person)

**Topics:** An Energy Balance Perspective

**Requirement Group:** Public health, and graduate students in Nursing, Social Work, Sociology, and Dietetics

**Req. Designation:** Internship

**Room Requirements:** Electronic Classroom

### Introduction to Global Health

Introduction to Global Health is an introductory course to global health, both epidemiology and policy aspects, focusing on health disparities on the international level.

**Components:** Lecture (Online)

**Requirement Group:** Restricted to Graduate students or students enrolled in the Master of Public Health

**Req. Designation:** Internship

**Room Requirements:** Classroom Not Needed

### Health Services Research Methods

This course introduces students to the scope of health services research by addressing issues central to understanding and applying modern research to public health and health policy.

**Outcomes:** Determine health services research's scope. Formulate questions and develop studies using primary data collection approach that are timely and relevant to contemporary organization, financing, and delivery of U.S. public health.

**Components:** Lecture (Online)

Public Health Law: Theories and Cases
This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy.
This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.
Outcomes: Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching

Health Economics and Healthcare Financing
This course will examine selected topics in health economics with major implications for healthcare delivery, healthcare financing and clinical and public health research. Essential economic theories and methods for exploring each topic will be discussed along a review of existing empirical research.
Outcomes: Describe the US health delivery and financing system; Apply essential economic theories/methods to study consumer behavior and healthcare demand, healthcare market and supply of services, and medical cost-effectiveness analysis
Components: Lecture(Online)
Req. Designation: Internship

Policy Analysis
This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice.
Outcome: Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems.

This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.

Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change.
2) Identify and critique future steps forward to reduce public health concerns of climate change.

#### Introduction to Public Health
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.

**Outcomes:**
- Describe the history, core concepts, functions, and methods of public health.
- Define health disparities and explain how they are produced.
- Synthesize public health information and communicate it effectively.

**Components:**
- Lecture(In person)
- Internship

**Room Requirements:**
- Seminar(1)

#### Introduction to Epidemiology
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including study design and measures of association.

**Outcomes:**
- Apply epidemiological methods to public health problems; select appropriate quantitative data collection, study designs, and analytical methods; apply adjustment techniques; and calculate measures of association; and interpret and communicate results.

**Components:**
- Lecture(In person)
- Restricted to Public Health majors.
- Internship

**Room Requirements:**
- Electronic Classroom(1)

#### Critical Thinking in Public Health
This course is designed to prepare students to make reasoned, intelligent decisions about public health matters by learning about and practicing how to think, read, write, and speak critically.

**Outcomes:**
- Be able to evaluate the credibility of sources of information, scrutinize arguments, recognize biases in oneself and in others, and take a stand on public health issues and support it.

**Components:**
- Lecture(In person)
- Restricted to Public Health majors.
- Internship

**Room Requirements:**
- Seminar(1)

#### Foundations of Public Health Policy
Provides students with theoretical frameworks to understand public health policy issues, introduces public policy making processes, and enables students to analyze position papers on policy topics. Drawing from law, economics, political science, ethics and epidemiology, the course provides students with the knowledge and skills to understand policy-making processes.

**Outcomes:**
- Explain how federal, state, and local health policy is formulated, implemented and evaluated.
- Assess the balance between the public good and individual rights in the policy process in public health.

**Components:**
- Lecture(In person)
- Restricted to Public Health majors.
- Internship

**Room Requirements:**
- Seminar(1)
This course is an introduction to global public health and focuses on health disparities on the international level. The course addresses the determinants, consequences and trends of infectious and non-communicable disease, maternal and child health, and refugee and migrant health in low-and-middle-income countries.

**Outcomes**

Students will be able to discuss major current global public health issues, identify effective and ineffective aspects of international public health programs, and create context-specific health promotion materials.

**Components:** Lecture (In person)

**Requirement Group:** Restricted to Public Health majors.

**Req. Designation:** Internship

**Room Requirements:** Electronic Classroom (1)

**Public Health Practice and Management**

This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.

Foundations of Environmental Science I

Prerequisites: The course is intended for majors/minors within the Department Environmental Science. Students majoring in other disciplines may enroll if space remains after ENVS majors enroll.

This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere, and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.

Outcomes: Recognize... interconnections among scientific disciplines and how their principles are used to investigate and address environmental issues; understand physical, chemical and ecological principles

Components:
- Lecture (In person)

Requirement Group:
- Restricted to Majors in the Institute of Environmental Sustainability

Environmental Careers and Professional Skills

Introduction to environmental professions and determining skills and individual traits best suited for professions in policy, science, business, community organizing, etc. Begin developing a professional network.

Outcomes: Select appropriate internships, curriculum, projects to enhance knowledge, skills and experience; develop job hunting and communication skills specific to environmental fields, including resumes, cover letters, presentations.

Components:
- Lecture (In person)

Environmental Statistics

This course introduces basic statistics from probability through multiple regression, employing computer programs with ecological, environmental, and relevant social science examples and data sets.

Restricted to IES majors.

Outcomes: Programming/spreadsheet skills; data structure practices and diagnosis; data visualization; appropriate test selection; test execution and interpretation; introduction to qualitative data analysis.

Gender, Health & Environment
Exploration of connections between social justice and environmental health using scientific tools of analysis. Focus on experiences of those at intersection of marginalized social locations. Issues include impacts of modern disposable culture and how socially constructed gender roles affect exposure to environmental health risks while biological sex shapes their impacts.

Outcome:
Understanding the web of causality (relationships among scientific, medical, ecological, cultural, behavioral, economic, political, and ethical dimensions) of environmental health problems and how to ameliorate the disproportionate burden of risk.

Environmental Journalism

The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.

Outcomes: Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing.

Components: Lecture
Course Equivalents: COMM 260
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

Bird Conservation and Ecology

This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management.

Pre-Requisites: ENVS 137 or BIOL 102

Outcome: Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation.

Components: Lecture
Requirement Group: P ENVS 137 or BIOL 102
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

ENVS 270(3) Course ID:010350 15-JUN-2018
Environment of China

This course provides a systematic introduction to major environmental issues in the context of recent social and economic development in China.

Prerequisite: UCSF 137 or ENVS 137

Components: Lecture
Course Equivalents: ASIA 272

Energy and The Environment

Requirement: UCSF 137 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Biology, Department of Chemistry, Department of Environmental Science, Department of Physics, Bioinformatics, Forensic Science or Neuroscience.

The concept of energy developed from antiquity through the present day and applied to national and worldwide energy use patterns, the technologies supporting their use, as well as the societal impact and environmental consequences of energy usage.

Outcome:

Components: Lecture
Course Equivalents: PAX 273
Attributes: Engaged Learning, Tier 2 Scientific Knowledge, Bioethics, Environmental Studies, Peace Studies
Req. Designation: Service Learning
Room Requirements: General Classroom(1)

ENVS 274(3)  Course ID:013355  15-JUN-2019

Chemistry of the Environment

Introduction to chemical principles in the natural and altered environment. This course covers the fundamentals of organic and inorganic chemistry in the context of the pressing environmental issues: air pollution, stratospheric ozone depletion, climate change, water pollution, and environmental contaminants.

Outcomes: Understand chemistry behind environmental problems; predict solubility, reactivity, storage in environmental compartments; understand different chemical models used to determine fate and transport of chemicals in the environment.

Components: Lecture(In person)
Course Equivalents: CHEM 312
Attributes: Tier 2 Scientific Knowledge, Bioethics, Urban Studies
Requirement Group: Prerequisites: ENVS 137 & CHEM 101; Restricted to IES majors.
Req. Designation: Service Learning

ENVS 275(1)  Course ID:013358  15-JUN-2019

Chemistry of the Environment Lab

Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills.

Pre-requisites: ENVS 137 & CHEM 101; Restricted to IES majors

Plan experiments, develop good lab techniques, conduct accurate chemical analyses on environmental samples, interpret chemical data, short and long reports describing work and interpreting significance of results.

Components: Laboratory(In person)
Course Equivalents: CHEM 313
Attributes: Bioethics
Requirement Group: Prerequisites: ENVS 137 & CHEM 101; Restricted to IES majors.
Req. Designation: Service Learning
Room Requirements: Lab - STEP(1)

Hydrology

Study of processes which cycle water between oceans, atmosphere, and land surface. This course examines precipitation, evaporation, infiltration, transpiration, groundwater and surface water flow. Understanding these processes is fundamental to managing our resources in the face of mounting environmental challenges and natural resource pressures.

Outcomes: Understanding of key physical processes and multidirectional complex interactions between different components of the water cycle; ability to apply fundamental equations of conservation to quantify flows.

Components: Lecture(In person)
Req. Designation: Service Learning
Room Requirements: Electronic Classroom(1)
### ENVS 279(3) Climate and History

**Course ID:** 011766  
**15-JUN-2019**  
**Instructor Consent Required**

**Course Description:** Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.

**Outcomes:** Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today.

**Components:** Lecture (In person)

**Course Equivalents:** HIST 279E

**Req. Designation:** Writing Intensive

**Room Requirements:** Electronic Classroom(1)

### ENVS 280(3) Principles of Ecology

**Course ID:** 010113  
**15-JUN-2019**

**Prerequisites:** ENVS 237 & Major within Institute of Environmental Sustainability

**Course Description:** The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation. Restricted to majors within IES.

**Outcome:** Students will understand key concepts and principles concerning ecological processes in nature at

**Components:** Lecture

**Attributes:** Bioethics

**Requirement Group:** Prerequisite: ENVS 237 or CHEM 101 & Major within Institute of Environmental Sustainability

**Req. Designation:** Writing Intensive

### ENVS 281C(3) Environmental Sustainability & Science in China

**Course ID:** 012721  
**04-AUG-2016**

**Prerequisite:** ENVS 137 or UCSF 137

**Course Description:** This course provides students with an understanding of how sustainable systems work and how the structure and function of these systems is altered by human activities. Students will gain first-hand experience studying environmental issues in China [air/water pollution, loss of biodiversity, and climate change] through lectures & field trips.

**Outcome:** Students will develop an in-depth understanding of human-environment relations in China and gain an appreciation for the interconnectivity of components, human included, of the natural world.

**Components:** Lecture (In person)

**Attributes:** Engaged Learning, Tier 2 Scientific Knowledge, Chinese Language & Culture

**Requirement Group:** Prerequisite: ENVS 137, BIOL 101 or UCSF 137

**Req. Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1)

### ENVS 281V(3) Humans and the Environment in Contemporary Vietnam

**Course ID:** 012722  
**01-JAN-2019**

**Prerequisite:** ENVS 137 or UCSF 137

**Course Description:** This course is intended to provide students with deep and practical understandings of three interrelated concepts: sustainability, conservation, and biodiversity. Students will also learn about the current condition of Vietnam's environment, causes of environmental degradation in Vietnam, and current efforts towards environmental sustainability in Vietnam.

**Outcome:** Students will grasp the concept of sustainability as it applies to Vietnam, understand the current state of the environment, and current efforts to mitigate problems in Vietnam.

**Components:** Lecture (In person)

**Topics:** Human Impact on Environment

**Attributes:** Tier 2 Scientific Knowledge, Asian Studies, Global & International Studies

**Requirement Group:** Prerequisite: ENVS 137, BIOL 101 or UCSF 137

**Req. Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1)

Applied Interdisciplinary Data Analysis
Restricted to students in IES majors. This course teaches students to approach environmental problem-solving from a systems perspective by understanding the complex adaptive nature of socio-ecological. It introduces analytic techniques used in the natural/social sciences, and provides opportunity to analyze and connect data from various disciplines (e.g., ecology, economics, sociology) to address pressing environmental concerns.

Prerequisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)

Outcomes: Students will be able to describe characteristics of complex adaptive systems, become familiar with analytical approaches suited to different sub-disciplines, and apply numerous analytical techniques to real data sets.

Environmental Health
Epidemiology is the study of the distribution and determinants of disease in populations. This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

ENVS 313(3)  Course ID:013777  10-JAN-2019

Energy Law & Policy
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.

Prerequisite: ENVS 310 recommended

Outcomes: Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies.

Components: Lecture (In person)
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

ENVS 319(3)  Course ID:013075  06-JUN-2018

Winter Ecology
Prerequisite: BIOL 265 or ENVS 280 or permission of instructor
Students will immerse themselves in the winter environment and learn about habitats on, in, and under snow, both terrestrial and aquatic, organisms that live in these habitats and their physiological, behavioral and morphological adaptations for survival. Students will gain an understanding of research on winter ecosystems.

Outcomes: Students will gain understanding of habitats and organisms present during winter in temperate ecosystems and gain experience with field techniques employed when studying these ecosystems.

Components: Field Studies (In person)
Course Equivalents: BIOL 329
Requirement Group: Prerequisite: BIOL 265 or ENVS 280
Req. Designation: Writing Intensive
Room Requirements: Classroom Not Needed(1)

ENVS 320(3)  Course ID:012751  06-JUN-2018

Conservation Biology
Prerequisites: ENVS 280 & 286

Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.

Outcome: Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems.

Components: Lecture (In person)
Requirement Group: Prerequisites: ENVS 280 & 286
Req. Designation: Writing Intensive

ENVS 321(1)  Course ID:012732  06-JUN-2018

Conservation Biology Lab
Prerequisites: Prerequisite: ENVS 280/286; co-requisite ENVS 320.

Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.

Outcomes: This course will provide practical field and lab experience in population, community and ecosystem conservation. Students will learn how the principles of Conservation Biology are applied, and the associated challenges.

Components: Laboratory (In person)
Requirement Group: Prerequisites: ENVS 280, ENVS 286 Pre- or Co-requisite: ENVS 320
Req. Designation: Writing Intensive
Room Requirements: Lab - Biology(1)
Invasive Species

Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.

Prerequisites: ENVS 280 or BIOL 265

Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem.

Outcomes:

Components: Lecture (In person)
Requirement Group: Prerequisite: BIOL 265 or ENVS 280
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

Sustainable Agriculture

Prerequisites: ENVS 280 or BIOL 265

This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.

Outcomes: Students will be able to explain the characteristics of the U.S. agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system.

Components: Lecture (In person)
Requirement Group: Prerequisite: ENVS 280 or BIOL 265
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

Agroecosystems

Prerequisites for Environmental Science and Environmental Studies majors: ENVS 237 & 238; OR BIOL 102 & 112; ENVS 223 is recommended.

In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.

Outcomes: Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating

Food Systems Analysis

Prerequisite: ENVS 237

This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.

Outcomes: Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis.

Components: Lecture (In person)

Restoration Ecology Lab
Prerequisites: ENVS 280 & 286 or BIOL 265 & 266; Co- or Pre-requisite: ENVS 330

Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.

Outcomes: Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects.

Industrial Ecology
Industrial ecology combines Business, Environment, & Engineering to shift industrial processes from linear (open loop) systems, where resources move through the system to become waste, to circular (closed loop) systems where waste becomes inputs for new processes. Students will learn life cycle assessment (LCA) to measure environmental impacts.

Outcomes: Students will understand how business and industry can create zero waste systems, how a circular economy works, and the tools of industrial ecology, including life cycle assessment.

Requirement Group: Pre-requisite: ENVS 363
Req. Designation: Writing Intensive
Room Requirements: Electronic Classroom(1)

Circular Economy
Principles and concepts of circular economy that can support a more sustainable economic system. Includes consideration of circular design, materials management, business models, supply chains, policy, financing, metrics, and applications. May include field trips to explore companies with circular business practices.

Prerequisite: UCSF 137 or ENVS 137; MGMT 201 for QSB students

Outcomes: Students learn to explain circular economy, including opportunities, challenges, critiques. Learn to identify applications of circularity in business models and value creation. Learn metrics and indicators of for circular economies.

Requirement Group: Prerequisites: ENVS 137 or UCSF 137; MGMT 201 for Quinlan School of Business students
Req. Designation: Writing Intensive

Ecological Economics
Prerequisites: ECON 201

Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges.

