Preparing people to lead extraordinary lives

PRE-PROFESSIONAL PROGRAMS

Are you thinking about becoming a doctor, a lawyer, or an engineer?

At Loyola, we have a number of academic programs offered at the undergraduate level to prepare you for your professional career. Our pre-professional programs include pre-health and pre-law. In addition to Loyola's Engineering Science degrees, we also offer a dual degree program in Engineering with partner universities.

PROGRAMS

PRE-HEALTH ADVISING

LUC.edu/prehealth

Loyola offers an extensive professional advising program for students interested in pursuing health professional careers. If you're considering a health profession, Pre-Health Advising within the Career Development Center can help guide you on your quest. Some of the services available to you include one-on-one per-health professional advising; a variety of workshops to help prepare you for health professional school interviews and application processes; and access to the Pre-Health Newsletter and Pre-Health Professions Committee process, if eligible. The Committee is comprised of advising staff, Loyola faculty, and other staff members providing a series of workshops and advising to help guide you as you prepare to apply to professional schools.

DUAL-ACCEPTANCE PHARMACY (DAP) PROGRAM

Loyola and the Chicago College of Pharmacy of Midwestern University offer incoming freshmen an opportunity to assure themselves a spot in a professional pharmacy program. Once accepted to both programs, students will complete two years of prerequisites at Loyola, then matriculate to the Chicago College of Pharmacy to begin the four-year Doctor of Pharmacy program.

PRE-HEALTH AWARD

Loyola University of Chicago grants up to five Pre-Health Awards each academic year to currently enrolled, full-time students. These awards are competitive in nature, based upon academic, co-curricular, experiential, and clinical achievements. Juniors and Seniors are eligible to apply for these awards.

LUC MENTORS

LUC Mentors is a program committed to helping undergraduate students explore the path to becoming a physician through one of three different mentoring programs, led by the 1st-4th year medical students at Loyola's Stritch School of Medicine.

PRE-LAW

LUC.edu/prelaw

Extensive advising is also available for Pre-Law students. Advisors host information sessions and on-campus programming as well as provide one-on-one advising. You can also participate in a Pre-Law internship in and around Chicago. In doing so, you'll earn course credit and gain real-world experience at law firms, government agencies, and nonprofits.

Loyola permits a limited number of well-qualified students to enter the School of Law after completing their junior year. In recent years, the average Law School Admission Test scores and acceptance rates of Loyola Seniors into law school have remained well above the national average. Our students have been admitted to more than 150 law schools, with a sizable number securing admission into many of the "Best Law Schools," including 21 of the Top 25 institutions as ranked by *U.S. News and World Report*.

DUAL-DEGREE ENGINEERING

LUC.edu/physics

Loyola's BS in Engineering Science allows students a chance to specialize in Biomedical, Computer or Environmental Engineering. For students interested in another engineering specialization we recommend the Dual-Degree Engineering program. In this unique program, you will earn two baccalaureate degrees: a Bachelor of Science in Physics from Loyola and a Bachelor of Science in Engineering from an affiliated engineering school. Typically, three years of study in the social sciences, humanities, mathematics, and physical sciences here are encouraged, followed by two years of concentrated engineering studies at the school of engineering.

In the recent past, students have gone to University of Illinois Urbana Champaign, University of Illinois at Chicago, Washington University in St. Louis, Northwestern University, University of Michigan, Columbia University, and Iowa State University to complete their engineering studies.
