

Graduation Requirements at a Glance – Class of 2023

The following information is provided as you develop your fourth year schedule to ensure that you will satisfy all graduation requirements in effect for the **Class of 2023**. Graduation requirements for your class include successful completion of:

- All Pre-Clerkship courses, including all PCM and TCM courses.
- Required Clerkships, including the third year Medicine, Surgery, Neurology, Family Medicine, Obstetrics & Gynecology, Pediatrics, and Psychiatry and the required fourth year clerkships: Sub-I ICU, Sub-I Wards, Emergency Medicine, as well as PCM-4.
- A minimum of **22 weeks of elective credit**, including a minimum of twelve weeks of *clinical electives* in your fourth year (more specific details regarding elective requirements will be on the following page). ***Participation in a 2-week elective for intern preparedness in the spring semester is highly encouraged.*** (Please note you are limited to four weeks of elective credit from the preclinical years.) Please consult the *Elective Requirements at a Glance* document below and the policies section of the *Elective Course Catalog* for specific details relating to satisfactory completion of your elective requirements.
- You must be enrolled in a minimum of **12 weeks of full-time required and/or elective coursework in your final semester** of your fourth year.
- Two specific Bioethics & Professionalism requirements –
 - A passing grade for the Bioethics Case Paper.
 - Attendance at a minimum of four Ethics Grand Rounds sessions.
- United States Medical Licensing Examination (USMLE) requirements:
 - A **passing** Step 1 score by the end of your third year.
 - A **passing** score for the Step 2 *Clinical Knowledge* exam prior to graduation. You are required to take your Step 2CK exam before January of your fourth year.

PLEASE NOTE: An audit of your progress towards satisfying graduation requirements will be completed in October and in January of your fourth year. You will be sent a copy of the audit results; any deficiencies that must be satisfied for graduation will be noted. Although we conduct this audit as a service to you, **responsibility for satisfying graduation requirements ultimately rests with you.** Your program should be planned in consultation with your advisor to complement your medical education and competency in the various specialty and sub-specialty areas available.

Elective Requirements at a Glance – Class of 2023

There are 30 weeks available in the third and fourth year for electives. You must complete a **minimum of 22 weeks of electives** to fulfill your graduation requirement.

Elective Guidelines:

- 1) During your fourth year, you must complete **at least twelve weeks of clinical electives**. Clinical electives do not include such electives as Quality Improvement, Research, or other online/virtual/didactic only courses (including any “virtual away rotations”). The SSOM’s overarching goal is to ensure that each student graduates as with a well-rounded, solid clinical foundation upon which to begin residency training.
 - For 2022-2023, the following electives are considered clinical electives:
 - Intern 101 (MED-457)
 - Surgical Residency Prep Course (SURG-430)
 - Medical Teaching Elective (MDED-420) (*Part-time Elective*)
 - Teaching in OB/Gyn & Med (MDED-420B) (*Part-time Elective*)
 - Teaching in Surgery & Med (MDED-420C) (*Part-time Elective*)
 - If you need any assistance in interpreting what counts as a clinical vs. non-clinical elective, please contact the Office of Registration & Records.
- 2) ***Before leaving for your extramural rotation, check your schedule on myLUMEN to make sure that you have been scheduled for the rotation.*** This will ensure that you receive credit towards graduation and that a grade evaluation is sent to the extramural school. ***If your extramural is not listed on your schedule, Registration and Records has not received approval for the elective from the extramural school.***
- 3) During your fourth year, you can accrue **no more than 12 weeks** of electives in a **particular specialty area** to count towards your graduation requirements. However, there are a few courses excepted from this specialty cap. These courses in the Department of Medicine do not count towards your 12 weeks cap of Internal Medicine electives allowed:
 - Cardiology Graphics (MED-401A or 405)
 - Intern 101 (MED-457)

Please note that **individually designed electives do count towards the total cap** of specialty electives given credit. However, research electives (RES-401) do not count towards the cap of the particular specialty you are doing research in (i.e. research is considered its own separate “specialty” category). If you are uncertain about a specific elective and how it will apply to your cap, do not hesitate to inquire in our office.

4) **Clinical specialty areas** include, but are not necessarily limited to, the following:

Allergy and Immunology	Otolaryngology
Anesthesiology	Pain Medicine
Colon and Rectal Surgery	Pathology-Anatomic and Clinical
Dermatology	Pediatrics
Emergency Medicine	Physical Medicine and Rehabilitation
Family Medicine	Plastic Surgery
Internal Medicine	Preventive Medicine
Medical Genetics	Psychiatry
Neurological Surgery	Radiation Oncology
Neurology	Radiology-Diagnostic
Nuclear Medicine	Sleep Medicine
Obstetrics and Gynecology	Surgery-General
Ophthalmology	Thoracic Surgery
Orthopaedic Surgery	Urology

- 5) Normally, credit will not be granted for full-time electives that are less than 2 weeks in length, or for "split" electives (electives interrupted by Discretionary Time, another elective, etc.) without prior written approval from the elective supervisor and the ORR.
- 6) If you wish to complete an **individually designed elective** (i.e. an elective not listed in the course catalog), you must submit a written proposal signed by the supervising physician to the ORR as your elective application. The educational deans in charge of elective curriculum will review and approve or deny all individually designed elective proposals. Please see [Section P](#) of the Elective Course Catalog policies for details on constructing an individually designed elective experience.
- 7) **International experiences** are awarded elective credit only if they are electives sponsored by Loyola (intramural) or by another LCME-accredited medical school (extramural). Inquiries regarding specific programs may be directed to the Center for Community & Global Health (ccgh@luc.edu).
- 8) You must submit an online **Discretionary Time request** (on myLumen, under the same menu as elective registration) for any week or weeks that you are not enrolled in a **full-time** elective or required clerkship.
- 9) Students are allowed to apply a maximum of four weeks of part-time elective credit from M1 and M2 years (combined) to fulfill elective requirements. Students are also limited to a maximum of four weeks of part-time elective credit from M3 and M4 year (combined) to apply towards graduation requirement totals. Thus, the maximum part-time elective credit allowed is eight weeks (up to four weeks from M1/M2 years and up to four weeks from M3/M4 years).