Outcomes: Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic

Biomimicry: Design Inspired by Nature
Prerequisites: UCFS 137 or ENVS 137; MGMT 201 for Quinlan School of Business students

This course provides an introduction to biomimicry (or biomimetics) and the application of biomimicry design principles. Biomimicry is the design of business products, processes, and systems modeled after nature's wisdom. In biomimicry, nature serves as the design inspiration for sustainable solutions to solve complex human problems.

Outcomes: Students will learn the concept of biomimicry and life principles, be able to identify examples, apply biomimicry design principles, and view nature as model, mentor, and measure.

Climate Change and Human Health
Department Consent Required

This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.

Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change.
2) Identify and critique future steps forward to reduce public health concerns of climate change.

Components: Lecture(Online)
Requirement Group: Restricted to Juniors and Seniors within IES
Req. Designation: Writing Intensive
Room Requirements: Classroom Not Needed(1)

Natural History of Belize
Prerequisites:
For Environmental Science or Environmental Studies Majors/Minors: ENVS 137
For Biology Majors/Minors: BIOL 102 & 112
For Anthropology or International Studies Majors/Minors: Junior or Senior Standing

This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.

Components: Field Studies(In person)
Requirement Group: Prerequisites: For Environmental Science or Environmental Studies Majors/Minors: ENVS 137 For Biology

Conservation and Sustainability of Neotropical Ecosystems
Prerequisites: For Biology Majors/Minors: Bio 265; For Environmental Science Majors: ENVS 280

This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.

Outcomes: Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture.

Components:
Lecture(In person)
Requirements Group: Prerequisite: BIOL 265 or ENVS 280

Solutions to Environmental Problems: Biogas
'STEP: Biogas' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to biogas production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.

Prerequisites: UCSF 137 or ENVS 137 grade of C- or better

Outcomes: Students will develop understanding of environmental problems related to biogas, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement.

Components:
Laboratory(In person)
Requirement Group: Prerequisites: UCSF 137 or ENVS 137 grade of C- or better

Solutions to Environmental Problems:Climate Action
Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences.

Prerequisites: ENVS 224 or instructor permission

Outcomes: Develop understanding of environmental problems related to climate change, demonstrate skills/knowledge needed to address those problems and recognize/articulate future possibilities for environmental leadership/civic engagement.

Components:
Lecture(In person)
Attributes: Engaged Learning
Req. Designation: Service Learning
Room Requirements: Electronic Classroom(1)
Solutions to Environmental Problems: Food Systems

'STEP: Food Systems' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to food production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.

Outcomes: Students will develop understanding of environmental problems related to food systems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement.

Components: Lecture(In person)
Attributes: Engaged Learning

Introduction to Sustainability Concepts & Impacts

Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders.

Outcomes: Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions.

Components: Lecture(Online)
Req. Designation: Service Learning
Room Requirements: Classroom Not Needed(1)

Sustainability Assessment & Reporting I

Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.

ENVS 351 prerequisite

Outcomes: Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation.

Components: Lecture(Online)
Requirement Group: Prerequisite: grade of C- or better in ENVS 351
Req. Designation: Service Learning
Room Requirements: Classroom Not Needed(1)

Sustainable Business Management

Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.

Prerequisites: ENVS 137 or UCSF 137 or MGMT 201 for Quinlan School of Business Students

Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

Components: Lecture(Blended)
Course Equivalents: ENVS 463
Requirement Group: Prerequisites: ENVS 137 or UCSF 137; MGMT 201 for Quinlan School of Business students
Req. Designation: Service Learning

Sustainability Management in the Global Context
This study abroad course takes students to international destinations to learn about business and sustainability management in the global context. Students hear presentations from local experts on sustainability in government, nonprofit, & for-profit entities, visit entities that have adopted sustainability practices, & visit local cultural sites. Fulfills MGMT elective.

Prerequisites: UCFS 137 or ENVS 137 (ENVS 363 recommended); MGMT 201 for Quinlan School of Business students

Outcomes: Students will understand sustainability perspectives outside the U.S., practical examples of circular operations and strong sustainability, and global, regional, and local sustainability concerns.

Components:
- Lecture

Course Equivalents: ENVS 464

Requirement Group:
Prerequisites: ENVS 137 or UCSF 137; MGMT 201 for Quinlan School of Business students

Field Ornithology
Prerequisites: ENVS 280/286 or BIOL 265/266. Recommended: BIOL 215 (not required)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.

Outcome: Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

Components:
- Lecture

Requirement Group:
Prerequisites: ENVS 280 & 286 or BIOL 265 & 266
Req. Designation: Service Learning

Introduction to Geographic Information Systems
Prerequisites: This course is intended for upper-division undergraduates (junior/senior) and graduate students.
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.

Outcomes:
- describe the conceptual/theoretical and practical/technological background of GIS.

Components:
- Lecture

Course Equivalents: ENVS 480
Attributes: Urban Studies
Req. Designation: Service Learning
Room Requirements: Lab - Computer

ENVS 381(3)  Course ID:013822  15-JUN-2019
Advanced GIS Applications
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.

ENVS 380 is prerequisite

Outcomes: Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy.

Components:
- Lecture

Requirement Group:
Prerequisite: ENVS 380
Req. Designation: Service Learning
Room Requirements: Lab - Computer
ENVS 383(3)  Course ID:012752  06-JUN-2018
Human Dimensions of Conservation
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.
Outcomes: Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions.
Components: Lecture(In person)
Req. Designation: Service Learning
Room Requirements: Electronic Classroom(1)

ENVS 384(3)  Course ID:013823  15-JUN-2019
Conservation Economics
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture.
ECON 201 is prerequisite
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences.
Components: Lecture(In person)
Requirement Group: grade of C- or better in ECON 201
Req. Designation: Service Learning
Room Requirements: Electronic Classroom(1)

ENVS 385(3)  Course ID:013208  15-JUN-2019  Instructor Consent Required
Introduction to Global Health
This course introduces students to epidemiological and policy aspects of global health with a focus on health disparities at the international level.
Enrollment Conditions: IES juniors and seniors
Outcome: Understand approaches to existing and emerging health problems and the relationships between health, poverty, and development.
Components: Lecture(In person)
Attributes: Bioethics
Req. Designation: Service Learning
Room Requirements: Electronic Classroom(1)

ENVS 387(3)  Course ID:012743  15-JUN-2019
Principles of Ecotoxicology
Prerequisites: For Biology majors BIOL 265; For Chemistry majors CHEM 312; For Environmental Science majors ENVS 280.
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.
Outcomes: This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems and to prepare them for graduate study/future career.
Components: Lecture(In person)
Attributes: Bioethics
Requirement Group: Prerequisites: BIOL 265 or CHEM 312 or ENVS 280

**Applied Environmental Statistics**
Tools and methods for analyzing combined social and ecological datasets. Emphasis on learning advanced quantitative statistics and applying this to project work. Students required to include both ecological and social data analysis in their projects and working with computer programs and output written in R/R-Studio, and interpreting output from these programs.

ENVS 203 or STAT 103 is prerequisite; restricted to IES students

Outcomes: Understand and be able to articulate fundamental statistical concepts; interpret software output and published articles; communicate results; describe data, articulate relevant hypotheses, know statistical tests which may be correctly applied.

**Components:**
- Lecture (In person)

**Requirement Group:** Prerequisite: grade of C- or better in ENVS 203 or STAT 103. Restricted to IES juniors and seniors

**Req. Designation:** Service Learning

**Room Requirements:** Electronic Classroom(1)

**Ecological Risk Assessment**
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced.

ENVS 274 and ENVS 275 required; ENVS 203 recommended

Outcomes: Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies.

**Components:**
- Lecture (In person)

**Requirement Group:** Prerequisite: at least C- in ENVS 274 and ENVS 275.

**Req. Designation:** Service Learning

**Room Requirements:** Electronic Classroom(1)

**Integrative Seminar**
This course requires students to focus on a specific environmental issue or theme, integrating multidisciplinary perspectives, through individual or group presentations, discussion, and analysis of presentations by outside speakers.

Outcome: Students will demonstrate an understanding of the multi-faceted and interdisciplinary nature of environmental issues.

**Components:**
- Seminar

**Topics:**
- Ecoethics/ Age of Global Chng, Current Environmental Issues

**Requirement Group:** Pre-requisite: Senior standing only.

**Req. Designation:** Service Learning

**Room Requirements:** Seminar(1)

**Environmental Research**
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor.

Enrollment Conditions: Administrative Permission

Outcomes: Students will be able to design and carry out the research that is original and meaningful, including data collection, analysis, and interpretation.

**Components:**
- Independent Study

**Attributes:**
- Engaged Learning

**Req. Designation:** Undergraduate Research
### ENVS 391C(3)
#### Independent Environmental Research (Capstone)
**Course ID:** 013461  
**Instructor Consent Required:** 15-JUN-2017

Fulfills capstone requirement for IES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation.

**Prerequisite:** IES advisor approval and senior standing

**Outcomes:** Learning outcomes: design and carry out research that is original and meaningful, including data collection, analysis, and interpretation.

- **Components:** Independent Study (In person)
- **Attributes:** Engaged Learning
- **Req. Designation:** Undergraduate Research
- **Room Requirements:** Classroom Not Needed (1)

### ENVS 395(3)
#### Environmental Internship
**Course ID:** 002989  
**Department Consent Required:** 15-JUN-2017

Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.

**Outcome:** Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience.

- **Components:** Field Studies
- **Attributes:** Engaged Learning
- **Req. Designation:** Internship

### ENVS 395C(3)
#### Environmental Internship (Capstone)
**Course ID:** 013462  
**Instructor Consent Required:** 15-JUN-2017

Fulfills capstone requirement for IES majors. Through internship experience, students reflect upon academic and extra-curricular activities in their degree program and learn how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts.

**Prerequisite:** IES advisor approval and senior standing

**Outcomes:** Guided reflection on relationship between coursework and internship experience, relate learning to specific activities and experiences in the internship, assess value of internship to future career plans.

- **Components:** Internship (In person)
- **Attributes:** Engaged Learning
- **Req. Designation:** Internship
- **Room Requirements:** Classroom Not Needed (1)

#### Environmental Science Topics for BIET Minor Capstone
**Course ID:** 012922  
**Instructor Consent Required:** 15-JUN-2014

The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides a cross-listed elective for Environmental Science students when the Bioethics capstone's topic is environmental.

**Outcome:** Students will understand the connection between ethical and environmental science issues with regard to the special topic in environmental science.

Directed Readings
Directed by an ESP faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme.
Outcome: Students will demonstrate comprehension of, and the ability to apply information from, scientific literature and be able to synthesize information to produce a cogent, synthetic analysis of their topic based on these readings.
Components: Supervision
Topics: Environmental Economics, Sustainable Development, Humn Effects/Deciduous Forrest, Environmental History, Food Systems
Req. Designation: Internship

Sustainable Systems - Scientific Perspectives
This required core course provides an integrated overview of environmental science and sustainability which connect to sustainable development and ecological economics goals to define a just and safe space for the equitable distribution of life's essential re-sources that does not exceed the Earth's capacity to provide and replenish them.
Restricted to GRAD students.
Outcomes: Students will be able to make logical connections between environmental science and sustainability and evaluate data and primary literature in learning best practices for making evidence-based decisions.
Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

ENVS 402(3) Course ID:013779 15-JUN-2019
Sustainable Systems - Social Perspectives
This required core course examines theoretical perspectives on and practical examples of sustainable development at both global and local/regional scales.
Restricted to GRAD students.
Outcomes: Students learn concepts of "sustainable development," and system "resilience," including history, contested meanings, strengths, and limitations of each. How change towards sustainability occurs at multiple scales using social sciences research.
Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship

Introduction to Environmental Law & Policy
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.

Restricted to GRAD students.

Outcomes: understand how the natural environment is controlled, managed and promoted through the legal system.
Components: Lecture(Online)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Classroom Not Needed(1)

ENVS 411(3)  Course ID:013781  15-JUN-2019
Natural Resources and Land Use Law & Policy
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk.

Restricted to GRAD students.

Outcomes: Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues.
Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

ENVS 412(3)  Course ID:013782  15-JUN-2019
Water Law & Policy
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues.

Restricted to GRAD students.

Outcomes: Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources.
Components: Lecture(Online)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Classroom Not Needed(1)

ENVS 413(3)  Course ID:013783  15-JUN-2019
Energy Law & Policy
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.

Restricted to GRAD students.

Outcomes: Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies.
Components: Lecture(Online)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Classroom Not Needed(1)

ENVS 420(3)  Course ID:013784  15-JUN-2019
Conservation Biology
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.

Restricted to GRAD students.

Outcomes: Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems.
Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Invasive Species
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.

Restricted to GRAD students.

Outcomes: Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem.

Components:
- Lecture (In person)
- Requirement Group: Restricted to graduate students.
- Req. Designation: Internship
- Room Requirements: Electronic Classroom(1)

Sustainable Agriculture
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.

Restricted to GRAD students.

Outcomes: Students will be able to explain the characteristics of the U.S. agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system.

Components:
- Lecture (In person)
- Requirement Group: Restricted to graduate students.
- Req. Designation: Internship
- Room Requirements: Electronic Classroom(1)

Agroecosystems
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.

Restricted to GRAD students.

Outcomes: Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences.

Components:
- Lecture (In person)
- Requirement Group: Restricted to graduate students.
- Req. Designation: Internship
- Room Requirements: Electronic Classroom(1)

Food Systems Analysis
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.

Restricted to GRAD students.

Outcomes: Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis.

Components:
- Lecture (In person)
- Requirement Group: Restricted to graduate students.
- Req. Designation: Internship

**Restoration Ecology**

This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.

Restricted to GRAD students.

Outcomes: Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects.

**Industrial Ecology**

Industrial ecology combines Business, Environment, & Engineering to shift industrial processes from linear (open loop) systems, where resources move through the system to become waste, to circular (closed loop) systems where waste becomes inputs for new processes. Students will learn life cycle assessment (LCA) to measure environmental impacts.

Prerequisite: ENVS 363/463

Outcome: Students will understand how business and industry can create zero waste systems, how a circular economy works, and the tools of industrial ecology, including life cycle assessment.

**Components:**
- Lecture (In person)

**Course Equivalents:** ENVS 332

**Requirement Group:** Prerequisite: ENVS 363 / 463

**Circular Economy**

Principles and concepts of circular economy that can support a more sustainable economic system. Includes consideration of circular design, materials management, business models, supply chains, policy, financing, metrics, and applications. May include field trips to explore companies with circular business practices.

Restricted to GRAD students.

Outcomes: Students learn to explain circular economy, including opportunities, challenges, critiques. Learn to identify applications of circularity in business models and value creation. Learn metrics and indicators of for circular economies.

**Components:**
- Lecture (Blended)

**Requirement Group:** Restricted to graduate students.

Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges.

Restricted to GRAD students.

Outcomes: Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic

Biomimicry - Design Inspired by Nature
This course provides an introduction to biomimicry (or biomimetics) and the application of biomimicry design principles. Biomimicry is the design of business products, processes, and systems modeled after nature's wisdom. In biomimicry, nature serves as the design inspiration for sustainable solutions to solve complex human problems.

Restricted to GRAD students.

Outcomes: Students will learn the concept of biomimicry and life principles, be able to identify examples, apply biomimicry design principles, and view nature as model, mentor, and measure.

Sustainability Assessment & Reporting I
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.

ENVS 451 prerequisite; GRAD students

Outcomes: Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation.

Components: Lecture (Online)
Requirement Group: Prerequisite: grade of C- or better in ENVS 451; restricted to GRAD students.
Req. Designation: Internship
Room Requirements: Classroom Not Needed (1)
ENVS 453(3)  Course ID:013795  14-JAN-2019
Sustainability Assessment & Reporting II
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.

ENVS 451 prerequisite; GRAD students
Outcome: Ability to assess and report sustainability metrics related to water, land, food, and waste.
Components: Lecture (Online)
Requirement Group: Prerequisite: grade of C- or better in ENVS 451; restricted to GRAD students.
Req. Designation: Internship
Room Requirements: Classroom Not Needed(1)

Sustainable Business Management
To introduce students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, moral, business, & economic cases for adopting sustainability. This course fulfills a MGMT elective.

