

Ways to Be a Water Champion...

- ◆ **Skip the bath and take a shower!** Taking a bath uses up to 70 gallons of water.
- ◆ **Shop consciously next time you need new jeans!** Your blue jeans may have taken 3,000 gallons of water to make.
- ◆ **Conserve water** so that the Great Lakes, which are a precious fresh water resource, will be around to enjoy for generations to come.
- ◆ **Cut back on red meat to reduce your impact!** A 1/3 pound hamburger takes 660 gallons of water to produce.

Remember: Without water, life can't exist!
Do your part and save water. 😊

Please recycle when you're done with me.
