

Statement of Candidacy Audrey Carberry
SGLC Spring Elections 2021

My name is Audrey Carberry and I am running to be re-elected as a senator in Loyola's Student Government, where I hope to continue to change the University for the better.

As a senator during the 2019-2020 school year I organized the Installation of three new water refill stations in Mertz residence hall and created legislation to acknowledge the work done. In

the Spring Semester I became chair of my committee and began having meetings with administrators to advocate for student needs on campus. In the Spring of 2021 I served as chair of the Facilities and Transportation committee where I advised new senators on their initiatives.

As a member of student government, I hope to expand the sustainability of Loyola Facilities and

create facilities that closely resemble the needs of the student body. I hope to facilitate communication between the University and the student body and to help students find the resources they need to be successful.

As a student with ADHD I have struggled with finding the resources I need. I have felt that my voice does not matter but learned there are ways to make it heard. I hope through a position in student government I can help all students get the services they need on campus.

I am elected as a senator, I will continue to use my position to make sure students are the center of campus improvements. I will continue to speak for students and serve the student body to the best of my ability.