Prerequisite or corequisite: ENVS 410
Outcome: Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business.
Components: Lecture (In person)
Course Equivalents: ENVS 363
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

ENVS 464(3)  Course ID:013463  16-AUG-2018
Sustainability Management in the Global Context
This study abroad course takes students to international destinations to learn about business and sustainability management in the global context. Students hear presentations from local experts on sustainability in government, nonprofit, & for-profit entities, visit entities that have adopted sustainability practices, & visit local cultural sites. Fulfills MGMT elective.

ENVS 464 Prerequisites: ENVS 463 recommended
Outcomes: Students will understand sustainability perspectives outside the U.S., practical examples of circular operations and strong sustainability, and global, regional, and local sustainability concerns.
Components: Lecture (In person)
Course Equivalents: ENVS 364
Req. Designation: Internship
Room Requirements: Classroom Not Needed(1)
Field Ornithology
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.

Restricted to GRAD students.

Outcomes: Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

Components: Field Studies
 Requirement Group: Restricted to graduate students.
 Req. Designation: Internship
 Room Requirements: Classroom Not Needed(1)

Introduction to Geographic Information Systems
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.

Restricted to GRAD students.

Outcomes: Describe the conceptual/theoretical and practical/technological background of GIS; describe ethical issues germane to GIS; prepare/analyze GIS data in research; apply GIS in community-service projects.

Components: Lecture(In person)
 Course Equivalents: ENVS 380
 Requirement Group: Restricted to graduate students.
 Req. Designation: Internship
 Room Requirements: Lab - Computer(1)

Advanced GIS Applications
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.

Prerequisite: ENVS 480

Outcomes: Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy.

Components: Lecture(In person)
 Requirement Group: Prerequisite: grade of C- or better in ENVS 480. Restricted to GRAD students.
 Req. Designation: Internship
 Room Requirements: Lab - Computer(1)

Human Dimensions of Conservation
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.

Restricted to GRAD students.

Outcomes: Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions.

Components: Lecture(In person)
 Requirement Group: Restricted to graduate students.
 Req. Designation: Internship
 Room Requirements: Electronic Classroom(1)
ENVS 484(3)  Course ID:013800  15-JUN-2019
Conservation Economics
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture.

Restricted to GRAD students.

Outcomes: Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences.

Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

ENVS 487(3)  Course ID:013801  15-JUN-2019
Principles of Ecotoxicology
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.

Restricted to GRAD students.

Outcome: This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems.

Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)

ENVS 488(3)  Course ID:013802  15-JUN-2019
Applied Environmental Statistics
Tools and methods for analyzing combined social and ecological datasets. Emphasis on learning advanced quantitative statistics and applying this to project work. Students required to include both ecological and social data analysis in their projects; working with computer programs and output written in R/R-Studio, and interpreting output from these programs.

Restricted to Graduate students.

Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Lab - Computer(1)

ENVS 489(3)  Course ID:013803  15-JUN-2019
Ecological Risk Assessment
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced.

Restricted to Graduate students.

Outcomes: Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies.

Components: Lecture(In person)
Requirement Group: Restricted to graduate students.
Req. Designation: Internship
Room Requirements: Electronic Classroom(1)
**Independent Environmental Research**

Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor.

Post-baccalaureate students only.

**Dependent on the specific research project and goals.**

**Components:**
- Independent Study (In person)

**Requirement Group:**
- Restricted to graduate students.

**Argument and Persuasion**  
Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as humans have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as to how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise.

**Transactional Skills Seminar**  
The course will examine the lawyer's role in business transactions by looking at examples of two distinctly different transactions - the negotiation of commercial real estate leases and the structure of the purchase, ownership, and operation of a corporate aircraft. The practical skills and knowledge acquired by examining these examples can be applied to virtually all commercial transactions. The class will consider the art of negotiating those transactions - and will focus on the role of the lawyer in those negotiations. We will consider a variety of negotiating strategies and how to deal effectively with opposing counsel who may, or may not, share your particular strategy. In addition, the class will examine a corporate aircraft transaction - with a myriad of parties and opposing interests and regulations - with the goal of appreciating the juggling and balancing necessary to achieve the best result possible. Along the way, we will look at how there is not ONE way to do things, rather there are many ways and many strategies. The rules and processes

Law & Catholic Social Thought
Introduces students to the major documents that comprise the Catholic Church's social teachings. The documents will serve as a basis for a broader discussion of whether the social teaching has anything relevant to say or should have to say about current trends in American law. Considers whether lawyers of faith are obliged to move the law in a direction that comports with their core religious values and how that can be done in a pluralistic society: whether Catholic social teachings offers ideas and values that might find broad-based acceptance; and what happens if a lawyer determines that the profession and/or the society are hostile to the values presented in the social teaching. A twenty page paper delving into a particular issue or subject matter will be required for successful completion of the course. International Arbitration: Public and Private
This course will familiarize you with what has emerged as the primary means of resolving cross-border and multi-jurisdictional commercial disputes in today's global economy, international arbitration. You will first learn about international commercial arbitration, which is carried out between private companies having disputes over international commercial contracts. You will then focus on international investment arbitration, which is a dispute mechanism provided for by treaty that permits an investor to have recourse to international arbitration when a dispute arises, rather than to the courts of the host country. Throughout the course, you will explore the similarities and differences between international arbitration and the procedures used in common law (i.e. the U.S. and U.K.) and civil law (i.e. most of Europe, Asia and Latin America) systems. You will develop an appreciation for the cross-cultural nature of international transactions and disputes and attain a certain facility with key international arbitration rules,

**Applied Civil Procedure**  
This course will give students practical experience with common pre-trial civil litigation tasks they will encounter in private practice. The instructor's principal goals is to expose students to the "nuts and bolts" of pleading, discovery and fact gathering - with particular emphasis on writing - so that they will be more effective junior lawyers on their first day or practice. Throughout the semester, each student will represent a client in simulated litigation of a fictional civil case in which one of their classmates is opposing counsel. Class time is devoted to discussing how to prepare and complete the tasks that arise in litigation generally and in the mock litigation in particular. As a result, students become familiar with the Federal Rules of Civil Procedure and obtain actual, albeit simulated, experience drafting pleadings, discovery and other writings. Specifically, this course will address: (i) conducting faculty investigations preceding and during litigation; (ii) drafting initial pleadings, such as complaints, answers, affirmative

**Housing Law and Policy in United States**  
The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

**LAW 154(3) Natural Law and Natural Rights**

The purpose of this course is to introduce students to the role of natural law in the development of the law, with an emphasis on the position of natural rights in American Law and International Law. The specific context of our examination will be the natural rights of the human person. Three interrelated objectives of this course are (1) to develop an understanding of what the natural law is and what it is not; (2) to dispel the skepticism (myths) about the role of natural law; and (3) to demonstrate the critical role in the evolution of natural human rights in American Law and International Law. Several particular rights will be examined to sharpen the focus of our investigation and discussion. Our readings will consist of primary and secondary sources compiled into a reader that will be made available in electronic form. There is one required book that will have to be purchased, viz. Heinrich Rommen's "The Natural Law."

**LAW 155(2) Law and the Subprime Debacle**

Beginning in late 2007, a rash of defaults in subprime mortgages triggered a historic credit crisis. This crisis has now resulted in a historic global economic contraction. This class will examine the role of law in precipitating and propagating the crisis. Financial regulation, corporate governance, globalization, and housing law will be examined to determine the role of each in creating the crisis and amplifying the crisis. Specific solutions will be offered. Finally, an institutional assessment of law and regulation will be undertaken to consider broader reforms.

Comparative Criminal Procedure focuses on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutors role and plea bargaining, the role of defense counsel, the role of evidentiary and constitutional rules of exclusion of evidence, and, as an example of the substantive criminal law, the law or rape. Course materials include a short, thoughtful critique of the American system, "Trials without Truth", by Professor William Pizzi of the University of Colorado; and a course pack of law review articles. The format is a mixture of lecture and classroom discussion, including role play exercises in witness examination and argument, at trial and at motions to suppress. Three Italian guest lectures are expected to participate as in the past: a prominent magistrate; a defense lawyer/law professor, and a prominent literature/film scholar whose focus will be on

Comparative Consumer Law
This course will be taught by Illinois Attorney General Lisa Madigan, assisted by Dean Jean Gaspardo. The Attorney General is the state's chief legal officer and is responsible for protecting the public interest of the state and its people through advocacy, legislating, and litigating. Protecting consumers and businesses that have been victimized by fraud, deception or unfair competition is one of the primary functions of the Attorney General. Her office receives 25,000 consumer complaints each year. In her many years of service since 2003, Attorney General Madigan has gained a solid, national reputation for prosecuting offenders perpetrating fraud against Illinois consumers. Most recently, she paired with a couple of other mid-west states Attorney Generals to prosecute the many big banks [¿too big to fail¿] for their predatory lending tactics, recovering billions of dollars. The course will focus on Consumer Law, including the role of the state in enforcing legislation protecting consumers. The course will also address the role of private components.

Supreme Court Seminar
The aim of this seminar is to provide students with a deeper understanding of the Supreme Court of the United States, its personnel and work, and the important role it plays in American government and society. Students will consider the processes by which Justices are appointed to the Court; the standards and processes the Court uses to choose cases for review and decision on the merits from among the multitude decided each year by the lower courts, leading to the creation of precedents of national applicability; the ways in which advocates endeavor to persuade the Court that it should (or should not) grant review in a particular case; and the ways in which the so-called merits cases; (those in which review has been granted) are briefed, argued, and decided. A substantial part of the semester will be devoted to the study of a small number of cases currently pending before the Court, either as candidates for review or for decision on the merits. Students will learn about the work of the Court by studying briefs that were actually filed and transcripts.

Advanced Litigation Skills

Learning litigation skills task-by-task can leave the young practitioner with little guidance on how to form the overall strategy necessary to develop and present an effective civil case. While covering a wide range of specific skills, including opening statement and closing argument, the careful researching of local rules, techniques for examining witnesses, techniques for oral argument and applying a structured approach to settlement negotiations, this course will emphasize the aspects of these skills that support an overall civil litigation strategy. This course will require students to review a variety of materials in preparation for class, to participate in in-class exercises and to submit written work that displays the learning acquired through the in-class exercises. Evaluation of each student's performance will be based primarily on the student's written work.

Business and the Law

The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting.

The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation,

Legal Writing I

Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor.

International and Comparative Antitrust
This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgments in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed.

Advanced Business Organizations including a Comparative Perspective
This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between Shareholders and the board, directors; elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students

Business Valuation
Attorneys play an active role in business transactions every day in connection with mergers and acquisitions, estates and gifts, divorce, filings with the SEC, etc. This includes attorneys who are in private practice or in with a company. Understanding business valuations and financial statements form a cornerstone of most of these transactions. In fact, the business world today and the financial work involved demands that today's lawyer understand the value and financial reporting of a business. This course will help attorneys to better understand the methodology and techniques involved in business valuations. This will also include basic financial statement analysis. Topics will include the proper standards for valuation, valuation methodology, cash flow analysis, financial analysis techniques, financial reporting issues, international standards, and specific uses of valuations.

Emerging Issues in Public International Law

Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law.

Race and the Law
This course covers interdisciplinary, critical perspectives on race and racism and the roles of law and history in shaping the meanings of race in the United States. We will study the histories of the major racialized groups in the United States: African Americans, Indians, Latinos/Latinas, Asian Americans, and Whites. We will also study the differing implications of enslavement, conquest, colonization, and assimilation. We will explore how race and racism play out in selected areas such as equality, education and crime and explore significant current events and findings such as: important studies of implicit bias; the Voting Rights Act and allegedly race-neutral restrictions on voting; disparate treatment of minorities in the criminal justice system; and demographic changes and their implications.

Domestic Violence Courthouse Practicum
The Domestic Violence Practicum is a one practicum that combines seminar and live-client experience (LCE) components. The classroom component will cover the foundations of domestic violence law, introduction to trial skills training; and evaluation of work completed in client cases through case round discussions. Learning about domestic violence includes discussion of the multidimensional aspects that include ethnicity, sexual orientation and socioeconomic status. Once the class covers foundational understanding of domestic violence, students are then placed at the Domestic Violence Legal Clinic located inside the Domestic Violence Courthouse at 555 W. Harrison in the west loop.
Students will represent clients during order of protection hearings under the supervision of licensed attorneys at the Clinic. Students will interview the client; complete the petition paperwork; and represent the client during the hearing. Students will have a choice of time slots to fulfill their LCE practicum

The Challenge of Green Energy

This seminar will take an interdisciplinary approach to the intersection of environmental and energy issues. It will introduce students to a variety of solutions to the problem of pollution from the energy sector. The course will start with a legal and technical introduction to the electricity grid, including discussion of federal/state jurisdictional issues, basic engineering concepts (taught with lawyers in mind) of the grid, and the basics of regulated and deregulated electric markets. The class will then address issues involving emissions and emission prevention, including the Clean Air Act (Title V and recent coal emission rules), renewable energy (including state incentives, Commerce Clause issues, and basic market design issues), and carbon capture/sequstration (including liability issues and state incentives). For their research papers, students will propose emission-reducing programs for a hypothetical state with a hypothetical electric market and evaluate the arguments for and against those proposals, including any unintended consequences.

**Bar Exam Fundamentals**
Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep. While we will complete many essay and MBE-type questions, there will be no final exam.

Human Trafficking in the U.S.: Special Issues Concerning Children

This interdisciplinary seminar will explore issues confronting children who are survivors of human trafficking within the United States, as well as an examination of efforts to prevent and intervene in this social problem. The seminar will begin with an overview of contemporary laws and policies addressing human trafficking, explore various frameworks (gender, criminal justice, public health) around movements to combat child trafficking, analyze current research in the field, and explore case management, services, and techniques utilized by service providers. Assignments will include in-class exercises and a final project addressing ways to advance the movement to combat child in the United States.

Personal Injury Law and Advocacy

This course will include an overview of Personal Injury Law and include the intake of a new case to its final resolution. The course will include not only the law and rules, but the implementation of them. Students will participate, in a meaningful way, in various court exercises and will be challenged to understand and persuasively present their client’s case. Advocacy will be discussed in detail and students should be expected to be pushed beyond their previous level of skill and comfort and learn to become "trial lawyers" rather than simply personal injury lawyers. Students will learn what it is like to "mix it up a bit" in the adversarial forum of trial work.

### Comparative Issues in Law and Religion

This course will examine the way the three Abrahamic Faiths (Islam, Judaism and Christianity) consider legal and policy issues. For instance we will look at the three faiths regarding various issues surrounding human rights and life and death issues such as: justified uses of war and violence; conscientious objection; end of life issues; capital punishment; criminal responsibility for causing death; positive duties to the poor and needy; and how the common good is described by the three religions. How do the three faiths envision translating their perspectives on the issues into civil law, and what are the proper limits on enacting religious perspectives into positive law?

### Workways of the U.S. Supreme Court

This course will address the role of the U.S. Supreme Court in our tri-partite framework of representative government and interacts with the other branches of the federal government (and the states) as it exercises the power of judicial review, consistent with the authority provided by Article III of the Constitution and the statutes which Congress has passed with respect to the jurisdiction of the federal courts, including the Supreme Court. The preliminary lectures by Professor Sullivan will provide the course foundation, exploring the constitutional and statutory provisions relating to the Court and its work and the ways in which the Court has chosen to structure its work within those constraints. The course will pay particular attention to the Court’s case selection process and the ways in which lawyers succeed in getting their clients’ cases to the Court. Justice Ginsburg will discuss the landmark cases of the current 2017-2018 court term; the workways of the Court; and the road to her appointment to the U.S. Supreme Court. ### Comparative Criminal Procedure

**Course ID:** 013201  
**Date:** 09-NOV-2018

The criminal justice process in the United States is shaped by the Constitution and Bill of Rights, statutes, rules and case law. This course will examine the role of these guiding principles in the various stages of the criminal justice process, such as the means by which information is gathered during an investigation, the circumstances under which an individual can be detained, and the type of evidence that can be used at trial. The course will focus on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutor's role and plea bargaining; the role of defense counsel; and the role of evidentiary and constitutional rules of exclusion of evidence. We will compare our criminal justice process to that of Italy and other countries, and Italian officials will participate as guest lecturers to talk about their own experiences with the Italian system. The course will have a writing intensive component.

