Ethics, Economics & Entrepreneurship
Prerequisite: Junior Standing, 'C-' or better in MGMT 201

The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions:
Who is the entrepreneur - that is, what activities or characteristics make one an entrepreneur?
Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?
How ought we to evaluate the entrepreneur morally - and does the answer depend upon who we understand the entrepreneur to be?

<td>This course examines the beliefs, values, sub-cultural traditions and performance of identity(ies) typically associated with persons of African heritage in various areas and contexts across the African world. Each of these elements of Black/African culture will be viewed through the lenses of social science, literature and other articulations and postulations which attempt to name and characterize these populations, historically and contemporarily in print and electronic media, filmic and popular cultural discourses. This interdisciplinary approach will engage early black film, ethnography, slave narratives, performance and performance theory as tools to unpack multiple contested ideas, beliefs and ideologies concerning the nature of black self-identity and expression.</td>

| **Course Title:** Research Methods in Black World Studies  
| **Course Description:** Chicago has a growing number of newly formed communities whose ancestors are/were African. Among such populations are Cuban, Haitian, Nigerian, Belizean, and Jamaican peoples. These neo-African communities in Chicago tend to cluster in patterns related to available housing, ethnicity and natality. Many factors including language barriers, educational and employment disadvantages as well as cultural ubiquity often leave these newcomers' needs unattended. This course provides instruction in research methods useful in understanding the social and political needs of such marginalized populations. The primary research model for this course is Participatory Action Research methods.

This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic
texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said,
Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

Outcome: Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum.

HONR 101(3)  Course ID: 003802  06-JUN-2017
Western Traditions - Antiquity to the Middle Ages
This course, (and its companion, HONORS 102), opens perspectives on works that have shaped the self-understanding of the Western intellectual tradition. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty.

Outcome: Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time. Written and visual expressions of these themes are examined in relation to the political and cultural background of each period: Ancient Greece and Rome, the Middle Ages, the Renaissance, the Enlightenment, the
