Wetland Restoration - LUREC Pond
1. Preventing water to wetland
2. Becoming more shallow
3. A liability for LUREC visitors
   Must be removed
1ST proposed step: Stabilize the north ditch to prepare for decommissioning of pond.

Requires specials permits and planning

Ditch not on our property
Loyola University Chicago Retreat & Ecology Campus, 2011

Oak and Hickory Savanna Restoration
Since September 2011

207 person-hours