### Contract Negotiation and Drafting

**Course ID:** 004487  
**Date:** 29-OCT-2007

The purpose of this course is to provide exposure to contract drafting and negotiation to students with an interest in transactional law. During the course of the semester we will examine the purpose and process of drafting documents. We will also spend time discussing the business side of transactional law and how best to work with and counsel clients. In some instances, we will start with form documents borrowed from prior transactions (precedent) and we will revise these documents to reflect the particular facts and circumstances surrounding our transaction. In other instances we will work through drafting a document from scratch. Finally, we will spend time reviewing and revising existing documents and discussing the logistics of working through a variety of business transactions. The course will include numerous drafting exercises and some negotiation. By the end of the semester, students should have a basic understanding of how and why contracts are drafted and negotiated. In addition, each student should be able to draft a precise and practical contract.

International Arbitration
This is a one credit course taught sometimes in one of the summer programs. In this course, students will learn how international commercial arbitration works. In most international contracts, the parties agree that all disputes will be resolved by arbitration. This private dispute mechanism provides a number of advantages over litigation. One of the most important advantages is that by agreeing to arbitrate, a party avoids ending up in the other party's court system. An arbitration award is also more easily enforced in a foreign jurisdiction than a court judgment, because of an international treaty known as the New York Convention. Students will learn about the various laws and rules governing international arbitration, as well as specific, practical knowledge about arbitrating, such as how to draft an arbitration clause, how to choose an arbitral institution, how to select arbitrators, the ethical rules that apply to arbitrators, the bases for challenging arbitrators, the conduct of the arbitral hearing, rules governing admission of evidence, etc.

Spanish for Lawyers
The course is designed for law students who are looking to supplement their existing knowledge of the language with Spanish that focuses on the legal field. Its main objective is to develop adequate communication skills that will allow you to advise Spanish-speaking clients on issues related to criminal, property, civil, labor, administrative, tax, commercial, and litigation law.

We will work with real documents and texts, analyzing cases, as well as reinforcing knowledge of both Spanish in the legal field as well as of different branches of law in the judiciary system. Coursework will be carried out in groups, and a system of continuous evaluation will be implemented using assignments and projects. The course will also include a cultural component, the aim of which will be to understand, contextualize, and handle effective exchanges with Spanish-speaking clients.

Criminal Law Practicum
This 2 to 4 credit course will help students develop a broader understanding of the criminal justice landscape. Students will be exposed to practical and substantive issues, garner a better understanding for what it means to practice criminal law, and be exposed to current and historical policies that have helped to shape our criminal justice systems. This course includes a mandatory weekly classroom seminar as well as either a field placement or research component.

Students who pursue the field placement option will work in an approved agency under the supervision of practicing attorneys. Students must secure unpaid externships on their own using each agency's own hiring procedures for law students. Past field placements have included the Cook County State's Attorneys Office, The Law Office of the Public Defender - Cook County, and Office of the State Appellate Defender, as well as

Global Challenge of Human Trafficking  
This course provides a comprehensive, introduction to the transnational federal laws and law enforcement efforts launched in response to human trafficking -- this global human rights challenge. The course will use a text written by the professor and a colleague who have the distinctive perspective of two individuals who have spent their careers in the trenches investigating, prosecuting, and adjudicating these intricate and commonly emotional cases. The course will offer open debate about human trafficking by stripping it of its unhelpful, constricted definitions, and by candidly discussing the state of the law, the criminal justice process, and the treatment of offenders and victims. The course examines today's system of federal anti-trafficking laws in relation to the global efforts to eradicate this pervasive human rights violation. It will explore the unique challenges posed by transnational investigations; the current state of the U.S. government's transnational anti-trafficking efforts; the myriad domestic and international legal instruments

Communications Law
This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

### Contracts in Complex Commercial Transactions

The objective of this course is to familiarize the student with contracts as used by sophisticated parties. Accordingly, this course will explore "real-world" contracts actually entered into by "real-world" companies — the Coca-Cola's, Microsoft's, and HP's of the world. Through this course, the student will attain a certain facility with agreements, their organization and structure, their language, and their provisions (and the interaction of these provisions). The course will pay considerable attention to how courts have treated various contractual provisions. The examination of actual contracts will begin with non-disclosure agreements and will proceed into employment agreements, services agreements, and agreements for the sale of goods. Topics will also include merger-and-acquisition agreements. In addition, readings will include comments from leading practicing attorneys (from law firms such as Sidley, Kirkland, and Cravath, and from legal departments at companies such as Microsoft, Accenture, and JP Morgan), and there is

### Critical Legal Studies Seminar

Critical Legal Studies posits that the influence of the social construct of race in America is ubiquitous, including in law. Moreover, it suggests that so-called color blind law-making is unlikely to address the most important means by which race continues to operate to oppress many persons in America. Finally, it teaches that racial reform occurs only in accordance with the interests of those with political and economic power. This course will survey the key scholarly works that form the basis for these precepts and seek to test these positions against the reality of race in America today.

|            |        |            | This course examines how the law regulates policing in the United States. We will spend part of the class exploring important court decisions related to police accountability. We will also study other legal mechanisms designed to combat police misconduct, like civil litigation, criminal prosecution, and federal oversight. Ultimately, this course will encourage students to consider whether existing regulatory tools effectively combat police misconduct, and whether these regulations impair the ability of law enforcement to fight crime. |

|            |        |            | This a unique course offered once a year to a select group of students from Loyola and Chicago-Kent. Enrolled students read and discuss draft articles of nationally renowned professors in the field of intellectual property; the articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of intellectual property is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at Chicago-Kent; for those days, the class will begin at 4:10 pm and end by 5:50 pm to allow students adequate travel time. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes. Students are selected based on an application that is available at: www.chicagolp.com. |

**Intro to Comparative Law**

This course will provide an introduction to the "civil law" legal systems (which include almost all of Western and Eastern Europe and Latin America, as well as, portions of Africa and Asia). The course will begin with the roots of the Civil Law in Rome around 450 BC and subsequent developments, including its preservation by Byzantine Jurists in the Corpus Juris Civilis, and its revival by scholars in medieval Italy. The various events and influences that led to the modern Civil Law will be considered. Differences between the modern Civil Law and Common Law approaches and attitudes toward law will be covered. **Courtcraft Excellence in Advocacy**

Courtcraft is the foundation and the discipline which makes for excellence in advocacy. It is a holistic approach to advocacy which harnesses together at least four principles: purpose, preparation, presentation and persuasion. Courtcraft should never be an option for the would-be advocate. It is not a luxury, but an essential grounding without which no law student can begin to call himself/herself an advocate. Like any skill, advocacy can be taught. Few of us are born advocates. Most need training and guidance. Courtcraft develops and enhances all that the student of law has been taught and prepares him/her for excellence in advocacy.

Our courtcraft programme is not founded simply on theory or academia. It is based on our own many years of experience as advocates appearing almost daily in court. Purpose Your role as a lawyer and advocate. Your duty

## Street Law

**Course ID:** 004521  
**15-MAR-2018**

Second- and third-year students teach about law and the legal system in Chicago area elementary and high schools. Students attend a weekly seminar and teach classes in their assigned school. In some schools, students have the option of preparing high school students for a mock trial competition. For that experience, prior or current enrollment in Trial Practice is advisable, but not required.

This is a Skills and Comprehensive Simulation course.

## Illinois Civil Litigation Practice

**Course ID:** 004522  
**18-OCT-2016**

This course will empower you to practice in Illinois state courts (where 90% of all litigation is heard) with the efficacy of a seasoned litigator. Teaming star civil litigators with veteran judges, this redesigned two-session intensive course will focus sharply on the crucial knowledge and skills needed to survive the confusing and hectic civil court system. The course will enhance your written and oral argument skills in the context of the labyrinth of procedural rules and statutes that govern different phases of civil litigation in Illinois. Using hypothetical scenarios, students will learn how the rules apply to the facts and substantive law in a concrete way, as well as how to argue issues arising in the pre-trial setting. You will write briefs (up to 8 pages), argue motions, serve as a judge, and instruct your fellow students on the law, all over two sessions, each one lasting one and a half days. The first session will generally focus on pleadings and motions directed to pleadings, while the second session will generally focus on discovery and cross-examining witnesses.

## Pharmacology Journal Club

**Course ID:** 013938  
**15-JUL-2019**

In this multi-disciplinary pass/fail course you will be guided through the following objectives. Gain confidence in presenting scientific data to an audience. Learn to direct a time-limited discussion in a professional and collegial manner. Learn to work through an article independently to understand complex experimental design. Learn to work collectively to help clarify complex experimental design. Learn to critically evaluate an experimental design and voice a critique in a constructive manner that includes potential alternatives. Understand how new cutting edge techniques are employed to answer scientific questions. Stay current on new findings of broad interest to the scientific (Pharmacology) community. Learn to apply Socratic teaching methods. Learn to utilize electronic technology rather than printed material to conduct meetings.

**Course ID:** 004528  
**Date:** 20-MAR-2018

This course will consider a number of topics residing at the cutting edge where law and legal philosophy meet, including: What is law? Must law be related to morality? What is the interpretative function of courts? Should integrity constrain what courts decide? From whence does the duty to obey law come? Are there any human rights? Might some of these rights be manifested by our ideas of liberty, privacy and freedom of expression? Need we respond to terrorism by changing our values? What is distributive justice as compared with corrective or retributive justice? Are distributive justice questions implicated by court decisions involving affirmative action, gender, and sexual orientation? How is corrective justice manifested in tort and contract law? What is ownership? Is ownership of intellectual property morally justified? What is the relationship of causation to responsibility, and what is punishment and how is it justified? Students may take this three hour course either as a lecture course with a midterm and final exam or a seminar with a 20

**Class Actions**  
Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

**State Constitutional Law**

This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution afford. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.

### LAW 325(3)  
**Course ID:** 004534  
**16-OCT-2014**  
**Conflict of Laws**

This course deals with the legal ramifications of disputes involving contracts with two or more states or other jurisdictions. When such disputes reach the courts, what law should be applied and how should the determination be made? The course explores these questions and the various methods courts and scholars have proposed and adopted to answer them. The contrasting points of view regarding choice of law, jurisdiction and recognition of foreign judgments are analyzed in terms of which policies best promote harmony and efficiency in the federal system and accord with the federal constitutional requirements of due process of law and full faith and credit to the judgments of sister states. A special focus this year will be on the application of these areas of law to family law issues.

<tr>
<td>This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a ¿capstone course,¿ because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. ### LAW 336(2) Expert Witness Theory and Practice
The expert witness is a powerful weapon in a trial attorney's arsenal. Expert Witness Theory & Practice gives students the opportunity to learn about expert witnesses and work with experts in a mock trial environment. During this two credit hour course, students will learn who can be an expert, what an expert can testify about, the pretrial disclosure requirements for experts, differences between Illinois and federal law regarding experts, and the fundamentals of direct and cross-examination of experts. Students will then participate in simulations including a discovery deposition and a mock trial where students will present and cross-examine psychology graduate students serving as expert witnesses. Students will be graded on their performance of these exercises as well as written exercises and classroom participation. The mock trial will serve as the final examination for the course. Completion of Trial Practice or Evidence is highly recommended.

**Components:** Seminar (In person)
**Requirement Group:** Restricted to J.D. and LL.M. students

### LAW 337(2 - 3) Employment Law
The law governing the employment relationship is not limited to the union management confrontation of traditional labor law and the proscriptions of employment discrimination statutes. Both common law claims and other statutes have become major sources in challenging, e.g., drug testing, plant closings, lie detectors, whistleblowers, wrongful discharge. This course explores those legal problems. This is not a duplication of either Labor Law or Employment Discrimination; neither is a pre-requisite. The course focuses on the total configuration of statutes regulating employment as well as the emerging common law principles affecting employment relationships.

U.S. Foreign Trade and Customs Law  
The goal of this course is to provide students with an overview of International Trade and U.S. Customs law, in its domestic and international contexts. Students should be prepared to learn about the history and current role of international trade organizations; U.S. government agencies and their roles in international trade; U.S. Customs law and compliance issues. Students will receive an overview of antidumping law and the litigation of antidumping and U.S. Customs issues at the U.S. Court of International Trade and the U.S. Court of Appeals for the Federal Circuit. The role of NAFTA and other free trade agreements in international trade will be discussed, in both legal and political settings. The class will also cover compliance issues that arise under U.S. Customs law, and how a client's non-compliance can incur penalties from the U.S. government and affect overall client profitability.

### Real Estate Seminar

**Course ID:** 004561  
**Course Date:** 03-MAR-2015

The seminar will focus on recent Illinois zoning and land use cases. Land use and zoning is one of the most important substantive law areas applicable to real estate development. Each student will select a recent reported case concerning subject property in the Chicago area. The instructor will assign the cases leaving students free to propose suitable alternatives. Students may trade cases with other students. Once case assignments have been finalized, the student assigned the cases will visit the site(s), perhaps taking photographs or videos. To the extent possible, the parties and their counsel will be interviewed. No library research should be necessary. However, all students will read the court’s opinion, and the student reporting on the case will also read the briefs of the parties. Each student will be given one full class period (50 minutes) to present an oral report to the seminar, beginning at the sixth week of classes. All members of the seminar will be required to attend these reports. After reporting and discussing the case with the seminar,

### American Legal History

**Course ID:** 013487  
**Course Date:** 21-SEP-2019

Deep controversies over political issues present now; immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

**Storytelling and Presentation Skills for Lawyers**  
This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading jurors by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. Global Access to Medicine: A Patent Perspective
This course considers how patents impact access to medicine in today’s global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students’ consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation, as well as a final project and presentation; there will be no final exam.

Financing An Aging Population

This class will highlight planning opportunities for attorneys practicing in elder law and estate planning to offer to their clients. Foundational topics include basic income tax concepts, basic gift and estate tax concepts, basic estates, trusts and probate concepts, and basic retirement planning concepts. Then, the course highlights the statutory planning tools available for individuals as they age, including special needs trusts, reverse mortgages, long term care insurance, and other methods for funding a healthy quality of life during retirement, and for funding as large a legacy as possible upon death. The contract and fiduciary issues with surrogate decision-making, as well as the clinical assessment of diminished mental capacity, will also be discussed.

Professionalism

Exposure to attitudes and characteristics which act as the basis for success as a true professional in the practice of law. The class will present perspectives on how to succeed as a new lawyer, given expectations and competitive environment. The class will expose the traits identified by others that will equip law students to grow into lawyers who have true professional and personal success. The experience will aim to provide a framework of skills that are considered indispensable for professional success that are not otherwise the focus of attention in the traditional law school curriculum. Subjects such as civility, self-awareness, resilience, the setting of focused values, duties of confidentiality and competence, and other strategic goals will be explored. In sum, this course will be an experience in reflection, goal setting, and exposure to the realities awaiting the post-law school experience in the legal profession.

**Elder Law**

This class provides the doctrinal foundation in elder law. The class is taught through the lens of bar-related areas of the law. Fiduciary and Agency law concepts are used to discuss ethics issues, discrimination issues, durable powers of attorney, and other methods for planning for an individual's incapacity. Public and Constitutional law concepts are used to discuss an individual's right to consent to or deny medical treatment, the court's jurisdiction in adjudicating adult guardianship, and the governmental benefits available to elderly individuals. Property laws are used to discuss various housing choices available in retirement, and Contract and Tort laws are used to discuss nursing homes, private insurance, and other financial contracts. Additionally, Consumer and Bankruptcy laws are used to discuss financial exploitation while Evidence and Criminal laws are used to discuss physical and emotional abuse of the elderly. Other important issues with aging populations will be discussed.

