Why did you want to be an RA?

I wanted to be an RA so that I could have a lasting impact on the Loyola community and build a community of my own within my floor.

What has been your favorite part of being an RA?

My favorite part of being an RA is getting to work with such an amazing team of people that have shaped how I look at the RA role today. Even if they are not apart of my area, they still have a lasting impact on me.

How has the RA role supported your future goals?

I am going into a helping profession after I graduate and having the RA experience under my belt has given me opportunities and insights that I otherwise wouldn’t have if I didn’t apply to be an RA.

A favorite program you have planned and implemented?

One of my favorite program that I did last year would have to be a program called “Float Your Future.” My residents and I had root beer floats while coming up with future goals through writing a letter to our future selves. I am giving them their letters during spring semester finals so they can see the growth that they have achieved since being at Loyola.

Why do you think others should be an RA?

I think others should be an RA because it gives you a new look at Loyola. Not only are you working with a university organization, but you are also working with other students and once everyone settles in, you start to form friendships that you otherwise wouldn’t have formed if you didn’t become an RA.
