ELPC-Loyola IES Internship Program

**ELPC-Loyola IES Internship Program Description:**
One internship will be available for the Fall 2018 semester at the Environmental Law & Policy Center. The student will work a **minimum 10 hours per week for the summer semester** at a rate of $12 per hour for up to a maximum of $2,000 per semester. If students are excellent interns for the ELPC, and desire to stay on longer in order to advance the project they are working on, they are eligible to apply for an extension of their internship for an additional semester or summer. The projects and/or case(s) on which the students will assist are determined by the ELPC, and are subject to change depending on their level of urgency and importance. **Students are expected to develop a work schedule that allows the ELPC to know when they can rely on the student intern being present.** Students can take the internship for Experiential Learning/Internship credit, and both the ELPC staff and the IES Associate Dean of Academic Affairs will be involved in drafting expectations for course credit and conducting assessments of the student’s progress.

**Application and Selection Process:**
To be considered for these positions, students will submit a 1-page resume which should include pertinent courses and experiences, and a 1-page statement of purpose which outlines what they hope to do with their career, and how this internship could help them advance their goals and enrich their Loyola experience. Students submit these materials to Ms. Eniko Racz ([eracz@luc.edu](mailto:eracz@luc.edu)) by August 31, 2018. The applications will be reviewed by a committee of ELPC and IES faculty/staff, and one candidate will be selected.

The Fall 2018 ELPC intern work on either of the following projects below:

Loyola Jr/Sr to assist the **Clean Energy and Sustainable Business** team with clean energy policy research and analysis – particularly related to solar power, electric vehicles, and energy efficiency. The ideal candidate has a strong quantitative and analytical background, excellent writing skills, is comfortable conducting in-depth qualitative research, and is familiar with clean energy technologies. Familiarity with Microsoft Excel is required. **Project mentor: Clean Energy and Sustainable Business Specialist Tamara Dzubay.**
Loyola Jr/Sr to participate in **Diesel Reduction Campaign** advocating for diesel school buses, transit buses and equipment to be replaced with zero emission electric. This effort stems from the VW defeat device scandal and aims to improve air quality and human health. Ideal candidate will have science background, strong research, data analysis and writing skills, and interest in the details of bringing about change. Project mentor: ELPC attorney/policy advocate Susan Mudd.

**IMPORTANT! Since this internship is funded by Loyola University and hours are logged in KRONOS, the total number of weekly hours cannot exceed 20 for all Loyola positions combined.**