**Negotiations**

This course examines the negotiation process engaged in by lawyers. It is intended to increase a student's understanding of that process and to develop his/her skills as a negotiator. Experts in various fields discuss negotiations as they apply in those areas of the law. Students engage in mock negotiations in a variety of contexts, such as divorce, real estate, contracts, commercial law, labor law, and criminal law. Not all instructors cover each of these areas of substantive law, and different instructors emphasize different areas of substantive law.

Must have completed 40 credit hours; if you take Mediation or Negotiations, you cannot take Alternative Dispute Resolution. If you have taken the Mediation & Other ADR Procedures Clinic, you cannot take this class.

**Corboy Fellows I**

Corboy I is a graded course available to students in their first year of the Corboy Fellowship program. Instructor permission is required for enrollment. In the Corboy I course students earn 3 graded units in the Fall and 3 graded units in the Spring which includes mandatory participation in the evidence/trial practice boot camp at the start of each semester in addition to successful completion of course work in trial practice as required by the syllabus provided by the instructor. In the Fall semester of the course students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. In the Spring semester of the course students build upon the basic trial advocacy skills developed in the Fall through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the motions in limine to support the basis for evidentiary objections and
closed evidence.

**Client Counseling Weekend Workshop**

This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn the goals and tactics for the most effective client interviewing and counseling relationships. Students practice application of skills and tactics of interviewing and counseling through role-playing as client and attorney. The course will teach skills including effective questioning, dealing with emotions, developing the client case narrative, identifying and addressing implicit bias, meeting clients where they are, and rapport building. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail.

Students may register for the Client Counseling Weekend Workshop to receive one credit. It is an option to also register for the Negotiation Weekend Workshops to receive a total of two credits for participating in

LAW 405(2 - 3)  Course ID:013213  16-JUL-2018  Business Practice Transactional Skills
This course is offered in a 2-credit version in the fall semester, and in a 3-credit weekend version in the spring. In the spring (3-credit) version of the course, students will have the same two credit hour experience in the classroom, together with an extension of the classroom experience through an additional hour of related, self-directed work on additional simulation scenarios during the course of the semester. Students may elect to take this course in the fall or in the spring, but not both.

This course will promote skills essential to successful lawyers in business transactional practice: evaluating facts; understanding the central business objectives of clients as well as the goals of other parties to the proposed transaction or relationship; issue spotting and problem solving; and developing, advocating for, and implementing responsive strategies.

LAW 406(2 - 3)  Course ID:009892  15-MAR-2018  Mediation Advocacy
This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

LAW 407(2)  Course ID:013986  15-OCT-2019  Immigration Detention Project
The objectives of the course is to provide students live client experience in the form of a week-long experiential immersion program where students will provide direct representation, advocacy, and support to detained immigrants in geographic locations in the US where the need is greatest. The program will include an online course on a Saturday or Sunday in February, providing students a basic understanding of US immigration law and policy related to the needs of detained immigrants at the designated site (e.g. how to conduct a bond hearing, credibly fear interviews for asylum applicants), followed by a hands-on live workshop (3 hours). The workshop will provide students an introduction to live-client skills including trauma-informed interviewing, vicarious trauma, and also include travel logistics. Reading materials will also be assigned in advance as part of the online course. Participants will travel over spring break in March to provide on-site representation in collaboration with national partners, and spend the last afternoon together to reflect on

LAW 408(1)  Course ID:012827  19-JUL-2017  Restorative Justice Workshop
In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

Negotiation Weekend Workshop
This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn basic negotiation principles and skills and apply them during a series of simulated negotiations where they will play the roles of counsel and clients. The course will explore the negotiation process from negotiation planning to the execution of a final agreement. The course will cover concepts including, but not limited to, needs and interests, BATNA, information-gathering, dealing with emotions and option development. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail.

Students may register for the Negotiation Weekend Workshop to receive one credit. It is an option to also register for the Client Counseling Weekend Workshops to receive a total of two credits for participating in

Advocacy
This course focuses on persuasive written and oral communication skills which are necessary for critical analysis and the competent representation of all clients. Students will explore all sides of an argument, provide evaluations of the merits of particular cases, and persuade the reader/listener of the student's position. Pre-requisites: successful completion of Legal Writing I and II.

This is a Juris Doctor Required course.

Trial Practice I

**Federal Litigation Practice**

A significant portion of federal litigation occurs prior to the filing of a dispositive motion or a trial. This course will explore complex areas of federal litigation that are likely to result in a hearing before a federal judge. Each week, during the first part of the class, the students will explore a different area of substantive law involving frequently litigated topics in federal court such as attorney/client privilege, review of electronic evidence, use and scope of protective orders, and motions to compel. The second half of each class will involve the "litigants" presenting their arguments to the Court based on fact scenarios given to the litigants the prior week. The course is taught by federal judge, Hon. Virginia M. Kendall, and will take place in her courtroom in the Dirksen Federal Building.

Legislation  
This course considers the dominant role state and federal legislation plays in today's legal system. Topics covered include legislative theory; key concepts of legislative drafting; sources of legislative uncertainty; the changing theories, tools (including the oft-maligned canons of statutory interpretation), and practices of statutory interpretation; and the role of courts in interpreting statutes. The greatest part of the course will focus on matters of statutory interpretation including the tools courts rely upon when interpreting statutes.

Documenting and Negotiating Finance Transactions  
This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Prerequisites: Students taking this class will be expected to have taken Business Organizations. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course.

Critical Legal Studies  
Critical theory attempts to answer the age old question, "What is law?" by asserting that law is the reflection of the political values of the dominant group within society. After a brief introduction to the more traditional theories of justice; such as natural law, legal positivism, and legal realism, students will take up the challenge of Critical Legal Studies. Subjects covered include an economic analysis of law; gender and sexual orientation; and critical race theory. Other possible topics include an evaluation of law and economics; the emergence of Sharia law; and the role of feminism in the 21st century.  
This course will be taught at Chicago Kent College of Law. (It may be taken as either a regular course with an exam at the end, or as a seminar with a paper in lieu of the exam.)

Trial Practice - Modern Trials

Trial Practice - Modern Trials is a three-hour, graded credit advanced trial practice class designed to teach students the skills necessary to effectively try cases using computers to present evidence and visuals for jury addresses. Modern juries receive the majority of their information from television and computer screens a courtroom should be no different. The course builds on the basic trial skills acquired in other Trial Practice classes with a real world approach to simulate modern trials as closely as possible. In the first few weeks of the semester, students learn how to use PowerPoint and a dedicated courtroom presentation program called ¿Sanction¿ as tools to better engage juries by presenting materials electronically. The remainder of the semester is spent trying cases; first in a workshop setting where students receive hands-on advocacy instruction, followed by trying two full mock-trials in the federal courthouse courtrooms with built-in computer monitors and projectors. The skills acquired in this class are now a necessary for any

Immigration Law and the Workplace

An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. Other laws protecting workers, such as labor and comprehensive immigration reform. This course will focus on the obligations of US employers, both under IRCA and beyond and the implications of illegal immigrant employment. It will examine pitfalls that await an

**Comparative Education Research**
This unique course will immerse students in a comparative analysis of early education law and policy in Italy and the United States. The specific focus of the class will be the world-renowned approach to preschool education developed in Reggio Emilia in northern Italy. The preschools in Reggio Emilia are widely regarded as the best in the world. The "Reggio" approach to early education is built on a particular understanding of the biological and social nature of children, and the role of the state in developing its young. Accordingly, the class will begin with an exploration of the neuroscience undergirding the Reggio approach and how this science informs: educational objectives and methods; the architecture of the educational environment, the connections between school and community and the legal and political structures surrounding children. Throughout the class, the "Reggio" approach will serve as a benchmark for understanding and assessing the law and policy of early childhood education in the United States. The class

**Negotiations Seminar**
Negotiating effectively is one of the most important qualities of a successful lawyer. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose.

This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system.

Mediation Seminar  
Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works.

This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation.

**Canon Law Seminar**  
Canon law plays a central role in determining how the Catholic Church handles the broad spectrum of issues involved in the daily management of a worldwide multinational organization that includes dioceses, parishes, colleges, universities, grade schools, high schools, hospitals, nursing homes and other charitable entities. Examples of these issues involve personnel and real estate matters, rights and duties of the Christian faithful, professional misconduct, foreign religious workers, the administration of ecclesiastical goods, mergers and joint ventures, and, of course, marriage and family law, especially divorces and annulments. This Canon Law Seminar should be of particular interest for students interested in the management of Catholic institutions. This course will be conducted as a seminar in which students will be invited to write a research paper and make a classroom presentation on some issue of canon law.

Education Law and Policy
This seminar will explore the difficult legal, political and practical issues currently confronting American education. The course will begin with an analysis of the fundamental political and legal principles underlying the American public education system. Students will then be challenged to apply these principles to difficult areas of education law, such as: (1) the adequacy and equity of school funding; (2) the nature of a constitutional right to education; (3) the relationship between public education and religious institutions and practices; (4) legal issues relating to curriculum; (5) equal educational rights, including issues of desegregation and affirmative action; (6) the constitutional rights of students; (7) special education; and (8) the rights and responsibilities of educators. Students will be required to participate actively in class, to facilitate class discussion of a selected topic, and to submit a paper which analyzes critically an important issue raised in the class. There will be no final examination.

Advanced Torts: Perspectives on Tort Law

This course has several objectives. It offers the student an opportunity to study several important tort topics not usually covered in the first year, such as products liability, misrepresentation, and business torts. It also offers an opportunity to consider whether tort law is a just and efficient way to resolve disputes and provide remedies for personal injuries and other types of harm. Perspective readings on tort reform evaluation will be included. Students also will conduct research on a topic of the student's choice and present findings to the class. The grade will be based on the quality of the presentation and a two-hour take home exam.

This is a Perspective Elective and Bar course.

Immigration Law Practicum

Immigration law is one of the most complex, dynamic, and rewarding areas of practice. Yet, it is often viewed as a specialized field that rarely is connected to other public interest areas of law, including child and family law, poverty law, housing, education, health, and criminal justice. The goal of this course is to teach the current realities of immigration law as experienced in practice, and to show how it intersects with other field of public interest law in the pursuit of social justice. This unique course has a classroom component and a field-work component.

The class meets formally two hours per week in the evening to cover substantive immigration law issues, current topics/changes in immigration practice, and to develop practical skills tailored to the practice of immigration law practice and advocacy, with an emphasis on issues affecting families and children. Structured Finance

Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets.

As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and

Business Organizations is a prerequisite for Business Planning, but not Business Planning: Transactions.

Business Planning: Transactions
A business lawyer needs to know, or at least be generally familiar with, many areas of law. Therefore, the
purpose of this course is to teach many legal issues, including:

(1) the organization of a business (e.g., the types of legal entities including ""C"" corporation, ""S"" corporation, partnership, and limited liability company), organizational documents for a corporation and a
limited liability company, control issues including the problems of a minority shareholder in a privately
owned business, and understanding balance sheets and income statements;

Employee Benefits and Executive Compensation Law
This course examines how our society tries to influence behavior with the tax code through the lens of
employee benefits and executive compensation. The course examines executive compensation, pension and profit
sharing plans, and health and medical plans. It also analyzes the tax, ERISA, corporate, labor, bankruptcy,
securities, and M&A consequences both to the employee and the employer. The course focuses upon the various
issues a practicing attorney should consider when designing plans and advising clients.

*Please note: This course is offered in a 4-credit version in the spring semester, and in a 3-credit version in the summer. The differences between the spring and summer versions are noted at the end of this description. Students may take elect to take this course in the spring or in the summer, but not both. There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well. **Federal Tax Clinic I**

The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite.

**Client Counseling & Negotiation**

This course is designed to develop skills used by lawyers in their roles as client interviewer, counselor and negotiator. Emphasis is on class participation. The first hour of each class is devoted to lecture/discussion of the covered topics. During the second hour, students participate in practice problems which emphasize the skills taught in the first hour. Students are graded on the following: written paper, one videotaped out of class problem, and class participation. Because of the heavy emphasis on class participation, the class is limited to 18 students.

London Comparative Advocacy Program

Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy in the U.K., and legal history. For students who hope to be selected for the program, completion of Evidence is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available space.

This course is the second credit of a two-credit ungraded program. To prepare for the visit to London, students are required to take "Introduction to the English Legal Profession" (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring.

Construction Law

Construction law draws upon many areas of law from contracts to torts to insurance and land use. This course allows students to understand how they interact and work together. It will focus on the legal issues common to the construction industry from transaction considerations to litigation. We will examine the parties involved in a construction project, project delivery systems, negotiation of contracts, scheduling and delays, insurance and bonding considerations, mechanics liens, defects, claims procedures, remedies, warranties, and termination. Students will gain practical experience in drafting construction contracts as well as writing complaints for a construction dispute. Readings will include state and federal cases and statutes, with a focus on Illinois law. In addition, this course will look at current construction projects and disputes going on in Chicago.

Media Law

This course will teach students the fundamentals of traditional media law with a particular focus on the intersection between injury law and constitutional speech and press protections. This area of study poses intriguing questions about the American balance between the rights of individuals to protect their reputation and privacy and the rights of those who speak via media, whether traditional mainstream news reporters or citizens using social media platforms such as Facebook or Google Glass. In the words of former New Republic counsel Scott Gant, "we're all journalists now." As a result, it is almost inevitable that even lawyers whose practice does not focus on media will confront questions about rights and liabilities arising from client speech. In addition to discussing defamation and privacy doctrine, we will cover statutory regimes that apply to public speech, such as the privilege to protect sources and rights of access to government institutions and documents, and consider whether and how those statutes apply to both old and new media.

Disability Law

Using disability law as a backdrop, this course will help students refine their research, writing and advocacy skills. In the first half of the course, students will gain an understanding of substantive disability law by analyzing caselaw involving the Americans with Disabilities Act and its 2008 amendments. In the second half of the course, students will apply this knowledge in the context of a hypothetical disability law case by writing an objective memorandum and brief on a topic chosen by the instructor. In addition to writing multiple drafts and working one-on-one with the instructor, students will also have an opportunity to talk with judges about their perspectives on effective advocacy.

In an era of computer-aided gerrymandering, foreign interference in our elections, increasingly unchecked campaign finance, systematic voter suppression, and (as yet unsupported) assertions of voter fraud, the study of election law seems more relevant than ever. This is a 2 credit course on election law co-taught by an experienced election law litigator, Ruth Greenwood, and Prof. Matthew Sag. Prof. Ruth Greenwood is the Senior Legal Counsel for Voting Rights & Redistricting for the Campaign Legal Center.

Election Law will give students an understanding of the themes in the legal regulation of elections and politics. It will cover all the major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. The course will also cover voter fraud and vote suppression. Election law is a product of federal and state law, both

Contract Drafting

This course will teach the fundamentals of drafting precise and clear contracts. Drafting concepts will be taught through assigned readings, lectures, in-class exercises, hands-on drafting in pairs and alone, and review of, and comments to, an individual's work and the work of others. The majority of the semester will be devoted to drafting without the use of forms or precedent documents. For the first several weeks of class, students will draft the components of a contract, each component being either peer-reviewed or reviewed by the instructor. The components will be revised according to the comments received and integrated into a complete contract. The individual drafting will be supported by independent in-class exercises and review of the assigned reading and relevant cases. The final project will simulate a real-world drafting experience in which students will receive precedent documents, term sheets, emails, relevant statutes, due diligence and will be required to prepare the first draft of the operative document for a transaction.

