2013-14
Degree Programs

Marcella Niehoff
School of Nursing
As you prepare for an exciting career in health care—one of the nation’s fastest-growing fields—you’ll benefit from the Marcella Niehoff School of Nursing’s tradition of excellence as you choose from one of three exciting majors in Nursing, Exercise Science, or Health Systems Management. Founded in 1935, Niehoff School of Nursing was the first baccalaureate nursing program in Illinois and has more than 7,000 alumni nationwide.

In conjunction with Loyola’s Jesuit ideals, we prepare nurses, fitness professionals, and healthcare administrators who are knowledgeable, caring, and competent practitioners, educators, administrators, and researchers in a range of academic undergraduate, graduate, doctoral, and certificate programs.

Leaders in Nursing and Health Studies

Jonathan Winarski is confident that his Loyola Experience will help him stand out professionally.

Class of 2013
Major: Health Systems Management

Oppportunities

Get on the fast track
Research in the Marcella Niehoff School of Nursing will keep you up-to-date in a complex and ever-changing health care world.

Experiences

Your career starts here
Thanks to Loyola’s Chicago location, you will have access to numerous hospitals, health care systems, and health care organizations. Our extensive relationships with the city’s health care providers facilitate numerous professional opportunities and diverse practicum sites.

Programs

Exercise Science

The Exercise Science degree opens the door for a career in the exercise science and health care arena, such as clinical exercise physiology, or a post-baccalaureate program like nursing or physical therapy. You will develop skills in evaluating risk factors, conducting fitness assessments, writing exercise prescriptions, and motivating individuals.

Health Systems Management

The Health Systems Management curriculum explores the structure of health systems, the policy environment and management of health service organizations. The program integrates a variety of core competencies including finance, quality management, information systems, policy, ethics, and leadership.

Nursing

As a Bachelor of Science in Nursing student, you’ll learn the science and skills required for a career in nursing and develop the ability to analyze complex health care situations, make sound clinical decisions, and deliver safe nursing care. You will practice in the Clinical Simulation Learning Laboratory, and complete clinical rotations in the Chicagoland area and finish your degree with a leadership practicum during your senior year.

Accelerated BSN

If you already possess a bachelor’s degree from an accredited university or college, you can acquire a BSN through our Accelerated Bachelor of Science in Nursing (ABSN) program. Once the prerequisites are completed, you will learn critical thinking and nursing skills to become a professional nurse in just 16 months.

RN to BSN (online)

If you have a degree in nursing (ADN) or a nursing diploma and are a licensed RN, you can earn your BSN through our one-year online program. The RN to BSN degree is designed for working professional nurses.

* Qualified BSN and Accelerated BSN students are able to take graduate-level nursing courses in their senior year through the Loyola University Immersion Nursing Program (LUMIN).
