

**WISCONSIN
PUBLIC HEALTH
PROGRAM**

**ENVIRONMENTAL
TRACKING
INTERNSHIP |**

APPLICATION FORM

We are looking for an independent problem solver to help us prepare and stage data for our [online data portal](#). We also expect a few smaller data projects to come up during the course of the internship.

A few more details:

- **Timing.** While we assume the intern will join us in May and stay for the summer, we are very flexible. If the selected intern is local and interested in starting sooner or a little later, we can make that happen. We expect this internship to last about 400 hours.
- **Capstone.** We welcome students who would be using this experience as part of their capstone project or program requirements, if applicable.
- **Payment.** This is a paid internship, and we expect to pay the intern \$14-18/hour based on experience.

Please submit this form and your resume to Jenny Camponeschi (jennifer.camponeschi@wi.gov) by **January 31, 2018**. Please contact Jenny if you have any additional questions about the internship or your application. Thank you for your interest!

For each of the questions below, please give an answer in about 4-6 sentences.

- 1. Why are you interested in environmental health and specifically the Environmental Public Health Tracking Program?**
- 2. How have your work experiences and classwork prepared you for this internship? List any courses you think are particularly relevant.**
- 3. What is your experience with programming or statistical analyses? This includes any use of statistical software (e.g., R, SAS, Stata, or SPSS) and/or any work with syntax, code, or mapping (e.g., HTML, CSS, web design, GIS). Please also mention your experience using Microsoft Excel to organize/prepare data.**
- 4. Tell us about one project you worked on that really excited you. What was it about that project that you enjoyed?**
- 5. What do you hope to gain from an internship with our program?**