**Energy Law**
This course offers a basic overview of the legal framework within which the production, distribution and sale of energy takes place. It is offered as part of the Program in Environmental and Energy Law but is open to all students. After a brief introduction to scientific concepts of energy and the history of energy technology, the course will survey the major sources of energy. The traditional sources have been oil, natural gas and coal converted to consumer products such as electricity and gasoline. Newer sources include nuclear and solar energy. Each source and delivery system has its own network of property rules and contract relationships. National energy policy will be reviewed and the impact of interregional competition on the regulation of energy will be studied, as will constitutional and economic concepts affecting the pricing of energy. Particular emphasis will be placed on energy issues in environmental law.

Advising Not For Profit Organizations in Real Estate and Business Trans Settings
This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. There will be a particular emphasis on transactions and involving ownership, leasing, use, and operation of real estate, which (just as with many for-profit businesses) is typically the largest single category of capital investment and the second largest category of repeat expense (after total personnel costs) for many not-for-profit organizations. The course will also consider issues of

Anatomy of a Deal
This weekend course will provide an introduction to the essential skill set you will need as an entry-level M&A deal lawyer. This is increasingly important, in light of growing client unwillingness to pay junior associate rates for attorneys to learn on the job. Facing an ever more competitive recruiting environment, it will be crucial for you to come out of the gate armed with the appropriate skill set for your chosen practice area. This course is designed to prepare you to speak intelligently in interviews and hit the ground running on the job. To this end, the focus of the class will be the basics of a typical M&A transaction, including how to perform due diligence and how to review and draft resolutions, share purchase agreements, third-party opinion letters, and other closing documents commonly assigned to junior associates. You will also study sample form agreements that appear in many different types of deals, including share purchase agreements, debt documents, confidentiality agreements and escrow agreements. When appropriate, we may invite guest

International Patent Law
The management of large international patent portfolios (comprising patent applications filed in several jurisdictions), and an understanding of law and treaties affecting those portfolios, is fundamental to international patent practice. We will discuss the basics of filing and prosecuting patents under the Patent Cooperation Treaty (PCT), including issues that may arise when prosecuting a US application under the PCT. We will also consider other multinational patent treaties commonly used in foreign patent application filings that affect the management of international patent portfolios and US patents. We will take a comparative look at several aspects of U.S. and foreign patent laws, and will consider current controversies surrounding patents in the international arena.g., regarding access to medicines and the patentability of business methods and other controversial subject matter. Patent Law is a prerequisite. This requirement can be waived only with the permission of the instructor.

Public Interest Boot Camp
Loyola is offering a full-day Boot Camp for students who are or will be working at public interest organizations. The one-credit Boot Camp will focus on a wide range of issues intended to make your public interest work experience more productive and successful. Discussions will focus on topics such as what organizations expect from law students, how to more effectively handle assignments, what resources are available to help with research and drafting, and how to better deal with, and possibly avoid, some of the pitfalls associated with public interest practice. Emphasis will be placed on professionalism, identifying certain basic institutional do's and don'ts.

Law student attendees will receive instruction in how to navigate and use Illinois Legal Aid Online, an extraordinary research tool for the legal aid community. They will also have the opportunity to participate in a variety of other activities designed to enhance their public interest work experience.

Search and Seizure: 4th Amendment Law and Practice in Illinois
A practical skills course on 4th Amendment/Search & Seizure law as it applies in Illinois, and how the most common issues are litigated in criminal cases. The class explores applicable Illinois statutes, Illinois Supreme Court rules, and federal and state case law that sets forth the prevailing legal basis for individuals' rights against unreasonable search and seizure. Taught by a Cook County Assistant State's Attorney and with question and answer sessions with a defense attorney and law enforcement; the course takes a balanced look at both the prosecution and defense approaches to Motions to Quash and Suppress, the bread and butter of pretrial litigation and the chief avenue for deciding 4th Amendment issues. After learning the legal basics, students will be tested on their ability to identify and analyze Search & Seizure issues in various scenarios and argue for or against 4th Amendment violations, as well as, practice some basic motion writing and oral arguments.

**Design Thinking and Early Childhood Education**

This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration.

In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality.

**History of the Federal Judiciary**  
People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I...
European Union Law

The European Union establishes one of the largest markets in the world, is a major US trading partner, and a site of a number of US firms' overseas offices. The EU legal order is therefore an established component of the day-to-day business of numerous US firms. The EU legal order is likely to have an even more significant impact on US firms over time, as the current President of the European Commission has recently stated that one of the Commission's priorities is negotiating a trade agreement with the US to further trade between the EU and the US by abolishing customs duties on each other's products and adopting transatlantic product standards.

The purpose of this seminar is to enable students to fully understand the legal framework within which firms operate in the European Union. It will start with a study of the institutions and the structure of EU, which shares some features with other international organizations and federal structures, but also is unique in its nature. The seminar will explore in depth several current topics in public international law, for example, human rights, the use of force, humanitarian law in a world confronted by terrorism and torture, international criminal law, protecting the environment including outer space and the polar regions, and the right to consular access by aliens in death penalty cases. The seminar is designed to provide students with a foundation upon which to think about and research these issues, and the way that domestic law is often implicated in the formation and reformation of foreign policy. Students will be expected to sign up to present their own assessments of the developing law in several areas, one of which will likely become the focus of their seminar paper. During the first three weeks of the course, the instructor will present a brief overview of the international legal structure - its sources and limitations, and how it operates - as well as a philosophical foundation for a system of human rights. The overall goal of the course is to get future

This class will examine how terrorism cases are investigated, prosecuted, defended and punished. It will address how suspected terrorists are targeted and captured, including surveillance methods and interrogation techniques, as well as the questions of whether these measures are effective and potentially undermine well-established and deeply ingrained constitutional liberties and culture. It will cover classified evidence in the adversarial process -- including how it is gathered, how it impacts charging decisions and trial strategies, and how courts manage it in adversarial proceedings. In addition to drawing out these issues as they operate in civilian courts, the course will also examine judicial alternatives, including the use of military tribunals or national security adjudicative systems in other constitutional democracies, as well as extra-judicial and judicially pre-emptive measures such as preventative detention, designations and the freezing of assets. Canon Law on Ecclesiastical Administration
While the Catholic Church ultimately exists for spiritual purposes, religious institutions must operate in the real world of human resources, leadership development, strategic thinking, communication, marketing, property and finance. Canon law is the Church’s own legal system that regulates ecclesiastical administration. In order to function effectively in this environment, knowledge of the Church’s legal system and how it interacts with civil law is essential for lawyers and administrators responsible for the management of ecclesiastical entities such as Catholic hospitals, universities, social service agencies, dioceses and parishes.

Examples of specific issues would be in the areas relating to Catholic identity, sponsorship, mergers and joint ventures involving Catholic schools and health care institutions; incorporation and tax-exempt status

**The Corporation and the Constitution**

This class will investigate the origin in law of the corporate form and explore the challenges presented by the modern corporation, both from the standpoint of its legal structure as a business organization formed by law, and the rights and privileges afforded corporations under case law that interprets the corporation as a jural “person.” Readings will be considered from colonial charters to the recent U.S. Supreme Court decision in Citizens United v. FEC (2010). There will be special emphasis on the contracts and commerce clauses of the Constitution, as well as the 14th Amendment. This course is not so much concerned with corporate responsibility as it is with corporate governance and accountability. We will explore the concept of limited liability, trace the evolution of legal personhood, examine the original public purpose requirement of the corporate entity as contemplated in law, and consider the role of public law in the world of the self-regulating market. This one credit weekend course will provide students with an intensive simulated experience in conducting a student disciplinary administrative hearing. Assuming the roles of counsel for the student and counsel for the school district, workshop participants will prepare for and represent their respective clients in a school expulsion hearing. Participants will develop an understanding of the constitutional principles of due process, freedom of speech, and search and seizure as they pertain to students in the public school setting; as well as Illinois School Code statutory provisions regarding student discipline, suspension and expulsion. In the course of preparing for the culminating disciplinary hearing, participants will gain a working familiarity with student codes of conduct and student school records and documents, and they will hone their skills in interviewing and preparing clients, witnesses, and school personnel for their respective roles in the discipline process and administrative hearing. Students will also deliver opening and/or closing arguments.

Practice Fundamentals: Interviewing Skills
Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say."[1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing] deals" are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or

Electronic Payment Systems and Commercial Paper
In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It

Mediation Certification & Courthouse Practicum
Students in this course will be trained to become certified mediators and then develop their mediation skills through hands-on experience mediating in court. The course starts with a mandatory intensive mediation skills training conducted by the Center for Conflict Resolution (CCR) at the beginning of the semester. The course will thereafter meet once a week in seminar to discuss, practice and improve upon student mediation skills. Students who complete the skills training portion of the course and meet all of CCR's certification requirements will be certified as CCR volunteer mediators and mediate actual cases in Cook County courts while continuing to meet in class once a week to discuss and build on what they learn in the mediations. Upon completion of this course and the CCR certification process, students will be able to continue volunteering as mediators for CCR, as long as they continue to meet CCR's volunteer requirements. There is no prerequisite for this class; however, preference will be given to students who have already completed a

The Veterans Practicum is a cross-disciplinary effort in partnership with the School of Social Work designed to better address veterans' social and legal needs. Senior law students will use 711 license to represent veterans and their families in a myriad of civil legal matters under the supervision of the director, Emily Vaughan.  
Students who enroll in this course must be available to be for office hours one morning or one afternoon each week (Monday-Friday). The Practicum also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that will be required of them in their casework.

Legal Issues in Student Discipline

The legal issues surrounding student discipline in public elementary and secondary schools involve the intersection of Constitutional and statutory law with the administrative hearing process. By developing a working knowledge of the school disciplinary process, course participants will build analytical and substantive skills applicable to a wide variety of practice areas.

The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about `zero tolerance¿ policies, the role that school discipline plays in the `school-to-prison pipeline¿, and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include:

Externship Long Distance

Students who have completed their first year of law school may receive two or three hours of credit per semester for supervised work done in chambers under the supervision of a member of the judiciary and his or her clerks. The externship course includes a classroom component which has been designed to compliment and support the field placement. The course is taught on Tuesday, Wednesday and Thursday evenings from 5:00pm - 6:00pm. Students may elect the day of the week they wish to attend the class at the time they apply for the externship. Applications are available on the law school website and in the offices of the Director of Experiential Learning.

Innocence and the Law

This weekend course is designed to provide students with an overview of the issues and case law related to wrongful convictions. Students will gain an understanding of the dynamics of wrongful convictions and this burgeoning area of law. The course will also provide the opportunity for each student to research one recent case of wrongful conviction. 40% of the grade in this course is based on class participation. 60% is based on a research paper.

Community LawCtr Clinic I  
The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school’s clinical faculty. The Law Center is located in Room 1005 of the law school. Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. Students in the LUCLC represent children in contested guardianship cases and cases in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. 

Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice.

This course examines the legal relationships among children, family and the state, primarily in the context of issues over which dependency (child welfare) courts traditionally have jurisdiction. The subject matter is divided into two sections, the first exploring Supreme Court jurisprudence on the issue of parental rights and family privacy. The second explores the emerging doctrine of children’s rights, also looking to Supreme Court cases that have pronounced limited, but distinct, rights for minors, as well as civil matters including child neglect, abuse, termination of parental rights, and adoption. This is Trial Practice I with an emphasis on those issues important to advocacy in cases involving children. The course is taught by a team of lawyers and judges experienced in child advocacy, with a student/faculty ratio of no more than 8 to 1. The principal objective is to introduce students to litigation principles, and to teach them advocacy skills in an intensive learn-by-doing environment. The case files from which exercises are drawn also enable students to prepare for the special challenges involved in the representation of children (child witnesses, unique problems in expert testimony, special evidentiary issues, etc.). At the end of the course each student conducts a complete trial before a mock jury at the Daley Center. Evidence is a prerequisite and the course requires instructor permission.

The course seeks to provide an opportunity for students in different disciplines to learn about the theories, philosophies, ethics, and practices of the range of professions that must confront family violence issues, and the impact of decision making in one forum on the practices and decisions made in another forum. Students are challenged to consider the strengths and weaknesses of the responses of various disciplines, and their interaction. The ChildLaw Legislation and Policy Clinic is part of the Civitas ChildLaw Center. Students in this Clinic have an opportunity to work, under the supervision of a faculty member, on a legislative or policy project that may involve any or all of the following: critiquing pending bills or existing legislation, drafting bills, developing summaries and fact sheets about pending bills, and building and working with coalitions to develop legislative ideas and consensus. Topics cover a range of child and family issues. Spring semester students primarily work on projects begun during the Fall Clinic, including researching and drafting legislation concerning child protection and juvenile justice reform issues. Students work in teams and must have sufficient time or flexibility during the work day to participate in some internal team meetings as well as attend meetings outside the Law School, as needed. Juvenile Justice

In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare?

Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

Intnl Children's Human Rights

In the last decade, children have become "the newest kids on the human rights block." This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

Childlaw Clinic
The Civitas ChildLaw Clinic represents children in a variety of settings including child protection (abuse and neglect), family separation (custody and visitation), education, and other kinds of cases involving children and youth. Students typically work on at least two cases during the course of a semester, under the supervision of at least one member of the Clinic faculty. The Clinic also includes a weekly seminar that addresses relevant substantive law, advocacy skills, and ethical issues in the representation of children. Students will learn about the law governing their areas of practice and gain experience with a range of lawyering skills, including client interviewing and counseling, case planning, and written and oral advocacy. While the subject matter of the Clinic's cases focuses on children's issues, students should expect to develop skills transferable to any practice setting. The course is open to all students eligible for a student practice license under Illinois Supreme Court Rule 711, and no prior experience in working with

### Advanced Domestic Relations Law Practicum

This is a selective enrollment year long course that is made up of three primary components: (1) teach students the practical application of the Illinois Marriage and Dissolution of Marriage Act and related statutes, (2) provide students with the opportunity to assist pro se litigants in Cook County Courtrooms, and (3) allow students the opportunity to prepare a proposal to make the process more efficient for litigants by building on the success of an existing process.

In the Fall portion of the course, students will have three credit hours of classroom instruction focusing on the practice of family law. In the Fall students will also have the equivalent of one hour per week of Courtroom observations.

In the Spring portion of the course, the hours will flip. Students will have one hour per week of classroom instruction which will focus on addressing any difficult issues the students are facing in the Courtroom components.

### Mediation Workshop

Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment.

This is a Skills and Experiential Learning course.

### Mediation Practicum

This mediation course allows students to mediate family cases through several community projects. Students are required to have participated in some type of 40-hour mediation training in order to register for this course. These students receive additional training in family mediation, co-mediation and related issues. Students mediate in family group conferences and other multiple party mediations. Students participate in multiple simulation and mediations and receive feedback on their skills. The course meets once a week for the two hours for most of the semester, however students are also required to mediate at other times during the semester. There is no examination. Grading is based on participation in mediations, simulations and discussions and self-evaluations. Students may take the course for 1 or 2 credits. For 2 credits, a paper on mediation theory or practice is required. Where the student is taking the course for 2 credits, the research paper is included in the grade. Enrollment is limited to eight students.

### LAW 654(2)  Current Issues in Children's Law Seminar
- **Date:** 23-AUG-2013

This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

### LAW 663(2)  Children's Summer Institute
- **Date:** 06-APR-2017

This intensive, one-week seminar, titled Children's Summer Institute, provides a wide-ranging interdisciplinary exploration of critical issues affecting children. A diverse team of faculty offers interdisciplinary perspectives on the meaning of best interests of the child. The course is open to graduate students throughout the University. Experts from law, psychology, social work, and child development present information, participate in discussion with students, and debate issues from the perspectives of their own professions. Faculty provide both a theoretical framework for examining the issues, as well as experiential learning. The week may include case studies, lectures, outside speakers, a field trip, and role-playing exercises. The 2017 Children's Summer Institute will focus on the impact of recent and pending federal policies on children and families, especially those involved in the immigration and child welfare systems.

**Special Education Law**  
This course primarily covers the law of special education provided in the Individuals with Disabilities Education Act (IDEA). Additionally, the course will also cover specific laws that are relevant to special education such as the Americans with Disability Act, Federal and State educational records statutes and mental health and privacy laws. A primary emphasis of the class will be to teach students about the process under which students are identified as eligible for special education services and provided with educational services under Individualized Education Plans (IEPs). The class will focus on the following topics: special education case law, legislation, and regulations; utilizing evaluations, tests and measurements in determining eligibility in special education, and in the preparation of Individualized Educational Programs and Section 504 Plans; issues of juvenile justice; behavior and discipline for students with disabilities; negation and compelement entry and transfer.

**13-JUN-2013**

**Introduction to the Study of Law and Legal Systems**  
This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses child and family law cases and problems and provides students with the background they will need for future children's law and policy studies.

**Introduction to Children's Law, Policy and Practice**  
Prerequisite: Introduction to the Study of Law and Legal Systems  

This required course is designed to give students an introductory overview of the law as it affects children. It begins with a discussion of the constitutional relationship among children, parents and the state, as well as the respective roles of the federal and state governments in the regulation of children and families. The course then introduces students to the principal areas of civil and criminal law that affect children and families. With this baseline of understanding, students can choose elective courses that provide a more in-depth study of a particular topic (e.g. education law, child welfare, etc.).

**Juvenile Justice Law and Policy**
This course explores the law, policies and practices of the American juvenile justice system, past, present and future. The focus is on children who are in conflict with the law and those who, by virtue of their status as children, are subject to the jurisdiction of the juvenile court for engaging in conduct such as curfew violations, running away, and other forms of potentially harmful adolescent behavior. Among other issues, the course will examine how juvenile justice law and policy has been shaped by new research on adolescent development, including brain research.

**Mental Health Law and Children**
Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. This course will use cases and examples to compare and contrast application of

**Law, Poverty and Public Benefits**
According to the National Center for Children in Poverty, children are disproportionately impacted by poverty, especially children of color and immigrant children. These risks are greatest for children who experience poverty when they are young and/or experience deep and persistent poverty. This course concerns those areas of civil law which most affect low income children and families, including public benefits such as welfare, housing, education, and health care. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal and other services to children.

Child Law Seminar Series  
The course will run 14 weeks, with seven live lectures and seven weeks of assigned readings to introduce you to each live lecture topic. There is one Module for each topic. Each lecture will be presented by different legal experts and scholars on emerging topics in child and family law.

Students will be expected to participate either in every live class or to listen to the archive if synchronous attendance is not possible. Students will be asked to write a 3-5 page (double spaced) reflective paper at the end of the term choosing from ONE of the lecture topics. The paper should describe how the lecture enlarged or changed your professional practice in child advocacy or in related fields.

Legal Issues in School Discipline  
The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about 'zero tolerance' policies, the role that school discipline plays in the 'school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts; responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.

System Consultation in School Discipline Reform  
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and

**Restorative Justice**

This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

**School Discipline Reform: Linking Law, Policy and Practice**

This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy, and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

Health Care Disparities

Health care disparities is a capstone course that will focus on three major topics in this broad area of public health, providing students with the opportunity to plan and execute projects that will require the drafting of a white paper and a community needs assessment and implementation plan, as well conducting interviews of key thought leaders. Topics for the 2015 course include responding to the medical needs of veterans in the light of the crisis in the Veterans Administration, addressing teenage pregnancy in Latino populations, and crafting innovative approaches to the growing need for community mental health programs. Classes will be discussion based and various group presentations will be integrated into class sessions as well. The course will stress a variety of legal and public policy approaches to the issues at hand.

**Bioethics, Law & Policy**  
This course provides an overview of American law as it relates to emerging ethical issues in medicine and health care. It is intended to give students an appreciation of the ways in which medical practice and decision-making are guided by modern American principles of constitutional, tort, administrative, and criminal law. Students will learn how the law's regulatory powers have been used to set boundaries in medicine, and, in turn, how theories of medical ethics and practice have informed modern legal developments. Topics covered vary from year to year, but may include issues in end-of-life care, research ethics, reproductive autonomy, distributive justice, and genetic technology.

### Law and Public Health
This course explores the role of law and government regulation in the area of public health. The public health process (measurement, problem definition, strategy, design, implementation and evaluation) is explored in reference to current issues that are both timely and expositive of the ways in which law and regulation shape public health practice at the local, state, federal and international levels. Topical areas for analysis and discussion are drawn from the primary environments of public health; biological, physical, social, individual behavior, and national/international health systems. Students are required to work on group projects, and write a research paper.

Topics in Long Term Care

Provides students with an overview of key legal and policy issues in the diverse and growing field of long term care. In the context of the seminar long term care will be cast broadly as an area that deals with diverse populations that have profound and ongoing health/social needs including disabled populations and the elderly. While much of the course will focus on statutory and regulatory law, significant emphasis will be placed on evolving public policies in long term care that impact programmatic developments in quality assurance, insurance coverage and the regulation of institutional and community actors. Specific areas of focus will be selected for each term for review and analyses including diseases of aging, prevention of abuse and neglect, uses of telehealth, senior housing policy and end of life care. Materials from the United States, Canada, the EU and Japan will be referenced. Students will be required to write two memoranda and participate in a group project.

Business Law Center Clinical & Seminar
The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Wednesday from 3:30 to 5 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 6 hours per week, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, and maintain their client's files in an organized and professional fashion.

**European Union Privacy Law**
European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

**Course ID:** 013021  
**Instructor Consent Required:**

This is a required foundational course to introduce the on-line student to the key concepts that underlie competition law as it exists throughout the world. The concepts that the students study here will be examined in greater detail throughout the rest of the curriculum. This course will begin the process of creating a common foundation of knowledge of the law and economics of competition by the conclusion of the program. The course will begin with the goals and history of competition law and its spread from the United States and a handful of developed market economics to over one hundred twenty jurisdictions in today's global economy. The common features of competition law in all these diverse systems will be examined including 1) so-called horizontal agreements between competitors, 2) so-called vertical agreements between suppliers, manufacturers, wholesalers and retailers, 3) unilateral conduct by dominant firms which injures or threatens to injure

**International and Comparative Antitrust Law**
This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgments in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed.

**Advanced Alternative Dispute Resolution**
The course will focus on the substantive and procedural elements of the various forms of alternative dispute resolution techniques in the United States. The class will cover arbitration, negotiations, mediation, mini-trials, non-binding arbitration using legal assistance, and the role of counsel in each of these processes. A significant amount of class time will deal with mediation as well as both administered and non-administered arbitration. The class will address established principles of arbitration law, the various types of arbitrations, the rules governing arbitration, the role of counsel in the processes, as well as the power, responsibilities and ethical requirements of both mediators and arbitrators. The course will combine a traditional lecture format with practical experience designed to provide the student with a strong substantive basis in mediation and arbitration, as well as clinical experience with several mock mediations and arbitrations interspersed during the course term.

Federal Criminal Trial Advocacy

Students will follow the evolution of a federal criminal case from investigation to trial. The class will focus on one mock problem – which will likely be a federal narcotics investigation that resulted in a two-count indictment. The indictment will allege that the defendants conspired to distribute more than 280 grams of a controlled substance and that they indeed distributed the controlled substance. Because it will be too complex for a one-semester course, I do not recommend that the mock problem include a Title III investigation.

The class will be divided into three parts: 1) Investigation 2) Suppression Hearing and 3) Trial.

Corporate Compliance

This course will familiarize law students with the world of corporate compliance focusing on competition law issues, and provide basic skills to be employed in a corporate compliance department. Students will obtain a basic understanding of the legal principles related to compliance, or preventive law, and learn the interplay between compliance and ethics. They will become familiar with the principles of Chapter 8 of the United States Federal Sentencing Guidelines, which describe the fundamental rules for creating an effective compliance program. They will be able to understand and articulate how compliance and ethics failures impact on the success or failure of a business.

Antitrust & Intellectual Property

This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

Chinese and Indian Competition Law

The People's Republic of China promulgated its Anti-Monopoly Law (AML) in 2008 following nearly a decade of study, drafting, debate, and revision. The AML is a unique and important competition law given China's status as both a socialist market economy and the world's second largest economy. This course will provide a survey of the development of the AML, its principal provisions, its unique method enforcement by three different government agencies, the early track record of enforcement, and the continuing questions regarding the effectiveness and fairness of the AML.

U.S. Antitrust Law

This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LIM Thesis

Open to: LLM students only. Each LLM student must write a paper of publishable quality. The paper, written under the guidance of a faculty advisor, should integrate a number of issues covered in the competition or consumer law curriculum. It is expected that each LLM paper will make an important contribution to competition or consumer law literature. Students must select a mutually agreeable topic with the Director or Associate Director of the Institute and then be paired with a thesis advisor selected from the full-time or adjunct faculty of the Law School. Students will be encouraged to apply the concepts from the rest of the curriculum to legal issues from their own jurisdiction.

With guidance of the faculty advisor, the LLM student will prepare a topic and thesis statement, a thesis outline, first draft, and final draft of the LLM thesis for completion by the end of the semester. In addition, the student will present a brief oral thesis defense to the faculty advisor and selected other professors.

European Union Competition Law

European Union (EU) competition law is generally considered one of the two most sophisticated systems of competition law in the world (in addition to the United States). It is also the model for the majority of other national and regional systems of competition law. This course is a survey of the substantive competition law of the EU, how it is enforced, and the relationship between EU competition law and the competition law of the 28 EU member states.

International Merger Regulation

This course provides an overview of the laws and legal issues related to the review and regulation of mergers from an antitrust and competition law perspective. Although the course will draw primarily from the experiences in the United States and Europe, we will discuss and compare many jurisdictions around the world and the challenge of applying multiple merger laws to the same merger. We will start by distinguishing mergers from other types of business conduct which implicate antitrust and competition laws and address the question of why mergers are treated differently. The course will then address basic principles used in the substantive review of mergers. We will start by identifying the economic rationale supporting the prohibition of mergers and the basic economic theories used to distinguish permissible mergers from impermissible mergers. We will then ask whether these theories apply across jurisdictions. We also will devote several sessions to the procedural context of merger review. We will discuss the basic

**Writing Fundamentals**

Students will review basic writing mechanics including grammar and punctuation. They will enhance their writing skills by editing passages, producing written assignments, and doing focused writing exercises. Students will also learn to develop sound arguments by practicing the art of logical flow. The goal is to help students to produce clear, well-organized, grammatically correct prose. This course will also offer some guidance regarding how to approach the thesis project.

Advanced Health Care Compliance
This course explores advanced concepts in health care compliance. This course will present a complex health
compliance scenario each module which the student must analyze and comment upon. The scenarios will
cover a broad array of regulatory subject matters which must be analyzed in the context of compliance program
principles.

Prerequisites: LAW 910 - Health Care Compliance (Online) or
LAW 798 - Health Care Compliance (Chicago-Based)
Components: Seminar(Online)
Requirement Group: Restricted to the students in the M.J. and LL.M. Health Law, Business Law, and Compliance and Enterprise Risk Management Online programs
Req. Designation: Writing Intensive

Privacy Program Management
This course explores advanced concepts in privacy and security law and is designed as a continuation of
either of the introductory privacy courses (LAW 918 or LAW 823). This course will present a complex
compliance privacy and security scenarios each module which the student must analyze and comment upon. LAW 918 or LAW 823 is a prerequisite
Components: Seminar(Online)
Requirement Group: Restricted to the students in the M.J. and LL.M. Health Law, Business Law, Compliance and Enterprise Risk Management Online programs

Conducting Internal Investigations
This course will cover practical techniques in responding to suspected non-compliance as well as liability
exposure in how investigations are handled. The course will also discuss resolution of identified
non-compliance and methods for discharging an organization's legal obligations to correct non-compliance,
including self-disclosures and refunds. Additionally, the course will cover responding to government
inquiries and audits. LAW 910 (Health Care Compliance) or LAW 839 (MJ Corporate Compliance) are preferred prerequisites but are not required.

Drafting Policies and Procedures
This course is designed to provide practical experience in drafting operational policies from compliance
regulations. Having clear policies and procedures is an essential element of an effective compliance program.
The course will explore liability associated with how policies are drafted as well as non-compliance with an
institution's policy commitment. The course will teach skills and techniques for turning complex regulations
into accessible policies for the workforce. LAW 910 Health Care Compliance) or LAW 839 (MJ Corporate
Compliance) are preferred prerequisites but are not required.

Human Subjects Protection
This course will cover the law of protecting human subjects in clinical research. Federal agencies require
institutions conducting research to have a study approved by an Institutional Review Board (IRB), obtain
informed consent from the human subject, and self-disclose to the government various events. The course will
review the regulations governing IRBs, the content of informed consent forms, the monitoring of research
studies, and the disclosure of unanticipated events and significant non-compliance. The course will look at
enforcement cases as well as tort liability. Financial relationships between investigators and sponsors will
also be covered. LAW 958 (Life Sciences, Research and the FDA) is a preferred prerequisite but is not
required.

Antitrust Law  
This course will provide an overview of the antitrust laws and will illustrate the antitrust issues that face businesses on a daily basis. The antitrust enforcement authorities believe that preserving competition provides the best mechanism for allocating economic resources, and that preventing unreasonable restraints of trade will benefit consumers by yielding high-quality, low priced goods and services and result in greater innovation. We will examine the value of competitive markets and the role antitrust law plays in addressing problems posed by mergers and acquisitions, joint ventures, monopolies, and other competitive collaborations across a wide variety of industries (including various aspects of the health care industry). We will also assess the antitrust implications of certain contracting practices such as exclusive dealing, non-compete clauses, and the impact of various other strategic business decisions. The subject matter is organized topically and will entail a discussion of competition theory and the practical application of those antitrust laws.

Comparative and Ethical Lawyering for the Rule of Law

This course will develop the students’ key knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. Comparative law and an interdisciplinary vision represent the added value of international legal assistance. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal systems: common law, civil law, religious law, customary and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. The course will provide practical examples of cross-system rule of law assistance. Students will get acquainted with the three-pronged approach (norms, resources, society) developed and implemented by A. Cordahi in the field. Attention is devoted to issues of comparison and contextualization when striving to enhance: state institutions, constitutions and the justice system.

History, Theory and Practice of Law for Development

This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any

Theory and Practice of Assessments in Rule of Law Advising

This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The philosophy in the course is that developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action.

International Development Architecture

This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors,

**Sustainable Development through International Commerce and Investment**
This course provides an introduction to the law governing trade, investment, and commercial transactions, giving particular focus to the ways institutional, legislative, and regulatory reforms in these fields can foster an enabling environment for private sector development. The course begins with an overview of the multilateral trading system, particularly the treaties and rules established by the World Trade Organization (WTO). The course also introduces elements of regional trading blocks such as Mercosur, ASEAN, and CAFTA-DR of significance for developing countries.

A critical issue relevant to national level legal and regulatory reform is non-tariff barriers to trade. This segment of the course will also examine the main elements of international regulation of intellectual property, notably the Trade Related Aspects of Intellectual Property Agreement (TRIPS) developed under the

This course will improve the understanding and skills of students in the area of project design and the preparation of proposals related to rule of law assistance, which can be carried out either in the context of an internationally financed assistance arrangement, or as a nationally driven and self-financed initiative. Accordingly, the course will develop students' skills in undertaking the principal steps in the programmatic design process. Building on the course on needs assessments, the course will introduce and position project design as it fits into the overall project lifecycle, as well as its relationship with results-based management. This will involve the following:

1. Examining the process of identification of goals, objectives, outcomes and activities, project inputs and expected outputs;
2. Undertaking the development of a stakeholder analysis and the selection of appropriate project partners,

**Rule of Law in Conflict Prevention and Peacebuilding**
Strong rule of law is essential to both conflict prevention and post-conflict recovery. The lack of effective legal institutions to uphold human rights, support political inclusion, and provide access to mechanisms for redress when rights are violated create conditions in which conflict may arise. After conflict, failure to achieve just terms or reconcile opposing factions in peace agreements may only replicate those conditions, thus increasing the likelihood of a return to conflict. The cessation of conflict poses further challenges to building the rule of law; state institutions are often fragile. Human capacity within the host nation is often severely constrained. Efforts to rebuild states after conflict are often carried out under the auspices of multilateral interim administrations or as part of military operations.

This course will explore the relationship between rule of law development and conflict. It will analyze the

**Legal Systems and Methods**
This course provides an introduction to the study of law in the global scenario. Through a historical and comparative approach, the course aims at providing non-lawyers with a framework for understanding the central features, branches and notions of law. After a general introduction on legal reasoning and the sources of law in the main legal traditions, the course will examine the interaction between norms, policies and society in different branches of the law. Emphasis will be placed upon the experience of law by "its professionals" (judges, attorneys at law, in-house lawyers, drafters of legislation, law enforcement agents, etc.) as well as by rights holders and duty bearers, claimants, defendants, the administration and ordinary citizens. A set of cases have been selected to understand legal relations and how rules are applied in the different legal environments. The course will also provide a comparative introduction to fundamental legal institutions and effects of globalization on domestic legal systems (and vice-versa). Attention will be given to the

**Research and Writing on the Rule of Law**  
This course is designed to assist lawyers and other professionals working with the law in developing the techniques of scholarly legal research and writing in relation to rule of law development. The methods and skills that will occupy this course are designed to achieve two objectives. The primary objective is that students will be able to apply scholarly research skills, which will be instrumental for conducting in depth studies on rule of law development topics for term and major papers during the PROLAW Program and for the final capstone project. In keeping with the focus on development issues, substantial emphasis will be given to socio-legal and empirical legal research methodologies. A secondary objective is that students will acquire writing skills that can be used in various practice settings involving legal advice, policymaking, and rule of law development implementation.  
The research methodologies analyzed in this course will enable students to develop a deeper knowledge of

PROLAW students are required to undertake a "Capstone Project" (Project) which will be the culmination of the student's academic and personal experiences in the PROLAW program. The course is intended to flow sequentially and draw on the substance and methods learned in earlier courses.

Each student shall be required to identify an institutional partner (e.g. a government, an international organization, an NGO, etc.) to be beneficiary of the Project which deals with rule of law and governance issues. Together with the partner institution, the student will agree on a specific situation or problem the partner is facing which will be the focus of the student's Project, thus having a real-life utility. The student will then undertake a multi-phase process of refining the Project focus by performing a detailed pre-project assessment, design of a resulting project and establishment of the Project's management.

This course will cover the main principles, methodologies and tools in managing rule of law projects, and examine specifically whether there is anything special that differentiates the management of rule of law projects from other types of projects. The course will analyze the main tasks involved in managing a rule of law project, including recruitment, human resource management, procurement, inventory, budgeting and pipeline analysis, reporting, monitoring and evaluation, and technical implementation. The course will also address the main steps in the project cycle that relate to implementation, including start up, work planning, reporting and stakeholder management, extensions and close out, managing conflicts and problems during project implementation, and the key requirements for successful project management – teamwork, transparency, knowledge and cultural literacy. The course will explore common challenges in project management, such as implementing a project with weak design or insufficient budget and what to do when the desires of recipient

Community Health Nursing

This clinical course provides the student with an opportunity to apply nursing and public health concepts to families, aggregates, communities, and populations. Opportunities to apply epidemiology and risk assessment strategies in a community assessment are provided. The role of the community health nurse as educator is addressed.

Outcomes:

Upon completion of this course the student will be able to:
1. Apply nursing and public health concepts to community assessment utilizing databases and community engagement.
2. Evaluate the provision of health education and/or health information in the community.

Components: Clinical(Online)

Theories & Concepts for Advanced Clinical Practice
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.

Upon successful completion of the course the student will be able to: 1. Understand the history and driving forces for knowledge development in nursing. 2. Describe the philosophical foundations of nursing and advanced nursing practice. 3. Understand the levels of theory development in nursing. 4. Explain the use of selected concepts and middle-range theories to guide advanced nursing practice. 5. Analyze concepts and theories for use in nursing practice. 6. ### GNUR 472(3) Course ID:013620 01-APR-2018
#### Psychiatric Mental Health Across the Lifespan I

This course focuses on potential and actual psychiatric mental health disorders across the lifespan. Evidence-based practice treatment options and evaluation for selecting appropriate treatment modalities are discussed. The student will learn how to apply prevention and treatment models for psychiatric mental health disorders based on the client's age, lifestyle, values, cultural considerations, and legal requirements with psychiatric treatment protocols.

**Prerequisites:** GNUR 413 (Advanced Pharmacology) and GNUR 425 (Advanced Health Assessment Across the Lifespan)

Upon successful completion of the course, the student will be able to:

1. Synthesize evidence-based components

**Components:** Lecture(Hybrid)

**Requirement Group:** Prerequisites: GNUR 413 (Advanced Pharmacology) and GNUR 425 (Advanced Health Assessment Across the Lifespan)

**Req. Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1)

### GNUR 474(3) Course ID:013619 23-APR-2018
#### Psychiatric Mental Health Across the Lifespan II

This course builds on the critical thinking, diagnostic reasoning, clinical judgment and decision making competencies developed in Psychiatric Mental Health Care Across the Lifespan I. A major focus of the course is the inter-professional integration of prevention and treatment strategies for clients and families.

Upon successful completion of the course, the student will be able to:

1. Apply clinical judgment and critical thinking to formulate collaborative psychiatric mental health care for clients.
2. Strategize coordinated care for children, adolescents, adult and older adults with psychiatric mental health disorders.
3. Evaluate evidence-based psychotherapeutic and psychopharmacological treatment strategies for clients with psychiatric mental health disorders.
4. Implement strategies to develop a psychiatric mental health treatment

**Components:** Lecture(Hybrid)

**Requirement Group:** Prerequisite: GNUR 472 - Psychiatric Mental Health Care Across the Lifespan I

**Req. Designation:** Fieldwork

**Room Requirements:** Electronic Classroom(1)

### GNUR 476(2) Course ID:013876 15-JUN-2019
#### Basic Diagnostics for Advanced Practice

The focus of this course is on clinical decision making for selecting and interpreting diagnostic tests. Students will use evidence to appropriately gather, interpret, and manage objective diagnostic clinical data to manage various health problems across the lifespan.

**Enrollment Conditions:** Advanced Health Assessment, Advanced Pathophysiology, Advanced Pharmacology

**Outcomes:**
1. Select appropriate diagnostic tests for conditions commonly seen by advanced practice nurses.
2. Evaluate diagnostic tests selection, based on health assessment data, clinical signs and symptoms, cost, risk/benefit analysis.
3. Interpret diagnostic test results for clinical decision making.

**Components:** Lecture(Hybrid)

**Requirement Group:** Restricted to Graduate Nursing or M.S. Dietetic students.

**Req. Designation:** Fieldwork

### GNUR 482(2 - 3) Course ID:013623 01-APR-2018
#### Psychiatric Mental Health Adv Practice Practicum

The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in psychiatric mental health settings. Students will advance their proficiency in caring for clients with common acute, chronic, and complex psychiatric mental health problems across the lifespan. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.

**Prerequisite** GNUR 472-Psychiatric Mental Health Care Across the Lifespan I

Upon successful completion of the course, the student will be able to:

1. Elicit and document relevant health

Emergency Care Procedures for the Nurse Practitioner
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.

Enrollment conditions: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology

Outcomes: Upon successful completion of the course, the student will be able to: 1. Recognize the importance of patient education and informed consent prior to performing procedures. 2. Synthesize knowledge of anatomy, Components:
Requirement Group: Restricted to Graduate Nursing or M.S. Dietetic students.

Teaching in Nursing
This course focuses on teaching and learning theories, principles, and practices in nursing education. Major topic areas include philosophies and theories of teaching and learning, teaching and learning processes and resources, curricular and program designs and frameworks, competency development and assessment, evaluations and measurements strategies, the faculty role, and regulatory issues.

Outcomes: 1. Explain philosophies, theories and principles of teaching and learning. 2. Understand curricular design, implementation and evaluation. 3. Analyze evaluation and measurement strategies in nursing education. 4. Understand the expectations of the faculty role. 5. Understand the relationship among educational setting, teaching methods, and student learning outcomes. 6. Evaluate education and nursing education research literature for implementation in practice.
Components:
Requirement Group: Restricted to Graduate Nursing or M.S. Dietetic students.

Teaching Practicum
This course is designed to give students a context for applying the concepts of teaching and learning in nursing education. Students will experience numerous aspects of the teaching role and the opportunity to design, deliver and evaluate approaches to teaching and learning. The practicum consists of supervised experiences with assigned faculty mentor(s) in varied teaching/learning environments.

Outcomes: 1. Assess the learning needs and learning styles of learners. 2. Demonstrate effective teaching in a selected area of nursing. 3. Demonstrate the ability to conduct formative and summative evaluation of the learners. 4. Evaluate teaching effectiveness in self.
Components:
Requirement Group: Restricted to Graduate Nursing or Graduate School students.

Quantitative Methods and Design for Nursing Research
This course focuses on quantitative research methods and designs for nursing research. The linkages between theory, concepts, research design, instrumentation, sampling, data collection analysis and reporting are emphasized. Ethical concerns related to the research process are discussed and analyzed. Strategies for developing a program of research and the leadership role of the researcher/scholar are addressed.

Outcomes: 1. Explain the significance of quantitative research in the development of nursing science. 2. Develop research questions to address gaps in knowledge. 3. Utilize the elements of quantitative research methods in the planning and conduct of research. 4. Understand the importance and implications for using big data for research and the issues related to measurement error. 5. Synthesize knowledge from nursing practice, theory, and research in the formulation of quantitative nursing research studies. 6. Analyze ethical concerns
Components:

Req. Designation: Fieldwork
Room Requirements: General Classroom(1)
Qualitative Methods in Nursing Research
This course focuses on exploration of inductive qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical, political, and special concerns of inductive qualitative research are emphasized.

Outcomes: 1. Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science. 2. Explain the relationship between theoretical and philosophical foundations and assumptions to the major qualitative research methods. 3. Compare the major qualitative research designs in terms of background, purpose, research questions, data gathering techniques, analytical methods and report of findings.

Common Health Problems of Adults/Older Adults
One course of a three-course sequence, GNUR 514 is designed to prepare the Nurse Practitioner to assume responsibility for coordination and management of adult/older adult health care. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing common health problems.

Components:

Interdisciplinary Frontiers in Psychoneuroimmunology
This is an interdisciplinary course designed to provide a forum for discussion of leading-edge empirical and theoretical papers relevant to the interdisciplinary field of psychoneuroimmunology. Emphasis is placed on emerging links among: the environment and the genome, behavioral epigenetics and the effect of cumulative stress on immune function.

Prerequisites include graduate research course or research experience. There are no co-requisites.

Outcomes: Evaluate empirical research in psychoneuroimmunology research. Infer health implications of research findings in psychoneuroimmunology.

**Measurement in Nursing Research**

This course focuses on principles and concepts of measurement in nursing research. Psychometric theory and instrument development, critique and testing are addressed. Methods for generating and evaluating reliability and validity are emphasized and operationalized. Ethical concerns related to development and use of measuring instruments are examined.

**Outcomes:**
1. Understand key principles and concepts of psychometric theory.
2. Differentiate between reliability and validity as measurement concepts.
3. Apply statistical techniques in the assessment of reliability and validity of scores from measuring instruments.
4. Evaluate measures and measurement approaches in answering research questions.

This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.

1. Analyze the role of federal, state, and local governments in population health.
2. Assess population specific health needs using Healthy People and the determinants of health as frameworks.
4. Analyze health disparities and needs of priority populations using databases.
5. Apply epidemiologic concepts when completing a population needs assessment.

**Health Care Policy and Economics**

Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.

**Outcomes:**
Upon successful completion of this course the student will be able to:
1. Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels.
2. Analyze the effects of health policy.

Research Internship
This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

Philosophy of Nursing: Nursing as a Moral Practice
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Outcomes: 1. Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy. 2. Articulate one’s own approach to moral reasoning when responding to bioethical issues in nursing. 3. Identify presuppositions/assumptions underlying one’s positions and the bases for

Prerequisite: GNUR 512 and GNUR 513.

This course provides students with a basic understanding of the research grant application process. The overarching objective is to foster fundamental skills and strategies needed to prepare and submit a competitive research grant proposal. Emphasis is placed on the means by which to best position a research grant application for success. Sources and types of funding from governmental agencies, private foundations and professional societies are considered, with an emphasis on federal (NIH, AHRQ) grant programs, mechanisms, application and review process. Key aspects of successful proposal development from conceptualization of an idea or research question to submission of the application is fully developed and explored. Strategies for successful writing of each component of a research grant are provided using examples

**Nursing and Health Policy**

This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level. The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.

Outcomes: 1. Analyze health care delivery systems and specific health policies using selected theoretical models.

**Evidence Translation for Adv Clinical Practice**

This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.

Upon successful completion of this course the student will be able to:
7. Formulate questions about population-based practice problems, issues and areas for improvement in context.
8. Synthesize the state of evidence with regard to a specific outcome.

**Introduction to Linear Models**

This course provides graduate students with a foundation in applied regression analysis techniques used in health, social, and behavioral sciences. Conceptual understanding and critical evaluation of statistical models is emphasized. Topics to be covered include probability statistical foundations, correlation, analysis of variance, simple and multiple linear regression, variable selection, model selection, model building, regression diagnostics, and prediction.

Knowledge commensurate with undergraduate intermediate algebra (equivalent to Loyola's MATH 100 course) and undergraduate introductory statistics (equivalent to Loyola's STAT 103 course)

Upon successful completion of the course, the student will be able to:
1. Explain strengths and limitations of regression models.

Communicating clearly and persuasively is at the core of this topic. Individuals can leverage their unique leadership style to effectively communicate and inspire action. By developing practices for formal as well as informal communication, students learn to manage frequency, volume and medium chosen in order to construct messages that reach various audiences. Practicing clear and effective oral communication is established through multiple exercises in this course.

Prerequisite: CPST 210; Restricted to Leadership majors only

At the end of this course, the student will be able to:
1. Identify leadership style and use for connecting in verbal presentations.
2. Develop the ability to communicate simply and effectively through written components.

Introduction to Global Trade Compliance

Understanding the principles of global trade compliance helps personnel in compliance and other key functional areas (e.g., accounting, logistics, talent, purchasing, R&D) understand the opportunities and risks associated with international trade. Topics include key principles of import and export compliance, the government's role in the regulatory framework, and common risk areas that impact business activities.

Restricted to students in the School of Continuing & Professional Studies. Prerequisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201

At the end of the course, the student will be able to:
1. Identify the basic regulatory framework for import compliance (e.g., customs valuation, tariff classification and country of origin)
2. Identify the basic components of compliance programs.

Environmental Economics & Resource Management

The purpose of this course is to help students understand the role of economics in analyzing natural resource management and the role of economics in the development of environmental policy. An understanding economic models of efficiency is integral to any discussion of innovative ways to approach our natural resource constraints in the 21st century and beyond. The focus of the course will be on energy, energy efficiency and renewable energy sources, and the cost of pollution and climate change. The renewed interest in innovative technologies that reduce emissions, waste and improve bottom lines provides a new impetus for investment in renewables and new technologies. The second part of the course will be devoted to highlighting opportunities for companies, citizens and entrepreneurs to create jobs and improve communities. By the end of the course, it is hoped that students will find that as citizens, entrepreneurs or corporate executives, they can do well financially by doing good environmentally.

Development and Change in Organizations

Prerequisites: CPST 250

Students will investigate the theory and practice of organizational development, examine assumptions, strategies, models, intervention techniques for organizational development and change processes. Students will also study the formation of collaborative relationships, overcoming resistance, gaining commitment and realigning culture.

Outcome: Students will provide case studies that integrate data; design interventions, change strategies and an evaluation for diagnosing organizations, groups and jobs.

Neurodevelopment and Trauma
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students
